| Whole schedule | [Gantt chart showing project duration from Sept 2007 to Sept 2011] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Progress Report | [Gantt chart showing progress report schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Survey Mission | [Gantt chart showing survey mission schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 1. Chief Aik user/Planning/Design | [Gantt chart showing Chief Aik user/Planning/Design schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2. Quality Control / Maintenance | [Gantt chart showing Quality Control / Maintenance schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3. Coordinator / Training | [Gantt chart showing Coordinator / Training schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 1. Quality Control Test Assessment | [Gantt chart showing Quality Control Test Assessment schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2. GIS Data Maintenance | [Gantt chart showing GIS Data Maintenance schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 4. Rural Road Design / Construction | [Gantt chart showing Rural Road Design / Construction schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 5. Rural Road Survey / Design (Pile Foundation) | [Gantt chart showing Rural Road Survey / Design (Pile Foundation) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 6. Rural Road Maintenance (Maintenance Strategy) | [Gantt chart showing Rural Road Maintenance (Maintenance Strategy) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 7. Rural Infrastructure Planning (GIS) | [Gantt chart showing Rural Infrastructure Planning (GIS) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 8. Rural Infrastructure Planning (GIS) | [Gantt chart showing Rural Infrastructure Planning (GIS) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 9. Survey and Design of Rural Road | [Gantt chart showing Survey and Design of Rural Road schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 10. Sub-soil Investigation | [Gantt chart showing Sub-soil Investigation schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 11. Rural Road Construction (Construction Equipment Maintenance) | [Gantt chart showing Rural Road Construction (Construction Equipment Maintenance) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 12. Soil Cement Technology | [Gantt chart showing Soil Cement Technology schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 13. Rural Road Survey and Design (Road slope design allowable overlapping-2) | [Gantt chart showing Rural Road Survey and Design (Road slope design allowable overlapping-2) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 14. Rural Road Survey/Design (Integrated Study of Foundation Work) | [Gantt chart showing Rural Road Survey/Design (Integrated Study of Foundation Work) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 15. GIS (Development & Strengthening of Sustainability) | [Gantt chart showing GIS (Development & Strengthening of Sustainability) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 16. GIS (Thematic Map Create) | [Gantt chart showing GIS (Thematic Map Create) schedule] | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| <p>Project Purpose Implementation capacity of RDEC for rural infrastructure development is strengthened</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-1 Select model areas for GIS Planning</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-1-1 Select model areas</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-2 Conduct trainings for updating Upazila maps and Upazila level Paurashava maps by using GIS and Remote Sensing (RS) Technology.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-2-1 Improve creating method and GIS management for Upazila maps</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-2-2 Improve creating method for Upazila level Paurashava map</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-3 Conduct training for developing a database of disaster damage to rural infrastructure by using GIS and Remote Sensing (RS)</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-3-1 Implement practical works developing a database of disaster damage to rural infrastructure by using GIS and Remote Sensing Technology.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-4 Develop a planning guideline for Rural Road Master Plan by using GIS and Remote Sensing Technology.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-4-1 Implement practical works for preparation of existing land-use maps by using GIS and Remote Sensing Technology.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-4-2 Develop a planning guideline for Rural Road Master Plan by using GIS and Remote Sensing Technology.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-5 Prepare the guideline for introduction of suitable construction methods and technologies</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-5-1 Study for pile introduction of rotary boring machine for bored pile</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-5-2 Make a draft of the guideline on introduction rotary boring machine for bored pile</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-5-3 Study for introduction of soil cement technology</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-5-4 Make a draft of guideline on introduction of soil cement technology</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6 Examine the locally applied technologies.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-1 Examine the existing pile foundation design method</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-2 Improve pile foundation design (1). Revise the estimate equation of the allowable vertical bearing capacity.