4<sup>th</sup> JCC Meeting 4<sup>th</sup> October, 2010 Phnom Pen Cambodia

### Modification of the part of work plan for 2<sup>nd</sup> period

1. The medium and long term business strategy and financial budget's plan

The mid/long-term strategy has the feature as "rolling plan" which should be reviewed and revised, if necessary, by comparing the results of the year and the prospect for the coming years. The one for the first year was prepared mainly by JICA Team and simultaneously utilized for transfering concerned technologies/skills to EUMP C/P staff.

### 1) Management matter

It became unnecessary due to the transfer of EUMP to EDC on 8<sup>th</sup> June 2010, since EDC has its own management strategy covering the whole structure of the company including EUMP.

2) Technical Engineering matter No change

### 2. Revision of the management and administration manuals

### 1) Management matter

After the transfer, EUMP came to be expected to follow the regulations of EDC, which is in the process of applying the same regulations to the whole company including EUMP. Therefore, revision of previous manual is not necessary.

2) Technical Engineering matter

No change
