Guideline for Preparation of the Provincial Primary Education Development Program (PEDP) (PEDP Guideline)

(May 2003)

Introduction Getting Started and Submission Information Situational Analysis

Data and Indicators Situational Analysis

Assessed Needs and Prioritized Sub-Sectors

Introduction

PEDP (Primary Education Development Program) is a recent MOET initiative attempting to bring more coherent and coordinated donor involvement to primary education development in the Socialist Republic of Vietnam. PEDP is a comprehensive action program, which aims to achieve the targets of the "Education Development Strategic Plan for 2001-2010 (EDSP 2010)" for primary education in Vietnam.

- PEDP presents necessary activities to be taken to achieve EDPS 2010 targets in order to consolidate primary education.
- PEDP provides a referential framework for the Government of Vietnam (GOV) and international donors to identify and address areas of need.
- The PEDP Document is an evolving working document subject to continual revision according to needs and changing situational and developmental circumstances.
- PEDP will assist international donors in formulating planned intervention on a systematic basis for the next decade in line with the EDSP 2010.

Implications for provinces are as follows:

- Assessed needs in the Provincial PEDP Document will be reflected in the project formulation/justification with potential donors at MOET
- With (earlier) submission of the <u>Provincial PEDP Document</u>, respective provinces have a greater probability of having their needs reflected in the National PEDP Document and of collaborating with international donors

The contents of the Provincial PEDP Document consist of: (a) Situational Analysis; and (b) Assessed Needs and Prioritized Sub-Sectors. Instructions for each of these are provided in this document.

Getting Started and Submission Information

This Guideline is a revised version of the draft 2nd edition

With the PEDP Guideline (Final Version), a floppy diskette containing the following files will be distributed, and you are requested to use these files to prepare your Provincial PEDP Document.

- DataAndIndicators.xls
- PEDPformVer2.doc

Provincial PEDP should reflect wider stakeholder views and perspectives. Thus, MOET expects that more varied stakeholders will be involved in the discussion/workshop to prepare the document (i.e., DOET, BOET (district level), commune, schools (teacher/headmaster), parents, community).

It is strongly recommended that personnel, who attended the EPCB training held in 2002 and 2003 (particularly from the Primary Education, Planning, and Financial Sections of DOET), play the roles of facilitators and be responsible for the preparation of the Provincial PEDP Document. He/she may assign several personnel to complete the document under his/her leadership. He/she is also responsible for quality assurance of the document.

The submission deadline for the Provincial PEDP Document for 2002/03 is set <u>at the end of the</u> <u>PEDP Workshop</u>.

You are requested to give your documents to the researchers or dispatch them to arrive at MOET at the earliest date to the following address:

Ms. Nguyen Thi Hong HANH Primary Education Department Ministry of Education and Training 49 Dai Co Viet, Hanoi

- The document should be submitted in four hard-copy documents (one original and three copies) and on the diskette provided.
- <u>**Cover page**</u> must clearly indicate the province name and contact persons responsible for Provincial PEDP preparation.

<u>Delay in submission may result in insufficient or none-consideration of your Provincial PEDP</u> <u>Document in the National PEDP Document preparation process.</u> <u>Earlier submission is encouraged</u> to allow PMU to examine your document more carefully in the process of the National PEDP Document preparation. The PMU/MOET welcomes inquiries and comments, as they would be very helpful to improve the PEDP process.

JICA Program Team for Primary Education Development Mr. Norihiko SUZUKI, M.A. / Mr. Viet Tel/Fax: 04 7762 494 E-mail: pedpmain@fpt.vn (should be cc:ed to pedpannex@fpt.vn) 2nd Floor, TTCI Building, 80A Lang Ha Street, Hanoi

CHECKLIST BEFORE SUBMITTING, CHECK THE FOLLOWING

- All the necessary data and indicators have been properly entered into "DataAndIndicator.xls" (Section 1.1)
- Issue Tree is properly prepared and saved in the file "PEDPFormVer2.doc" or a handwritten version is produced according to the requirements (Section 1.2)
- Issue Description is properly filled out in "PEDPFormVer2.doc" and supplemental information is added in Section 1.1 "DataAndIndicators.xls" (Section 1.2)
- Sustained a straight the straight term of term o
- Three printed copies of "PEDPFormVer2.doc" and "DataAndIndicators.xls" and one floppy diskette containing these files are included in the envelope to be sent to MOET
- > Your document should be dispatched to MOET at the earliest date

1. Situational Analysis

1.1 Data and Indicators Describing Situation of Primary Education in Your Province

The aim of Section 1.1 is to clarify and understand the situation of primary education in your province through quantitative data that you already have. You will be provided with an Excel file titled "**DataAndIndicators.xls**" on the floppy diskette to fill out the form. <u>Please follow the instructions in the Excel file</u>.

The data and indicators to be covered and provided in this section are as follows:

- Population, Enrollment, Repetition, and Dropout
- Primary School and Classrooms
- Teachers (divided into two sections)
- Curriculum
- Budget for Primary Education Sector
- Indicators
- Additional Data & Indicators (refer to Quantitative Evidence for Section 1.2 Situational Analysis)

You do not have to collect completely new information to fill out this form. Please refer to the latest, existing information that was already made available to you (i.e., five-year and annual education plans submitted to the Finance and Planning Department of MOET, data collection activities for EFA, etc.).

