# Statistics on Program Results

## Interpreting the Statistics

The following shows statistics relating to JICA's operations in FY2010.

The methods of calculation and the range of figures are as follows.

1. When categorized according to region, figures for bilateral cooperation are based on classification into six regions.

- (1) Asia (including Central Asia and the Caucasus, excluding the Middle East);
- (2) Pacific;
- (3) North America and Latin America;
- (4) Middle East (west of Iran and north of Sahara except Sudan);
- (5) Africa (excluding the Middle East);
- (6) Europe (including Turkey)

2. The programs are classified into the following five types in regard to the program results by number of participants.

- (1) Acceptance of technical training participants;
- (2) Dispatch of experts; (3) Dispatch of study teams; (4) Dispatch of Japan Overseas Cooperation Volunteers (JOCV); and (5) Dispatch of other volunteers

3. Sectoral classification in regard to the Technical Cooperation employs the following 10 categories.

- (1) Planning/administration; (2) Public works/utilities; (3) Agriculture/forestry/fisheries; (4) Mining/industry; (5) Energy; (6) Business/tourism; (7) Human resources; (8) Health/medical care; (9) Social welfare; and (10) Others

4. All other data in connection with JICA's operations and performance together with revisions and updates of achievements and results not appearing in this report shall be posted on JICA's website in a timely and appropriate manner.

Consulting Services		For consulting services, the interest rate will be 0.01% and the repayment, grace periods and conditions for procurement will be the same as those for main components.					
Options for Program Type ODA Loan		In case of co-financing, it is possible to apply the same repayment terms as co-financer's lending while maintaining the concessionality of ODA loans. For countries complying with ongoing IMF-supported programs or receiving grants from IDA, it is possible to modify the terms and conditions of the Japanese ODA Loan so as to meet the IMF's concessionality criteria.					

Notes: Special Terms for Economic Partnership (STEP) is set and reconsidered on January 15 each year. This is to ensure tied aid eligibility.

The concessionality level of optional terms does not exceed that of standard terms.

Under the EPSA initiative, loans for projects co-financed with the AfDB are extended using "Preferential Terms," determined for each income category; in the case of low-income LDCs, the terms are MIRAI.

A two-step loan extended to the AfDB to cover its sub-loans to private enterprises under the EPSA initiative is extended using such terms and conditions as an interest rate of 0.55% and a repayment period of 40 years with a 10-year grace period.

Irrespective of the country category, the terms applied for disaster recovery assistance projects are MIRAI.

Emergency financial assistance in the form of ODA Loan requires a floating rate (6-month LIBOR for yen) with a fixed term of 15 years (three years).

**1 Sectors and Fields Eligible for Preferential Terms**
**The Global Environment**

## (1) Forest conservation, forestation

- Forest conservation and management
- Afforestation and reforestation
- Research for forest resources
- Others (monitoring system etc.)

## (2) Prevention of pollution

## (a) Prevention of air pollution

## Examples:

- Installation of equipment for the prevention of air pollution
- Rehabilitation of existing power plants contributing to the reduction of air pollution
- Upgrade and rehabilitation of factories etc.
- Coal quality selection for the prevention of air pollution

## (b) Prevention of water pollution

## Examples:

- Effluent treatment, recycling of water
- Sludge treatment, residue treatment
- Relocation of factories for water pollution prevention

- Treatment facilities for preventing water pollution in harbors etc.
- Sewage treatment facilities

## (c) Waste treatment

Example: Collection, processing, disposal of solid waste

## (3) Energy saving and resource conservation

## Examples:

- Installation of energy saving facilities and equipment
- Power plants and transmission and distribution lines for energy saving and resource conservation
- Centralized city heating system
- Co-generation

## (4) Conservation of the natural environment

- Protection of wildlife
- Marine resource research
- Genetic resource research
- Conservation of soil
- Others (research, monitoring)

## (5) New and renewable energy sources

## Examples:

- Photovoltaic power generation, Utilization of solar thermal energy

- Wind power generation
- Utilization of heat and power generation through waste treatment
- Geothermal power generation
- Biomass energy
- Utilization of urban waste heat
- Fuel cells
- Utilization of exhaust gas

(6) Protection of the ozone layer

Examples:

- Emission control or collection of CFC etc.
- Treatment of materials damaging the ozone layer
- Monitoring

(7) Marine pollution

Examples:

- Machines or vessels for the prevention of marine pollution
- Measures for preventing marine disposal of wastes
- Monitoring

(8) Desertification protection

Examples:

- Afforestation, protection of forests
- Agriculture desertification protection

(9) Water supply for the prevention of infectious disease and poverty reduction

**Human Resource Development Support**

- (1) Foreign study or training to Japan
- (2) Expert dispatch from Japan
- (3) Lending to private foreign students in Japan

**Small and Medium Sized Enterprises**

Low-interest loan facilities for small and medium sized enterprises focusing particularly on smaller sized businesses

**Support for Peacebuilding**

Projects and programs for humanitarian improvement, restoration and reconstruction in peacebuilding countries and their neighboring nations

[Note] 1 In cases where a part of the project is eligible for preferential terms, preferential terms can be applied to that part.

2 Hydro-electric power generation with no significant impact on the environment can be categorized as a new and renewable energy only in those cases where it can be confirmed that the project will not create problems as a result of deliberate environmental aspect investigation.

**2 In order to assist upper-middle income countries to reduce regional income disparities, projects to develop specified economic and social infrastructure in low-income regions will be funded through ODA Loans. This will be in areas where ODA Loans have been hitherto limited in-principle to environmental, human resource development, and anti-seismic measure projects.**

**Regarding "ODA Loan Activities for Supporting Africa" announced in May 2010, in view of Japan's commitments made at TICAD IV, as a time-limited measure up to the end of fiscal 2012, the categories of Agriculture and Rural Development Projects and Regional Infrastructure that contribute to poverty through economic growth have been added as eligible fields for ODA Loan in Africa in addition to the above-mentioned four fields.**

**3 Special Term for Economic Partnership (STEP)**

**Overview**

The Government of Japan decided to introduce a new ODA loan scheme from July 2002, now called the Special Term for Economic Partnership (STEP), in an effort to raise the visibility of Japan's ODA among the citizens of recipient countries as well as Japan. These schemes utilize and transfer the cutting-edge technologies and know-how of Japanese firms.

**STEP Recipient Countries**

Low-Income Countries, Lower-Middle-Income Countries and Middle-

Income Countries to which tied aid can be extended under OECD rules (excluding the Least Developed among Less Developed Countries and Upper-Middle-Income Countries)

**STEP-Eligible Projects**

(1) Outline: Projects eligible for STEP will be limited to those that are in the following sectors and fields; (2), and at the same time, for which Japanese technologies and equipment are substantially utilized.

**Sectors and Fields**

- Bridges and Tunnels
- Ports
- Airports
- Urban mass transit system
- Oil/Gas transmission and storage facilities
- Urban flood control projects
- Communications/Broadcasting/Public information systems
- Power stations/Power transmission and distribution lines
- Trunk roads/Dams (limited to projects that substantially utilize Japan's anti-earthquake techniques, ground treatment techniques and fast implementation techniques)
- Environmental Projects (limited to projects that substantially utilize Japan's air-pollution prevention techniques, water-pollution prevention techniques, waste treatment and recycling techniques and waste heat recycling and utilization techniques)

**Interest Rates and Repayment Period**

Interest rates and repayment periods are set so as to enable the extension of tied aid under OECD rules, and revised annually on 15 January.

