#### 2-2-4-7 Software Component

Since the related personnel at the Project schools lack sufficient knowledge for correct facility use and maintenance methods, proper maintenance activities have not been implemented. Considering this situation, the Project will introduce a software component in order that each Project school will utilize Project facilities in an effective and sustainable way. Targeting members of the school management committees at the Project schools, the following activities will be implemented: 1) workshops will be held to analyze current situations and problems regarding maintenance activities at each schools and to raise awareness among participants; 2) guidelines will be produced for the effective use and maintenance of facilities; and 3) proper training and related activities regarding the use of these guidelines will be provided. (See Appendix A for details).

#### 2-2-4-8 Implementation Schedule

Project implementation, which is within the framework of Japan's Grant Aid System, will become effective after the demarcation of work and other necessary procedures have been completed by the Government of Japan and the Government of Vietnam. The Project will commence following the signing of the E/N by the two countries. After the signing, the Project will be implemented in 4 steps for each stage: (1) Detailed Design, (2) Tender, (3) Procurement of materials, and (4) Construction. Approximately 12 months are required for each stage of the Project.

#### (1) Detailed Design

After the approval of the consultant agreement, the consultants will prepare the tender documents based on the Basic Design, consulting with the representatives of MOET to decide on and set up the various specifications including the construction budget and management system. The specific demarcations of the work between the Vietnam and Japan sides must be cleared at the beginning of the detailed design process and according to the policies of the E/N and Japan's grant aid system. Once these items are completed, work on the Detailed Design will commence. The Detailed Design will take approximately three months per stage of the Project.

#### (2) Tender

The tender period includes announcement, qualification examination of companies, opening of the tender, tender results evaluation and the construction contract. The methods for determining the type of contract between the client (MOET) and the construction company, and the tender shall be decided in advance of the tender period through sufficient consultation. Approximately three months are required to complete all of the tender processes.

#### (3) Procurement of Construction Materials and Equipment

Following the signing of the construction contract, preparation of shop drawings should be started immediately. Procurement of materials and equipment will start after the approval of the shop drawings. The delivery of the first equipment can be expected to arrive at the site about one month after the conclusion of the contract.

## (4) Construction

After the signing of the contract, the Project sites shall be divided into groups and the determination of when each group will start its building construction and in what order shall be decided. Since two story buildings need a longer construction period, they should be included in the first group as much as possible. It takes about one month of preparation time after signing the contract before excavation of the ground can start. After completion of the building construction it will take one month for delivery of furniture and equipment to transfer to the sites and for the final inspection to take place by the consultant. It will take 12 months for each construction stage. The Project schedule is shown in Table 2-13.

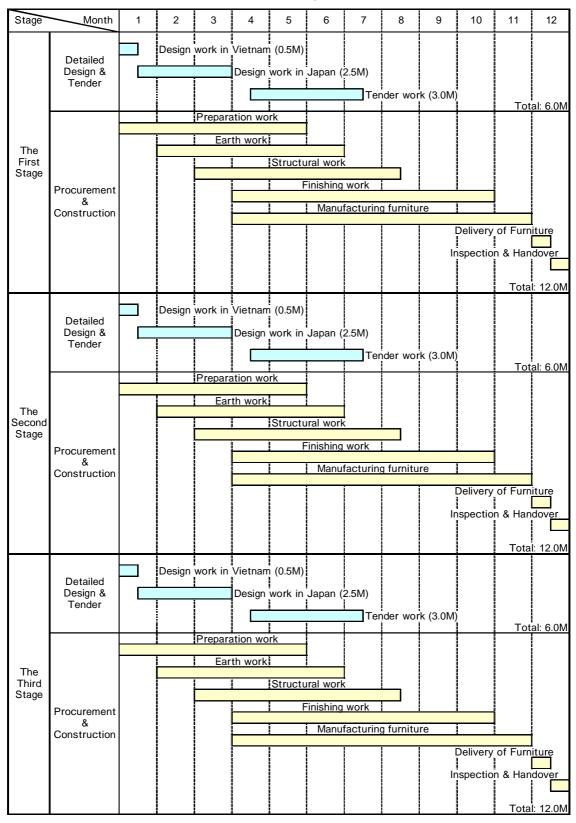

Table 2-13The Project Schedule

# 2-3 Obligations of Recipient Country

The purpose of Japanese Grant Aid is to provide financial assistance for countries making their own self-effort for development. As a basic principle, the Government of Japan requests recipient countries to share obligations of the Project, and this principle applies equally to any recipient country in the world.