You will be provided with an Excel file titled "DataAndIndicators.xls" on the floppy diskette to fill out the form. You are requested to follow the instructions in this file.

- In general, you can find most of the necessary data in your Annual Plan and Five-Year Plan Documents that were submitted to the Financial and Planning Department of MOET.
- You may find it difficult to obtain such documents. In such cases, please use the data that is made available to you. Do not wait for data and information, as the Provincial PEDP Document needs to be submitted at the earliest time.
- Planned/estimated data during 2006/7 2010/11 is optional

For more detailed instructions, please refer to the file provided. Hard copies of the files are shown in the following pages.

INSTRUCTIONS

Please indicate with the latest, existing data that you have, I.e. AnnuaU5-year Plan for education development submitted to Finance and Planning Department of MOET. If you don't have planned/astimaled figure after 2006/7, just leave them blank.

1.2 Situational Analysis

The purpose of **Situational Analysis** is to analyze the situation of primary education development in your province. Here, please describe the following issues in a narrative form (referring to the data in Section 1.1 is desirable):

- Demographic situation
- Geographic situation
- Social and cultural situation
- Economic situation
- Current situation of primary education

2. Assessed Needs and Prioritized Sub-Sectors

2.1 Issue Tree

In this section, the PEDP Document focuses more on possible interventions to be proposed by your province. After the situational analysis, you may have some ideas regarding the issues in primary education development of your province.

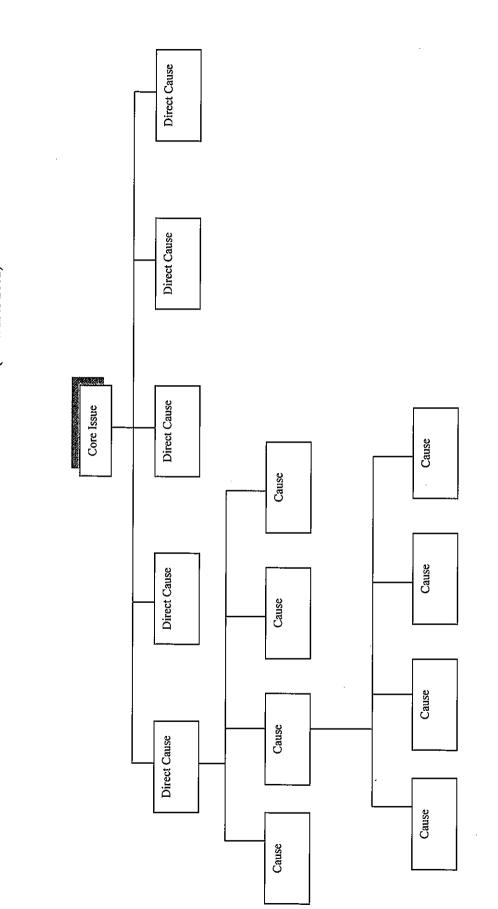

Prepare an Issue Tree, drawing upon your experiences in the EPCB training and documents.

In the Issue Tree development for your Provincial PEDP Document, the core issue needs to be **the top priority problem of each province**. The core issue, "Education quality is inadequate" is too broad and should not be selected as the core issue of your province.

If you find it difficult to identify the qualitative issues, the following steps might help give you some idea on what your topic might be:

- Curriculum (contents, core subjects, extra-curricular activity, etc.)
- Teaching method (language of instruction, pupil-centered, multi-grade, etc.)
- Learning material situation (type, availability, quality, distribution)
- Teacher situation (profile, qualification, distribution, absenteeism)
- Nature of the learning environment (friendliness, protection and safety, health issues, etc.)
- Parental awareness of continuing education
- Out-of-school/disadvantaged children issues

To type out your Issue Tree, please use the templates shown on the next page.

2.2 Issue Matrix

The **Issue Matrix** systematically outlines the needs/issues to be addressed in your proposed Provincial PEDP Project to be. An example of the matrix is shown on page 15, which contains the following items for Core Issue 1 (the top priority issue).

(a1) Direct Cause
(a2) 2nd Level Causes
(a3) Consequences

In this section, you will explore and define what the structures of the issues are that you have listed in Section 2.1 and may have obtained from other sections.

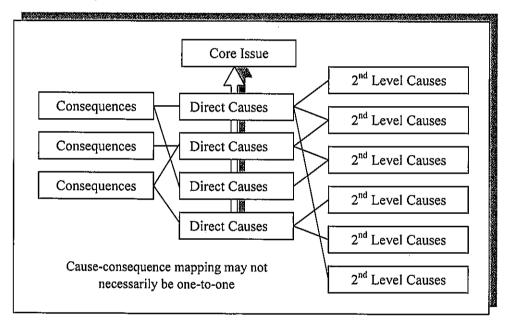

Figure: Items to be outlined in the Issue Matrix

If you are stuck

- (Tip 1) Use group discussion to fill out the Issue Matrix, inviting concerned persons. Do not try to do everything by yourself. Utilize the human resources at DOET.
- (Tip 2) Remember that the Issue Matrix is a kind of "map" that shows the location of the issues. Try to avoid struggling with details, but follow your (group's) "logical" impression to fill out the matrix. Before completion, take a quick look to check if some obvious mistakes or logical errors were made.
- (Tip 3) The Issue Matrix should be described qualitatively. You will find it difficult if you

describe it quantitatively. For example, you can write, "Quantity of usable school facility is not enough" but you should NOT write, "100 chairs and tables are lacking." Such quantitative notions are very hard to elaborate upon and are too precise.

