9-8.本計画対象 6 郡の選定概容

**Site Districts Selection**

1) Precondition: **Letter of Interest**

*Letter of Interest* is prerequisite: ○in the Table below shows the expressed interest in participation

2) First Step: **Four Criteria for district selection**

Program sites will be the districts with worst status at the following three criteria:

Criterion 1: Lower female students' ratio against a male student from Grade 1~9

Criterion 2: Higher female dropouts: Higher loss of female ratio compared to Grade 1.

Criterion 3: Fewer female teachers: More female students per female teachers.

### Criterion1. Lower female students' ratio against a male student

対男子女子生徒比のより低い郡

(1) Definition:

Female students' ratio against a male student is the number of female students divided by male students. Districts with lower female ratios will be selected here as potential targeted areas.

男子生徒数を1人に対する女子生徒比は、女子生徒を男子生徒で割った数。ここでは、その女子比が低い地域を事業対象郡の候補とする。

(2) Method:

1) Ranking from better districts with fewer difference between female and male of Grade 1~9.

2) Identify the worst ranked districts by mean ranking.

Grade1~9の各Gradeを、男女比の差が少ない地域から良好な郡としてランク付けしたのち、ランキングの平均値 (Mean) から、ワースト郡を探しだす。

## Criteria2. Higher female dropouts: Higher loss of female ratio compared to Grade 1.

中退/落第程度

### (1) Definition:

Female dropouts are presumably estimated by examining the loss (minus difference) of female students' ratio against a male (Criterion 1) compared to the ratio of Grade 1, as baseline. Districts with bigger loss will be selected as potential targeted areas.

Grade 1 が上がるごとの対男子女子生徒比 (Criteria 1) について、Grade 1 をベースラインとしてその値との差異 (マイナス数値) を見て進学できない(中退・落第) 女子比の大きさを推測する。マイナス差 (女子比の減少) が大きい地域を、対象郡の候補とする。

### (2) Method:

1) Ranking from better districts with less loss from Grade 1, focusing on Grade 2, 4, 6, and 9.

2) Identify the worst ranked districts by means rank from focused Grade 2~9.

Grade2, 4, 6, 9 における Grade1 時点での対男子女子生徒比との差を求めて、良好なもの(プラス差の大きいもの)からランク付けしたのち、平均値からワースト郡を探し出す。

### Criterion 3: Fewer female teachers: More female students per female teachers

女子教員 1 人あたり女子生徒数

(1) Definition:

Number of female students per female teacher implies the enough or deficient number of female teachers. Districts with fewer female teachers will be chosen as targeted areas.

女子教員 1 人あたりの女子児童生徒数から、女子教員数の不足を確認する。女子教員数がより少ない郡を、対象郡の候補とする。

9-10.評価五項目の基本概念

During the Program implementation, JICA Headquarters will send the Evaluation Study Team to assess the achievement and evaluate the effectiveness of the Program. The evaluation study will be jointly conducted by both sides, based on the following five criteria, which have been also used for preparatory study (Program impact analysis). The study will be conducted in some six month before the completion of the Program, and in the middle of the Program when necessary.

Basic idea of five criteria is summarized as follows:

**1.Relevance** : Examine the consistency of the *Program purpose, Overall and Super goals* with the educational development policy of Yemen and Basic Human Needs of the Yemeni people.

**2.Effectiveness** : Examine the effective achievement and outcomes of *Program purpose* and *Outputs*.

**3. Efficiency**: Examine the employment of *Input* to bear *Outputs*, at quantity and quality, focusing on timing, resources used and cost performance.

**4.Impact** : Examine negative impacts to affect the Yemeni society as well as positive impacts to fulfill the long-term goals.

**5.Sustainability** : Examine whether Program targeted people and organization will sustain the benefits from the Program in long-term, focusing on institutional and financial capacity, socio-cultural, environment, and technological aspect.

**Five criteria shown in PDM**

<b>Criteria PDM</b>	<b>Relevance</b>	<b>Effectiveness</b>	<b>Efficiency</b>	<b>Impact</b>	<b>Sustainability</b>
<b>Super goal</b>	Whether Program purpose, Overall and Super goals have consistency with the Country's needs?			What impacts are observed?	Whether the Country will sustain the benefits after the completion of the Program?
<b>Overall goal</b>					
<b>Project purpose</b>		How Outputs contributes to achieve the Program purpose?	How the Inputs are used and converted into the Outputs?		
<b>Outputs</b>
