1.a. ADD PROCESS

1.b. DESCRIPTION

1. Read User Entry Data

User Entry Data are:

- Title
- Story/Description
- Content File
- Content Image

Show Error Message if Title is left blank.

Show Error Message if one of Content File or Story is left blank

Content File should have extension *.txt, otherwise error message will be displayed

Show Error Message if content image is not in allowed type. The allowed image file to be updated is only jpg, gif or png.

Show Error Message if image size is more than 50 KB

Sequence No will be generated automatically by system, with rule:

Sequence No = max Sequence No + 1 (for each type)

The Sequence No will be started by 1 for each content type.

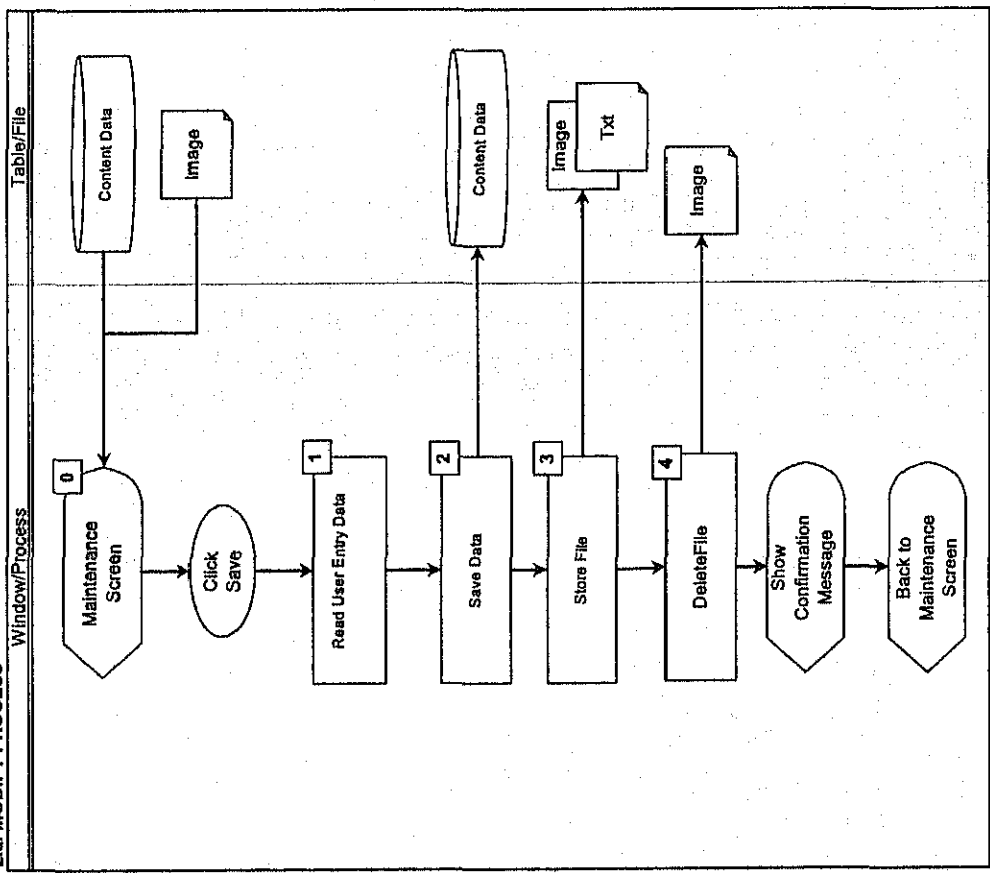

The list of story will be sorted descending, but only for Seq No = 0, that is Welcome Indonesia will be displayed in first row