Once the Government of Japan decides to provide Grant Aid for the implementation of the Project, the Government of Vietnam will undertake the following obligations:

- (1) Provide the Japanese side with information and data pertinent to the Project:
- (2) Prepare necessary land for the Project and obtain rights for MOET to construct the Project facilities:
- (3) Secure the land; remove existing objects and trees, make access roads, clear or reclaim land prior to the start of construction.
  - 1) Retaining wall construction
    - TQ-10s Xuan Quang (Sub-School)
  - 2) Large scale cutting, filling and reclamation of the land
    - BG-5 My Ha
    - BG-15 Kien Lao
    - BG-18 Dong Viet
    - TQ-2 Vinh Loc
    - TQ-6 Phan Thiet
    - TQ-7 Thai Binh
  - 3) Demolition of all concerned existing buildings in the proposed construction site
    - BG-1 An Chau
    - BG-2s Phi Dien(Sub-School)
    - BG-5 My Ha
    - BG-8s Dong Lo2(Sub-School)
    - BG-11 Ngoc Thien1
    - BG-13 Yen Son
    - BG-15 Kien Lao
    - BG-16 Hop Thinh
    - TN-2 Trung Hoi
    - TN-3 Nam Hoa1
    - TN-10 Bao Cuong
    - TN-17 Binh Thanh

- TQ-2 Vinh Loc
- TQ-5s Thuong Am (Sub-School)
- TQ-6 Phan Thiet
- TQ-10s Xuan Quang (Sub-School)
- TQ-14 Phuc Thinh
- TQ-17s Dang Chau (Sub-School)
- PT-4T ieu Son
- PT-10 Dong Xuan
- PT-20 Ha Thach
- 4) Demolition of existing building foundations, concrete structures, pavement,
  - other structures etc.
    - BG-11 Ngoc Thien1 (Removal of fences)
    - BG-17 Thanh Lam
- 5) Demolition and removal of existing trees, school gardens etc. which affect the construction works
  - BG-5 My Ha
  - BG-11 Ngoc Thien
  - BG-13 Yen Son
  - BG-18 Dong Viet
  - TN-3 Nam Hoa1
  - TN-4 Thi Tran Du
  - TQ-7 Thai Binh
  - PT-6 Van Lung
  - PT-16 Thanh Van
  - PT-20 Ha Thach
- 6) Others (Construction of access road etc.)
  - BG-5 My Ha(Removal of the road)
  - BG-8 Dong Lo2 (Construction of access road)
  - BG-8s Dong Lo2 (Sub-School)(Removal of electric pole)
  - TQ-17s Dang Chau (Sub-School) (Expansion of the road)
- (4) To connect the electric power up to integrating wattmeter, and to provide and connect the water source to the toilet cistern tank before completion of construction. And to provide of all necessary electric water pumps to the sites.
- (5) Undertake landscaping, construction of boundary walls, and other incidental outdoor work, if necessary

- (6) Secure teachers and administrative staff members; as well as a sufficient amount of funds necessary for operating and maintaining completed Project facilities; including equipment that are to be procured by the grant aid.
- (7) Bear commissions and/or fees for banking services based on the banking arrangement.
- (8) Ensure the expeditious unloading and prompt inland transportation of Project materials and equipment purchased by grant aid. Also, ensure all grant aid materials are exempt from taxes, customs clearance fees at the port of disembarkation.
- (9) Exempt all Japanese companies engaged in the Project from customs duties, domestic taxes, and other levies in Vietnam that may be imposed on products and services which come under the verified contracts. Especially, to allocate necessary budget for Value Added Taxes in advance to pay the equivalent amount for all Japanese juridical and physical nationals engaged in the Project.
- (10) Provide every convenience to all Japanese nationals engaged in the Project when b they enter into or stay in Vietnam to perform work which comes under the verified contracts.
- (11) Give permission, approval, and other authorization that may be necessary for the b project implementation.
- (12) Adequately and effectively use and maintain the Project facilities under the responsibility of MOET.
- (13) Bear all costs necessary for the implementation of the Project, including costs for land preparation, access road construction, infrastructure line connection, and other incidental work, but excluding those cost that are to be borne by the Japanese side.
- (14) Provide expeditious assistance, decisions, and judgment whenever requested by consultants for smooth project implementation.

## 2-4 Project Operation and Maintenance Plan

#### (1) Personnel Plan

In Vietnam, there is a system for assigning one teacher to one class. In the case of double-shift, different teachers are assigned each for the morning classes and the afternoon classes. Thus, even if new classrooms are constructed by the Project to conduct the full day schooling, there will be no need to assign new teachers. For this reason, it is considered that measures for assigning teachers to new classrooms would not be required.

#### (2) Maintenance Plan

School facilities' operation and maintenance activities at each school are conducted by the school management committee that are organized by the principal, vice principal, representative of teachers, parents of students and area residents under the supervision of BOET. As for actual repair and maintenance work, simple work, such as gardening, repair of desks and chairs and painting walls, is carried out either by volunteers recruited by the school management committee or outside contractors. Relatively large-scale work, such as replacement of roof trusses and floor replacement, is financed by the school-facility operation maintenance funds that are reserved by the People's Committee. The reserved funds are originally collected as school operation and maintenance fees from the parents of students. The amount of the fee is in the range of 30,000 to 80,000 VND per student in a year (approximately 240 to 650yen). As for the cleaning of school facilities, students and teachers conduct cleaning work at many Project schools. However, in urban areas there are some schools that farm out cleaning work to outside contractors.

