ROAD MAINTENANCE MANUALS
TRAINING CURRICULUM

**REF: ROAD MAINTENANCE
MANUALS TRAINING**

INTRODUCTION:

Please find attached the following documents as per your letter Ref. KIHBT/CON/11/VOL. 1X/129.

a. The curriculum

The training curriculum is tailored for a two weeks training on the usage of the three manuals developed by the JICA study team in conjunction with other stake holders involved in Road maintenance in Kenya.

In order for KTC to reach as many people involved in road maintenance within the shortest time possible it is proposed that these trainings be conducted in respective provinces as per the attached provincial ranking.

b. Training programme

This contains an overall schedule of all courses to be handled by KTC for the financial year 2002-2003.

Please note the emphasis on the Kenya Road Board courses that have been grouped into two categories:

- (i) Usage of the manuals.
- (ii) Tailor made courses as per KTC Training needs assessments.

c. Training budget

This is the overall training budget for the implementation of the three road maintenance manuals.

APPROXIMATE TIME TABLE

Introduction of course participants and instructors documentation, course opening and course introduction.	6 HOURS
Presentation of course content	49 HOURS
Summary and evaluation of course	5 HOURS
TOTAL HOURS	60 HOURS
