Analysis and Conclusion:

- 1. With reduced interest rate, the WACC will reduce by 3.49%.
- 2. The lower interest rate is reflected on higher rates of return (on revenues and total assets).
- 3. The impact of lower interest is highest in 2010, the last year of loan withdrawal and loan balance is at the highest.
- 4. The impact of lower interest starts to lower in 2011 when repayment of loan starts.

Category I are subject to the prior permit from the Ministry of Environment when the amount of their effluent exceed ten cubic meter per day (10~M3 /day) but not including the amount of water volume used for cooling the engine.

Category II omitted.

Category II shall be necessarily required to apply for the permission from the Ministry of Environment.

2. Air Pollution

(1) Maximum allowable standard of pollution substance for immobile sources in ambient air

| No | Parameters | Maximum level of discharge |
|----|--|------------------------------|
| 1 | Particulate in smoke of : | |
| | Incinerator | 0.4g/m3 |
| | Heating metal | 400mg/m3 |

| 23 | Sulfur trioxide SO3 | 35mg/m3 |
| 24 | Phosphoric Acid H3PO4 | 3mg/m3 |
| | Chemical organic substance | |
| | (omitted) | |

Remark: This standard is applied to control of pollution substance for immobile sources to atmosphere.

(2) Gas emission standard of mobile sources

| | | | Level of emission | | | | |
|----|---|-----------------|-------------------|---|---------|------|----------------|
| Nº | Kind of Vehicle | Kind of fuel | CO(%) | | HC(ppm) | | Dark fume % |
| | | | A | В | A | В | - |

| 2 | Motorcycle contain 4 chapter combustion | Petrol | 4.5 | 4 | 10000 | 2400 | - |
| 3 | All kind of vehicles | Petrol | 4.5 | 4 | 10000 | 800 | - |
| 4 | All kind of vehicles | Diesel | - | - | - | - | 50 |

<u>Remark</u>: This Standard applied to control of noise emission of mobile sources into atmosphere.

A: Refer to all kind of vehicles used over 5 years as from year produce.

B: Refer to all kind of vehicles are new importation in first 5 years as from year produced.

(3) Sulfur, lead, Benzene, and Aromatic Hydrocarbons standard permitted to fuel and other combustion substances

| N° | Combustion Substance | Sulfur (S) | Lead (Pb) | Benzene | Aromatic Hydrocarbon s |
|----|-------------------------|------------|-----------|---------|------------------------------|
| 1 | Fuel Oil | 1.0% | | | |
| 2 | Diesel | 0.2% | | | |
| 3 | Petrol | - | 0.15g/l | 3.5% | 50% |
| 4 | Coal | 1.5% | | | |

Remark: This standard applied to control of Sulfur, lead, Benzene, and Aromatic Hydrocarbons that permitted to fuel and coal

3. Noise

(1) Vehicle of noise in public and residential area maximum permitted noise level

| Nº | Category of vehicle | Maximum noise level permitted (dB(A)) |
|----|--|---------------------------------------|
| 1 | Motorcycles, cylinder capacity (CC) of the engine does not exceed 125cm3 | 85 |
| 2 | Motorcycles, CC of the engine exceeds 125cm | 90 |
| 3 | Motorize tricycles | 90 |
| 4 | Cars, taxi, passenger vehicle for the carriage of not more than 12 passengers | 80 |
| 5 | Passenger vehicle constructed for carriage of more than 12 passengers | 85 |
| 6 | Truck permitted maximum weight does not exceed 3.5 tones | 85 |
| 7 | Truck permitted maximum weight does not exceed 3.5 tones | 88 |
| 8 | Truck engine is more than 150 KW | 89 |
| 9 | Tractor or any other truck not elsewhere classified of described in this column of the table | 91 |

Remark: This standard is applied to control of noise emission standard for all kind of vehicle when operating on the public road.

(2) Maximum permitted noise level in public and residential area (dB(A))

| | 1 | P | Period of time | |
|----|---|----------------------|-----------------|------------------|
| N° | Area | From 6h AM to 18h | From 18h to 22h | From 22h to 6hAM |
| 1 | Quiet areas - Hospitals - Libraries - School - Kindergarten | 45 | 40 | 35 |
| 2 | Residential area: - Hotels - Administration offices - House | 60 | 50 | 45 |
| 3 | Commercial and service areas and mix | 70 | 65 | 50 |
| 4 | Small industrial factories intermingling in residential areas | 75 | 70 | 50 |

Remark: This standard is applied to control of noise level of any source of activity that emitted noise into the public and residential areas.