As mentioned above, school facility operation and maintenance systems are already established at most Project schools. Thus, there will be no need to establish a new organization for facility operation and maintenance after completing Project facilities. However, through site surveys, the Study Team learned that the existing facilities at Project schools were not necessarily operated and maintained adequately and that the operation and maintenance methods were not necessarily suitable. For this reason, it is recommended to introduce software components for the purpose of raising the awareness of the members of the school management committee and conducting appropriate school facility maintenance work by teaching suitable methods.

# 2-5 Project Cost Estimation

# 2-5-1 Project Cost

The total amount of the project cost needed for implementing the Grant Aid Project is approximately 1.367 Billion Japanese Yen. According to the conditions of the cost estimate shown below in section (3), the previously mentioned details of expenses based on the respective shares borne by Japan and Vietnam are calculated as below. However, the following estimated project cost may not be considered the final Grant Aid project cost as that is limited based on the Exchange of Notes. The cost estimate is provisional and will be further examined by the Government of Japan for final approval of the Grant.

## (1) Expense borne by the Japanese side

Approx. 1,360.21 Million Japanese Yen

Item		Rough Project Expenses ( Million Japanese Yen )		
	Classroom Building	302.32		
Facility	Toilet Building	96.13	433.91	
	Furniture	35.46		
Detail Design / Const. Supervision / Technical Training			74.58	

Bac Giang Province :16 Schools, 158 Classrooms (Total Floor Area 8,804.89 m<sup>2</sup>)

Rough Project Expenses (Subtotal) Approx. 508.49 M.J.Y.

Item		Rough Project Expenses ( Million Japanese Yen )	
Facility	Classroom Building Toilet Building	219.99 74.01	320.87
	Furniture	26.87	
Detail Design / Const. Supervision / Technical Training			61.67

Rough Project Expenses (Subtotal) Approx. 382.54 M.J.Y.

Item		Rough Project Expenses ( Million Japanese Yen )	
	Classroom Building	112.21	
Facility	Toilet Building	43.72	168.95
	Furniture	13.02	
Detail Design / Const. Supervision / Technical Training			24.88

Tuyen Quang Province: 9 Schools, 54 Classrooms (Total Floor Area 3,037.30 m<sup>2</sup>)

Rough Project Expenses (Subtotal) Approx. 193.83 M.J.Y.

Phu Tho Province: 9 Schools, 86 Classrooms (Total Floor Area 5,039.45 m<sup>2</sup>)

Item		Rough Project Expenses ( Million Japanese Yen )	
	Classroom Building	165.43	
Facility	Toilet Building	47.88	234.05
	Furniture	20.74	
Detail Design / Const. Supervision / Technical Training			41.30

Rough Project Expenses (Subtotal) Approx. 275.35 M.J.Y.

#### (2) Expense borne by the Vietnamese side:

#### 858.9 Million VND (approx. 6.84 million Japanese yen).

Construction of shoring and retaining wall	622.0 Million VND	4.95 M.J.Y
Cutting, filling and reclamation of land	85.5 Million VND	0.68 M.J.Y.
Demolition of all concerned existing buildings	9.6 Million VND	0.08 M.J.Y
in the proposed construction site		
Removal of existing obstacles, such as	1.5 Million VND	0.01 M.J.Y.
foundations, concrete structures, pavement,		
and others		
Demolition and removal of existing trees	0.5 Million VND	0.01 M.J.Y
Electrical Connection Work	112.0 Million VND	0.89 M.J.Y.
Supply Water Connection Work	27.8 Million VND	0.22 M.J.Y
Total	858.9 Million VND	<u>6.84 M.J.Y.</u>

The Vietnam side works and costs calculated are shown in the list. The fiscal year in Vietnam is from January to December, and the necessary budgets will be made by the Planning and Finance Department of MOET.

# (3) Condition of Cost Estimate

Period of cost estimate	September, 2002
Currency Exchange Rate	1 US\$=122.08 Japanese Yen
	1 US\$=15327.57 VND
	1 VND=0.00796 Japanese Yen
Period of Execution	The Project design work and construction will be
	implemented in three phases. The time periods for
	work in each phase, the detailed designs,
	construction and procurement, are shown in the
	Project Implementation Schedule.
Others	This Project shall be carried out under the system of
	the Grant Aid of the Japanese government.

# 2-5-2 Operation and Maintenance Costs

After the Project implementation, additional operation and maintenance costs would be necessary.

# (1) Operating Costs

Operating costs (personnel expenses, electric fees and water fees) will be estimated as follows.

1) Personnel Expenses

As stated earlier, the additional employment would not be necessary.

2) Electric Fees, Water Fees and Sewage Disposal Costs

a) Electric Fees

There are 45 schools now being connected to electric facilities. Total number of classrooms in these schools is 394 and total numbers of principal's rooms and teaching aid rooms is 40. The electrical related equipment in this Project covers lighting systems, wall outlets and fans. The length of usage depends on climate. Average electric consumption per classroom will be estimated 723 kwh and principal's room and teaching aid room will be estimated 921 kwh each. Total consumption will be estimated 321,702 kwh and the total fees would be estimated

418,212,600 VND (approximately 3.33 million JPY). In this Project, water supply pumps will be provided by the Vietnamese side if necessary, therefore, electric fees related to water supply pump usage will be added to the above mentioned figure.