Program Design				Created on	Created by	Updated on	Updated by	Page
4.1. Home Maintenance				31/08/2006	AR			19/70
2.	Save the Data into Database When user in add mode Save the Data into table TB_Content	The field type will be filled by character "t" automatically If user fill both story/description and content file, the content file will be neglected, and story/description in the text area will be saved into database. If user only fill content file without fill story/description, the content of content file will be read and saved into database.	When input for description, HTML tag will be disabled. <Enter> will be recognized and displayed in preview and home content story screen.					
3.	Store the image File	Store the image File in the following folder The file is stored in two place : live directory: /file/content/ backup directory: /file/content/backup/ File will be saved with format: filename_YYYYMMDDHHMMSS						
4.		if user input story/description using content file, the content file (txt) will be saved in folder: /file/content/backup/						
5.		If there is file with same name in the folder. /file/temp , then the delete the file in that folder. Show Confirmation Message if data can be stored successfully

2.a. MODIFY PROCESS

2.b. DESCRIPTION

- 0 Retrieve Data
 - Retrieve Data from database based on Sequence No.
 - Retrieve image file from folder : file/content/
 - 1. Read User Entry Data
 - User Entry Data are:
 - Title
 - Story/Description
 - Content File
 - Content Image
 - Sequence No (editable)
 - Show Error Message if Title is left blank.
 - Show Error Message if one of Content File or Story is left blank
 - Content File should have extension *.txt, otherwise error message will be displayed
 - Show Error Message if content image is not in allowed type.
 - The allowed image file to be updated is only jpg, gif or png.
 - Show Error Message if image size is more than 50 KB
- The list of story will be sorted descending, but only for Seq No = 1, that is Welcome Indonesia will be displayed in first row

When modify existing story, user can edit the Sequence No with rule:
 modify Sequence No to greater number
 before after

No	Title	No	Title
xx	A	xx	G
xx-1	B	xx-1	A
.	.	xx-2	B
.	.	.	.
yy+1	F	yy	F
yy	G	yy	G

modify Sequence No to lower number
 before after

No	Title	No	Title
xx	A	xx	A
xx-1	B	xx-1	B
.	.	.	.
yy+1	F	yy+2	F
yy	G	yy+1	G
yy	A	yy	A

3.a. PREVIEW PROCESS

3.b. DESCRIPTION

1. Read User Entry Data

User Entry Data are:

 - Title
 - Story/Description
 - Content File
 - Content Image
 - Sequence No (only editable when modify story)

Show Error Message if Title is left blank.

Show Error Message if one of Content File or Story is left blank

Content File should have extension *.txt, otherwise error message will be displayed

Show Error Message If content image is not in allowed type. The allowed image file to be updated is only jpg, gif or png.

Show Error Message If image size is more than 50 kB

Sequence No will not be processed in the preview process.
2. Store the image File with the Following Name:

Store the image File in the following folder

/file/temp
3. Display Preview Screen (new window)

Display Preview Screen based on data from user entry field. Nothing to do with database. The image is retrieved from folder: /file/temp

If user fill both story/description and content file, the content file will be neglected, and story/description in the text area will be displayed in preview screen.

