BY RAINs AND SEDIMENTS

ACTUATION GUIDE FOR EMERGENCY CAUSED
BY RAINs AND SEDIMENTS

¿What should we know?

A **HAZARD** is an external factor which determines a risk.

The hazards are determined by:

Events caused by the Nature.

Events caused by the Mankind.

Events caused by the nature and worsened by men.

These events can cause damages to living beings, the environment and/or personal goods.

In our Country, the most common natural events are:

SEISMS (Tremors or Earthquakes).

DROUGHT that can produce forest fires and other consequences.

CONTINUOS RAINS which can cause FLOODING and LAND SLIDES.

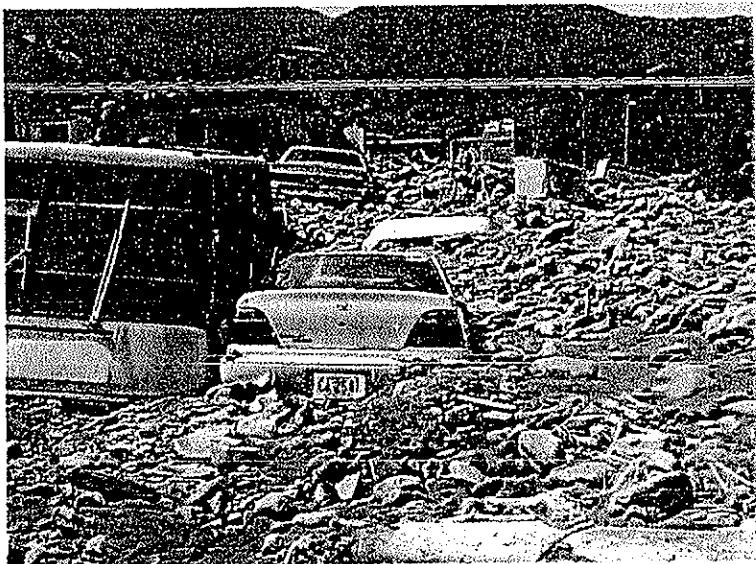

In our city, Caracas, flooding and landslides occur during the rainy season. Every year, these events leave a big amount of damaged and sometimes people injured or dead.

3

Let's remember the «Vargas Tragedy» occurred in December 1999, which left a great amount of deceased, missing, injured and damaged people. Usually, the most affected areas are located in the popular Barrios since these are more prone to suffer damages.

**El Rincón, Edo Vargas.
Dic.1999**

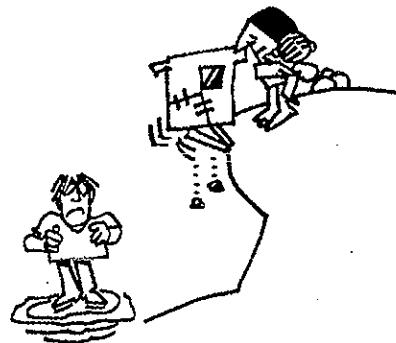

**Blandín, Caracas.
Dic.1999**

Some of the factors that determine a community's physical vulnerability are:

- The type of housing.
- The land's instability.
- Inadequate maintenance of gulches and other water beds.
- The faulty preparation of its inhabitants
- Lack of resources.

The Hazards and the Vulnerability determine the RISK in a directly proportional way.

¿Can we diminish the Risk?

iSure we can!!!

When a latent Hazard exists, we can diminish the Vulnerability and so we can diminish the Risk.

To diminish the Vulnerability of the Barrio as much as of the persons who inhabit it, we must adopt habits and measurements that turn into a normal attitude in our life.

Knowing our Hazards and Vulnerabilities and preparing ourselves adequately, we will be able to live more quietly.

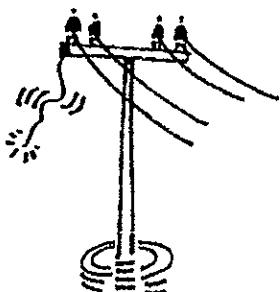

Is Our Barrio Vulnerable

to suffer damages caused by floods and landslides?

YOU DECIDE IT

**Following you will find a list of situations that can determine the physical vulnerability of your Barrio.
Checkmark those ones that you have observed:**

- Anarchical Constructions, non-planned.
- Non-safe structures, without appropriated basis
- Constructions without permission from Municipal Engineering.
- Obstructed escape-roads.
- Irregular and unsafe Stairways.
- Illegal Electrical Outlets.
- Trash accumulation inside the gulches.
- Obstructed Sewers.

6

- Broken pipelines and sewers.
- Instable Terrains.
- Flooding and/or landslides occurred in past years. (Historical)

¿How do you think
the physical vulnerability
of your **Barrio** is?

- HIGH
- MEDIUM
- LOW

8

¿What should we do?

iEasy easy! The first thing to do is to organize ourselves, internally; to answer to ourselves the following questions:

¿Am I really aware of the risk my family and I are running?