	Classrooms		Principal's and Teaching aid rooms		Total	Total costs	
	number	consumption (kwh)	number	consumption (kwh)	Consumption (kwh)	(VND)	(million JPY)
Bac Giang Province	158	114,234	7	6,447	120,681	156,885,300	1.25
Thai Nguyen Province	106	76,638	20	18,420	95,058	123,575,400	0.98
Tuyen Quang Province	44	31,812	5	4,605	36,417	47,342,100	0.38
Phu Tho Province	86	62,178	8	7,368	69,546	90,409,800	0.72
Total	394	284,862	40	36,840	321,702	418,212,600	3.33

Table 2-14 Electric usage amount and fee for each province (per year)

#### b) Water Fees

Schools that connect to the public water supply system will have to pay additional water fees. Five schools (54 classrooms / 1,890 students) are now being connected to the public water supply system. Estimated from the amount of water used by a student and present water fee, additional fee after the Project implementation would be 1,020t × 6,500 VND/t = 6,630,000 VND (approximately 50,000JPY).

Water Water Fee Consumption (VND) (JPY) (t) Bac Giang Province 0 0 Thai Nguyen Province 265 1,722,500 13.000 Tuyen Quang Province 320 2,080,000 17.000 Phu Tho Province 435 2,827,500 Total 1020 6,630,000 53,000

Table 2-15 Water fee for each province (per year)

c) Sewage Disposal

There are no Project schools that will connect to the public sewage disposal system, so no additional fee for the sewage disposal cost shall be considered.

## (2) Maintenance Costs

Maintenances costs can be divided into a) periodic expenses such as painting costs and b) irregular expenses such as minor maintenance (repairing of jalousie windows and doors). In general, maintenance fees are estimated at 0.6 to 1.4 % per year of the entire

construction costs. In this Project, maintenance cost is estimated as 0.6% per year, as all the Project buildings simply require easy maintenance work.

119,000,000 VND × 0.6% / year = Approx. 714,000,000 VND / year (Approx. 5.7 million JPY)

# (3) Total Operation and Maintenance Costs

Operation and Maintenance Costs are estimated according to the management costs of each province with regard to MOET primary education policy for the 2002 academic year, and shown in table 2-16. After-Project maintenance cost increases are calculated to be approximately 0.2 to 2.0% a year, which is considered reasonable and reliable for future budget considerations.

Table 2-16 Operation Budget for Primary Education in each Projected Province and	
Estimated Increase in Operation Cost by the Project	

	Budget for Primary	Estimated Increase by	Increase
	Education in Year 2002	the Project	Ratio
	( Million VND )	( Million VND )	
Bac Giang Province	105,050 ( Approx.860M.J.Y. )	407 ( Approx.2.5M.J.Y. )	0.4%
Thai Nguyen Province	78,378 ( Approx.640M.J.Y. )	325 ( Approx.2.0M.J.Y. )	0.4%
Tuyen Quang Province	9,892 ( Approx.80M.J.Y. )	200 ( Approx.1.2M.J.Y. )	2.0%
Phu Tho Province	93,680 ( Approx.760M.J.Y. )	203 ( Approx.1.3M.J.Y. )	0.2%
Total	287,000( Approx.2340M.J.Y. )	1,135 ( Approx.7.0M.J.Y. )	0.4%

Chapter 3 Project Evaluation and Recommendations

# Chapter 3 Project Evaluation and Recommendations

#### 3-1 Effect of the Project

#### (1) Direct Effects

Improvement of the Study Environment

Through construction of the 404 classrooms by the Project, the existing decrepit and temporary classroom buildings, which are approximately 20% of all the classrooms, will be replaced and the Project schools will be provided with the capacity to hold a larger number of students. With the reduction of the classroom population from 107.4 students to 34.2 students per room<sup>1</sup>, the learning environment of the classrooms will be better. The Project will also provide a principal's room and a teaching aid room for schools which do not have them. Thus, the Project schools will have a better learning and teaching environment.

#### Implementation of the Full-Day School Program

Because of the improvement of classroom shortages through the implementation of the Project, the schools, which are now forced to operate under a double-shift program, will be able to change their operation to a full-day school program. Therefore, the ratio<sup>2</sup> of classrooms capable of implementing the full-day school program will be increased from 31.75% to 99.2 %.

Improvement of the Sanitary Environment

The Project will provide well-equipped toilet facilities with the number and sizes based on the number of classrooms to be built. Thus, the shortage of toilet facilities as well as the general sanitary environment shall be markedly improved.

Acquiring Skills and Knowledge for Proper Facility Maintenance and Management By introducing the Software Component, each Project school will understand the importance of the proper maintenance of facilities and acquire the basic skills and knowledge for such maintenance. Furthermore, the appropriate implementation of the maintenance activities enables sustainable use of the existing facilities as well as the

<sup>&</sup>lt;sup>1</sup> Number of Students per Classroom = Total Number of Students divided by Number of Usable Classrooms

 $<sup>^2~</sup>$  Classroom Ratio capable for the Full-Day School Program: Total Number of Classrooms divided by Appropriate Number of Class

Project facilities, decreasing the maintenance cost in the long run.