**Procurement Conditions**

Primary contracts are tied to Japanese firms, while subcontracts are generally untied. Joint ventures with recipient countries are accepted for primary contracts, on condition that the Japanese firm is the leading partner.

**Coverage Ratio**

ODA loans may be used to finance up to 100% of the total project cost.

**Country of Origin Rule**

Not less than 30% of the total amount of the principal contract financed with ODA loans must be accounted for by either (a) goods originating from Japan together with services provided by Japanese firms, or (b) goods procured from Japan. See chart below.

Category	Examples
In the case of projects for which advanced technologies and/or knowhow of Japanese firms can be identified in services (e.g. construction methods), not only goods but also services must be included in the ratio mentioned.	Tunnels, ports, concrete bridges, trunk roads, dams, sewerage systems, urban underground headrace tunnels, public information systems, hydroelectric power, and geothermal power, etc.
In the case of projects, which mainly consist of the installation of goods or plants and their core technologies that can be identified in goods or plants, only goods shall be included in the ratio mentioned.	Communications/broadcasting facilities, wind/solar/thermal power generation, oil/gas transmission and storage facilities, waste treatment sites, waste incineration plants, steel bridges, urban mass transit systems, urban flood control projects, power transmission and distribution line, etc.

**Procurement Audits**

The procurement process is audited by a third party after bidding to ensure fairness, utilizing loan funds or JICA research expenses.

Note: Please refer to page 197 for the classification of principal country income levels.

## Significant Accounting Policies

### 1 Standards for reporting revenues from the management grants

The Revenue Recognition Standard based on Accrued Expense is applied. This is attributable to the difficulties associated with the application of achievement and time-period standards, specifically, the significant amount of time required to evaluate operating results as well as other complexities.

### 2 Depreciation methods

#### (1) Tangible fixed assets

Straight-line method.

The useful lives of major assets are as follows:

Buildings:	1–50 years
Structures:	1–42 years
Machines and equipment:	1–20 years
Vehicles and other transportation devices:	1–6 years
Tools, instruments, and fixtures:	1–18 years

The estimated depreciation costs for specific depreciable assets (Accounting Standard for Incorporated Administrative Agency No. 87) and specific removal costs, etc. associated with asset retirement obligations (Accounting Standard for Incorporated Administrative Agency No. 91) are directly deducted from the capital surplus and reported as accumulated depreciation not included in expenses.

#### (2) Intangible fixed assets

Straight-line method.

### 3 Standard for appropriation of allowances and estimation in relation to bonus payments

An allowance for bonus payments is not appropriated, since the financial source is secured by the management grants.

The estimated bonus payment not included in the allowance, as shown in the Administrative Service Operation Cost Statement, is reported as current fiscal year estimate of allowances in relation to bonus payments which has been calculated according to Accounting Standard No. 88.

### 4 Standard for appropriation of allowances and estimation in relation to retirement benefits

An allowance for retirement benefits is not appropriated since the financial source is secured by the management grants.

An allowance for retirement benefits is not provided for pension benefits from Employees' Pension Funds, since the financial source for EPF's insurance fees and reserve shortfall is secured by the management grants.

The estimated increase in retirement benefits not included in the allowance, as shown in the Administrative Service Operation Cost Statement, is reported as current fiscal year allowance for retirement benefits which has been calculated according to Accounting Standard No. 38.

### 5 Basis and standard for appropriation of allowances, etc.

#### Allowance for possible loan losses

To provide for loan losses, JICA records the estimated amount of default, taking into account the actual loss rate for ordinary loans and specific collectability of doubtful loans, etc.

### 6 Standards and methods for the valuation of inventories

#### Stored goods

Cost method as determined by the FIFO method

### 7 Translation standard of foreign currency assets and liabilities into yen

Foreign currency money claims and liabilities are translated into yen utilizing the spot exchange rate as of the fiscal year-end. Exchange differences are recognized as profit or loss.

### 8 Standards for computing opportunity costs in the Administrative Service Operation Cost Statement

The interest rate used to compute opportunity costs concerning central and local governments' investments, etc.

1.255% taking into consideration the yield of 10-year fixed-rate JGBs as of March 31, 2011.

### 9 Accounting for lease transactions

The same accounting method applicable to ordinary transactions is applied to finance lease transactions with total lease fees of ¥3 million or more.

The same accounting method applicable to ordinary rental transactions is applied to finance lease transactions with total lease fees of less than ¥3 million.

### 10 Accounting for consumption taxes

Consumption taxes are included in financial statement amounts.

### 11 Change in principal accounting policies

The "Accounting Standards for Incorporated Administrative Agency and Guidance Notes for the Accounting Standards for Incorporated Administrative Agency" (February 16, 2000 [Amended October 25, 2010]) and "Q&A concerning the Accounting Standards for Incorporated Administrative Agency and Guidance Notes for the Accounting Standards for Incorporated Administrative Agency" (August 2000 [Final Amendment, November 2010]) have been adopted starting in the current operating year.

#### (1) Accounting standards concerning asset retirement obligation

In addition to the above revisions, "Accounting Standards for Asset Retirement Obligations" (Accounting Standards Board of Japan [ASBJ] Statement No. 18, March 31, 2008) and "Guidance on Accounting Standards for Asset Retirement Obligations" (ASBJ Guidance No. 21, March 31, 2008) were applied from the current operating year.

The change in asset retirement obligations due to the start of the application of the accounting standards, etc. was ¥269,889,175.

Removal costs, etc. associated with the asset retirement obligations (the cost allocation related to removal costs associated with asset retirement obligations and the adjustment amount of the asset retirement obligations due to passage of time set forth in the "Accounting for Asset Retirement Obligations," Accounting Standard for Incorporated Administrative Agency No. 39) were not expected to yield revenues which needed to be accounted for. Therefore, Accounting Standard for Incorporated Administrative Agency No. 91 was applied. The costs were not recorded in the costs for calculating profit and loss and were deducted from the capital surplus. This change had no effect on profit or loss.

#### (2) Accounting for transfer transactions associated with payment to the national treasury, etc. concerning unnecessary property

The "Accounting for Transfer Transactions Associated with Payment to the National Treasury, Etc. Concerning Unnecessary Property," Accounting Standard for Incorporated Administrative Agency No. 99 has been adopted starting in the current operating year.

Among the transfer transactions for unnecessary property conducted in the current operating year, the transfer balance of the transactions which were designated as "transfer transactions whose transfer balance shall not be recorded in the profit and loss for calculating profits and losses" of Article 13-2 of the Ministerial Ordinance for the Operations and Finances and Accounting of the Japan International Cooperation Agency (Ministry of Foreign Affairs Ordinance No. 22 of September 30, 2003 [Final Amendment, November 26, 2010]) and the costs required for the transfer were not recorded in the costs for calculating profits and losses and were deducted from the capital surplus.

As a result, ordinary profits increased by ¥29,263,704. Net income and total income for the current year increased by ¥1,177,897,498, respectively.

**3 Impaired loss on fixed assets**

## (1) The fixed assets for which the impairment loss was recognized

## A. Outline of the usage, type, location, book value

Impairment losses were recognized in the following assets.