If you cannot choose Core Issues

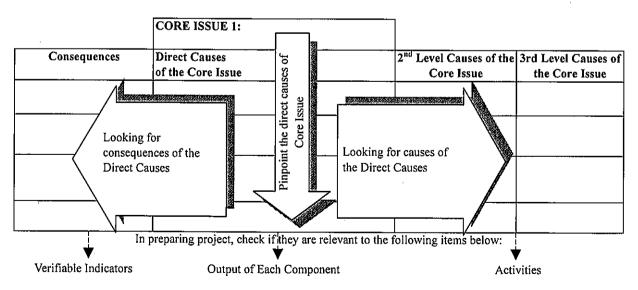

- (Tip 4) Refer to both the Quantitative and Qualitative Situational Analyses performed in Section 1. Both will give you good suggestions on what your "Core Issues" should be.
- (Tip 5) Again, group discussion will help. Whatever you are going to add or drop from the Issue Matrix, obtain a consensus from ALL participants present at the discussion.

Chicken-or-Egg Problem (Cause-or-Consequence problem)

- (Tip 6) It is OK to leave the same notion in both the "cause" and "consequences" column, if there is a mutual relationship between cause and consequences (Chicken-or-Egg **Problem**). If so, do not try to pursue a perfect answer, as nobody has yet been successful.
- (Tip 7) It is OK to have the same notion in "2nd-Level Causes" for several "Direct Causes" if it **reflects the actual situation** more precisely. This may also be applied to the relationship between "Consequences" and "Direct Causes."

One Issue Matrix is not enough?

- (Tip 8) Try to cover all crucial issues in one matrix. In case you still feel something important is missing:
 - (Tip 8-1) Define what is missing
 - (Tip 8-2) Try to include it in the 1st Issue Matrix
 - (Tip 8-3) If it does not fit, then go for another Issue Matrix

2. Assessed Needs and Prioritized Sub-Sectors (Example) Tips1. 2. & 3 Based on the Issue Tree prepared in Section 2.1, prepare the Issue Matrix. As a reminder, the aim of the Issue Matrix is to sort out what are the causes and consequences surrounding the Core Issue. "Core Issues" are the most crucial issues to be analyzed here (from Section 2.1) "Direct Causes" are the direct causes of the Core Issues. One box for one Direct Cause only "2nd Level Causes of the Core Issues" are the causes of the Direct Causes Categorize other issues as 3rd Level Causes of the Core Issue Find out consequences of the Direct Causes Thus, the number of Issue Matrices to be prepared and submitted is one (1). However, you can prepare one additional Core Issue Matrix (in this case the total number of Issue Matrices is two (2)) if you are not successful in including into one matrix other Core Issues (2 & 3). **Issue Matrix:** CORE ISSUE 1: School-based educatio macity is insufficient Tips 4&5 Consequences of the Direct Causes to the 2¹⁴ Eevel Causes ... Level Causes to the Core Issue Direct Causes Core Issue Issue Dropout and repetition Management of Management skills of head Interaction between school remains high school is poor teacher/are inadequate and commune is poor committees do not Schoo . Old or damaged facilities are func on for school not repaired (a3) (gement ma/ laign to raise parents' (a1) (a2) ness for continuation of primary education is ineffective • Quality of teaching Teachers have been trained Teachers face difficulties in • and learning process insufficiently completing curriculum and is insufficient Quality of educational syllabus material is insufficient Teachers do not maximize Furniture/equipment and function of existing teaching material need to be aids repaired/procured-Inventory is not adequate Ouantity of usable school facilities is not enough Tips 6,7&8 (Rest is omitted)

2.3 Issue Description

Next, combining the Issue Tree and quantitative information provided in Section 1.1 with your qualitative assessment/perception, please fill out the "Issue Description."

The form for the Issue Description is quite simple, and consists of three columns indicated with the following symbol:

(a) Issues

- (b) Description
- (c) Quantitative and Qualitative evidence that support your notions

Finding Issues

(Tip 1) Your document submitted to MOET has a qualitative assessment section (i.e. Annual Education Development Plan and Five-Year Education Development Plan, both submitted to the Finance and Planning Department of MOET). You are encouraged to utilize existing materials to complete this section as long as they are accurate and sufficiently relevant.

Description

- (Tip 2) Utilization of bullet points will help improve the clarity of your presentation.
- (Tip 3) Avoid duplication/similar expressions as much as possible. If you discover similar expressions, try to merge them or remove them.
- (Tip 4) Refer to the consequences in the Issue Matrix, but do not directly transfer these consequences to issue descriptions.

