Japanese intensive class(50 hours)

COURSE CONTENTS

This training course is formulated to cover ;
 (1) history of Japan's water resource development and environmental management (2) project case studies of Japan's water resource development and environmental management (3) the method and practice of preliminary planning for a small scale distributed type of sewage system including recycling and reuse (4) the theory and method of water ecosystem management and waste water treatment system, (5) the theory and method of operation and maintenance of the simple and cost effective waste water treatment system called "Shimanto method" (6) the method of environmental assessment and evaluation of model study using PC (7) field study to observe ecological water resources management and other advanced waste water system ("Shimanto method" and water recycling)

IRRIGATION WATER RESOURCES IN ARID AND SEMI-ARID REGION AND EIA FOR SUSTAINABLE DEVELOPMENT

乾燥地水資源の開発と環境評価

TARGET REGION: Countries with arid or semi-arid region

Jul.7, 2003 ~ Nov.21, 2003 9 participants J0300620

OVERALL GOAL / PURPOSE

It is to provide the participants with fundamental knowledge and application technique in the aforementioned field on which the attention to environmental conservation is attached. Thus it aims at enhancing the practical skills of the participants to enable them to use water effectively for sustainable agriculture in order to solve the problems concerning the water shortage and food security.

QUALIFICATION OF APPLICANT

Researchers/engineers who are engaged in water resources development for irrigation in arid and semi-arid regions with over two years of practical experiences, who are university/college graduates or those with equivalent academic background and for those under forty years of age, as a general rule.

Chugoku International Centre

COOPERATION PERIOD

1999 ~ 2003

REMARKS

This course is aimed for those who are engaged in the aforementioned work in either arid or semi-arid region where annual rainfall is less than 500mm.

COURSE CONTENTS

The training course consists of Group Training Program, Individual Training Program, Field Study and Study Tour.
 Group training program focuses on
 (1) Data/information processing
 (2) Water storage and supply facilities
 (3) Field water and soil management
 (4) Soil / water quality assessment
 (5) Preservation of greens : assessment of vegetation
 (6) Ground water
 (7) Crops suitable for arid area : plant nutrition (fertilization)
 (8) Farm management and food policy
 (9) Design and practice in water supply/service system

ENGINEERING ON WATER SUPPLY SYSTEMS

上水道施設技術

May.6, 2003 ~ Jul.19, 2003 10 participants J0300639

OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
The purpose of this course is to provide participants with an opportunity to broaden theoretical and practical knowledge of water supply systems with surface water resource and sanitary engineering systems including its planning, designing, operation and maintenance through lectures, laboratory practices and observations.	(1) be presently in a management position or a senior engineer in the field of water supply with surface water resource in the relevant organization (2) be a university graduate from the faculty of engineering or equivalent academic backgrounds.
COURSE CONTENTS This course is designed to cover the following themes. (1) water supply planning (2) waterworks management (3) water purification system and Quality (4) pipeline design and its maintenance	LANGUAGE English

NON-REVENUE WATER MANAGEMENT

上水道無収水量管理対策II

Oct.13, 2003 ~ Dec.8, 2003 8 participants J0303529

OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
(1) Comprehensive knowledge about various problems around non-revenue water (2) Basic technical knowledge to detect and repair leakage (3) Practical knowledge and techniques for planning, designing and construction management as leakage prevention measures	(1) Administrative officials who have engineering background and are presently engaged in waterworks management with more than five (5) years working experience (2) Between twenty-seven (27) and around forty (40) years of age
COURSE CONTENTS (1) Outline (2) Leakage Detection and Repair (3) Leakage Prevention in Planning (4) Leakage Prevention in Design (5) Leakage Prevention in Construction Management (6) Metering System (7) Mapping Management (8) Measures for Water-Stealing (9) Water Charge -Observation- ● Intake Facilities: Inuyama Intake ● Water Purification Plant Facilities: Nabeya Uneno Water Purification Plant	LANGUAGE English

WATERWORKS ENGINEERING II

水道技術者養成II

Jun.10, 2003 ~ Aug.30, 2003 8 participants J0300763

OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
The course is designed to provide participants with basic knowledge and comprehensive technology regarding overall water supply, including water resources, intake, treatment, distribution facilities, and water service installations. It also provides information on the integrated methodology of planning and technology required for operation and maintenance. The final goal of the course is to contribute to improving and promoting the water supply in developing countries, ensuring a safe potable water supply.	(1) senior technical official in charge of waterworks in central/local government or public bodies (2) university graduate or the equivalent with over 3 years of practical experience, or polytechnic school or the equivalent with over 7 years of practical experience (3) under 40 years of age
COURSE CONTENTS This course mainly deals with: (1) water leak prevention (2) water quality control (3) water treatment facilities (4) water distribution planning and pipe network (5) design and construction management (6) water service installations.	LANGUAGE English