(Unit: Yen)

Name of Asset	Usage	Location	Type	Book Value before Impairment Loss	Impairment Loss Not Included in Current Year Expenses	Accumulated Impairment Loss Not Included in Current Year Expenses
Former Thailand Office	Office	Bangkok, Thailand	Building	74,727,187	—	—
			Structures	3,995,938	—	—
			Land	183,294,939	—	—
Shimura Mitsugi-koen Haydens 107 and 25 units	Employee housing	Itabashi-ku, Tokyo, etc.	Building	245,648,329	128,417,030	128,417,030
			Land	145,403,326	36,383,117	36,383,117
Telephone subscription rights	Telephone subscription rights	—	Telephone subscription rights	4,383,250	86,900	7,893,100

## B. Background relating to the recognition of impairment losses

The former Thailand Office is set for disposal in line with the Second Mid-Term Plan during the JICA Mid-term Objective Period starting from FY2007, and it was recognized this asset has an indication of impairment. In FY2009, an impairment was recognized because of the discontinued use of this facility. However, because the book value exceeded the recoverable service amount at the end of the operating year, an impairment loss was not incurred.

With regard to employee housing, based on the Second Mid-Term Plan during the JICA Mid-term Objective Period starting from FY2007, it was determined that 38 units would not be in use in the current operating year. Also, it was determined that these units would be disposed by sale in FY2011. Among these units, and excluding 12 of the units that continue to be used for employee housing, impairments were recognized for 26 units. Excluding 11 units for which the book value exceeded the recoverable service amount at the end of the operating year, the book value of 15 units was reduced to the recoverable service amount. This reduction has been recorded as a

capital surplus deduction in the accumulated impairment loss not included in expenses.

With regard to an increase in the number of dormant telephone lines in the operating year, the book value of telephone subscription rights was reduced to the recoverable service amount. This reduction has been recorded as a capital surplus deduction in the accumulated impairment loss not included in expenses.

## C. Breakdown of each principal fixed asset not appearing on the income statement but which is included in impairment loss and the overview of the calculation method for recoverable service amount

(Unit: Yen)

Name of Asset	Type	Impairment Loss	Calculation Method for Recoverable Service Amount
Shimura Mitsugi-koen Haydens 107 and 25 units	Building	128,417,030	*1
	Land	36,383,117	*1
Telephone subscription rights	Telephone subscription rights	86,900	*2

\*1. The recoverable service amount is determined by the net sales price, which is calculated by deducting the expected cost of disposal from the appraised value by a third party.

\*2. The recoverable service amount of dormant telephone subscription rights is determined by the net sales price, which is calculated based on Asset Evaluation Standards released by the National Tax Agency. The recoverable service amount of in-use telephone subscription rights is determined by the equivalent in-use value, which is calculated based on the official set price announced by NTT.

## (2) Fixed assets indicating impairment losses

## A. Outline of the usage, type, and location of fixed assets that indicate an impairment loss

The following assets have an indication of impairment losses. (Unit: Yen)

Name of Asset	Usage	Location	Type	Book Value
Hiroo Center	Program facility	Shibuya-ku, Tokyo	Building	1,161,019,521
			Structures	1,825,565
			Land	1,652,251,000
Osaka International Center	Accommodation facilities for training	Ibaraki City, Osaka Prefecture	Building	3,384,154,111
			Structures	23,869,693
			Land	780,478,000
Heights Sunrise 607 and 111 units	Employee housing	Nagoya City, Aichi Prefecture, etc.	Building	686,955,992
			Land	714,124,060

## B. Background relating to the determination of an indication of impairment loss

With regard to the Hiroo Center, payment to the national treasury from FY2012 and beyond was decided pursuant to the Cabinet decision effective December 7, 2010, and it was recognized that this asset has an indication of impairment. At the end of the operating year, however, the timing of the disposal of this asset had yet to be determined. The asset will continue to be used for programs and so impairment has not been recognized.

With regard to the Osaka International Center, integration with the Hyogo International Center from FY2011 and beyond was decided pursuant to the Cabinet decision effective December 7, 2010, and it was recognized that this asset has an indication of impairment. At the end of the operating year, however, the timing of the disposal of this asset had yet to be determined. The asset will continue to be used for programs and so impairment has not been recognized.

112 units of employee housing, including Heights Sunrise 607, are set for disposal in line with the Second Mid-Term Plan during the JICA Mid-term Objective Period starting from FY2007 and the Cabinet decision effective December 7, 2010, and it was recognized that these assets have an indication of impairment. At the end of the operating year, however, the timing of the disposal of these assets had yet to be determined. These assets will continue to be used as employee housing and so impairment has not been recognized.

**4 Donated funds for grant aid**

Grant aid is received in the form of funds from the Japanese government. JICA administers this grant aid based on a presentation contract with the recipient country's government. At the end of FY2010, the outstanding balance of unexecuted donation presentation contracts stood at ¥156,564,963,971.

### Notes to Cash Flow Statement

The funds shown in the cash flow statements are cash, deposit accounts, and checking accounts.

(1) Breakdown of balance sheet items and ending balance of funds (as of March 31, 2011)

Cash and deposit	¥121,419,899,271
Time deposit	¥-103,500,000,000
Ending balance of funds	¥17,919,899,271

(2) Description of significant non-financial transactions

#### A. Assets under the finance lease

Machines and equipment	¥3,858,750
Vehicles and other transportation devices	¥4,046,500
Tools, instruments, and fixtures	¥57,240,888

B. "Accounting Standards for Asset Retirement Obligations" (ASBJ Statement No. 18, March 31, 2008) and "Guidance on Accounting Standards for Asset Retirement Obligations" (ASBJ Guidance No. 21, March 31, 2008) were applied from the current operating year. The resulting increase amount of assets and liabilities is as follows:

Buildings	¥232,899,280
Asset retirement obligations	¥271,316,889

### Notes to Administrative Service Operation Cost Statement

Number of the loan employees from governments who are counted as opportunity costs

Of the estimated increase in retirement bonus not included in the allowance, ¥21,929,807 was recognized as the current fiscal year increase of allowance for retirement and severance for 33 loan employees according to JICA's internal regulations.

### Matters concerning the state of financial instruments

The General Account's fund management is limited to short-term deposits and public and corporate bonds while fund raising consists mainly of management grants approved by the state ministers in charge. The General Account does not borrow from the government fund for Fiscal Investment and Loan Program, borrow funds from financial institutions or issue FILP agency bonds.

### Matters concerning the fair value of financial instruments

Balance sheet amounts, fair value and differentials at the end of the operating year are as follows. (Unit: Yen)

	Balance sheet amount	Fair value	Differential
(1) Cash and bank deposits	121,419,899,271	121,419,899,271	0
(2) Accrued payments	(18,501,946,755)	(18,501,946,755)	0

Note: Those recorded under liabilities are shown in parentheses.

Note 1: Calculation method for fair value of financial instruments and matters concerning marketable securities

#### (1) Cash and bank deposits

Cash and bank deposits are short term and fair value approximates book value. Thus fair value for cash and bank deposits is calculated at book value.

#### (2) Accrued payments

Accrued payments are short term and fair value approximates book value. Thus fair value for accrued payments is calculated at book value.