Evidence

- (Tip 5) For quantitative evidence, use quantitative information data provided in Section 1.1. If the figure you need is not available in the given format, please supply the relevant information in "<u>DataAndIndicator.xls</u>" as "<u>G.Additional Data & Indicators.</u>"
- (Tip 6) For qualitative information, note the possible sources of information as concretely as possible (i.e., "perception of XXXX district education personnel,").

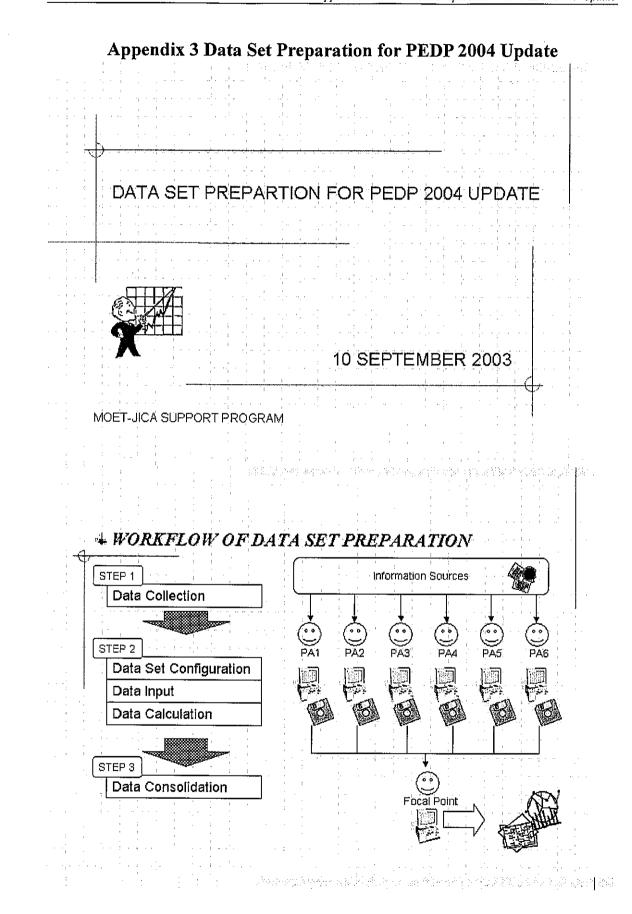

| · · · · · · · · · · · · · · · · · · · | (Figures and sources, where applicable) |
|---------------------------------------|---|
| | • |
| | • |
| | |
| | • |
| | • |
| | |
| | |

(You can add rows as you wish)

Using the Issue Tree, quantitative data obtained in Section 1.1, and other information you have, list issues of primary education development in your province, together with descriptions and quantitative/qualitative evidence that support your notions.

| Issues | Description | Quantitative and Qualitative |
|--|---|--|
| (a) C Tipi | 1&2 (b) Tip3&4 | evidence that supports your notions (figures & sources, where applicable) |
| School is not properly maintained and operated | Management skills of head teachers are inadequate School committees do not function for school management Interaction between school and commune is poor New construction of facilities is not enough | Perception of commune educational officers Perception of parents |
| Quality of teaching and learning process is insufficient | Teachers face difficulties in completing curriculum and syllabus School facilities are poorly installed Quality of educational material is insufficient Teachers do not maximize function of existing teaching aids Old or damaged facilities are not repaired Damaged furniture in the classrooms is not replaced or repaired Equipment and material need to be repaired/procured Quantity of usable school facilities is not enough Inventory is inadequate | School facility and material inventory Perception of principal Perception of commune educational officers Dropout XX% Information from school Commune level statistics District level statistics |
| Dropout and repetition level remain high | Dropout rate in grade XX is higher than other grades Difficult for dropout students to return to school. Parents do not appreciate continuing primary education Some parents cannot afford primary education costs Campaign to raise parents' awareness for continuation of primary education | Dropout XX% Information from school Commune level statistics District level statistics |

Appendix A-4 BAPI Update Guidelines

The updating of the National PEDP "Broad Areas of Intervention" (BAPIs) is a **continuing process** based on the return of the Provincial PEDP documents compiled at the PEDP Planning Workshops. Table 5.1 in the Operational Guidelines indicates the process timeframe. It is anticipated that the national updates will take place in 2004 and 2007.

The analysis of the National PEDP BAPIs will be the responsibility of the six Task Force groups from the PMU, with each group taking responsibility for one Prioritized Area.

- Task Force 1 PA1 Strengthening Education Management
- Task Force 2 PA2 Improvement of Pre-Service Training Provision
- Task Force 3 PA3 Improvement of Facilities
- Task Force 4 PA4 Improving Quality in the Classroom
- Task Force 5 PA5 Overcoming Barriers in Accessing Primary Education
- Task Force 6 PA6 Strengthening Educational Finance and Socialization

Below are detailed descriptions of gap analysis and BAPI updates:

- 1. Quality of Provincial PEDP Documents.
- 2. Qualitative Collation and Analysis
- 3. Reliability and Verification
- 4. Quantitative Analysis
- 5. Updating the BAPIs
- 1. Quality of Provincial PEDP documents

The quality of returns provided in the Provincial PEDP Document is important for the final results.