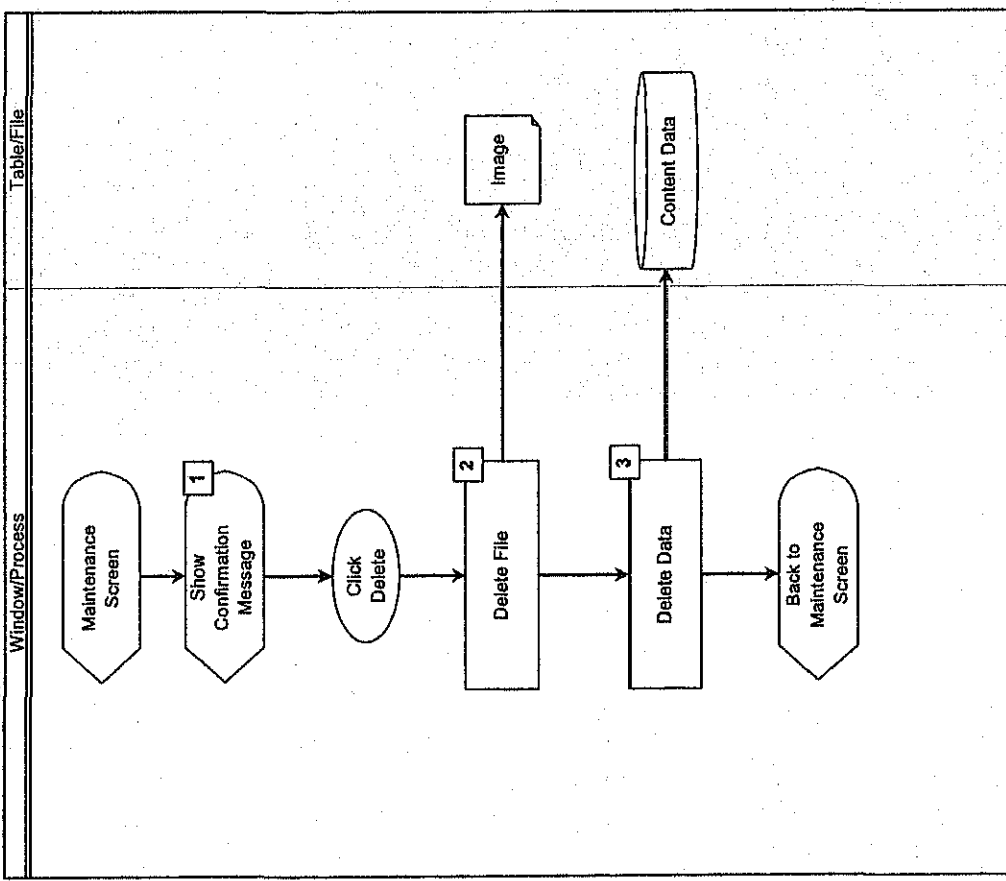

If user only fill content file without fill story/description, the content of content file will be read and displayed in preview screen.

When input for description, HTML tag will be disabled. <Enter> will be recognized and displayed in preview screen.

付編 II Investment Gateway のコンテンツ概要

The screenshot displays the 'Investment Gateway' website. At the top left is a 'Home' button. The main header features the 'BKPM' logo and the text 'INVESTMENT GATEWAY'. Below this is a navigation menu with buttons for 'Welcome to Indonesia', 'Home', 'Advantage', 'Success Story', 'Investment Procedure', 'Law and Regulation', and 'Search Law and Reg'. The main content area is titled 'Investment promotion section' and contains two news items. The first item is 'Welcome to Indonesia' with a sub-header 'Investment promotion section' and a text box containing information about the BKPM's role in attracting investment. The second item is 'Indonesian President on Japan Visit' with a sub-header 'Investment relating laws/regulations section' and a text box about a trade pact with Japan. A sidebar on the right contains a search box labeled 'Investment Procedure section' and a 'Prev | Next' link. At the bottom, there is an 'Adobe Reader' logo and a copyright notice for BKPM.

Investment promotion section

Welcome to Indonesia

We, at the Investment Coordinating Board (Badan Koordinasi Penanaman Modal or BKPM) recognize the significance of direct investment to sustain Indonesia's 8.27% economic return. We are committed to continuously work with various stakeholders in Indonesia and abroad to enhance the investment climate in the country.

The Indonesian economy has demonstrated its resilience since the Asian financial crisis. The economy expanded by 5.3% during... (more)

Indonesian President on Japan Visit

November 27, 2006 (Tokyo)

Visiting Indonesian President Susilo Bambang Yudhoyono is set to sign off on the framework for a free trade pact with Japan. Under the expected deal, Indonesia will send workers, particularly nurses, to Japan, the world's second largest economy. In turn, Japan wants Indonesia's assistance in supplying natural gas, in reassuuring North Korea to halt its nuclear programme, and also over Pyongyang's pact... (more)

Indonesian Advantage You Can Pride

Shipping Industry in East Java Province

General Information

As a marine country, Indonesia needs supporting boats for patrolling and controlling Indonesian waters. Indonesia also needs more boats for carrying people and transporting goods among the islands.