- YES
- NOT

¿Am I willing to participate continuously and in a lasting way in any activity that helps my Community to live with less hazard?

- YES
- NOT

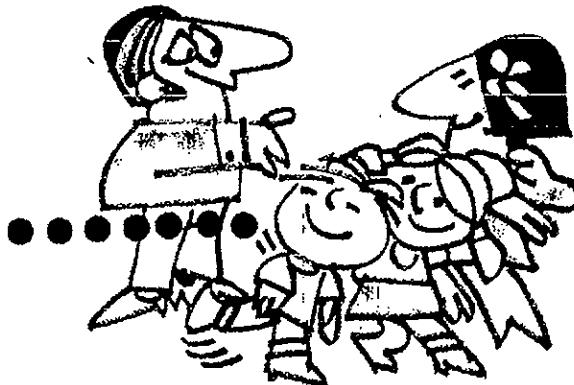

¿And people?

The people who inhabit the Barrio 12 de Octubre will be less vulnerable as long as they can respond timely and efficiently in case of an emergency produced by landslides or flooding.

The better a person is prepared to act in case of an emergency; the minor the probability will be of suffering physical damages.

The Vulnerability will be reduced, when EVERY member of the Community is prepared.

Answer the following questions:

¿Do you think you are ready to act in case of an emergency of this kind?

- YES
- NOT

¿Do you think your family is prepared?

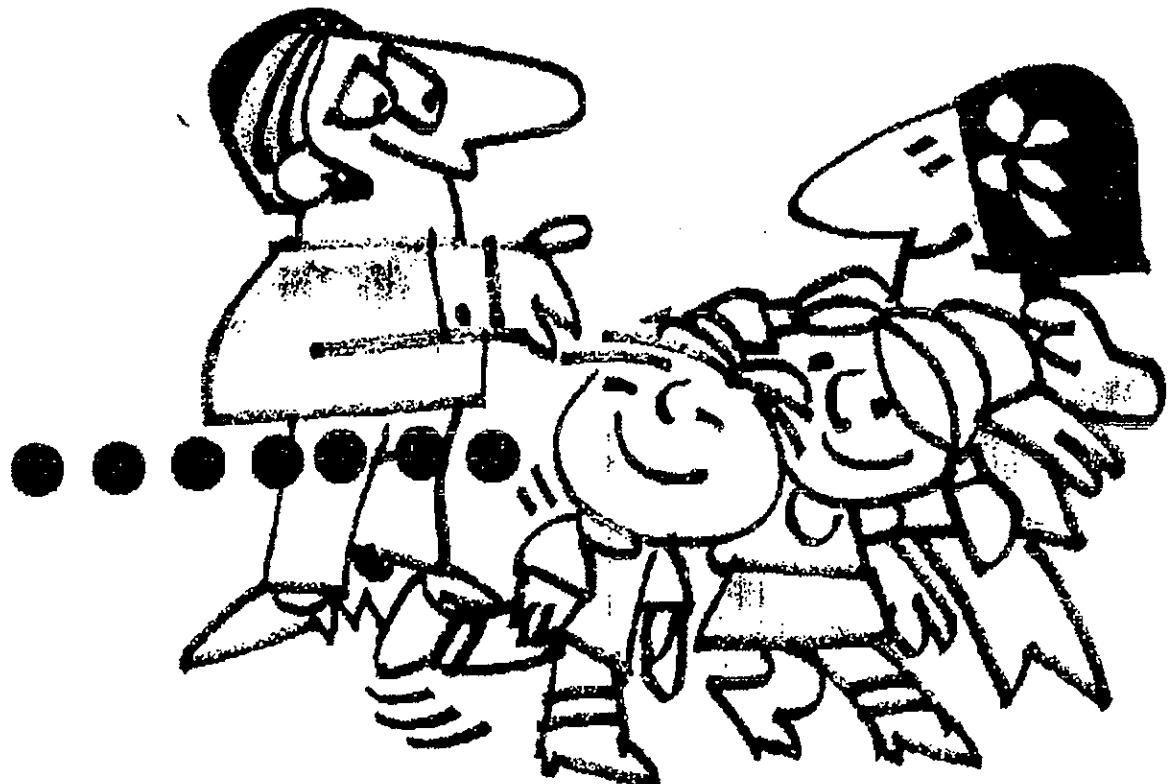

- YES
- NOT

¿Do you think that your Community is prepared?

- YES
- NOT

ORGANIZING THE FAMILY

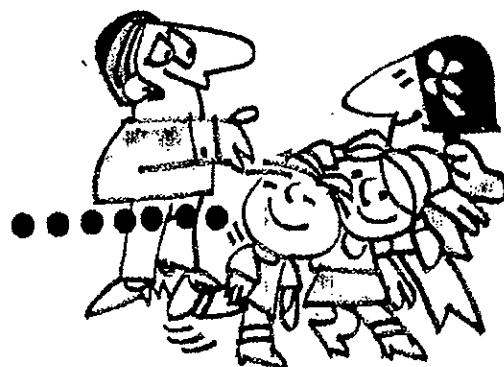

10

Step 1: Get your family together

Inform to your family about the need to be prepared for the rainy season. State the possibility that an emergency by flooding or landslide occurs and explain the risk they are running.