</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-3 Improve pile foundation design (2). Strengthening of subsoil investigation</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-4 Implement integrated practice on subsoil investigation and pile foundation design</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-5 Improve pile foundation design (3). Study for introduction of foundation improvement work</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-6 Make a draft of the guideline on introduction of foundation improvement work</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-7 Examine the existing hydraulic design for slope protection work</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-8 Improve slope protection design. Revision of road structure manuals</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| <p>1-6-9 Conduct training course on structure design</p> | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| 2-4-4 | Make a draft of the manual for Rotary drilling rig for subsoil investigation | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-4-5 | Make a draft of the manual for Quality Control Manual | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-5 | Implement training for road construction survey using Roughness indexes. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-5-1 | Implement planning practice of Periodic Maintenance by using IKI | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-5-2 | Study on Introduction of FWD apparatus for measuring Deflection Index | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-6 | Update maintenance guideline. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-6-1 | Study on introduction of the soft and cold asphalt mixture for routine maintenance | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-6-2 | Revise Maintenance manual for Introduction of the soft and cold Asphalt mixture | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 2-6-3 | Conduct a training course on Routine maintenance by use of the soft and cold asphalt mixture | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-1 | Develop a database of training records | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-1-1 | System equipment analysis for the database of training records | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-1-2 | Development of the database of training records | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-2 | Strengthen PM&E, library, and CEMW. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-2-1 | Develop the Progress Monitoring System | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-2-2 | Integrate the existing Library Management system into LGED LAN system | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-2-3 | Conduct a troubles and failure survey on Maintenance equipments in CEMW | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-2-4 | Make a trouble and failure survey on maintenance equipments in CEMW | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-3 | Support and organize Working Group Meeting | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-3-1 | Organize Working Group Meeting | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-4 | Support development of Sustainability Plan for continuing RDEC activities through Working Group | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-4-1 | Prepare the pamphlet on the outline of the project | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-4-2 | Operate Homepage | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-4-3 | Issue the News Letter | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| 3-4-4 | Development of Sustainability Plan in each Unit | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

| Evaluation Criteria | Evaluation Questions | | Results |
|---|---|---|---------|
| | Main questions | Sub-questions | |
| <p>• Have inputs been allocated as planned?</p> | <p>(Japanese side)</p> <p>• Have JICA Experts been dispatched as planned?</p> <p>• Have machineries been delivered as planned?</p> <p>• Was the training course in Japan and training in the third country been carried out as planned?</p> <p>• Was the Local Budget from Japanese side allocated from Japan side? (Bangladeshi side)</p> | <p>6 Long-term Experts and 12 short-term Experts have been dispatched as planned and needed. By the end of the Project, one short-term Expert will be dispatched for GIS Unit.</p> <p>All the machineries have been delivered as planned. The maintenance for the machineries is appropriate.</p> <p>Twelve counterparts participated in the Training in Japan, as well as five trainees participants in the technical exchange program from 2008 to 2010.</p> <p>287.9Lac Tk has been allocated as the local cost.</p> | |
| | <p>Have the C/P and management staff been appointed as planned?</p> <p>Have the rooms for Japanese experts equipped with furniture and IT facilities been arranged by Bangladeshi side as planned?</p> <p><Output1: Technical capacity of engineers working at RDEC for planning and design is developed.></p> <p>1-1.50 % of engineers working at RDEC (GIS Unit) are capable to maintain and operate system of disaster damage to rural infrastructure by themselves.(GIS)</p> <p>1-2.50% of engineers working at RDEC (GIS Unit) are capable to update Upazila maps by using and Remote Sensing (RS) technology by themselves.(GIS)</p> <p>1-3.Planning manual for Rural Road Master Plan is developed.(GIS/Maintenance)</p> <p>1-4.Guidelines for introduction of suitable construction methods and technologies are produced.(Design)</p> <p>1-5.50 LGED engineers participate in the Structure Design Training (Design)</p> <p>1-6.Design guidelines for slope protection works developed and authorized by LGED. (Design)</p> <p>1-7.The number of LGED engineers who apply Road Structure Manuals developed/ revised by RDEC2(Design)</p> | <p>36 LGED Engineers/staff have been appointed.