In the future, fiberglass boats probably will be a competitive alternative to substitute the wooden boat or to become an express water transportation facilities in the big rivers, lakes and seas in Java, Sumatera, Sulawesi... (more)

Rubber Processing Industry in Northern Sumatera Province

Market Opportunity

Natural Rubber Production. The increase of Indonesian Natural Rubber production has been more dominated by the acreage enlargement and productivity increase through "PSPK, Kernel Underlaying", or "PKR (Pabrik and Rakas)", or "URR (Unit Pelaksana Proyek)", or "Popular Rubber Development Project" or "PRPK (Proyek Pengembangan Karet Rakyat)", and partial pattern... Indonesia is playing an important role in promoting global strategic diversification of a production base for the Japanese leading stationery manufacturer

King Jim is known as the manufacturer of "KING FILE", top brand of pipe-type files used throughout offices in Japan, together with as many as 800 types of filing products, that are widely used.

PT. King Jim Indonesia (KJI) was established in July 1996 as a subsidiary of King Jim Co., Ltd., Tokyo, Japan as one of the King Jim's overseas production base in order to implement the company's global strategic plan for diversification of production.

Now, King Jim operates 3 overseas production bases in China, Malaysia and Indonesia. In addition to their factories in Japan, in order to maximize both price competitiveness and quality to satisfy their customers. All the overseas subsidiaries are closely tied to one another, under the brand power of King Jim.

Mr. M. Takano, President Director of KJI, explains that King Jim Indonesia is now producing chemical files such as "CLEAR FILE", one of the main products of King Jim at their factory in Pasuruan, of East Java. Thanks to a strategic location and the ease of access to raw materials and competent work force, they have achieved their initial target of providing high quality and price competitive products earlier than expected and their production volume is steadily on the rise year by year.