Get all of the family members involved in the next activities to be executed. If your family lived a prior experience regarding the described events, please remember the actions that were taken at that moment and the results obtained.

Step 2: Check up your Housing

11

Since when you don't stop and match details in your housing?

Execute this check list together with your family. Complete it with observations carried out in-site.

| SI | NO |
|--|----|
| ¿Is the housing located on an instable terrain? | |
| ¿Can it be damaged by near landslides? | |
| ¿Does it have cracked walls or floors? | |
| ¿The gas tanks are placed in a closed place, without enough ventilation? | |
| ¿Does it exist some gas escape? | |
| ¿Are there deficient electric installations? | |
| ¿Are there broken pipelines? | |
| ¿Do seepages exist? | |
| ¿Do you have gasoline or any other kind of fuel stored? | |
| ¿Is the housing located near a gulch or any other water bed? | |
| ¿Are the neighboring constructions in bad conditions? | |
| ¿Are there dangerous trees in the proximities? | |
| ¿Are there electrical systems near? | |
| ¿Has your housing ever been flooded? | |

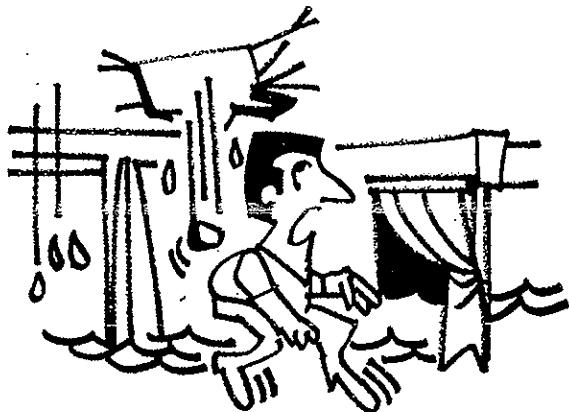

12

Many times, we don't perceive coming dangerous situations because we don't use to live with them.

WATCH CAREFULLY EVEN THE MINOR DETAIL.

Step 3: Elaborate a Risk Map of your Housing

Draw together with your family, a chart of your housing, pointing out on it

- The risks found during the check up.
- The escape routes.
- Stopcock and gas tanks.
- Electric Breakers

Use for that, colors, arrows, symbols, etc.

Make it on a paper sheet or a large cardboard and put it on a visible place of your home in a safe and ordered way.

Plan and practice with your family how to get out of your home in a safe and ordered way.

Point out the routes decided in the chart.

Remember taking into account the special needs of some members of the family such as babies, elderly or handicapped.

13

Draw the risk map of your housing

Step 4: Look for Information of your Environment

You must go out to the streets to observe and gather information that permits you to answer the following questions or other that you ask yourself or your family ask to themselves:

¿Does it exist inside my Community some organization that is taking care of our preparation for Emergency or Disaster cases?

- YES
- NOT

¿Where is it located? _____

¿Who conform it? _____

¿Which are the telephone numbers of the Organisms that take care of emergencies in my Barrio?

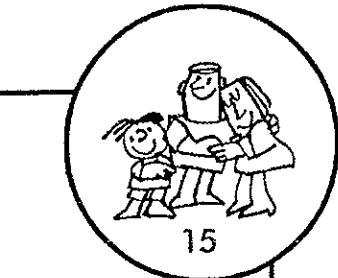

EMERGENCIES: 171

(From any CANTV telephone)

Here we will get communicated with Fire Department,
Transit Authority, Police Department:

| | |
|--------------------------|--|
| Neighbours Association | |
| Fire Department | |
| Police Department | |
| Domingo Luciani Hospital | |
| Pérez de León Hospital | |
| Barrio Adentro Mission | |

¿What kind of hazards do they exist in my Barrio and where are they located? Use as support the check list fulfilled before.

¿Which are the safest places to go in case of an emergency by flooding or landslide?

¿What is the safest route to get to them?

In case of this route be collapsed or flooded, ¿What alternate route could you use?

¿Does some member of the family possess a specific preparation that might be applied in case of an emergency?

First Aids _____

Rescue and Salvage _____

Psychological Support _____

Others: _____

Establish together with your family a meeting point in case the family gets separated during an eviction.

• Did you know that... .

The Barrio 12 de Octubre counts on the following resources?

Health Centers

- Two (2) Offices of the Barrio Adentro Mission, with 6 doctors who work per shifts.
- A Deontological Popular Clinic.
- A Day Clinic in process of adequation

Educational Centers

- A Public School («Abajo Cadenas» Municipal Educative Unit).
- Two Private Preschools.
- A Daily Care Home.