</p> <p>All the facilities were arranged as needed (LGED bears 205Lac Tk)</p> <p><Output1-1> Nearly 100% of GIS Unit engineer mastered the technique for development of three type thematic maps for Disaster damage database and update technology using the satellite image</p> <p><Output1-2> Nearly 100% of GIS Unit engineer mastered the technique for analysis technology of satellite image which is needed for Upazila map update</p> <p><Output1-3>Planning manual for Rural Road Master Plan was developed. (Printed in Bengali language. No plan to print in English)</p> <p><Output1-4>The guideline on introduction rotary boring machine for bored pile and the guideline on introduction of soil cement technology were completed.</p> <p><Output1-5> The training course on Analysis, Design and Construction of Bridge has been conducted for HQ engineer and field engineer twice (with total 52 participants)</p> <p><Output1-6>LGED and JICA expert have monitored construction works for trial construction on Concrete block retaining wall and on soil bag method. These works remain the same. Both works are stable and performance is satisfactory. Regarding the construction method of concrete block retaining wall, a design and construction guideline were made and the drawings were included in the construction manual.</p> <p><Output1-7>50% of the Road Structure Manual Drawings for single lane RC girder bridges has been completed</p> | |
| <p>• Have the Outputs been achieved as planned?</p> | <p><Output2: Technical capacity of engineers working at RDEC for quality control and maintenance is developed.></p> <p>2-1.All of the HQ lab, engineers & 10 core regional lab, engineers are able to conduct the newly introduced quality control test by themselves*(IQC)</p> <p>2-2.All District lab, technicians are able to conduct the newly introduced the Field CBR Test by themselves.(QC)</p> <p>2-3.All District lab, Technicians of LGED apply Quality Control Manual revised by RDEC2(QC)</p> <p>2-4.All the District office of LGED apply maintenance guideline updated by RDDEC2.(Maintenance)</p> | <p><Output2-1></p> <p>•The training courses on Rotary Drilling Rig Machine for sub-soil investigation, Tri-axial Compression Test, Consolidation Test were conducted for field engineers (District laboratory engineer) by QC Unit Central lab engineers.</p> <p>Participants of: Tri-axial test: 41, Consolidation test:16, Rotary drilling rig for subsoil investigation:26 →Output2-1.achieved.</p> <p><Output2-2></p> <p>•The training on Field CBR test was conducted for field engineers by QC Unit Central lab engineers. participants:78 →Output2-3></p> <p>•Manuals for Rotary Drilling Rig Machine for sub-soil investigation, Tri-axial Compression Test, Consolidation Test and F-CBR Test were developed. The new Quality Control Manual on sub-soil investigation and Tests combined with the specific manuals are in development. The application of new techniques is monitored at field lab by central lab engineers →Output2-3 achieved.</p> <p><Output2-4></p> <p>•Maintenance guideline including introduction of Soft and Cold Asphalt Mixture was revised. Hands-on Training Manual on Application of Soft and Cold Asphalt Mixture for Routine Maintenance was printed for dissemination training for field engineers starting from July 2011. →Output2-4 achieved.</p> | |

|--|--|---|--|
| | Main questions | Sub-questions | |
| | | <p><Output3>Technology dissemination system of RDEC is improved> 3-1.Individual training history is available to LGED engineers(Training) 3-2.LGED is able to organize Working Group Meeting by itself 3-3.Sustainability Plan is established before the Project ends by LGED</p> | <p><Output3-1> •The database software has been completed and installed. Data collection of training history of LGED staff is going on. •LGED decided that PMS software develop by own resources. Data collection will be completed by September 2011. →Output3-1 will be largely achieved <Output3-2> •WGM meetings were held 28 times so far. PM&E Unit will be responsible for conducting WGM as secretariat. →Output3-2 achieved. <Output3-3> •GIS Unit, Design Unit and QC Unit and Maintenance Unit made a presentation of Sustainability plan at a WGM. By the end of Project, the main four Unit will complete the plan. →Output3-3 will be achieved.</p> |
| • Has the implementation capacity of RDEC for rural infrastructure development been strengthened?(Achievement of Project Purpose) | (Indicator1) Have the two Designs, one Quality Control, and one Maintenance Guideline been developed ? (Indicator2) How many of the LGED core engineers who learned the applied technology for planning, design, quality control, and maintenance can disseminate their new knowledge & skills to field engineer? | | <p>One kind of Designs (contains two kinds) , one kind of QC and one kind of Maintenance Guideline will be developed by the end of the Project. →Project Purpose indicator 1 will be achieved.</p> <p>Total 887 Engineers in LGED HQs assistant engineers and Upazila engineers have participated in the training by February 2011. The trainers at main four technical units are: Design Unit: 4 engineers, GIS Unit: 3 engineers, Maintenance Unit: 1 engineer, QC Unit: 3 engineers →Project Purpose indicator 2 is achieved.</p> |
| Will LGED implement rural infrastructure projects using technical standards developed by the Project?(Achievement of the Overall goal) | (Indicator1) Types and numbers of developed infrastructure | | <p># Up dating and management technologies of the Upazila Map # Development of the Disaster damage map # Trial construction of Concrete block retaining wall and soil bag method # Development/Revise of Road Structure Manuals # Confirmation of utility of the Local sand(Fine sand) as the material for road pavement construction # Introduction of the IRI apparatus for monitoring of road condition # Confirmation of utility of the Soft and Cold Asphalt Mixture # Development of PMS software</p> |
