OBJECTIVE		ET ORGANIZATION / GROUP
[Objectives] Based on the action plan, Global Map data of participating country will be developed and updated continuously, at the same time, application way of Global Map for environmental problems will be shared with the participating organization. [Preliminary Phase] To clarify the priority issues by analyzing the ongoing activities concerning the Global Map and define the objective of participating this course. [Program in Japan] 1. Be able to explain the overview of Global Map, GIS/R.S. and global standards.	involved or has Mapping Projec [Target Group] 1) Be a member be working in or Mapping Projec	ng Organization that is presently an intention to participate in Global t.
<ol> <li>Be able to develop and update Global Map data.</li> <li>Be able to explain the outline of global environmental issues and utilization of Global Map for addressing them.</li> <li>To make an action plan draft and be able to explain the details of development, update and utilization of Global Map for his/her country.</li> <li>[Finalization Phase] Report the progress of action plan and submit the final report.</li> </ol>		aduate or equivalent serving any form of military service
CONTENTS	PERIOD	Jun / 22/2010 ~ Sep / 4/2010
[Preliminary Phase]Formulation and Submission of Inception Report. [Program in Japan] Lectures, visits and workshops etc related the following topics will be implemented. 1. Overview of Global Map, Outline of GIS/Remote Sensing, Geographic	DADTNED	Geospatial Information Authority of Japan (GSI), Ministry of Land, Infrastructure, Transport and Tourism JICA Tsukuba(Training&Partnership)
information standards, Environmental GIS, Global environment and land use changes 2. Outline of GIS software and its operation, Specifications, digitizing/compilation	COOPERATION PERIOD	2010~2012
and production of output Global Map, Development and update of Global Map using satellite images, Development and validation of Global Land Cover dataset 3.Overview of global environmental issues, Application of GIS/Remote Sensing to global environmental field, Utilization of Global Map in environmental field 4. Preparation of an action plan for the development, update and utilization of Environmental Map (Global Map), Technical presentation	REMARKS	<global mapping="" project=""> http://www.iscgm.org/</global>
[Finalization Phase] To revise and implement of the Action Plan in the participant's country and submit its Final Report by 4th Dec, 2010.