The quality of Provincial PEDP documents depends on data integrity, the composition and representativeness of workshop participants, and the ability of workshop facilitators. The analysis of the information is only as good as the integrity of the returns in terms of:

• Integrity of data collected. Is the data collected complete? Is it clear and unambiguous? Is it accurate and sufficiently disaggregated?

Check for *Completeness* – It is important that the Provincial PEDP documents are fully completed (e.g., the tables) and that there are no gaps in key data; otherwise, the results of any analysis may be skewed towards those sections which have been filled in. It is also important that the facilitators have made sure that all areas within the Prioritized Areas and Sub-Sectors have been considered; otherwise, important BAPI elements may be considered unnecessary or unimportant.

Check for Clarity – It is important to have clear, unambiguous definitions and descriptors for all elements on which information is collected.

Check for *Accuracy* – Quantitative information provided must be accurate and estimates need to be indicated. This also includes accuracy in terms of the copying of statistics and the adding up of information from checklists.

Check for *Disaggregation* – Too little aggregation means a loss of information. Check to ensure that a reasonable level of aggregation is given to show relationships between variables.

- Composition and representativeness of workshop participants and the extent of their input. Is there adequate representation from all sectors of education within the province (administration (DOET & BOET levels), schools (principals, teachers, communities), etc.)? Are the different perspectives between the various levels discussed and represented?
- **Competence of facilitators.** How focused and probing are they? To what extent can they elicit information on various issues to ensure that the information provided goes beyond generalities?

2. Qualitative Collation and Analysis

The Provincial PEDP documents provide a great deal of <u>qualitative</u> information as the Issue Trees, Issue Matrices, etc. are mostly <u>descriptive</u> and record the <u>opinions</u> of participants on the workshops. Therefore, it is important to have a system for the analysis of qualitative data for the updating of the BAPIs. This involves data collation and data analysis.

Collation is concerned with how to bring the data together in a manageable form so that it is easy to use - i.e., data reduction and data display.

Data Reduction and Display

The BAPI Project Match Matrix provides a simple way to reduce data into easy chunks for analysis and can be easily displayed. The Match Matrix reflects the definitions given in the "BAPI List and Profiles" and also the conceptually ordered clustering system of the six prioritized areas in the BAPI matrix. This will allow comparisons throughout Vietnam and between provinces and regions.

Analysis is concerned with how to make reliable and verifiable conclusions from the data.

Three Kinds of Analyses

Various strategies can be used to understand the data returns:

Match analysis – This involves checking Provincial PEDP documents for a synoptic overview provided by the Issue Tree marked on the checklist (sub-sectors & BAPI). Further details and elucidation of areas of need can be obtained from the Issue Matrix. Issues identified by a province are to be marked on National and Donor Activities. The match analysis will indicate which Prioritized and Sub-Sector areas are of most concern to the province and which BAPIs are of most relevance. This

will also enable inferences concerning regional variations to be made.

Gap analysis – This is the checking of Provincial PEDP documents to see whether areas of identified concerns have been included in the Match Matrix. This can be done initially at a provincial level, but a comparison of recurring themes and patterns will show up in the notes made on National and Donor Activities. A simple frequency count will determine the level of importance ascribed to an issue and whether activities within BAPIs are to be revised, new BAPIs to be included, or descriptors to be changed.

Prioritization analysis – This involves checking Provincial PEDP document returns to assess which areas of intervention are to be prioritized. This requires both a sequential logic (what has to be done first before going on to the next stage – e.g. trainer training before teacher training) and also a way of assessing intervention areas of importance (e.g., MOET priorities matching provincial needs,; linking the National PEDP to CPRGS goals, the EFA). Criteria for prioritization need to be established by the PMU Task Forces, which should be flexible enough to meet regional, ethnic, socio-economic, and practical needs. Once criteria have been established, these can be compared and matched with the recurring themes and patterns derived from the match analysis and frequency counts.

Tactics for Drawing Conclusions

Counting – This includes both simple and complex frequency counts, which allow isolation of themes or patterns to be made on a consistent basis through iteration. Making generalizations is a process of amassing facts and then seeing which facts go with what. The process entails simply recording the "core issues" identified by each province and matching them with National and Donor Activities. Inferences may be made by comparing issue descriptions with "matrix descriptors."

Clustering – This is the process of inductively forming categories and iteratively sorting data into categories. This involves scanning, itemizing, classifying, ordering, reviewing, summarizing, structuring, and abstracting. An example would be to look at the marked BAPI within sub-sectors on a regional/national basis and cluster according to categories. Check to assess whether the descriptors adequately fit the clusters.

Noting patterns and themes – When doing the clustering, note recurring patterns and themes. This helps the analyst to see what goes with what, and provides a holistic understanding. This is a form of subsuming particulars into the general – i.e., moving from the particular to higher levels of abstraction. Instead of breaking down constituent parts, you are building up to form a picture of what is happening in Vietnam as a whole.

Contrasting and comparing – How does province/region X differ from province/region Y and what are the underlying factors (e.g. the need for VSL – ethnic group)? The results of comparisons should themselves be compared with what else we know about the provincial demography, geography, etc. An example of this would be to compare similarities of needs across regions and provinces. Note areas of dissonances and assess the reasons according to criteria of geographic location, demography and ethnicity, and socio-economic factors.