#### (2) Indirect Effect

Use of the Facilities by the Community

The Project facilities will be used not only for primary education but also for social educational activities such as adult education or literacy education, as well as for non-educational purposes such as community activities. In this ways, the Project facilities will greatly contribute to the surrounding communities.

## **3-2 Recommendations**

In conclusion, the Project is highly expected to bring many positive benefits as mentioned as well as to contribute to the improvement of Basic Human Needs of the society; thus, the implementation of the Project through the Japanese grant aid scheme is deemed worthy and meaningful. If the items mentioned below are improved, this Project will be implemented more smoothly, and thus more effectively contribute to improving the general educational environment.

Approach to the Full-Day school Program

The current level of student attendance in the primary schools is quite high in Vietnam. However, after the adoption of the full-day school program, which will take a large amount of the students' time, make many students in the farming villages and lower income families may encounter difficulty in school attendance. This causes serious concern as it might widen education-opportunity gap between the social classes. Thus, in order to prevent such problems from happening, the Vietnamese side is well advised to effectively eliminate any possible negative effect which the implementation of the full-day school program might cause.

In order to smoothly introduce and fully establish the acceptance of the new full-day school system in the schools, it is necessary to secure a sufficient number of teachers and to obtain the understanding from students, parents and the community about the purpose and goals of the full-day school program system as well as working on the facility shortage problem. To increase the number of subject teachers for the new subjects, the Vietnamese government needs to provide the pre-service training of subject teachers for these new subjects and to support the conversion from current teachers teaching all the subjects to subject teachers. Furthermore, at the provincial and school level, careful preparation is required such as examination of the new school operation system and conduct of the campaign for all the related people.

#### Implementation of Proper Maintenance Activities

Currently, school maintenance activities are not being carried out in an effective or systematic way, and also, proper preventative maintenance procedures for building facilities are not being implemented in any periodic fashion. When any problems arise, it seems that only temporary measures are taken to solve them. However, for the continuous and permanent use of both the existing and Project school facilities, it is absolutely essential that these kinds of activities be performed appropriately. In order to achieve and support such activities, the schools need to be well organized, the partnerships between the schools and their surrounding communities need to be promoted, and the awareness of all the related people needs to be raised.

#### Concern Regarding the School Construction Done by Vietnam

Several efforts to construct classrooms and improve classroom shortages are being made by the local people in conjunction with the People's Committees. In order for the Vietnamese side to best implement all work done for facility improvement on its own, an accurate forecast and analysis needs to be made in regards to the number of students attending school in the future. Moreover, the country of Vietnam needs to recognize and to fully acknowledge such voluntary effort by the local people and their communities as well as the close communication with Bureau of Education and Training and Department of Education and Training. In summary, the Vietnamese side need pay more attention to maintaining a high level of coordination of any and all school development projects that donors may bring, including this Project. Appendices

# The Basic Design Study on the Project for Improvement of Facilities of Primary Schools in the Northern Mountain Region (Phase2)

#### in

#### The Socialist Republic of Vietnam

In response to a request from the Government of the Socialist Republic of Vietnam (hereinafter referred to as "Vietnam"), the Government of Japan has decided to conduct a Basic Design Study on the Project for Improvement of Facilities of Primary Schools in the Northern Mountain Region (Phase2) (hereinafter referred to as "the Project"), and entrusted the study to Japan International Cooperation Agency (JICA).

JICA sent to Vietnam the Basic Design Study Mission (hereinafter referred to as "the Mission") headed by Mr. Masaaki Matsushima, Director, First Project Management Division, Grant Aid Management Department, JICA, and is scheduled to stay in the country from 4 August to 17 September 2002.

The Mission held a series of discussions on the Project with the officials concerned with the Ministry of Education and Training. The discussions were followed up with a field survey of the study areas.

In the course of discussions and field survey, both parties confirmed the main items described on the attached sheets. The Mission will proceed to further work and prepare the Basic Design Study Report.

b E

Mr. Masaaki Matsushima Leader Basic Design Study Mission Japan International Cooperation Agency

Hanoi, 12 August 2002

Mr. Tran Ba Viet Dzung Director General International Relations Department Ministry of Education and Training The Socialist Republic of Vietnam

With the witness of

Dr. Duong Duc Ung Director General Foreign Economic Relations Department Ministry of Planning and Investment

## ATTACHMENT

#### **1.** Objective of the Project

The objective of the Project is to improve the educational environment of basic schools in 4 northern provinces (Bac Giang, Thai Nguyen, Tuyen Quang, Phu Tho) through reconstruction and expansion of school buildings and provision of educational equipment.

#### 2.Project Areas

The Project areas are Bac Giang, Thai Nguyen, Tuyen Quang and Phu Tho provinces.

#### **3.**Responsible and Implementing Organization

The Ministry of Education and Training will take overall responsibility of the project. The implementing organizations are the International Relations Department, Planning and Finance Department and Primary Education Department. The PMU (Project Management Unit), of the Support Program for Primary Education Development will act as the coordinator.