Religious Centers

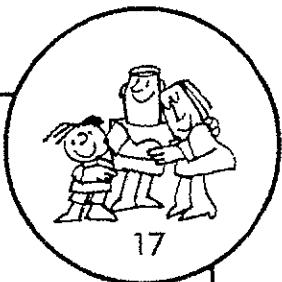

- A Chapel.

Trade Shops

- Diverse Trade Shops and Retail Grocery Stores.
- Fruit Shops.
- Bakeries.
- A Pharmacy.
- A Food Cooperative
- Several Car-Repair Shops and Car-Accessory Stores.
- A Feeding Unit for incomeless people.

Sports Facilities

- A Multi-Usage Court.

Community Organization

- Neighbours Association (ASO-12)
- Bolivarian Circles
- Urban Land Committee
- Electoral Battle Units

External Resources

The Neighbours Association maintains links with:

- The Sucre Municipality Mayoralty through the
 - Social Development Direction
 - Fundasucré
 - Municipal Controllership
 - Citizen Participation
 - Municipal Cadastre

FUNDACOMUN-CAMEBA

Federation of Neighbours Association of the

Sacre Municipality (**Miranda State**)

Autonomous National Service of Integral

Attention to Childhood and Family (**SENIFA**)

FUNDABARRIOS

The Barrio 12 de Octubre's Population Census is the following:

| SECTORES DEL BARRIO | TOTAL | ADULTOS | NIÑOS |
|---|-------------|-------------|-------------|
| Calle Principal y Adyacencias | 487 | 322 | 165 |
| Escalera Tello Malave | 57 | 43 | 14 |
| Escalera Los Camejos | 29 | 21 | 8 |
| Escalera La Farmacia | 96 | 65 | 31 |
| Escalera Bucare | 162 | 104 | 58 |
| Escalera Caurimare | 221 | 139 | 82 |
| El Cerrito | 284 | 175 | 109 |
| Atrás de la Escuela Abajo Cadenas | 145 | 84 | 61 |
| Caña de Azucar / El Pino | 30 | 22 | 8 |
| El Puente | 213 | 145 | 68 |
| Escalera Brisas del Zulia | 153 | 103 | 50 |
| Cristo Rey | 108 | 67 | 41 |
| Parte baja del Cerrito / 19 de Abril / Barlovento | 401 | 252 | 149 |
| Araguaney / Escalera 20 de Agosto / Barlovento | 347 | 224 | 123 |
| Guicaipuro | 209 | 134 | 75 |
| TOTAL | 2942 | 1900 | 1042 |

Step 5: Check up and practice the Actuation Guide with your family.

The Actuation Guide will point out some actions that you must take **BEFORE**, **DURING** and **AFTER** an Emergency.

Read them with your family and make sure that everybody understands them perfectly.

Practice the actions that you consider necessary.

19

Organizing the Community

STEP 1 Communitarian Organization

Why is it necessary to prepare ourselves as a Community?

To be successful in the development of a Plan or Activity destined to reduce the vulnerability of a Community in regards to emergencies caused by rain and sediments, the direct participation of the organized community is fundamental.

This would allow people susceptible of being affected to get to know their risks and better understand their responsibility during the execution of the actions

In the community at **Barrio 12 de Octubre** do not exist groups nor organizations focused towards the prevention of natural events, as are landslides and floodings, which have already occurred in the barrio and have caused loss of homes and diverse material goods.

In the barrio these emergency situations have occurred in the rainy season, and since there is no drainage for the rain water in the upper areas of the barrio, which brings as consequence flooding of the stairways which conform the barrio, which makes it impossible to be normally used by the inhabitants of the barrio.

12 de Octubre barrio is vulnerable to floodings which could affect it greatly. This could result in long lasting repercussions – people could be injured, some die, and the property damage could reach high amounts of money.

If a flood affects the community, the local authorities and organizations for disaster assistance can offer help. Nevertheless, it is important for you to be prepared as well. The local attention organisms may not be able to reach you immediately, or maybe they would have to focus their attention in other priorities.

Do you wish to have a Community organized in order to offront events caused by rain and sediments?

20

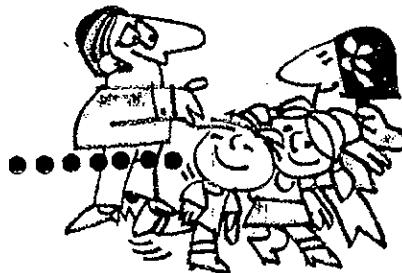

For this to happen, the following activities should be done:

FORMING OF THE LOCAL ORGANIZATION FOR EMERGENCY.