Tips for Drawing Conclusions

- 1. It is helpful to start with a quick scan of a matrix (rows and columns) and then going back to the Issue Tree to see what emerges.
- 2. Verify, revise, or disprove that impression through a careful review.
- 3. Any kind of conclusion should always be based on a series of tactics. The most frequent tactics include noting patterns and themes, making contrasts and comparisons, clustering, and counting.
- 4. As conclusions form in your mind, write down text to explain those conclusions. Always make conclusions explicit. The process of writing leads to reformulation, greater clarity and more ideas for further analysis.
- 5. First conclusions must always be checked back against the Issue Matrix and Issue Description.
- 6. More generally, any conclusion needs confirmation, checking, and verification. Is it really correct? Triangulating and checking alternative explanations is important.
- 7. Remember that analysis has to extend beyond descriptive summaries and must give some kind of explanation. Checking conclusions against data is only one part of the job.
- 8. Ask for comments from colleagues, especially during the early stages.

3. Reliability and Verification

Support your findings by trying to obtain other independent evidence that agrees with your findings. You are seeking to obtain multiple instances of your findings from different sources by using different methods and by reconciling your findings with other data that needs to be taken into account.

Check for *representativeness* – Is the information typical or not? If so, how representative is it? If not, then are there special circumstances or reasons why a province has highlighted a particular problem or area of need?

Check by *triangulating* – Support your update by trying to obtain other independent measures, which agree with your findings or which are not contradictory – e.g. opinions of colleagues, documentation etc. This is where you link your findings with the quantitative data sheets provided in the Provincial PEDP documents (Issue Descriptions and Situational Analysis).

4. Quantitative analysis

The Provincial PEDP documents provide quantitative data in the Situational Analysis section and backup data in the Issue Description.

Two levels of analyses can be made from the quantitative data:

- Inferential analysis through surveying the data and drawing conclusions. For example, a survey of "number of teachers" and "types of training" provides a general estimate of provincial conformity to national standards in regards to teacher qualifications. A further analysis of the data on "need for new teacher supply" linked to the upgrading of teachers in post then has important strategy and policy implications for the role and work of teacher training colleges, their rationalization, trainer-of-training programs, training modes and approaches, and financial support.
- Verification to support qualitative analysis: for example, quantitative data on revenues in terms of parental and community financial contributions help to assess the level of socialization within a specific province and also the country as a whole.

However, the usefulness of such data is directly related to how accurate it is, how relevant it is to the needs analysis in terms of reasons for inclusion, and to the level of disaggregation.

5. Updating the BAPIs

The National PEDP BAPIs provide a map of the requirements and areas of interventions necessary to assist the development of Vietnam's long-term educational goals.

The revision of the BAPIs must reflect the country's changing needs and circumstances; hence, this is a dynamic process. Updating the BAPIs therefore entails revisions, where appropriate and necessary, of the columns within the Sub-Sector on the basis of your analysis of the PEDP return, monitoring information, and update of the donor intervention website.

It is also important to bear in mind the practical issues of implementing the "Activities" as well as being

realistic about outcomes.

Practicality Issues

- 1. *Relevance* contribution towards addressing the main concerns and policies in education and training; relationship to other interventions by donors, NGOs, and the private sector; identification of target groups; consistency with the objectives of poverty reduction, social inequity, etc.
- 2. Efficiency and Effectiveness critical areas of the phasing of TA and financial inputs; identification of constraints and bottlenecks related to program implementation; monitoring and evaluation required to track progress and assess impact
- 3. Overall Quality and Sustainability policy measures, economic and financial sustainability; socio-environmental factors; proposed technology

Suggested Sequence for Updating the BAPIs

- Check that Prioritized Areas fit the listed issues on the basis of your matrix checklist and notes
- Check that the Sub-Sector fits the listed issues on the basis of your matrix checklist and notes
- Check that the BAPI descriptors fit the listed issues on the basis of your matrix checklist and notes

• Update Intervention Purpose and Outputs on the basis of your matrix checklist, Provincial Issue Tree, and Issue Matrix to provide a generalized finding per region and then nationally

- Update Current Intervention per region by referring to the donor website and other documents
- Update Activities on the basis of your matrix checklist, Issue Tree and Issue Matrix to provide a generalized finding per region and then nationally
- Update National BAPI Region/Area section from the regional updated activities
- Update donor activities by checking the website

INTRODUCTION

1.1 Background

This Handbook aims to be utilized by those engaged in the implementation of PEDP to monitor the processes of PEDP implementation activities. The objectives of PEDP Monitoring and Evaluation are for the MOET/PMU and DOET to determine, through self-examination, if the update and implementation of PEDP are being carried out in an effective manner.

The National PEDP developed in May 2002 aims to assist GOV and international donors to formulate planned interventions on a systematic basis for the next decade, in accordance with EDSP and EFA implementation. The PEDP Document is an evolving working document subject to continual revisions according to changing needs and situational/developmental circumstances. Stakeholders will be involved in its development. In order to manage the continual revisions, PEDP Operational Guidelines have been developed. The Guidelines aim to provide a practical reference tool for the updating and implementation of PEDP and clarify such areas as: (1) organizational arrangements; (2) roles and responsibilities of concerned parties; (3) task and activities involved; and (4) work schedule.