OPERATION AND MAINTENANCE OF URBAN WATER SUPPLY SYSTEMS

都市上水道維持管理

May.19, 2003 ~ Aug.10, 2003 7 participants J0300597

OVERALL GOAL / PURPOSE

The purpose of this course is to provide participants with broad knowledge such as the strategy for general maintenance and management of facilities, establishment of maintenance system, water purification technology, etc., while making effective use of existing facilities.

QUALIFICATION OF APPLICANT

(1) inspectors, chiefs, or superintendents of urban water supply schemes/authorities using surface water resources (2) have experience of at least 3 years in the above mentioned field (3) between 28 and 40 years of age.

LANGUAGE

English

TRAINING INSTITUTIONS

Osaka International Centre

COOPERATION PERIOD

1994 ~ 2003

REMARKS

COURSE CONTENTS

This course is conducted mainly by practice and discussion, and report making is requested at the end of each session. Main contents are: (1) introduction of waterworks (2) operation and maintenance of water supply facilities (3) water purification technology (4) planning of urban water supplying system.

GLOBAL SEISMOLOGICAL OBSERVATION II

グローバル地震観測II

Oct.21, 2003 ~ Dec.14, 2003 10 participants J0303504

OVERALL GOAL / PURPOSE

This course is designed to introduce up-to-date technologies and knowledge in the field of global seismological observation to participants who are expected to play important roles in a global monitoring network for nuclear tests.

QUALIFICATION OF APPLICANT

(1) University graduates or equivalent with professional experience of more than 3 years in the field of seismology (2) At Least 3 years professional experience in the field of seismology (3) Well-versed in basic mathematics such as differentiation and integration (4) Under 35 years of age.

COURSE CONTENTS

This course consists of lectures, practices and field studies. The subjects are as follows.
 1) Introduction to seismology and nuclear politics
 2) Global seismic network
 3) Instrumentation and observation practice
 4) Hypocenter location
 5) Data processing
 6) Analysis of teleseismic record
 7) Source mechanism
 8) World seismicity
 9) Practice of discrimination of nuclear explosion

FIRE PREVENTION TECHNIQUES

火災予防技術

Sep.1, 2003 ~ Nov.17, 2003 6 participants J0300696

OVERALL GOAL / PURPOSE

The participants are expected to have better understanding on:
 (1) Outline of Japanese legislation and administration of fire prevention
 (2) Measures for fire prevention in buildings and other structures
 (3) Legal systems governing fire inspection and other powers granted to fire service organizations
 (4) Measures for fire prevention regarding hazardous materials objects
 (5) Measures for investigation of the causes of fire.

QUALIFICATION OF APPLICANT

Administrative officers or candidates of a fire service implementation agency, who is or will be engaged in planning / drafting of the Fire Service System. Under forty (40) years of age.

1. Outline of fire service
 (1) Fire service organization in Japan (2) Standard of fire service strength
 2. Legislation on fire service
 (1) Regulations on fire prevention administration (2) Regulations on hazardous materials
 3. Fire service systems
 (1) Measures for fire prevention (2) Fire protection equipment
 4. Fire Inspection
 Inspection of fire prevention properties and violation procedures
 5. Regulations on dangerous objects
 (1) Outline of regulations on dangerous objects (2) Chemistry of hazardous materials etc
 6. Investigation
 7. Case Study

VOLCANOLOGY AND SABO ENGINEERING 火山学・砂防工学	
Mar.17, 2004 ~ Sep.13, 2004 7 participants J0300630	
OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
The purpose of the course is to introduce participants to basic and modern concepts of volcanology and/or disaster prevention (Sabo Works) through lectures, exercises and field studies. For this purpose, the first half of the course is allotted to the common course and the second half is divided into two topics; volcanology and sabo engineering.	Under thirty-five (35) years of age. Currently engaged in Volcanic Observation and/or Disaster Prevention (Sabo Works) and be scheduled to engage in the same duties after the completion of the course.
COURSE CONTENTS	LANGUAGE
(1) Common subjects for Volcanology and Sabo group (2-1) Volcanology group/(a) up-to-date physical and geological concept of volcanism (b) theory of seismology, geodesy, geomagnetism, geotherm and geochemistry with the aid of exercises (c) methods of volcano monitoring, data analysis and interpretation emphasizing eruption forecasting. (2-2) Sabo engineering group/(a) basic theories necessary for study and planning of erosion and sediment control engineering (b) mechanism and structure of debris-mud flows (c) engineering technology and administrative countermeasures against debris-mud flow. (3) Individual training at university/research institute/technical center	English