An organization for emergency is very important to community. This will have the responsibility of organizing and executing the initial actions being responsible for the good functioning of the system, monitoring that the Working Commissions are fulfilling their functions according to the steps indicated in the Manual. It is important to note that the community is to decided what kind of organization wants for the Barrio. In case this organization exists, it shall have to be evaluated and restructured if necessary. The persons belonging to this committee must have sufficient motivation, interest and time to obtain the proponed objectives. It must be included in it some persons who have many years in the area and preferably, who have experienced previous emergencies. We must remind that for the good functioning of a working team, its members must possess certain characteristics as are:

- Helping spirit towards the community.**
- Ease to negotiate and consensus.**
- Disposition towards team work.**
- Motivation.**
- Creativity.**
- Tolerance.**
- Positive self-esteem.**
- Common interests.**
- Feeling of belonging.**

Preferably, the members should be representatives of groups as the ones we mention as follows:

Non Governmental Organizations (ONG), volunteer organizations, clubs, communitarian or neighbor associations or any other organization with a common objective.

Public Sector: Municipality, local State Offices, Fire Department, Police Force, Church, Civil Protection, Rescue and Salvage Groups, Health, etc.

Private Sector: Industries, Corporations, farmers, builders, business people in general, etc.

21

ACTIONS

Identify the possible stakeholders with the features pointed out in the previous points.

Make an initial meeting to determine who wishes and accept to form the Local Emergency Committee.

Establish a Commitment-Act specifying the roles and responsibilities of each one of the members of the Committee.

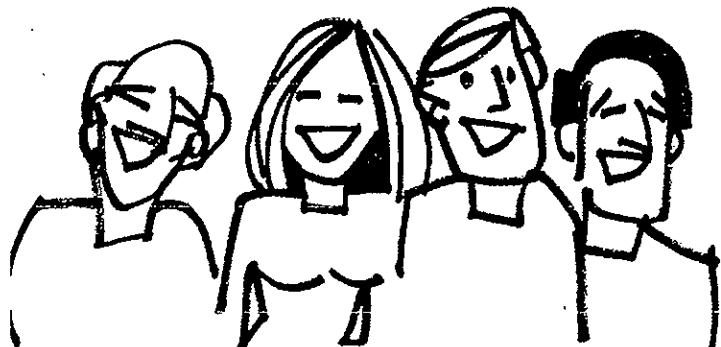

Structure the Local Emergency Committee.

Establish an Activity Chronogram for the following actions of the Plan.

Make and distribute a Summon to all the Community members for a general meeting where the importance of the Manual must be explained for the implementation of an Early Warning System for events produced by rain and sediments, based in the participation of the Community. In this meeting it shall be established the need to form the Working Commissions.

Comment:

In case that within the Community exists a Neighbor's Association or any other Neighbor Organization, this one could act as a Local organization for Emergency.

22

LOCAL ORGANIZACION

BARRIO 12 DE OCTUBRE. **PETARE**

Name**Phone Number**

| | | |
|--|--|--|
| President: | | |
| Vice-President: | | |
| Secretary: | | |
| Treasurer: | | |
| Critical areas' Coordinator of Observation and Evaluation: | | |
| Warning and Alarm System Coordinator : | | |
| Eviction Coordinator : | | |
| Transportation Coordinator: | | |
| Shelters Coordinator : | | |

| Available Resources' Coordinator: | | |
| Public Sector Representative: | | |
| Private Sector Representative: | | |
| Other Representatives: | | |

23

COMMUNITY CENSUS

It is fundamental to establish a Census of the Community in order to know how many and which persons are at risk of being affected by an event caused by rain or sediments, or any other event which could happen in the area. This census must include the identification of the persons regarding their names, ages, special physical conditions or any other condition which requires a special attention or help. Likewise it should be mentioned the role occupied within the Community or outside it, preparation or capabilities in any specific task, telephone number or other locating method, address and family group.

(for this the head of the family should be censed, indicating the nearest family group).

ACTIVITIES:

Design an instrument to obtain the necessary information.

To establish work groups to make the census house by house.

Classify the information according to pointed out parameters.

To make the final Directory.

Establish mechanisms for the updating of the obtained data, when same become modified.

In the case of Barrio 12 de Octubre, even though a Census already exists, it is necessary to update it and adapt it.

24

CREATING THE WORKING TEAMS

The Working Teams shall be made by sharing the responsibilities according to the training and/or abilities of each person. This volunteer personnel shall be formed taking into account that each community must determine the Teams they consider really necessary for the complying of the Plan. It is very important to determine the role to assume by each person within the Team.

It is only suggested to make the following working teams:

1. To contact the Assistance Organisms
2. To gather the previous information on damages to people, structures and services, product of the flooding or landslides in the area.
3. To shape the information on the vulnerability map in the lists designed for such objective
4. To assign the work commissions for the most affected areas prioritizing the activities.
5. To establish the mechanisms, schedules and conditions of the reports to be submitted by the different working commissions.
6. To gather the information of the working commissions and make a binnacle.