#### 4. Items requested by the Government of Vietnam

After a series of discussions with the Mission, the Vietnamese side requested the items described in ANNEX-1, ANNEX-2 and ANNEX-3. JICA will assess the appropriateness of the request and will recommend to the Government of Japan for approval.

#### 5. Japan's Grant Aid Scheme

- 5-1. The Vietnamese side understood the Japan's Grant Aid Scheme explained by the Mission, as described in Annex-5.
- 5-2. The Vietnamese side will take the necessary measures, described in Annex-6 for the smooth implementation of the Project on condition that the Japan's grant aid is extended to the Project.

#### 6. Schedule of the Study

- 6-1. The consultant mission will proceed to further studies in Vietnam until 17 September 2002.
- 6-2. JICA will prepare a Draft Report in English and dispatch a mission to explain the outline of the Basic Design approximately in and around December 2002.
- 6-3. Based on the discussion on the draft report with Vietnamese side, JICA will

of 1/4 ph

complete the final report and send it to the Government of Vietnam approximately by the end of March 2003.

#### 7. Other Relevant Items

#### 7-1. Number of schools and classrooms

The Vietnamese side understood that the total number of requested schools and classrooms for the implementation of the Project would not be fully covered by the project according to the assessment of each school. Both sides agreed that the field survey of the candidate sub schools is conducted in only one sub school for each commune.

#### 7-2. Selection criteria of the Project sites

Both sides agreed the Project sites were to be examined according to the selection criteria as listed in Annex-4.

#### 7-3.Land for the Project

The Japanese side requested the Vietnamese side to submit the certificate to guarantee the usage of the land for each project site by the end of November 2002, and the Vietnamese side agreed on it.

# 7-4. Demolishing work and temporary classrooms

The Vietnamese side agreed to demolish the existing facilities and prepare temporary classrooms during the period of construction in case of reconstruction.

#### 7-5. Soil boring Test

Both sides agreed that the Vietnamese side provides the soil boring test reports on the sites where defined as necessary. The sites to be tested are decided by the Japanese side, and will be submitted in the list through official channel by the middle of November 2002. The Vietnamese side agreed to submit the test reports by the end of January 2003.

## 7-6. Operation and maintenance

The Vietnamese side agreed to allocate necessary budget for teaching and administrative staff members for the proper and effective operation and maintenance of facilities and equipment covered by the Project.  $\frac{1}{\sqrt{2}}$ 

AP-10

#### 7-7. Official appraisal and approval

The Vietnamese side will secure the official appraisal and approval by the Government of Vietnam required for the implementation of the Project.

#### 7-8. Waste Treatment facilities

The Vietnamese side requested to add waste treatment facilities to the list of major components requested for the projects (ANNEX-2). Both sides agreed that the provision of waste treatment facilities must be considered in the perspective of necessity, efficiency and the cost in the course of the field study.

# 7-9. New Curriculum

The Annex-3 (List of Requested Educational Equipment for Each School) is based on the existing curriculum. Since the Vietnamese side is now preparing the new curriculum for the coming school year, the Vietnamese side agreed to provide the revised list of the requested educational equipment to the Japanese consultant by 13 September 2002. // D

#### Annex-4 Criteria for the Site Selection

# Schools/sites satisfying the following criteria will be given priority:

- 1. Urgently needs the rehabilitation because of over aging and /or damage of the existing buildings.
- 2. Urgently needs the construction of additional classrooms due to overcrowding.
- 3. Incomplete schools which are not provided with higher grade classes and are distant from the complete schools.

# Schools / sites to be selected must fulfill the following criteria:

- 4. The present and future demand for primary education facilities is quantitatively estimated by a set of data such as the number of school-aged children, the rates of population growth, enrollment ratio, completion rates, etc.
- 5. No other program or plan for new/undergoing classroom construction by the Ministry of Education and Training, local government, other donors, NGOs and so forth.
- 6. Access road for the movement of materials and for the construction works is properly constructed.
- 7. The ownership of land for construction is legally secured.
- 8. No constraints against construction such as occupation of out-of-law houses.
- 9. Topographically safe and appropriate-sized for construction.
- 10. No foreseen natural and environmental or social hazard.

11. Sufficient teachers, budget allocation, and necessary cooperation from concerned people for the proper operation and maintenance of the facilities are secured.  $\mu/\mu$ 

CA A

#### Annex-5 The Japan's Grant Aid Scheme

The Grant Aid Program provides a recipient country with non-reimbursable funds to procure the facilities, equipment and services (engineering services and transportation of the products, etc.) for economic and social development of the country under principles in accordance with the relevant laws and regulations of Japan. Grant Aid is not supplied through the donation of materials as such.

#### (1) Grant Aid Procedure

1) Japan's Grant Aid Program is executed through the following procedures. Application (Request made by a recipient country) Study (Basic Design Study conducted by JICA) Appraisal & Approval

> (Appraisal by the Government of Japan and Approval by Cabinet) Determination of Implementation

(The Notes exchanged between the Governments of Japan and the recipient country)

2) Firstly, the application or request for a Grant Aid project submitted by a recipient country is examined by the Government of Japan (Ministry of Foreign Affairs) to determine whether or not it is eligible for Grant Aid. If the request is deemed appropriate, the Government of Japan assigns JICA to conduct a study on the request. If necessary, JICA send a Preliminary Study Mission to the recipient country to confirm the contents of the request.

