for the Realization of Sustainable Regional Fishery 持続可能な地域水産業の実現のための漁業者組織育成・指導能力強化	Sub	Sector : Fisheries -Sector : Fisheries Administration
Target Countries: Countries which have a sea or inland water		8 participants 🖌
OBJECTIVE	TARG	ET ORGANIZATION / GRO
[Course Objective]The consideration to lounch the Action Plan made by the participants through the training in Japan is initiated under the initiative of the participant's organization. [Expected Outputs]	[Target Organization] Local or central governments in charge of m and guiding regional fisheries	
 ①Issues of operation and development of fishers' organizations in participant's country will be clarified, causes for each issue will be analyzed, and objective to achieve through the training will be specified (Preliminary Phase) ②Basic knowledge necessary as administrator for guiding fishers' organizations with responsible operation will be gained and its contents can be explained 	[TargetGroup] •National or local government officials who currently engaged in managing and guiding fisheries •Have more than 5 years of work experience relevant fields	
concretely. ③Specific skills and methods necessary as administrator for guiding fishers' organizations with responsible operation will be gained and they can be explained. ④Action plan with high feasibility will be formulated incorporating knowledge and skills gained through the training in Japan	•Should have d or have studied	egrees of fishery-related u l economics, business admi ration or legal science
(5) Action Plan is shared in the participant's organization (Finalaization Phase)	PROGRAM	
CONTENTS	PROGRAM	Mar / 22 / 2011 ~ Jun /
[Preliminary Phase] (1) Preparation of Job / Country Report Presentation and Issue Analysis Sheet [Core Phase in Japan]	IMPLEMENTING PARTNER	National Fisheries Universit
(After arriving at Japan, Job/Country Report Presentation and Issue Analysis	JICA CENTER	JICA Chugoku
Workshop will be held to check the achievement of (1) and to complement> (2) Lectures on fishery laws and system / administration / fishery economics / management and distribution covering overall fisheries of Japan, Lectures on actual	COOPERATION	2010~2012
 cases of resource management activities in Japan (3) Lectures, observations and practices concerning methods to analyze necessary policiy tools and social/economical aspects of region, and concerning methods to implement measures (4) Formulation, Presentation and Discussion of Action Plan. Gender Main-streaming in Fishing Community Development 漁村開発におけるジェンダー主流化		PITD Trainers 1080376 Sector : Fisheries Sector : Rurel Development in Fisheries 10 participants / Engl/ish
OBJECTIVE	TARG	ET ORGANIZATION / GROUP
[Objective] Technique of establishment in small-scale business by co-partner participation of man and woman is understood in common in fishing village. [Outputs] 1.Participants understand the meaning of gender consideration, WID,GAD and participation in local business and can explain them to others. 2.Participants master the method of survey of small-scale business in fishing village and of its analysis from a viewpoint of gender consideration. 3.Participants master the technique and capacity development method and system required for higher income generation 4.Participants can make an appropriate plan of small-scale business from a viewpoint of gender consideration	TARGET ORGANIZATION / GROUP [Target organization] Central or local government dealing with the planning and implementation of fishing community (including women) development [Target Group] •be an extension worker or officer of central or local government who are engaged in the development and promotion of the fishing villages. •have more than 3 years' experience in the field. •be a graduate of university •have a competent command of spoken and written English	
CONTENTS	PROGRAM	Jan / 23/2011 ~ Mar / 9/2011
[Output1] •Lecture:Basical theory of gender, Gender condition in Japan •Exercise :Gender and development, Analysis of gender soceity	MPLEMENTING	1.2000 Contraction of the Contra
Discussion:Presentation of support for development of fishing village [Output2] Lecture:Woman's employment in Japanese fishing village, Example of	JICA CENTER	JICA Yokohama
est ablishment of business in fishing village	COODEDATION	

·Discussion with fishery extesionist, women's group & Fishery universuty [Output4] • Exercise: Method and theory of PCM, Planning of action plan ·Discussion:Recap the training content, Summarization of Study trip Presentation: P/J plan of establishment for business in each country 1080852 Planning for Fisheries Community Development 漁業コミュニティ開発計画 PITD Solution Sector : Fisheries Sub-Sector : Rural Development in Fisheries 10 participants English TARGET ORGANIZATION / GROUP OBJECTIVE [Target Organization] [Objective] The possibility of the draft plan for fisheries community development will be studied, and the result of the study including a future policy will be decided Adminstrative organization or agency in charge of fishery community development by the fisheries administrative organization. [Expected Results] 1. To recognize and organize the issue of activities, programs [Target Group] and systems of fisheries community development. / 2. The participants can deepen the necessary knowledge to strengthen and cultivate fisheries community activities. <Position> / 3. To recognize and organize the issue of the proper programs and activities of fisheries community development for the income generation of fisher's households. community development <Experience> / 4. To recognize and organize the issue of the proper programs and activities of coastal resource management and environmental conservation by the fisheries Ten(10) years experience in fisheries sector communities. / 5. To formulate a practical action plan through logical analysis of issues of fisheries community development and the detail consideration of concrete measures. / 6. To implement the activities for fisheries community development by training participants on the basis of the framework of action plans formulated in the training course. Jul / 11/2010 ~ Sep / 30/2010 CONTENTS [Program in Japan] A series of lectures, observations and practices will be held IMPLEMENTING IC Net Limited according to each of the followings; PARTNER 1. Situation of coastal fisheries in Japan, Policy and regulation of fisheries JICA CENTER community development in national and local governmnet, Situation of fish product JICA Yokohama distribution and fish processing, Infrastructure development for fisheries COOPERATION communities, and etc. / 2. Society and culture in fishing communities, 2009~2011 PERIOD Organization, structure and management of fisheries cooperative association, , and etc. / 3. Income generation activities of fisheries cooperatives, Role of women in fishing communities, Economic management of fisher's households, Rural development in remote islands, and etc. / 4. Mechanizm of coastal resource REMARKS

management. Environment-friendly fishing gears and methods, and etc. / 5. Project Cycle Management, Problem and Objective analysis for own issues of fisheries community development, Formulation of practical action plans for fisheries community development, and etc.

· Exercise : Participatory development for community in fishing village

• Practical training: Processed marine products, Business management

·Study trip:Women's group activity, Small scale business in fishing

[Output3] •Lecture: Gender support and strategy by JICA & Japanese Government Study trip:Woman's activity in fish market, Woman's role in fishing

village

community

[Post-program acitvities (after participants' return)] The participants are expected to implement action plan and requested to report the progress as a final report.

Field Manager and field officer in charge of fisheries