STEP 2

26

TO STUDY THE VULNERABILITY OF THE **BARRIO.**

It is important for the community to be aware of its hazards, its vulnerability towards the risk. When the hazard is an external risk factor (not depending on ourselves) little to nothing we can do to intervene over this, instead the vulnerability is an internal risk factor (depending on ourselves) where we can intervene over this. To adequately intervene in order to reduce the risk or minimize it, it is necessary to be aware of it. Following we show some elements which contribute to become aware of it:

History of the Area:

Study the history on floodings and landslides in the Barrio

Investigate with the elderly of the place, with persons that have lived in the Barrio for many years, ask them:

For how long it rained before a flooding occurred?

What changes were observed in the behavior of the gulches?

What areas of the community flood: streets, houses, public places, etc.?

When floodings occur up to what height has the water reached?

Where do the overflowing waters come from?

Which have been the human and material damages?

Which are the areas mostly affected by landslides and floodings?

How long has it been since a flood or a landslide has occurred?

How did the community react to these events?

Make a Risk **Map of the Barrio**

In a map of the community covered with a transparent acetate do the following:

Show with a marker the gulches and water canals?

Indicate the areas surrounding it?

Mark the location of the Church, school, clinic and any other place that could work as temporary shelter?

Identify the most vulnerable places?

Show the streets and principal avenues?

Any other information you consider convenient?

Use the Population Census to:

Revising the population census of the Barrio can provide useful data to:

Quantify the amount of population that could be affected according to my most risky areas?.

Know how many children, boys, girls, ages, adults, men and women.

This is to count on the resources according to age and gender which would be necessary in a refuge or temporary shelter?

Determine where I would have the largest people concentration?

Compare the total population census against the damaged or evacuated people in order to avoiding a person foreign to the area to declare himself as a victim in an emergency?

STEP 3:

28

Request Help

The labor undertaken by the community in **Barrio 12 de Octubre** benefits the inhabitants of the area and the State Agencies who already are trying to improve their conditions to face a flooding or a landslide. The State Agencies see in these attitudes a fundamental element for their eventual intervention in an event.

They will provide the necessary help.

The directors of the Neighbor's Association must find help from the organisms such as the Fire Department, Civil Protection, Municipal Engineering, Service Corporations, etc. These would be able to contribute with you making home inspections, training the work teams, help improve the action plan, etc.

What should we request?

1. Information

In regards to events occurred in your Barrio, risk studies, contingency plans.

2. Training Plans

Which should include speeches, courses and workshops to prepare your community and the working groups to face any adverse event in any of its stages (**before, during, after**). You together with them must determine the training needs required.

3. Simulacrum and Simulations

The Attention Organisms can help make an evacuation simulacrum enactment or a reception and treatment to the evicted persons. It would also be a good idea to make Disaster simulation games.

This is a simulation made by different working groups who place their acting on paper according to the event or various damaging events in their community.

This game helps them to get used to stressing situations which are lived through these events.

STEP 4

Develop an Early Warning System

When everything indicates that a flooding will soon occur, it is necessary for your community to be prepared but... **How could they be alerted?** Some strategies must be developed which are:

1. Strengthen the Internal Communication Network:

The community leaders and working groups must know how they must communicate and practice how they would do it in a determined situation, they must make activation simulacrum. With the activation simulacrum they would be able to verify just how effective the employed methods are for this and which could be the alternate communication mechanisms. For this it is necessary to make a report. We suggest the following format:

| Names | Telephone Number | Address | E-Mail Address | Work Team |
|-------|------------------|---------|----------------|-----------|
| | | | | |
| | | | | |
| | | | | |

2. Establish the External Communication Network.

In calmed times as in those of emergency, the community leaders must establish contacts with the attention organisms, may they be primary or secondary, which is why we must create a list with these contacts.

| Organism | Telephone | Address | E-Mail Address | Contact Person |
|----------|-----------|---------|----------------|----------------|
| | | | | |
| | | | | |
| | | | | |

30

1. Place flooding warning signs.

When rains begin and their intensity increases in a prolonged period of time, the flooding risk is closer to you. But it is necessary for you to know just how close this is, which is why these water flow measurements notice-boards will help you. These notice-boards signal where the dangerous water limits are. The placement of these is a job that you yourselves must do. Who knows the Barrio better than yourselves?

2. Establish your alert and alarm.

When meteorological and hydrological information is obtained which determines that a flooding is imminent, or you receive information that this has begun, the persons in charge of checking these signs or any other persons who sees a condition of a possible flooding must inform the team leaders. There are three types of conditions:

- **Advising of a flood.** This is issued by the Emergency Operation Center (COE) for all the volunteer measure readers, all the persons in charge of the emergency plan and all the inhabitants in general to keep a follow-up on the behavior of the rains.