### Finance lease transactions

The amount of the finance lease transactions which influences the current year's profits and losses was ¥89,838. The current year's net profit after the deduction of this amount was ¥1,129,117,532.

### Matters concerning asset retirement obligation

JICA has a building lease agreement for its head office building, and has an obligation to restore the building to its original state at the termination of the lease. Therefore, this asset retirement obligation has been recorded.

The estimate for the asset retirement obligation has used the five-year lease period for the projected period of use and a discount rate of 0.529%.

In the current operating year, in line with the application of accounting standards, the amount recorded for asset retirement obligations was ¥269,889,175. The asset retirement obligation balance at the end of the operating year was ¥271,316,889—the sum of the above ¥269,889,175 and the ¥1,427,714 adjustment amount of the asset retirement obligations due to passage of time.

### Matters concerning the to payment to the national treasury, etc. for unnecessary property

Transfer transactions concerning unnecessary property conducted in the current operating year are as follows.

Among the transfer transactions, the transfer balance of the transactions which were designated as "transfer transactions whose transfer balance shall not be recorded in the profit and loss for calculating profits and losses" of Article 13-2 of the Ministerial Ordinance for the Operations and Finances and Accounting of the Japan International Cooperation Agency (Ministry of Foreign Affairs Ordinance No. 22 of September 30, 2003 [Final Amendment, November 26, 2010]) and the costs required for the transfer were not recorded in the profit and loss for calculating profits and losses and were deducted from the capital surplus by applying ASBJ Statement No. 99.

(1) Outline of the type, book value, etc. of assets which were transferred, etc. as unnecessary property (Unit: Yen)

### 1 Depreciation methods

#### (1) Tangible fixed assets

Straight-line method is adopted.

The useful lives of major assets are as follows:

Buildings:	2–50 years
Structures:	2–46 years
Machines and equipment:	2–17 years
Vehicles and other transportation devices:	2–6 years
Tools, instruments and fixtures:	2–15 years

#### (2) Intangible fixed assets

Straight-line method is adopted.

### 2 Standard for appropriation of allowances and estimation in relation to bonus payments

The allowance for bonus payments is calculated and provided for based on estimated amounts of future payments attributable to the services that have been rendered by executive directors and employees applicable to the fiscal year under review.

### 3 Standard for appropriation of allowances and estimation in relation to retirement benefits

The allowance for retirement benefits is calculated and provided for based on estimated amounts of future payments attributable to the retirement of executive directors and employees, and is accrued in line with the projected benefit obligations and estimated pension plan assets applicable to the fiscal year under review. The profit and loss appropriation method for actuarial differences is presented as follows.

Actuarial differences are recognized as a lump-sum gain or loss in the fiscal year in which they occur.

The estimated increase in retirement benefits not included in allowance, as shown in the Administrative Service Operation Cost Statement, is reported as current-year allowance for retirement benefits which has been calculated according to Accounting Standard No. 38.

### 4 Basis and standard for appropriation of allowances, etc.

#### Allowance for possible loan losses

The allowance for claims on debtors who are legally bankrupt (“Bankrupt borrowers”) or substantially bankrupt (“Substantially bankrupt borrowers”) is provided based on the outstanding balance and the deductions of the amount expected to be collected through the disposal of collateral and execution of guarantees. The allowance for claims on debtors who are not legally bankrupt but are likely to become bankrupt (“Potentially bankrupt borrowers”) is provided based on an assessment of the overall solvency or the debtors after deducting the amount expected to be collected through the disposal of collateral and the execution of guarantees. The allowance for claims on debtors other than Bankrupt borrowers, Substantially bankrupt borrowers and Potentially bankrupt borrowers is provided primarily based on the default rate, which is calculated based on the actual defaults during a certain period in the past.

All claims are assessed initially by the operational departments and secondly by risk evaluation departments based on internal rules for self-assessment of asset quality. The internal audit department, which is independent from the operational departments, reviews these self-assessments, and the allowance is provided based on the results of the assessments.

### 5 Standards and methods for the evaluation of securities

#### (1) Affiliated companies

Cost method as determined by the moving average method.

However, when the equity equivalent has fallen below the cost at acquisition, the equity equivalent price is used.

#### (2) Other investment securities (non-marketable)

Cost method as determined by the moving average method.

### 6 Standards and methods for the valuation of derivative transactions

Market value method.

### 7 Translation standard of foreign currency assets and liabilities into yen

Foreign currency money claims and liabilities are translated into yen using the spot exchange rate as of the fiscal year-end, with exchange differences recognized as profit or loss.

### 8 Standards for computing opportunity costs in the Administrative Service Operation Cost Statement

The interest rate used to compute opportunity costs concerning central and local governments’ investments, etc.:

1.255% with reference to yields applicable to 10-year fixed-rate JGBs as of March 31, 2011.

### 9 Accounting for lease transactions

The same accounting method as ordinary transactions is applied to the finance lease transactions with a total lease fee of ¥3 million or more.

The same accounting method as ordinary rental transactions is applied to the finance lease transactions with a total lease fee of less than ¥3 million.

### 10 Method of hedge accounting

Deferral hedge accounting is used for the method of hedge accounting. Hedge effectiveness is assessed first by identifying hedged loans and hedging instruments which offset market fluctuations. Then it is examined to see if there are any discrepancies of maturity and notional principal between the two.

### 11 Accounting for consumption taxes

Consumption taxes are included in the amounts on the financial statements.

### 12 Change in principal accounting policies

The “Accounting Standards for Incorporated Administrative Agency and Guidance Notes for the Accounting Standards for Incorporated Administrative Agency” (February 16, 2000 [Amended October 25, 2010]) and “Q&A concerning the Accounting Standards for Incorporated Administrative Agency and Guidance Notes for the Accounting Standards for Incorporated Administrative Agency” (August 2000 [Final Amendment, November 2010]) have been adopted starting in the current operating year.

#### (1) Accounting standards concerning equity

In addition to the above revisions, “Accounting Standard for Equity Method” (ASBJ Statement No. 16, March 10, 2008) and “Provisional Accounting Policies Applied to Affiliated Companies Accounted for Using the Equity Method” (Practical Issue Task Force No. 24, March 10, 2008) were applied from the current operating year. This had no effect on profit or loss.

#### (2) Accounting standards concerning asset retirement obligation

In addition to the above revisions, “Accounting Standards for Asset Retirement Obligations” (ASBJ Statement No. 18, March 31, 2008) and “Guidance on Accounting Standards for Asset Retirement Obligations” (ASBJ Guidance No. 21, March 31, 2008) were applied from the current operating year.

As a result, ordinary profits and net income decreased by ¥14,072,258 and ¥23,499,599, respectively. The change in asset retirement obligation due to the start of the application of the accounting standards, etc. was ¥68,784,655.

## Notes

## Notes to the balance sheet

## 1 Joint obligations

JICA is a joint debtor in connection with existing bonds issued by Japan Bank for International Cooperation which were succeeded by the Japan Finance Corporation.