Secondly, JICA conducts the study (Basic Design Study), using Japanese consulting firms.

Thirdly, the Government of Japan appraises the project to see whether or not it is suitable for Japan's Grant Aid Programme, based on the Basic Design Study report prepared by JICA, and the results are then submitted to the Cabinet for approval.

Fourthly, the project, once approved by the Cabinet, becomes official with the Exchange of Notes signed by the Governments of Japan and the recipient country.

Finally, for the implementation of the project, JICA assists the recipient country in such matters as preparing tenders, contracts and so on.

#### (2) Basic Design Study

1) Contents of the Study

The aim of the Basic Design Study (hereinafter referred to as "the Study"), conducted by JICA on a requested project (hereinafter referred to as "the Project"), is to provide a basic document necessary for the appraisal of the Project by the Government of Japan. The contents of the Study are as follows:

- a) confirmation of the background, objectives and benefits of the Project and also institutional capacity of agencies concerned of the recipient country necessary for the Project's implementation;
- b) evaluation of the appropriateness of the Project to be implemented under the Grant Aid Scheme from the technical, social and economic points of view;
- c) confirmation of items agreed on by both parties concerning the basic concept of the Project;
- d) preparation of a basic design of the Project; and

e) estimation of costs of the Project.

The contents of the original request are not necessarily approved in their initial form as the contents of the Grant Aid project. The Basic Design of the Project is confirmed considering the guidelines of Japan's Grant Aid Scheme. 1/1/1

The Government of Japan requests the Government of the recipient country to take whatever measures are necessary to ensure its self-reliance in the implementation of the Project. Such measures must be guaranteed even through they may fall outside of the jurisdiction of the organization in the recipient country actually implementing the Project. Therefore, the implementation of the Project is confirmed by all relevant organizations of the recipient country through the Minutes of Discussions.

#### 2) Selection of Consultants

For the smooth implementation of the Study, JICA uses a consulting firm selected through its own procedure (competitive proposal). The selected firm participates in the Study and prepares for a report based upon the terms of reference set by JICA.

At the beginning of implementation after the Exchange of Notes, for the services of the Detailed Design and Construction Supervision of the Project, JICA recommends the same consulting firm which participated in the Study to the recipient country in order to maintain the technical consistency.

#### (3) Japan's Grant Aid Scheme

1) Exchange of Notes (E/N)

Japan's Grant Aid is extended in accordance with the Notes exchanged by the two Governments concerned, in which the objectives of the project, period of execution, conditions and amount of the Grant Aid, etc., are confirmed.

2) "The period of the Grant" means the one fiscal year which the Cabinet approves the project for. Within the fiscal year, all procedure such as exchanging of the Notes, concluding contracts with consulting firms and contractors and final payment to them must be completed.

However, in case of delays in delivery, installation or construction due to unforeseen factors such as weather, the period of the Grant Aid can be further extended for a maximum of one fiscal year at most by mutual agreement between the two Governments.

3) Under the Grant, in principle, Japanese products and services including transport or those of the recipient country are to be purchased.

When the two Governments deem it necessary, the Grant Aid may be used for the purchase of the products or services of a third country.

However, the prime contractors, namely consulting, contracting and procurement firms, are limited to "Japanese nationals". (The term "Japanese nationals" means persons of Japanese nationality or Japanese corporations controlled by persons of Japanese nationality.)

4) Necessity of "Verification"

The Government of the recipient country or its designated authority will conclude contracts denominated in Japanese yen with Japanese nationals. Those contracts shall be verified by the Government of Japan. This "Verification" is deemed necessary to secure accountability to Japanese taxpayers.

5) Undertakings required to the Government of the recipient country

- a) to secure land necessary for the sites of the Project and to clear, level and reclaim the land prior to commencement of the construction;
- b) to provide facilities for distribution of electricity, water supply and drainage and other incidental facilities in and around the sites;
- c) to ensure all expenses and prompt execution for unloading and customs clearance at ports of disembarkation in the recipient country and internal transportation therein of the products purchased under the Grant Aid; 1/1/2

AP-18

- d) to exempt Japanese nationals from customs duties, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the supply of the products and services under the verified contracts;
- e) to accord Japanese nationals whose services may be required in connection with the supply of the products and services under the verified contracts such as facilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work;
- 6) "Proper Use"

The recipient country is required to operate and maintain the facilities constructed and equipment purchased under the Grant Aid properly and effectively and to assign the necessary staff for operation and maintenance as well as to bear all the expenses other than those covered by the Grant Aid.

7) "Re-export"

The products purchased under the Grant Aid shall not be re-exported from the recipient country.

- 8) Banking Arrangement (B/A)
  - a) The Government of the recipient country or its designated authority should open an account in the name of the Government of the recipient country in a bank in Japan (hereinafter referred to as "the Bank"). The Government of Japan will execute the Grant Aid by making payments in Japanese yen to cover the obligations incurred by the Government of the recipient country or its designated authority under the verified contracts.
  - b) The payments will be made when payment requests are presented by the Bank to the Government of Japan under an Authorization to Pay (A/P) issued by the Government of recipient country or its designated authority.