- **Flood Alert.** Issued by the **CEL** for the different organized groups and persons in charge, in order for them to be prepared and to execute the actions prior to a flood. The alert shall be disseminated using the local radio, the church bell, speakers, horns, sirens, red flag and any other instrument which could have the longest range for the whole community to be alerted.

- **Flood Alarm.** Issued by the competent organisms. Which will order the evacuation of the inhabitants to the shelters and all the other actions specified in the emergency plan.

STEP 5

Establish Evacuation Routes

In the vulnerability map, where the most vulnerable areas are pointed out, it should be showed which is/are the ways to lead to a safer place for the population. Think of all the possible situations (if Street A is blocked or if the water is too high, do I go to street B or C as an alternate evacuation route? Check the land since on the map it could seem easy but in reality it could be very different. Keep your map updated.

STEP 6

Determine the possible Temporary Shelters.

When a flood occurs which requires the evacuation and relocation of the population, these could be located in places within the community, such as churches, schools, sports grounds, or any other place that for its features allow to accommodate persons until the reestablishment of the minimum conditions for them to be able to return to their homes or be relocated to another place.

Remember that this is a TEMPORARY measure. Contact the persons in charge of the possible temporary shelters, smooth the way, and make agreements to be allowed to use these spaces in case of an emergency.

Observe these places well; make calculations of how many families could be accommodated there. Write down the information; add it to the available or locatable resources. To make an estimate of the approximate capacity you divide the square meters (mts^2) area between
4. Example for 40 mts^2 $40 / 4 = 10$ persons.

Temporary Refugees

| Type | Address | Contact Person and Telephone Number | Area Square Meters Mts ² | Number of Bathrooms | Capacity of persons |
|--------|---------|-------------------------------------|-------------------------------------|---------------------|---------------------|
| Church | | | | | |
| School | | | | | |

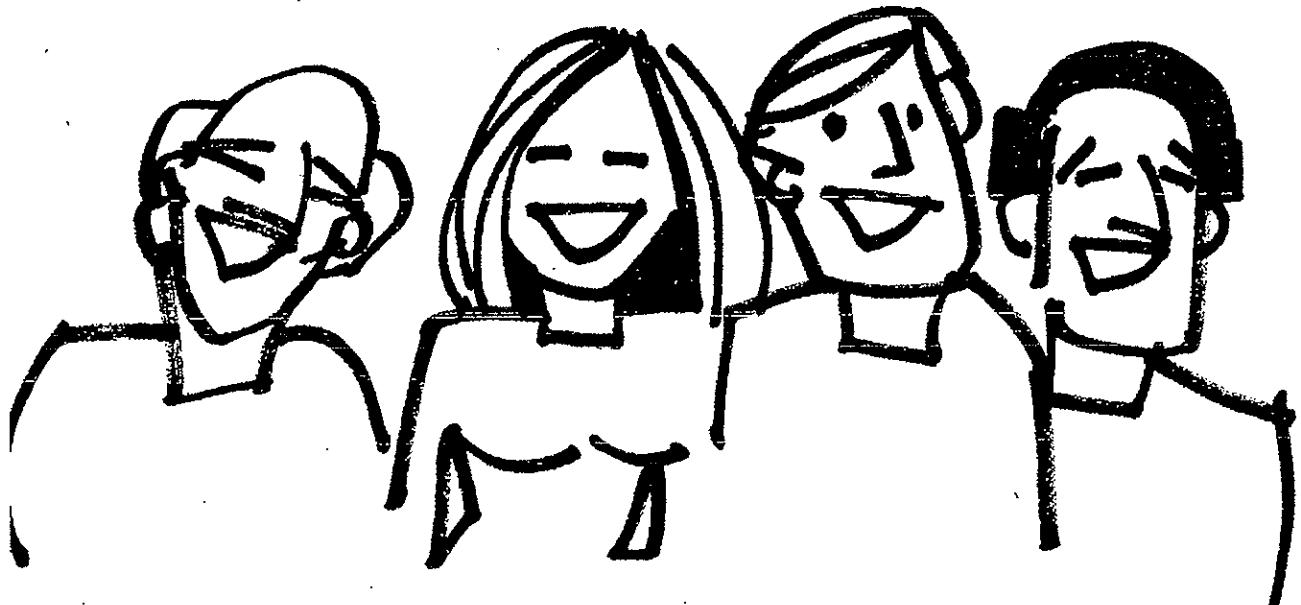

BEHAVIOR GUIDE FOR EMERGENCY CASES CAUSED BY RAIN AND SEDIMENTS

(FLOODING AND LANDSLIDES)

Following, we will indicate to you some countermeasures to be taken in
the **BEFORE, DURING AND AFTER** an **EMERGENCY**.

Complete this Guide with those actions that you consider necessary or
that arise from your family's concern.

jica

BEFORE

1

What to do?

During the rainy season:

TAKE PREVISIONS!

Repair, as much as you can, broken windows, faulty locks, electric wiring, gas escapes, or any other risky situation detected in your housing.