FILP (Fiscal Investment and Loan Program) Agency Bonds	¥950,000,000,000	
Government Guaranteed Foreign Debt	5,900,000,000	USD
	1,250,000,000	Euro

## 2 Impairment loss on fixed assets

(1) The fixed assets for which the impairment loss was recognized

## A. Outline of the usage, type, location, book value

Impairment losses were recognized in the following assets in the first half of this operating year. (Unit: Yen)

Name of Asset	Usage	Location	Type	Book Value before Impairment Loss	Accumulated Impairment Loss in Current Year Expenses
Takebashi Godo Building	Office	Chiyoda-ku, Tokyo	Building	849,195,195	675,214,797
			Structures	14,677,560	11,670,468
			Machines and equipment	128,643,813	102,287,680
			Land	10,671,270,000	6,091,196,973
			Construction in process	49,563,410	49,563,410
			Total	11,713,349,978	6,929,933,328

## B. Background relating to the recognition of impairment losses

The Takebashi Godo Building was recognized as having an indication of impairment as its use as an "regular office" shifted to "provisional usage accompanying relocation" in FY2009. However, impairment was not recognized as the building continued to be used for the latter use at the end of FY2009. Due to the termination of the building's "provisional use for relocation" in the first half of the fiscal year, the book value of the building, structures, machines and equipment, land, and construction in process was reduced to the recoverable service amount. This reduction has been recorded as impairment loss.

## C. Overview of the calculation method for recoverable service amount

The recoverable service amount is determined by the net sales price, which is calculated by deducting the expected cost of disposal from the appraised value by a third party.

## (2) Fixed assets indicating impairment losses

## A. Outline of the usage, type, and location of fixed assets indicating an impairment loss

The following assets have an indication of impairment losses. (Unit: Yen)

Name of Asset	Usage	Location	Type	Book Value
Azabu Institute	Training Center	Minato-ku, Tokyo	Building	142,303,743
			Structures	8,746,155
			Land	1,170,000,000

## B. Background and reason for determining the indication of impairment loss

The Azabu Institute is set for sale in FY2011 pursuant to the Cabinet decision effective December 7, 2010, and it was recognized that this asset has an indication of impairment. At the end of the operating year, however, the office will continue to be used as a training center and so impairment has not been recognized.

## 3 Collateral financial assets

The fair value of collateral financial assets with the right of free disposal at the end of the operating year was ¥840,017,580.

## 4 Outstanding balance of undrawn loans

A large portion of JICA loans cover a long term. Ordinarily, when receiving a loan draw-down proposal from a customer, which corresponds to the intended use of funds as stipulated by the loan agreement, upon confirming

the fulfillment of conditions prescribed under the loan contract, JICA promises to loan a certain amount of funds within a certain range of the amount required by the customers, with the outstanding balance up to the limit of the agreed amount. The outstanding balance of undrawn loans related to these contracts is ¥3,851,283,550,535.

## Notes to the cash flow statement

The funds shown in the cash flow statements are ordinary accounts and checking accounts.

## (1) Breakdown of balance sheet items and ending balance of funds

(as of March 31, 2011)

Cash and deposits	¥51,393,164,655
Ending balance of funds	¥51,393,164,655

## (2) Description of significant non-financial transactions

## A. Assets granted under finance lease

Vehicles and other transportation devices	¥1,031,300
Tools, instruments and fixtures	¥14,588,562

B. "Accounting Standards for Asset Retirement Obligations" (ASBJ Statement No. 18, March 31, 2008) and "Guidance on Accounting Standards for Asset Retirement Obligations" (ASBJ Guidance No. 21, March 31, 2008) were applied from the current operating year. The resulting increase amount of assets and liabilities is as follows:

Buildings	¥59,357,314
Asset retirement obligations	¥69,148,526

## Notes to the administrative service operation cost statement

Loan employees from governments who are counted for opportunity costs

Of the estimated increase in retirement bonus not included in the allowance, ¥5,589,083 was recognized as the current-year increase of allowance for retirement and severance for 33 loan employees according to JICA's internal regulations.

## Matters concerning the state of financial instruments

## 1 Policy regarding financial instruments

The Finance and Investment Account undertakes financial cooperation operations by providing debt and equity financing. To undertake these operations, it raises funds by borrowing from the Japanese government under the Fiscal Investment and Loan Program, borrowing from financial institutions, issuing FILP agency bonds, and receiving capital investment from the Japanese government. From the perspective of asset liability management (ALM), derivative transactions are conducted for the purpose of mitigating adverse impact caused by interest rate fluctuations.

## 2 Details of financial instruments and related risks

The financial assets held in the Finance and Investment Account are loans to developing regions and are exposed to credit risk attributed to defaults by its borrowers. Marketable securities, investment securities and affiliated companies' stocks also held in the Account are primarily bonds and stocks which are held to maturity or held for policy-oriented purposes. These are exposed to credit risk of issuers, interest rate risk and market price volatility risk.

Borrowings and FILP agency bonds are exposed to liquidity risk in the way that their payments/repayments cannot be duly serviced in such a situation where the Account is unable to have access to markets for certain reasons.

## 3 Risk management system for financial instruments

## (1) Credit risk management

The Finance and Investment Account has established and operates a system for credit management. This system encompasses credit appraisal, credit limit setting, credit information monitoring, internal rating, and guarantee and collateral setting, problem loan management, etc., in

accordance with integrated risk management regulations and various credit-risk monitoring regulations. This credit management is carried out by the respective department responsible for each region in addition to the Credit Risk Analysis and Environmental Review Department and Information Policy Department. Additionally, the Risk Management Committee and board of directors are convened on a regular basis for the purpose of deliberating or reporting. Moreover, the Office of Audit checks on the state of credit management.

Credit risk of issuers of investment securities and affiliated companies' stocks are monitored by the Office for Private Sector Partnership which regularly confirms their credit information and fair values.

Counterparty risk in derivative transactions is monitored by regularly confirming the exposure and credit standing of counterparties and by securing collateral as necessary.

## (2) Market risk management

### (i) Interest rate risk management

Interest rates are determined in accordance with those methods prescribed by laws or business and service documents. Interest swap transactions are conducted to hedge against the risk of interest rate fluctuations in light of their possible adverse impact.

### (ii) Price volatility risk management

Stocks are held for policy-oriented purposes, and the market environment and financial conditions of the investees are monitored. This information is reported on a regular basis at the board of directors by the Information Policy Department.

## (3) Liquidity risk management related to fundraising

The Finance and Investment Account prepares a funding plan and executes fundraising based on the government-affiliated agencies' budgets as resolved by the National Diet.

## (4) Derivative transactions management

Pursuant to regulations concerning swaps, interest swap transactions are implemented and managed by separating the sections related to transactions enforcement, assessment of hedge effectiveness, and logistics management, respectively, based on a mechanism with an established internal check-and-balance system.

## Matters concerning fair value of financial instruments

The following table summarizes the amount stated in the balance sheet and the fair value of financial instruments as of March 31, 2011 together with their differences.

(Unit: Yen)

	Balance sheet amount	Fair value	Differential
(1) Loans	11,051,139,214,728		
Allowance for possible loan losses	-96,053,968,326		
	10,955,085,246,402	10,689,648,688,947	-265,436,557,455
(2) Claims in bankruptcy, rehabilitation, reorganization or other equivalent claims	25,088,735,101		
Allowance for possible loan losses	-24,802,756,856		
	285,978,245	285,978,245	0
(3) Borrowings from government fund for Fiscal Investment and Loan Program (including borrowings due within one year)	(2,459,841,318,000)	(2,529,685,913,187)	(69,844,595,187)
(4) Derivative transactions	4,022,340,050	4,022,340,050	0

Note: Those recorded under liabilities are shown in parentheses.