METEOROLOGY 気象学	
Sep.16, 2003 ~ Dec.20, 2003 8 participants J0300780	
OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
To provide participants with basic knowledge and techniques to utilize data and products disseminated from advance meteorological centers and thus to motivate participants to formulate future plans to modernize their meteorological services.	(1) Presently engaged in meteorological service for their governments or governments-related public organizations (2) bachelor of science and/or technology (3) under 40 years of age (4) having experience in forecast operations (5) being familiar with using off-the-shelf spreadsheet software on PC.
COURSE CONTENTS	LANGUAGE
(1) application techniques to process meteorological data such as numerical predictions, satellite observations and climate data and derive information which meets the requirements of the participants' countries; (2) operational introduction to the meteorological services using above techniques at the headquarters and local offices of the Japan Meteorological Agency; and (3) general introduction of the operational meteorological service. NATURAL DISASTER MITIGATION 自然災害防災研究	
Sep.2, 2003 ~ Nov.30, 2003 5 participants J0303423	
OVERALL GOAL / PURPOSE	QUALIFICATION OF APPLICANT
This course is designed to introduce research methodology for research and mitigation of the natural disaster in the developing countries to researchers, scientists, and engineers in the field of mitigation of natural disaster.	(1) a bachelor's degree or an equivalent, and be capable of carrying out basic research about natural disaster mitigation (2) currently engaged in research on natural disaster mitigation, and have occupational experience of more than 3 years in the field (3) over 25 and under 40 years of age (4) a sufficient command of English to conduct research training
COURSE CONTENTS	LANGUAGE
The course consists of research practice (70%), lecture, observation, presentation, on the research for the mitigation of natural disasters. We prepare 4 research subjects for this year's course as follows: 1) Methods of Seismic Data Analysis, 2) Understanding the flood run-off caused by heavy rainfall and their prediction in the natural area and the urbanized area, 3) Studies on rainfall measurements by weather radars, and 4) The Basis of the weather analysis and numerical simulation using a personal computer. DISASTER MITIGATION AND RESTORATION SYSTEM FOR INFRASTRUCTURE (FOR CIVIL ENGINEER)

社会基盤施設の災害に対する危機管理

May.5, 2003 ~ Jul.17, 2003 8 participants J0303521

OVERALL GOAL / PURPOSE

The purpose of this course is to provide civil engineers who are engaged in infrastructure maintenance with comprehensive knowledge and techniques on the restoration from disasters and reconstruction methods, and thereby to contribute to the establishment of the restoration system in developing countries.

QUALIFICATION OF APPLICANT

- (1) technical executive officials who are engaged in civil engineering
- (2) have more than 3 years' experience
- (3) between 30 and 39 years of age
- (4) university graduate and equivalent

LANGUAGE

English

COURSE CONTENTS

This course includes lectures and practices on (1) the outline of the great Hanshin earthquake, (2) mechanism of earthquake disaster, (3) aseismatic technology, (4) predicting earthquake, (5) mechanisms of ordinary disasters in rivers and roads, (6) disaster prevention plan, (7) disaster-prevention-city plan, (8) activities at the initial stage and rescue system, (9) evacuation measures, (10) protection of lifeline, (11) communication at the time of disasters, (12) disaster prevention, (13) disaster rescue method and its application, (14) administrative work of reconstruction for restoration, and (15) group research (disaster restoration plan).

FIRE FIGHTING TECHNIQUES II

消火技術II

Jun.30, 2003 ~ Oct.16, 2003 10 participants J0300814

OVERALL GOAL / PURPOSE

(1) understand the outline of the organization, systems and roles of fire service administration, as well as the present situation of various disasters in Japan. (2) acquire knowledge and techniques to rescue people and extinguish fires such as high-rise building fires, hazardous and petroleum material fires, mountain fires, forest fires, ship fires and aircraft fires, at the early stage by commanding fire-fighting units on the ground, utilizing various fire engines, fire-fighting techniques and equipment.

