

For the areas outside of the Capital Municipality Zone, a development plan is illustrated in the “National Infrastructure and Services”, in the VUDMP, as shown in Figure 25-2.

Figure 25-2 National Infrastructure and Services

As shown in the figure above, “Forest Conservation Area, Dongphosy Village” in the east and “National Forest Conservation Area, Dongmarkay (km 18) Village, 1,140 ha” in the north of the Capital Municipality Zones, are reserved as forest area.

Location of a new national airport (2,400 ha), a new industrial area (3,000 ha), a new railway, and a tourism conservation area are shown on the figure. However, the target year for implementation of the development of these areas is not described.

Figure 25-3 shows reserved areas for forests and paddy fields which are shown on Figures 25-1 and 25-2, together with exiting water serviced areas. This information will be the basis for the planning of future water serviced areas.