## Note 1: Method for calculating fair values of financial instruments

### 1) Loans

Fair values of loans with floating interest rates are calculated at their book values, as policy interest rates (bank rates) are immediately reflected in their floating interest rates and therefore fair value approximates book value. On the other hand, fair values of loans with fixed interest rates are calculated by discounting the total amount of the principal and interest using a rate that combines a risk-free rate with respective borrowers' credit risk.

### 2) Claims in bankruptcy, rehabilitation, reorganization or other equivalent claims

Regarding claims in bankruptcy, rehabilitation, reorganization or other equivalent claims, the estimated uncollectible amount is calculated based on the expected recoverable amount through collateral and guarantees. Therefore, fair value approximates an amount listed on the balance sheet at the settlement date, less the current estimated uncollectible amount and hence is calculated accordingly.

### 3) Borrowings from the government under the Fiscal Investment and Loan Program (including borrowings due within one year)

Fair value of borrowings from the government under the Fiscal Investment and Loan Program (including borrowings due within one year) is calculated by discounting the total amount of principal and interest using interest rates expected to be applied to new borrowing for the same total amount.

### 4) Derivative transactions

Derivative transactions are interest-related transactions (interest swaps), and fair value approximates the present discounted value.

Note 2: The following are financial instruments for which the calculation of fair values is deemed extremely difficult. They are not included in the financial instruments' fair value information.

(Unit: Yen)

	Balance sheet amount
Investment securities	5,989,825,631
Affiliated companies stock	112,034,352,794

These financial instruments have no market prices, and the calculation of their fair values is deemed extremely difficult.

## Notes to retirement benefits

2) Periodic allocation method for expected retirement benefits	Periodic fixed-amount benefits method
3) Processing period for actuarial differences	1 year
4) Others (Processing period of differences upon change of accounting standards; actual return rate, etc.)	1 year

## Matters concerning asset retirement obligation

JICA has a building lease agreement for its head office building, and has an obligation to restore the building to its original state at the termination of the lease. Therefore, this asset retirement obligation has been recorded. The estimate for the asset retirement obligation has used the five-year lease period for the projected period of use and a discount rate of 0.529%.

In the current operating year, in line with the application of accounting standards, the amount recorded for asset retirement obligations was ¥68,784,655. The asset retirement obligation balance at the end of the operating year was ¥69,148,526 – the sum of the above ¥68,784,655 and the ¥363,871 adjustment amount of the asset retirement obligations due to passage of time.

**Profit and loss under the equity method**

JICA does not maintain any specific affiliated companies, and so does not prepare consolidated financial statements. However, profit and loss under the equity method as it relates to affiliated companies is as follows:

(1) Investment amount in affiliated companies	¥113,313,206,157
(2) Investment amount when applying the equity method	¥115,255,321,104
(3) Capital gains amount from investments when applying the equity method	¥9,164,252,086

### Breakdown of Allowance for Possible Loan Losses

(Unit: Millions of yen)

	End of FY2009	End of FY2010
Loans	131,415	96,054
Claims in bankruptcy, rehabilitation, reorganization or other equivalent claims	24,557	24,803
Total	155,972	120,857

Note: The allowance for claims on debtors who are legally bankrupt ("Bankrupt borrowers") or substantially bankrupt ("Substantially bankrupt borrowers") is provided based on the outstanding balance and the deductions of the amount expected to be collected through the disposal of collateral and execution of guarantees. The allowance for claims on debtors who are not legally bankrupt but are likely to become bankrupt ("Potentially bankrupt borrowers") is provided based on an assessment of the overall solvency or the debtors after deducting the amount expected to be collected through the disposal of collateral and the execution of guarantees. The allowance for claims on debtors other than Bankrupt borrowers, Substantially bankrupt borrowers and Potentially bankrupt borrowers is provided primarily based on the default rate, which is calculated based on the actual defaults during a certain period in the past.

All claims are assessed initially by the operational departments and secondly by risk evaluation departments based on internal rules for self-assessment of asset quality. The internal audit department, which is independent from the operational departments, reviews these self-assessments, and the allowance is provided based on the results of the assessments.

## Information on the Quality of Assets of Japan International Cooperation Agency (JICA) Finance and Investment Account

Although the Banking Act and Act on Emergency Measures for the Revitalization of the Financial Functions of 1998 (the "Financial Revitalization Act") do not apply to JICA, JICA has made self-assessments of the quality of its assets since the fiscal year ended March 31, 2001, in accordance with the standards set forth in the Inspection Manual for Deposit-Taking Institutions of the Financial Services Agency of Japan. This was aimed at increasing disclosure on its asset quality and improving the internal management of credit risks.

One characteristic of JICA's operation is that a considerable portion of its loans is official credit for the governments of developing countries. Thus, when an indebted country is temporarily unable to service debt due to economic difficulties, debt rescheduling will sometimes take place, based on an international agreement among the creditor countries in the Paris Club, in order to ensure sustainable debt service. A debtor country receiving such temporary support for overcoming the liquidity problem will implement economic restructuring programs agreed upon with the IMF to

acquire sustainable debt service capacity.

The loans rescheduled under the agreement in the Paris Club have a high probability of repayment, because, unlike loans provided by private financial institutions, their nature as official credit provides an asset-securing mechanism under the above international framework. Nonetheless, to facilitate comparison with private financial institutions, JICA, in principle, discloses the loans rescheduled in the Paris Club and whose debtor countries are categorized as "needs attention" in its self-assessments of asset quality, as loan assets require to be disclosed classifying them either as "Restructured Loans" (under the Banking Act) or "Special Attention Assets" (under the Financial Revitalization Act).

**1 Risk Monitored Loans**

The following table shows the classification of Risk Monitored Loans based on the self-assessments of asset quality in accordance with the disclosure standard of Risk Monitored Loans applied to commercial financial institutions

(under the Banking Act). Each category of Risk Monitored Loans is defined as follows:

(1) Loans to Debtor in Legal Bankruptcy

Among loans that are placed in non-accrual status (except the portion deducted as allowance for loan losses), when collection of either principal or interest becomes doubtful for the reason that principal or interest is past due for a considerable period of time or for other reasons, those loans which there is filing of reorganization procedures under the Corporate Reorganization Act or bankruptcy procedures under the Bankruptcy Act or special liquidation procedures under the Companies Act or other relevant laws, or there is suspension of transactions in promissory notes issued by the borrowers in the clearing house. <sup>(Note 1)</sup>

(2) Past Due Loans

Loans that are placed in non-accrual status except those classified as "Loans to Debtor in Legal Bankruptcy" or those whose interest payments are deferred in order to expedite the borrowers' business restructuring or support their business operations

(3) Loans in Arrears by 3 Months or More

Loans whose principal or interest is past due three months or more from the date following the contractually scheduled payment date and not classified as "Loans to Debtor in Legal Bankruptcy" or "Past Due Loans"

(4) Restructured Loans

Loans whose terms and conditions are modified in favor of the borrowers in order to expedite the borrowers' business restructuring or support their business operations by, among others, reducing the stated interest rate, deferring interest payments or write-downs, and that are not classified as "Loans to Debtor in Legal Bankruptcy," "Past Due Loans" and "Loans in Arrears by 3 Months or More" <sup>(Note 2)</sup>

(Unit: Millions of yen)

	March 2011 Reporting Period

## 2 Loan Assets Required to Be Disclosed under the Financial Revitalization Act

The below table shows the classification of loans based on the self-assessments of asset quality in accordance with the disclosure standard of the Financial Revitalization Act.