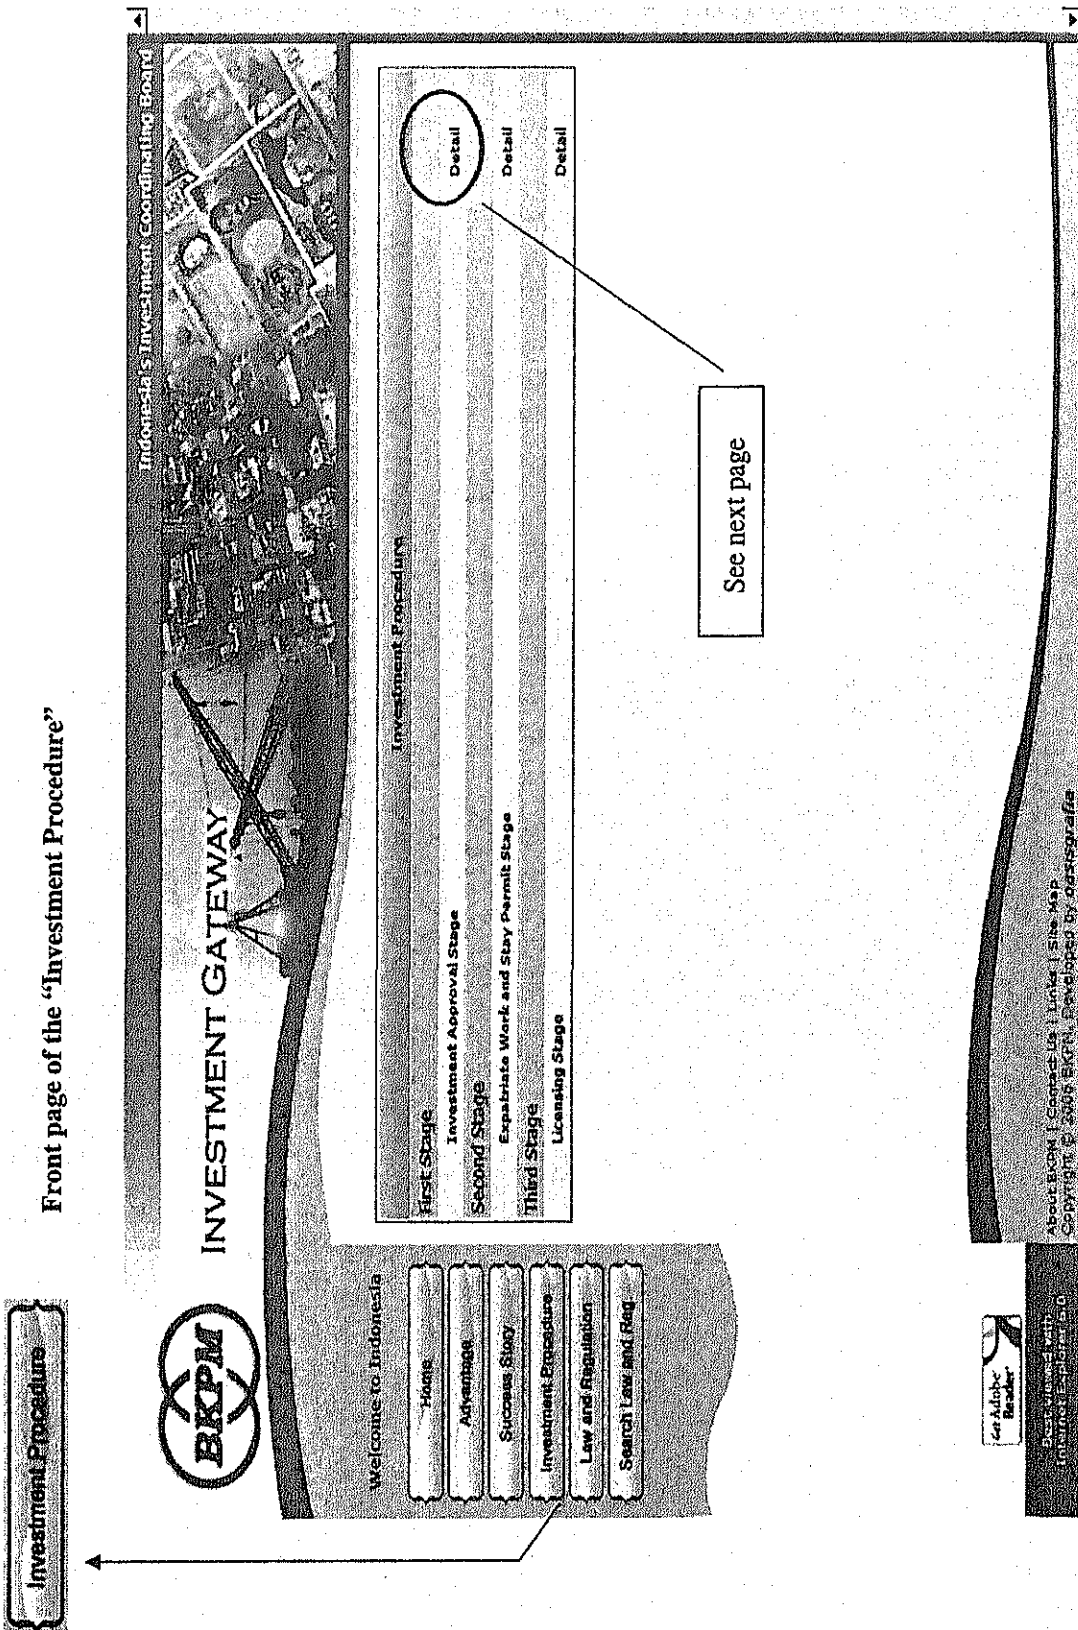

At present, most of their products are exported to Japan, King Jim Indonesia hopes to make their products available throughout the world in the future.