QUALIFICATION OF APPLICANT

- (1) presently engaged in fire service, have at least five years' experiences
- (2) be or planned to be fire fighting commanders or training instructors
- (3) be university, or college graduates or the equivalent
- (4) be under 40 years of age

LANGUAGE

English

COURSE CONTENTS

The course will be conducted in the form of lectures, practical training, visits, study trips, and presentation of Country Reports. Lectures will be given mainly by using textbooks and audio visual equipment such as video tapes and films. Practical training will be conducted by utilizing all kinds of fire engines, fire fighting equipment and tools. The training course is programmed to provide following knowledge and techniques:

- (1) fire service system and command theory
- (2) safety control
- (3) fire radio operation system
- (4) fire fighting equipment (breathing apparatus, aerial ladder truck), pump, rope work
- (5) first aid at fire site
- (6) ship fire, hazardous material fire, forest fire, airplane fire fighting, vehicle fire, basement fire, high-rise building fire

requested to be in good health, both physically and mentally because of many field works

SEISMOLOGY AND EARTHQUAKE ENGINEERING

地震・耐震工学

Aug.26, 2003 ~ Jul.18, 2004 20 participants J0300834

OVERALL GOAL / PURPOSE

The purpose of the course is to contribute to upgrade the knowledge and technique of the participants in the field of seismology, earthquake engineering and earthquake disaster prevention measures through lectures (including colloquiums, exercises, practical training, field trips) and individual studies, so as to nurture researchers and engineers capable of playing an important role in these fields.

QUALIFICATION OF APPLICANT

- (1) University graduate or equivalent with at least three years' professional experience
- (2) Well versed in basic mathematics such as differentiation and integration
- (3) Under 35 years of age

LANGUAGE

English

COURSE CONTENTS

During the first 5 months, participants will be divided into 2 groups, Seismology group and Earthquake Engineering group, and during next 2 months, they will be divided into 3 groups, Seismology, Earthquake Engineering and Strong Motion and Seismic Hazards. And then all participants have individual studies for 3.5 months. The outline of the subjects on the training course are as follows; (1) Subject in common: general seismology and earthquake engineering, mathematics, basic computer programming, etc. (2) Seismology group: computer data processing, source process, structure of the Earth, seismicity and plate tectonics, etc. (3) Earthquake engineering group: soil mechanics and dynamics, structural analysis and dynamics, earthquake resistant design of building, etc. (4) Strong motion and seismic hazards group: geophysical exploration, soil dynamics, seismic zonation, hazard analysis, etc.

SEMINAR ON DISASTER MANAGEMENT

防災行政管理者セミナー

Jan.18, 2004 ~ Feb.28, 2004 14 participants J0300695

OVERALL GOAL / PURPOSE

(1) provide the latest administrative knowledge of disaster prevention as a total system of prediction, evacuation, recovery and disaster reduction.(2) show the variety of the activities and organizations involved in disaster prevention administration & give a brief outline of the individual activities & demonstrate how these are organized in the JPN disaster prevention administrative system.(3)exchange ideas & experiences concerning natural disaster prevention & discuss international cooperation for natural disaster reduction.

QUALIFICATION OF APPLICANT

(1) presently engaged in government agencies responsible for disaster prevention
 (2) not more than 45 years of age
 (3) university graduate or equivalent

LANGUAGE

English

COURSE CONTENTS

In this seminar, the emphasis is put on introduction of basic theory and exchange of ideas and experiences through discussions, observations and practices.
 The main themes are;

- (1) policy formation, enforcement and implementation of disaster countermeasures in Japan
- (2) international cooperation for natural disaster prevention and reduction
- (3) implementation of disaster countermeasures of local government in Japan

CORRUPTION CONTROL IN CRIMINAL JUSTICE II

汚職防止刑事司法支援II

Oct.27, 2003 ~ Nov.30, 2003 12 participants J0300804

OVERALL GOAL / PURPOSE

The frequency among public officials of bribery and abuse of authority is a serious obstacle to the development of the market economy. By transferring Japanese knowledge and expertise of regulation and enforcement, and by offering lectures on anti-corruption legislation and its enforcement, and discussion meetings with police inspectors and public prosecutors in this field, it is hoped that establishment of legal framework and its effective enforcement is realised in developing countries.

QUALIFICATION OF APPLICANT

- Applicants should: (1) be administrators, investigators, public prosecutors, or judges who are engaged in corruption control in criminal justice
- (2) be university graduates or the equivalent
- (3) have a sufficient command of English

LANGUAGE

English

COURSE CONTENTS

The course will consist of lectures, discussions, and observation.

- (1) analyse the current situation of corruption in Japan and participating countries
- (2) explore current problems relating to corruption in the criminal justice system and their solutions at the investigation, prosecution and trial levels
- (3) explore general measures to prevent corruption
- (4) enhance international cooperation in corruption cases