| | (Indicator2) How much the target areas and population of beneficiaries of developed infrastructure have been expanded? | | <p>• Judging by the future activities expressed in the Sustainability plan and present activities, the target areas and population of beneficiaries of developed infrastructure will be expanded.</p> |

| Evaluation Criteria | Evaluation questions | | Results |
|--|---|--|--|
| | Main questions | Sub-questions | |
| | <ul style="list-style-type: none"> Have the activities been carried out as planned? | <ul style="list-style-type: none"> Has the activities been carried out as planned in the Plan of Operations? What were the backgrounds and causes for change in some parts of activities? | <ul style="list-style-type: none"> Many of activities were revised at the Mid-term review. After the Mid-term review, activity 3-2-2 was deleted. ADB would make Upazila map and Paulashava map. So the Project shifted to conduct training for developing a database of disaster damage. Rural development plan using GIS/RS was not supposed to be realized as LGED is not responsible for making the plan. So the Project shifted to develop a planning guideline for Rural Road Master Plan by using GIS and RS technology. Activities for public relations remained, but in the PDM, development of database of training records was replaced. Implementation of training was deleted as that was included in each unit activities Support and organize WGM and Support development of Sustainability Plan were added to accelerate these activities Integrate the existing Library Management system into LGED LAN system was decided to take care by LGED's budget. |
| | <ul style="list-style-type: none"> Did the project change the activities by taking appropriate procedures? | <ul style="list-style-type: none"> Did the project change the activities by taking appropriate procedures? | <ul style="list-style-type: none"> The change in activities was officially approved in MM exchange at the end of Mid-term review. The termination of activity 3-2-2 (integration of the existing Library Management system into LGED Lan system) was approved by CE. |
| | <ul style="list-style-type: none"> Are the methodologies of technology transfer appropriate? | <ul style="list-style-type: none"> Are the methodologies of technology transfer appropriate? | <ul style="list-style-type: none"> The Japanese experts were very cooperative and flexible to work with us with respect to Bangladeshi culture. They provided means and information of local resources They accelerated activities by using WGM They improved manuals by collecting appropriate information C/P and Japanese Experts communicate very well. The process of technology transfer (analysis of current situation - specification of issues and needed technology - trial test - trial construction - making manuals/guideline) was established for most activities. |
| | <ul style="list-style-type: none"> Is the Project management system (Monitoring system, decision-making process, functions of JICA Bangladesh Office, Communication within the Project) appropriate? | <ul style="list-style-type: none"> Are the contents of technology transferred appropriate? Is the Project management system (Monitoring system, decision-making process, functions of JICA Bangladesh Office, Communication within the Project) appropriate? | <ul style="list-style-type: none"> Introduced technologies such as Rotary Drilling Rig Machine for sub-soil investigation, [RI], application of locally available construction materials, LWD, were all relevant to the needs of LGED engineers. With the leadership of CE, decisions are promptly and appropriately made for project implementation. WGM functioned very well for sharing information among Units, learning each other. PDM was well known, but not fully used as a tool to monitor implementation of activities JICA Bangladesh office was very active to attend WGM, provided the Project with feedback to Monitoring report Coordination between the Project and other JICA or development partner's project was successfully done. |
| | <ul style="list-style-type: none"> Is the Project recognized fairly by the implementation organization and C/P? | <ul style="list-style-type: none"> Is the Project recognized fairly in LGED? | <ul style="list-style-type: none"> The objectives of the Project, the rules of C/P are fairly recognized by C/P. Most of C/P are very positive and eager to learn new technologies. Some of C/P even participated in the training during holiday. |
| Verification of the implementation process | <ul style="list-style-type: none"> Have appropriate C/P been appointed? | <ul style="list-style-type: none"> Has C/P been appointed as planned? Are number, position, capacity and assignment of C/P appropriate? How far the involvement of personnel except the direct C/P (such as LGED field engineers)? | <ul style="list-style-type: none"> Refer to Verification of results Since CE is the PD (Project Director) of the Project, the Project has been highly prioritized. RDEC engineers are very motivated, enthusiastic to gain the latest technologies and active to disseminate their new skills and knowledge to field engineers. Many of field engineers participated in the training (570 participants out of 887) When the Project conducts the training/field survey in the field, coordination between HQ and District/Upazila was closely taken. |
| | <ul style="list-style-type: none"> Is there the problem occurring during the | <ul style="list-style-type: none"> Is there any problem occurred in the implementation process of the project? | <ul style="list-style-type: none"> -1 Through the PMS training, there found some parts to be improved. -2 Two kinds of slope protection tests on soil cement technology resulted not successful. |

| Evaluation Criteria | Evaluation questions | | Results |
|---------------------|---|--|--|
| | Main questions | Sub-questions | |