Remember to your family the Emergency measurements.

Keep informed on possible floods. Listen to the radio and TV.

Keep availability of lanterns, portable radio and enough batteries.

Keep, if possible, reserve of foods, chlorine to make the water drinkable, matches and personal hygiene articles.

Place in visible place the Emergency telephone numbers.

Put your home keys in a visible and accessible place.

Inform yourself on Warning and Alert mechanisms of the Community and talk about it with your family.

Attend the informative meetings called in by the Neighbours Association.

2

In Case of Strong and Lasting Rains: **iBEWARE!**

Don't leave your children unattended at home.

Memorize the safe places inside or outside your home.

Locate the escape routes and make sure that they are clear of obstacles.

Place your articles and important documents in high places.

Remember your Community Alert's mechanisms.

Pack warm clothes, foods and documents just in case that the need of evacuation appears.

Do not diffuse neither make yourself echo of rumors and non-confirmed alarms.

Observe any irregular situation inside or close to your home and do inform the competent authorities.

Keep alert to the radio, TV information or the ones disclosed by the zone authorities.

Get ready to evict, in case of being necessary.

3

In case of Notice about Imminent Flooding or Landslides:

Get out of your Housing!

iKeep calm and act prudently!

Make sure that your family maintains together.

Carry only the necessary stuff with you

Let go of your pets

Close gas and water keys

Disconnect the electricity

Leave your home but NOT RUNNING

Pay attention to the authorities' indications

Don't get close to light posts or wires with electricity

Don't use your car, unless it is indispensable

If you observe the water level increases on the street

you are driving on with your vehicle, GET OUT OF

IT IMMEDIATELY

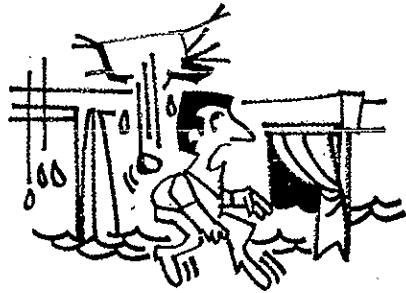

Avoid walking over flooded areas

Memorize the safe places and head to them

Avoid crossing river and gulch beds. THE WATER
LEVEL CAN INCREASE SUDDENLY.

Get away of the zones that may suffer landslides

Get away of trees and electricity posts

After the Emergency:

iBe Careful!

Make sure that every family member is ok.

Don't come back to the affected area until the authorities indicate it.

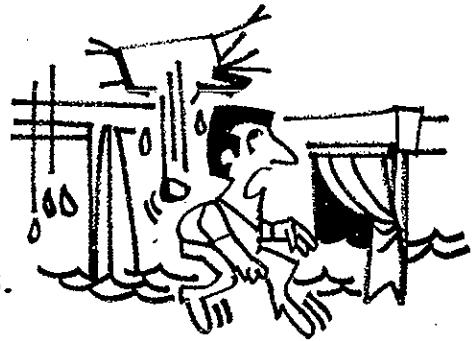

Don't step on or touch fallen electrical cables.

Don't get close to edifications in danger of collapse.

Offer help to the affected persons, as much as you can.

Don't move the wounded persons.

Report them to the competent authorities.

When allowed by the authorities, go to your home WITHOUT THE CHILDREN.

Check your housing, taking into account the existent risks.

Do not smoke or light up matches.

Don't push the electricity breakers.

Clean immediately any toxic or flammable substance that has spilled.

Don't reconnect the gas, water or electricity until you are sure that you can make it safely.

Evaluate the damages to your housing.

Verify your family member's emotional condition and ask for help, if necessary.

Back to normal

When the authorities indicate it:

Come back home with your family.

Reestablish the water, electricity and gas basic services.

Use your reserves: don't drink water neither food contaminated with water from the flooding.

Proceed to clean and organize your housing
If your housing didn't suffer damages, offer collaboration
to your affected neighbours.

If your housing got seriously affected, inform
to the authorities for your relocation.

Join the commissions organized by neighbours and
authorities.

6

Work and studying place of your family members.
Family and neighbours cell phones and Neighbours Association members.

If you are a Family Head: (Father,Mother, adult) Speak to your family clearly about the risks of the area, but avoid creating panic.

The younger children can get scared with information that they can't handle properly.

Explain to your family the advantages of being organized and prepared for an emergency caused by rain and sediments.

If you are a child, a girl, adolescent or live temporarily with the family:

Give him/her the Manual and explain the importance of getting his/her family organized and prepared.

Comment this Manual with your neighbours and compare information.

Actively join the plans promoted by your Neighbours Association.

Now...

Do you think that you and your family are prepared to act in case of an Emergency caused by rains (Flooding or Landslide)?

- YES
- NOT

7

Where do you work or study? Where do your relatives work or study?. Where do your friends are working or studying?
Cellular phones?

Head of the family: (Father, Mother, Adult)