Each category of Loan Assets to be disclosed under the Financial Revitalization Act is defined as follows.

(1) Bankrupt or De Facto Bankrupt Assets

"Bankrupt or De Facto Bankrupt Assets" are loans and other credits to debtors who have begun proceedings under the Bankruptcy Act, the Corporate Reorganization Act, the Financial Revitalization Act and other similar laws of Japan and have financially failed. In the asset quality self-assessments, these loans are loans to debtors who are legally or substantially bankrupt.

(2) Doubtful Assets

"Doubtful Assets" are loans and other credits to debtors whose financial and operational conditions have deteriorated and who have a possibility that payment of principal and/or interest will not be made on a contractual basis. In the asset quality self-assessments, these loans are loans to the debtors who are likely to become bankrupt.

(3) Special Attention Assets

"Special Attention Assets" are loans to debtors who are categorized as "needs attention borrower" in the asset quality self-assessments, and (i) loans whose principal and/or interest is overdue for three months or more from the date following the scheduled payment date but which are not categorized as "Bankrupt or De Facto Bankrupt Assets" and "Doubtful Assets" ("Past due loans (three months or more)"); (ii) restructured loans on which JICA granted concessions to borrowers in financial difficulties through amending terms and conditions of the loans to assist them to recover and eventually be able to pay to creditors, but which are not categorized as "Bankrupt or De Facto Bankrupt Assets", "Doubtful Assets" or "Overdue loans (three months or more)". <sup>(Note 2)</sup>

(4) Normally Performing Assets

"Normally Performing Assets" are loans to borrowers with no particular problem in their financial conditions, categorized in the asset quality self-assessments either as "loans to normal borrowers" or "loans to needs attention borrowers (excluding Special Attention Assets)", but which are not categorized as "Bankrupt or De Facto Bankrupt Assets", "Doubtful Assets" and "Special Attention Assets".

(Note 1)

According to the Ordinance for Enforcement of Banking Law 19, 2-1-5, which establishes the disclosure standards of risk-management loans held by private financial institutions, debt owed by foreign debtors must be disclosed as bankrupt debtor debt for all debtors fulfilling each of the following conditions: 1) nonpayment of interest or principal within the most recent

(Unit: Millions of yen)

	March 2011 Reporting Period	
Loans Payable*1 (% of total credit transactions)	Bankrupt or De Facto Bankrupt Assets	— (—)
	Doubtful Assets	25,089 (0.23)
	Special Attention Assets	593,826 (5.34)
	Sub Total	618,915 (5.56)
	Normally Performing Assets	10,505,638 (94.44)
Loan-loss Reserve*1	Bankrupt or De Facto Bankrupt Assets	—
	Doubtful Assets	24,803
	Special Attention Assets	71,911
	Sub Total	96,714
	General Loan-loss Reserve for loans not requiring close monitoring	24,143
	Special Allowance for Foreign Debt	—
Total	120,857	
Collateral / Guarantees	Bankrupt or De Facto Bankrupt Assets	—
	Doubtful Assets	—
	Special Attention Assets	—
	Sub Total	—
Coverage Amount*2 (Coverage Ratio, %)	Bankrupt or De Facto Bankrupt Assets	— (—)
	Doubtful Assets	24,803 (98.86)
	Special Attention Assets	71,911 (12.11)
	Sub Total	96,714 (15.63)

\*1 Based on JICA's self-assessments of assets, the difference between the debt exposure to bankrupt debtors and debtors in bankruptcy and the amount recognized as recoverable by means of collateral or guarantees is considered as the projected amount that cannot be collected on, and so is subtracted directly from the total debt exposure. As such, this figure is not included in the above chart under "Loans Payable" or "Loan-loss Reserve".

\*2 Coverage amount refers to the combined total of the loan-loss reserve set aside for each debt and the value of collateral and guarantees, while the coverage ratio represents the ratio of the coverage amount as a percentage of total loans payable.

previous three-year period from the end of the term; 2) no contract signed regarding the extension of the redemption deadline within the most recent previous three-year period from the end of the term; and 3) no specific plans to sign a contract regarding the extension of the redemption at the end of the term. In making disclosures based on the above, JICA, in line with its asset self-assessments and taking into consideration the international framework for cooperation, has classified the aforementioned foreign government debt as debt with bankruptcy concern, while in the disclosure of Risk Monitored Loans, this debt is included as “Past Due Loans”.

(Note 2)

An international consensus was reached at the creditor nation conference (Paris Club Meeting) on rescheduling foreign government debt (where the debtor is a country, and debt originates from such government entities as trade insurance or export credit agencies) of debtor nations temporarily unable to make payments due to a deterioration in their balance of payments. As a result, a temporary liquidity support program for debtor nation governments (balance of payments assistance under the framework of international cooperation) will be shortly executed. In conjunction with this temporary liquidity assistance, debtor nations will implement an economic reform program agreed upon with the International Monetary Fund (IMF), making it possible for the country to continue to service its debt obligations.

The total foreign government debt principal applicable to the debt rescheduling agreement at the Paris Club Meeting held in JICA's Finance and Investment Account was ¥1,130,262 million as of the end of FY2010. Debt from debtor nations classified as debtor nation of concern that received approval for rescheduling measures, in principle, classified as “Restructured Loans”, excluding debt classified as “Loans in Arrears by 3 Months or More”. These debts account for ¥593,826 million (of this amount the deferred principal totals ¥517,230 million) under the category “Restructured Loans” in the above chart.

# Glossary

## **A African Union (AU)**

The world's largest regional organization comprised of 53 member countries and regions in Africa. Headquarters in Ethiopia's capital city of Addis Ababa. Inaugurated with the reorganization and enhancement of the Organization of African Unity (OAU) in July 2002. In January 2010, the New Partnership for Africa's Development (NEPAD) was integrated into the AU. The organization has since increased its role in development. AUC is the commission of the AU.

## **Asian Development Bank (ADB)**

An international financial institution whose purpose is the promotion of economic and social development in Asian countries. ADB carries out lending on a semi-commercial basis.

## **B Base of the Pyramid (BOP)**

People living in poverty with incomes below US\$3,000 a year. Approximately four billion people around the world are estimated to form the BOP. "BOP business" refers to business which has the potential to improve a variety of issues that face people in poverty in developing countries as well as people who are excluded from society and development processes.

## **C Capacity Development (CD)**

The process by which a developing country strengthens its own capacity for solving development issues. In contrast to capacity building, which is driven from the outside, capacity development refers to the endogenous process of a developing country improving the capacity of individuals, institutions, systems and society as a whole. JICA's cooperation plays a role in supporting developing countries' efforts at capacity development as a facilitator for such efforts.

## **Clean Development Mechanism (CDM)**

One of the Kyoto Mechanisms—specified in the Kyoto Protocol—for reducing greenhouse gas emissions. This mechanism enables a developed country to provide funds or technology for a project that contributes to the reduction of greenhouse gas emissions in a developing country. In return, the developed country can use all or a part of the certified emissions reductions achieved by the project to meet its emissions targets.