1.2 What Is PEDP Monitoring and Evaluation?

PEDP Monitoring and Evaluation examines the updating and implementation of PEDP for its effectiveness and relevance. Moreover, PEDP Monitoring and Evaluation is a strategy that enables lessons learned through the implementation of PEDP to be reflected back in the practice of PEDP activities. PEDP Monitoring and Evaluation is based on the principle that the stakeholders themselves are the best sources of solutions to their problems, because they experience the problems and their effects and know which solutions will prove to be the best choices.

While confusion between monitoring and evaluation is a common one, there is a simple distinction between PEDP Monitoring and PEDP Evaluation. PEDP Monitoring is a routine and regular assessment of on-going activities and progresses. It looks at what is being done, and is simply defined as <u>process and progress evaluation</u>. The monitoring methodology is a continuous process of observation, interpretation, and institutional learning.

In contrast, PEDP Evaluation is the episodic assessment of overall achievements. It examines what has been achieved or what impact has been made within the program; this can also be simply defined as <u>achievement evaluation</u>.

1.3 Who Is Involved in PEDP Monitoring and Evaluation?

There are two levels for PEDP Monitoring and Evaluation. One is at the national level implemented by MOET and the other is at the provincial level by DOET. The provincial level covers Provincial PEDP workshops and related activities, while the national level covers other activities of PEDP Monitoring and Evaluation.

For PEDP Monitoring at the national level, the *PEDP Secretary* coordinates the PEDP activities of PA Task Force members and other Focal Points and monitors their activities. *PMU members, Focal Points, and other officers in MOET related to PEDP activities* implement self-evaluation.

For PEDP Monitoring at the provincial level, the organizer of the Provincial PEDP, who will usually be the *Director of DOET and/or primary education division in DOET*, monitors activities. Any DOET officers, related to the Provincial PEDP Planning Workshop, are responsible for its evaluation.

| | National Level | Provincial Level |
|------------|--|---|
| Monitoring | PEDP Secretary | Director of Primary Education Division in DOET |
| Evaluation | Officers in MOET related to PEDP activities: PMU Task Force Members, PEDP Focal Point, Project Officers, etc. | DOET officers related to Provincial PEDP Planning Workshop |

Table 1.1 Persons in Charge of PEDP Monitoring and Evaluation

1.4 When and How Often Are PEDP Monitoring and Evaluation Carried Out?

The monitoring at the national level is carried out throughout tasks and activities, as it is an ongoing activity. The evaluation at the national level, however, is carried out every year after the completion of all PEDP activities and tasks. The monitoring and evaluation at the provincial level is carried out during and after the Provincial PEDP Planning Workshop. The table below shows the monitoring and evaluation schedule in relation to the PEDP operation work schedule.

Table 1.2 Timing and Frequency of PEDP Monitoring and Evaluation

| | National Level | Provincial Level |
|------------|---|---|
| Monitoring | During every activity | Once every three years, during the Provincial PEDP Workshop |
| Evaluation | Once a year at the end of PEDP activities | Once every three years, after the Provincial PEDP Workshop |

2

TASKS OF PEDP MONITORING AND EVALUATION

This chapter presents the organizational framework of PEDP operation, to clarify who does what in the processes involved.

2.1 EDP Monitoring at National Level

2.1.1 Objectives

This task aims to monitor the progress of PEDP at the national level to ensure its smooth implementation (namely Tasks 1 to 6 in Operational Guidelines, excluding the Provincial PEDP Planning Workshop in Task 1).

2.1.2 People Concerned

- **PEDP Secretary** for monitoring and coordination (Steps 1 through 3)
- **PMU Task Force Members and PEDP Focal Points** (MOET/Donor, Database, and Indicator Focal Point) for reporting progress (Steps 1 through 3)
- **PMU Head** as the final decision-maker (Step 3)

2.1.3 Activities

Step 1: Confirm the progress of the activities in each task

During the implementation of Tasks 1 to 6, the PEDP Secretary periodically asks PMU Task Force Members and/or PMU Focal Points about the progress of activities. PMU Task Force Members and/or PEDP Focal Points in return provide the PMU Secretary with a brief summary of the activities, the approximate percentage rate of task completion (e.g., 50 % completion), and the expected completion date (the checklist in Annex 1 can be used for this step).

Step 2: Confirm the output of the activities in each task

During and after implementation of Tasks 1 to 6 described in the Operational Guidelines, the PEDP Secretary asks PMU Task Force Members and/or PEDP Focal Points to report on their ongoing output. The PEDP Secretary confirms its quality by checking whether the contents are correct or not, whether utilized forms are appropriate, and whether the next task can be organized with this level of quality (the checklist in Annex 1 can be used for this step).

Step 3: (Optional) Rearrange the schedule and/or increase the number of staff

If through Steps 1 and 2 above, the PEDP Secretary thinks that the planned schedule cannot be met with an acceptable quality of deliverables, the PEDP Secretary discusses with PMU Task Force Members and/or PEDP Focal Points about any possible solutions. The three main options are to rearrange the schedule, to increase the number of staff to support PMU Task Force, or to reduce the quality of the deliverables. The PMU Secretary then consults with the PMU Head to determine how best to solve the problems with a combination of the above options.