#### 9) Authorization to Pay (A/P)

The Government of the recipient country should bear an advising commission of an Authorization to Pay and payment commissions to the Bank. 1/10

# the Basic Design Study on the Project for Improvement of Facilities of Primary Schools in the Northern Mountain Region (Phase 2) in The Socialist Republic of Vietnam (EXPLANATION ON DRAFT REPORT)

In August 2002, the Japan International Cooperation Agency (hereinafter referred to as "JICA") dispatched a Basic Design Study Team on the Project for Improvement of Facilities of Primary Schools in the Northern Mountain Region (Phase2) (hereinafter referred to as "the Project") to the Socialist Republic of Vietnam (hereinafter referred to as "Vietnam"), and through discussions, field survey and technical examination of the results in Japan, JICA prepared a draft report of the study.

In order to explain and consult with the officials concerned of the Government of Vietnam on the components of the first draft report, JICA sent to Vietnam the first Draft Report Explanation Team (hereinafter referred to as "the Team I "), from January 9 to January 18, 2003. However, the Vietnamese side and the Japanese side could not reach agreement on several details of the draft report.

On May 20, 2003, the Vietnamese side sent to the Japanese side "Sample design for primary schools (Decision No.355/QD-BXD)" issued on March 28, 2003 as reference documents and requested the Japanese side to reconsider the report. Upon the request, JICA conducted further technical examination and prepared the second draft report of the study.

In order to explain and consult with the officials concerned of the Government of Vietnam on the components of the second draft report, JICA sent to Vietnam the second Draft Report Explanation Team (hereinafter referred to as " the Team II "), headed by Mr. Fumio KIKUCHI, Resident Representative, JICA Vietnam Office, from August 10 to 15, 2003.

As a result of discussions, both parties confirmed the main items described on the attached sheets.

Hanoi, August 29, 2003

Mr. Fumio KIKUCHI Leader Basic Design Study Team Japan International Cooperation Agency

unal

Ms. Dang Huynh Mai Vice Minister Ministry of Education and Training The Socialist Republic of Vietnam

#### ATTACHMENT

#### 1. Components of the Draft Report

The Government of Vietnam agreed and accepted in principle the components of the second draft report explained by the Team II.

#### 2. Japan's Grant Aid Scheme

The Vietnamese side understood the Japan's Grant Aid Scheme and the necessary measures to be taken by the Government of Vietnam as explained by the Team II and described in Annex-5 and Annex-6 of the Minutes of Meetings signed by both parties on August 12, 2002.

#### 3. Schedule of the Study

JICA will complete the final report in accordance with the confirmed items and send it to the Government of Vietnam by October 2003.

#### 4. Other relevant issues

#### 4-1. Schools and Facilities covered by the Project

Both sides agreed on schools and components covered by the Project as shown in Annex-1.

#### 4-2. "Sample Design for Primary Schools"

The Vietnamese side explained that "Sample design for primary schools (Decision No.355/QD/BXD)" were issued based on the "Classroom and School Concretization Program in Vietnam (Decision No.159/QD-Ttg)" approved by the Prime Minister. The Vietnamese side confirmed that contents of the "Sample design for primary schools" are the minimum requirements, and primary/secondary school construction programs/projects conducted by all the localities and donors are required to fulfill the requirements.

#### 4-3. Official appraisal and approval

The Vietnamese side will secure the official appraisal and approval by the Government of Vietnam required for the implementation of the Project.

#### 4-4. Works covered by the Vietnamese side

The Vietnamese side agreed that the timely completion of the site preparation works described in Annex-2 would be required. The Vietnamese side assured to complete the site preparation works before the commencement of Japanese construction.

#### 4-5. Securing of Proposed Building Sites

The Vietnamese side confirmed that they will secure the identified building sites in the recipient schools till the actual commencement of the construction work.

#### 4-6. Allocation of Personnel and Budget

The Vietnamese side agreed to allocate necessary budget and personnel (teaching and administrative staff) for proper use and maintenance of the facilities and equipment covered by the Project.

#### 4-7. Proper Use and Maintenance

Both sides understood that proper use and maintenance of the facilities and equipment would be indispensable for their lifelong use. The Vietnamese side assured to facilitate their proper use and maintenance of facilities in the schools covered by the Project with the active involvement of concerned parties such as DOETs, BOETs, schools, communities and so on.

#### 4-8. Software Component

The Vietnamese side requested the implementation of the software component within the scope of the Project in order to facilitate proper use and maintenance of the facilities in the schools covered by the Project.

#### 4-9 Tax Exemption

The Vietnamese side confirmed to exempt all grant aid materials from taxes, customs clearance fees at the port of disembarkation as agreed in the Annex-5 and Annex-6 of the Minutes of Meetings signed by both parties on August 12, 2002. Also, based on this Minutes of Discussions, the Vietnamese side assured to exempt all Japanese nationals from customs duties, domestic taxes, and other fiscal levies which may be imposed in Vietnam with respect to the supply of the products and services under the verified contracts.
