Terminal Evaluation of the Project for Strengthening Extension System  
for Bivoltine Sericulture in India

Questionnaire to Counterpart (C/P) Personnel

Dear Sir/Madam,

This is a questionnaire for terminal evaluation of the Project for Strengthening Extension System for Bivoltine Sericulture in India. The Project, with the purpose of strengthening the extension system for bivoltine sericulture, started in August 2002 for the duration of 5 years to August 2007. With less than five months remaining before the termination of the Project, we are now evaluating the achievement of the Project from various perspectives. The Indian and Japanese evaluation team will conduct the evaluation study jointly from 16<sup>th</sup> March to 22<sup>nd</sup> March.

In this questionnaire we will ask you various questions for the purpose of evaluating the performance, achievements and implementation process of the Project based on the five evaluation criteria.

a) Relevance

Relevance refers to the validity of the Project Purpose and the Overall Goal in connection with the development policy of the Republic of India (hereafter referred to as "India") as well as the needs of beneficiaries.

b) Effectiveness

Effectiveness refers to the extent to which the expected benefit was brought about as a result of the project (not of the external factors).

c) Efficiency

Efficiency refers to the productivity of the implementation process, examining if the input of the project was efficiently converted into the output.

d) Impact

Impact refers to direct and indirect, positive and negative impacts caused by implementing the project, including the extent to which the Overall Goal has been attained.

e) Sustainability

Sustainability refers to the extent to which India can further develop the project, and the benefits generated by the project can be sustained under the Indian policies, technology, systems, and financial state.

➤ Although the analysis of collective answers might be presented in the report, the answer of each respondent will be kept confidential.

This questionnaire is designed to be responded by every C/P personnel as individual, so please answer the questions based on your own view or opinion. Fill in the questionnaire by ticking boxes and giving details as instructed. Please make answers as specific and concrete as possible. You may skip some questions if they require information difficult to disclose for secrecy reasons, or irrelevant to your activities in the Project.

I would be highly appreciated if the filled-in questionnaire could be returned to JICA Evaluation Team (Mr.Mori or Mr.Seo).

Thank you very much for your cooperation.

JICA Evaluation Team.

Your field in the Project	
---------------------------	--

### 1. Implementation Process and Achievement of the Project

1) Do you think that your communication with Japanese Experts has been good and frequent enough?

- Yes, very much       Yes, but not much       No       Other

Please provide the reasons/suggestions.

2) Is there any problem about overall project management? (Have experts taken a lead in the operation of the Project or in decision making? )

Please provide the reasons/suggestions.

### 2. Questions about Relevance

1) Do you think that the Project is contributing to the promotion of bivoltine sericulture?

- Yes, very much       Yes, but not much       No       Other

Please provide the reasons/suggestions.

2) Do you think that the Project is consistent with local people's needs?(not only JICA farmers also non-JICA farmers)

- Yes, very much       Yes, but not much       No       Other

Please provide the reasons/suggestions.(e.g. increase of income, non-JICA farmers started bivoltine sericulture, request of bivoltine sericulture training from non-JICA farmers, etc.)

### 3. Questions about Effectiveness

1) Do you think that the Project as a whole has achieved (or is about to) its purpose, "Extension system for bivoltine sericulture will be functioned"?

- Yes, very much     
 Yes, but not much     
 No     
 Other

Please provide the reasons/suggestions.

2) Are there any Contributing or Negative factors for the achievement of Project Purpose? (e.g. Achievement of indicator number 2 of project purpose "The quantity of bivoltine cocoon transaction in cocoon markets in target states increase to about 2000 MT from base year 2002 by the end of project" is 57.4%(1148t) in March 2006. Is there any reason which can or can't control. Is there any plan to achieve the indicator?)

Please provide the reasons/suggestions.

3) In your field, do you think that your technical / managerial capability has become good enough to achieve the Overall Goal after the end of the Project period? (Is there any techniques needed to achieve the Overall Goal?)

- Yes, very much     
 Yes, but not much     
 No     
 Other

Please provide the reasons/suggestions.

**4. Questions about Efficiency**

1) Has Japanese Experts' approach/method of technology transfer been appropriate?

- Yes, very much     
  Yes, but not much     
  No     
  Other

Please provide the reasons/suggestions.

2) Do you think that the number, technical capability, and management ability of Japanese Experts (both long-term and short-term) have been good enough for technology transfer?

- Yes, very much     
  Yes, but not much     
  No     
  Other

Please provide the reasons/suggestions.

3) If you received C/P training in Japan, how did you find the training in upgrading of your capability?

- Yes, very much     
  Yes, but not much     
  No     
  Other

Please provide the reasons/suggestions.

4) If you received C/P training in Japan, how have you utilized techniques/skills/knowledge that you acquired in Japan, in the Project after you returned?

- Yes, very much     
  Yes, but not much     
  No     
  Other

*BR*

*A*

Please provide the reasons/suggestions.

5) Do you think that all the machinery and equipment were provided adequately, in terms of their type, volume and timing? If not, describe the problems and their reasons.

- Yes, very much     Yes, but not much     No     Other

Please provide the reasons/suggestions.

**5. Questions about Impact**

1) Do you think that the Project is contributing to the increase of local people's income?

- Yes, very much     Yes, but not much     No     Other

Please provide the reasons/suggestions.

2) Have you observed any kind of positive or negative impact of the Project, besides direct and expected effects?

Please provide the reasons/suggestions.

**6. Questions about Sustainability**

- 1) In your field, do you think that you and your colleagues have acquired enough techniques/knowledge so that CSB, DOS, and other related organizations will be properly maintained and the quantum of bivoltine silk will be increased?

Please provide the reasons/suggestions.

**7. Others**

Please provides other comments/suggestions on the Project.

Please provide the reasons/suggestions.

Thank you very much for your cooperation