2.2 PEDP Evaluation at National Level

2.2.1 Objectives

This task aims to monitor the progress of the Provincial PEDP Planning Workshop to ensure the smooth submission of Provincial PEDP documents.

2.1.2 People Concerned

- **PMU Members** as self-evaluators (Steps 1 through 4)
- **PMU Secretary** for coordination (Steps 1 through 3)
- **PMU Head** for coordination (Step 3)

2.1.3 Activities

Step 1: Fill out the evaluation form

The PEDP Secretary provides forms to PMU members to fill out.

Output: Collected and filled out evaluation forms

Step 2: Summarize the evaluation form

After collecting the evaluation forms, the PEDP Secretary summarizes the results of the evaluation forms and submits it to the PEDP Head.

Output: Summary of the evaluation form

Step 3: Hold the evaluation meeting

After reviewing the results, the PEDP Head asks the PEDP Secretary to organize an evaluation meeting and to invite all PMU members and other related officers to the meeting. The PEDP Head can choose any topics or combinations thereof raised in the evaluation form for the agenda. In the meeting, the PEDP Head solicits PMU member input to improve the quality of PEPD activities.

Output: Minutes of evaluation meeting

Step 4: Follow-up to the meeting

The PEDP Secretary follows-up on the meeting. One example is to change the detailed tasks and format by revising and using Operational Guidelines to confirm the changes with relevant PMU members.

2.3 PEDP Monitoring and Evaluation at Provincial Level

2.3.1 Objectives

This task aims to evaluate the quality of deliverables, approaches and skills at the national level for improvement in future activities.

2.3.2 People Concerned

- Director of DOET and/or Director of Primary Education Division as an organizer and for monitoring of the Provincial PEDP Planning Workshop (Steps 1 through 5)
- **DOET Officers** as facilitators (Steps 1 through 5)
- **PMU Secretary** as coordinator (Step 5)
- **PMU Members** for reporting progress (Steps 1 through 3)

2.3.3 Activities

Step 1: Confirm the progress of the activities of the Provincial PEDP Workshop

During the Provincial PEDP Workshop, the Director of DOET and/or Primary Education Division monitors the activities using the *PEDP Monitoring Checklist for Provincial Level* (see Annex 2) in terms of the participants' activeness, facilitators' skill, desk and chair arrangement, time management, etc. If the PMU Secretary sees fit, he/she also attends the workshop and carries out similar tasks.

Step 2: Confirm the output of the activities in each task

During the Provincial PEDP Planning Workshop, the Director of DOET and/or the Primary Education Division also checks whether the Issue Tree, Issue Matrix and Description are logical and detailed enough. If the PMU Secretary sees fit, he/she also attends the workshop and carries out similar tasks.

Step 3: Give feedback

At the end of every day of the workshop, the Director of DOET and/or Primary Education Division gives feedback to the facilitator to improve the quality of the workshop and Provincial PEDP documents.

Step 4: Confirm the output of the activities in each task

At the end of the workshop, the Director of DOET and/or Primary Education Division implements the final evaluation using the *PEDP Evaluation Form for Provincial Level* and gives feedback to the facilitators and participants.

Annex 5/AppendixA6-6

Step 5: Send the evaluation forms to the PEDP Secretary

After finishing the Provincial PEDP Planning Workshop, the Director of DOET and/or Primary Education Division sends all forms (*PEDP Monitoring Checklist for Provincial Level*, and *PEDP Evaluation Form for Provincial Level*) to the PEDP Secretary with Provincial PEDP documents.

ANNEX6-1

PEDP MONITORING CHECKLIST FOR NATIONAL LEVEL

Below is a set of questions that you will ask the person in charge of every task.

| No | PEDP Monitoring Check List at National Level | Check | | | | | |
|---|--|---------------|--|--|--|--|--|
| | <input preparation=""/> | | | | | | |
| | PMU members have necessary input and resources (time, information, place to work) to implement their tasks | | | | | | |
| 1 | Does he/she have enough time to finish his/her activities? | | | | | | |
| - | Does he/she have updated and correct information needed to carry out his/her activities? | | | | | | |
| | Does he/she have adequate resources to implement his/her activities (e.g. computer and printer) | | | | | | |
| | <process schedule=""></process> | | | | | | |
| _ | Task will be finished according to schedule. During the implementation of task, the completion expected completion date reported by PMU members are in line with what you expected | rate and/or | | | | | |
| 2 | - Is the completion rate lower or higher than you expected? | | | | | | |
| | - Is there any expected delay in the schedule? | | | | | | |
| | <output></output> | | | | | | |
| | Produced output matches and expected output. | | | | | | |
| 3 | - Is the form used by PMU members correct? | | | | | | |
| | - Can the person in the next task implement his/her activities with the current output? | | | | | | |
| | e is a "No" above, you should discuss with PMU members and the PEDP Head about the reason(s), and co | untermeasures | | | | | |
| (short-t <reaso< td=""><td>erm/long-term)</td><td></td></reaso<> | erm/long-term) | | | | | | |
| ~110430 | | | | | | | |