## **Cool Earth Partnership**

At the World Economic Forum's annual meeting held in Davos, Switzerland, in January 2008, then Prime Minister Yasuo Fukuda announced the Cool Earth Partnership fund of approximately US\$10 billion to be implemented over a five-year period. The fund will be used to support efforts for tackling climate change.

## **Counterpart**

Refers to government officials and technicians from partner countries in international cooperation projects who receive policy advice and technology transfer through such projects.

## **D Developing Countries**

Countries whose level of economic development is low compared with developed countries. Although this term is commonly used in reference to developing countries, JICA generally uses it in reference to countries and regions in Part I of the DAC List of ODA Recipients.

## **Development Assistance Committee (DAC)**

An international committee comprised of aid donor countries to discuss issues surrounding aid, development and poverty reduction in developing countries. It is one of the three major committees of the Organisation for Economic Co-operation and Development (OECD). Japan became a member in 1964 at the same time it became a member of the OECD.

## **E Education for All (EFA)**

An international initiative commenced in 1990 with the aim of providing education opportunities to people around the world. Specifically, the current EFA has established six goals to be achieved by all countries and regions by 2015, including ensuring access to and complete free and compulsory primary education, eliminating gender disparities in education, and achieving a 50% improvement in levels of adult literacy (The Dakar Framework for Action). To achieve these goals, the international community is working together on a variety of initiatives. These goals are also identified in Goals 2 and 3 of the MDGs.

## **Emerging Countries**

Developing countries which achieved rapid economic growth in recent years in such regions as Central and South America, Southeast Asia and Eastern Europe.

## **F Food and Agriculture Organization of the United Nations (FAO)**

A specialized agency of the United Nations. FAO's mission is stated as: "achieving food security for all is at the heart of FAO's efforts—to make sure people have regular access to enough high-quality food to lead active, healthy lives."

## **G Governance**

This refers to the building and management of a country's overall framework of institutions to facilitate stability and development. Good governance should enable the efficient mobilization, allocation and management of a country's resources while also reflecting the will of its citizens. Governance also refers to a government's systems for cooperation between government agencies, civil society and the private sector as well as mechanisms for decision-making. Governance encompasses three main dimensions—the national political system, the capability of the government to formulate and implement policy, and systems relating to the interaction between the government and civil society and the private sector.

## **Gross National Income (GNI)**

The total value of goods and services produced by the citizens of a country domestically and overseas during a specified period.

## **I International Monetary Fund (IMF)**

A United Nations specialized agency whose purpose is to provide comparatively short-term funding facilities to member countries necessary to ensure trade payments and other normal financial flows are maintained.

## **International Rice Research Institute (IRRI)**

Established in 1960. A training and research organization focusing on rice growing.

## **M Master Plan**

A master plan is formulated as the basic plan for the implementation of many types of long-term development projects.

**Medium-developed Countries**

Refers to countries whose GNP per capita exceeds US\$3,035 (1995 World Bank estimate).

**Millennium Development Goals (MDGs)**

These serve as the goals of the international community for the 21st century. They draw together the United Nations Millennium Declaration and earlier international development targets agreed at major international summits during the 1990s, forming a unified common framework. There are eight MDGs, which the international community has agreed to achieve by 2015.

**N NERICA Rice**

Acronym for the New Rice for Africa Project. It mainly refers to new upland (dry) rice cultivars but research and development is also being conducted into wetland rice varieties. The NERICA project has developed hybrid rice varieties by crossing high-yielding Asian varieties with African varieties, which are resistant to drought, disease and pests. The new varieties are expected to contribute significantly to the advancement of rice as an important staple in Africa.

**New Growth Strategy**

A policy for promoting the growth of the Japanese economy. The Japanese government announced the basic policies in December 2009. The six strategic areas are: Strategy for becoming an environment and energy power through green innovation; Health power strategy through life innovation; Asian economic strategy; Strategies for promoting a tourism-oriented nation and local revitalization; Science-and-technology-oriented nation strategy; and Employment and human resources strategies.

**O ODA Graduate Country**

The List of ODA Recipients created by the OECD Development Assistance Committee (DAC) consists of two parts. Part I lists the countries included in the United Nations target for aid of 0.7% of Gross National Product (GNP), and Part II lists the remaining recipient countries of aid. Countries which developed further and progressed from Part I to Part II are referred to as ODA graduate countries.

**ODA Review Final Report**

A set of recommendations presented by the Ministry of Foreign Affairs in June 2010 regarding the way forward for ODA in view of the changes in the domestic and international environments. The report discusses, among other items, the ODA philosophy, priorities, strengthened cooperation with the private sector and NGOs, strategic and effective aid, information disclosure, and wider public participation in ODA activities.

**P Public Private Partnership (PPP)**

Utilizing the private sector for the provision of public services, PPP is a method of implementing programs through the coordination of the public and private sectors. It includes a wide range of schemes which are tailored to the level of participation of the private business, ranging from a simple consignment of a project to build-operate-transfer (BOT) and full privatization. "PPP infrastructure project" refers to infrastructure projects implemented through the coordination of the public and private sectors by utilizing the private sector for the provision of public services.

**S Sound Material-Cycle Society**

A society that decreases consumption of natural resources and reduces environmental burden. The Japanese government established the Basic Act on Establishing a Sound Material-Cycle Society in 2000 to serve as a vision for the society's way forward in place of the traditional concept of the mass production, mass consumption and mass disposal society. The practical action guideline for realizing this sound material-cycle society called for the 3Rs of reduce, reuse and recycle.

**South-South Cooperation**

The implementation of cooperation programs for least developed countries lagging behind in development by middle-income developing countries which are relatively more developed through the use of their own development experience and human resources.

**Special Terms for Economic Partnership (STEP)**

Terms for ODA Loans introduced in 2002 to raise the visibility of Japan's ODA through technical transfers for developing countries by utilizing Japan's advanced technologies and know-how. More concessional terms are applied compared with Japan's tied procurement and other loan terms.

**T Tokyo International Conference on African Development (TICAD)**

An international forum focusing on African development. Since 1993, TICAD has been co-hosted by the Government of Japan together with the United Nations, the United Nations Development Programme (UNDP), the World Bank and other agencies. TICAD has been held every five years since 1993, with TICAD IV being held in Yokohama in 2008.

**Triangular Cooperation**

The implementation of cooperation programs by Japan, jointly with other donors and international organizations, aimed at the further development of developing countries.

**U United Nations Children's Fund (UNICEF)**

A United Nations organization which provides assistance to children with a focus on health in developing countries, through improving nutrition, supplying drinking water, promoting the welfare of mothers and children, and providing education, among other approaches.

**W World Bank**

The world's largest development assistance agency. Carries out lending to member-country central governments and agencies that have received debt guarantees by those governments.

**World Food Programme (WFP)**

The United Nations' food aid agency, which strives to eradicate hunger and malnutrition.

**World Health Organization (WHO)**

A United Nations specialized agency whose purpose is to combat disease on a worldwide scale and enhance health and nutritional standards through international cooperation.

**World Trade Organization (WTO)**

An international organization established in 1995 to promote non-discriminatory free trade. As of September 2009, WTO had 153 member countries and regions.