| | How the recommendations made during the mid-term review were reflected in the course of the project ? | *If so, what was the cause and what kind of measures has the project taken? | #-1: The Unit found out there were some items to add into the PMS through software introduction training. The Project appointed a DB specialist who has worked in LGED long term and is fully knowledgeable in the LGED system. The task will be completed by the end of 2011. #-2: The possible causes are erosion of soil at toe level, shallow foundation and inadequate curing. |
| | | (1) Has the Project concentrated more on establishment and dissemination of the concept of the project as well as each technology introduced through the project to LGED engineers? (2) Has the position of RDEC been more clarified in LGED? Was involvement of JCC/SC activated? (3) Strategic and active publicity of outputs of the project (4) Has the "Sustainability Plan" been formulated? (5) Have the collaborative linkage and cooperation among the related Units been fostered? (6) Have the Project's outputs been included in the result of "Training Needs Assessment"? (7) Are the database of training record and personnel database linked? (8) Has the revision of PDM been effective to the better project management? | Plans for establishment and dissemination of introduced technologies are addressed in the Sustainability Plan of each Unit RDEC is not a part of section in LGED, but functional name for LGED engineers. # The Project produced an introduction brochure at the beginning of project period. # The Project upgraded LGED HP relating the Project # LGED Newsletter has picked up the Project activities 14 times so far. GIS, Design, QC, and Maintenance Units introduced their Plan. Eventually, four main Units will complete their Plan by the end of the Project. There are lots of cases of collaboration among technical Units, and collaboration is promoted in LGED. When a technical unit organizes training, they implement the training through Training Unit. Also, as PM&E Unit compiles the result of activities, technical Units collaborate with PPM&E Unit as routine work. TNA is supposed to be revised every 5-6 years. Training Unit will discuss this matter with CE soon. TMS is preferred to be individual rather than linking with PMS as linking will limit efficient functioning of TMS. # Change in PDM was grounded practical reasons and it was effective. # The objectives become clear with indicators which assisted the Project move forwards to make activity plan. # Some mistakes, however, remained in PO which may mean PDM and PO were not actually used for daily management of the project. |

| Evaluation Criteria | Evaluation Questions | | Results |
|--------------------------|--|--|--|
| | Main questions | Sub-questions | |
| | | <ul style="list-style-type: none"> •Have the Project objectives been tackled with issues of rural infrastructure in Bangladesh? •Is improvement of implementation capacity of RDEC in line with needs of LGED? •Is improvement of implementation capacity of RDEC in line with needs of LGED field engineers? | <ul style="list-style-type: none"> # The Project contributed to capacity development of LGED engineers which is effective to rural infrastructure development in Bangladesh. # Not only in rural infrastructure but for plan, design, implementation and maintenance of rural development, LGED is indispensable. In that point, capacity development of LGED is highly prioritized and meets the needs of rural development sector as a whole. # The Project with its objective to empower skills and knowledge of LGED engineers, has transferred technologies on planning, design, QC, and maintenance for rural road and bridges. These transfers were meeting to LGED engineers' needs. # Upazila engineers use the road structure manual developed by the Project for simple design of rural road. They visit HQ for advice when they need to design more complicated road. # Upazila engineers use the GIS map for requesting budget of rural infrastructure development. Also, they send road data to HQ for GIS map. As for maintenance, HQ engineers visit the Upazila office to conduct IRI survey, and Based on the result of survey, Upazila engineers prioritize the maintenance area. # Soft and Cold Asphalt Mixture is new and easy to handle for field engineers. It has much potential to be disseminated as it will be on the FY2011 version of Schedule of Rates. |
| | Necessity | <ul style="list-style-type: none"> •Is improvement of implementation capacity of RDEC in line with needs of rural residents? | <ul style="list-style-type: none"> # When the trial construction of slope protection methods results in success and LGED applies them in extensive areas, the potential farmland will be expanded, which is a strong needs of local populations. |
| | Policy Priority (Bangladesh) | <ul style="list-style-type: none"> •Is improvement of implementation capacity of RDEC in line with the national policy and development issues in the rural infrastructure development sector in Bangladesh? Are the Rural Road Master Plan and improvement of implementation capacity of RDEC relevant? | <ul style="list-style-type: none"> # PRSP II and NSAPR II raised a strategy to include more regional government institutions for road maintenance, employment of the poor, heading technologically possible high quality road construction. # In the 6th Five Year Plan, which will be issued soon, focusing on assurance of equal development and inclusive growth in all over the nation. The Rural Road Master Plan will be revised in FY2011. Planning Unit at LGED is responsible for making the plan, with collaboration of maintenance and GIS Units in terms of indicating criteria, putting information of map and maintenance. The major difference between 2005 version and 2011 version will be that in 2005 version, these information was not included. Revising process for the Plan is now very clear which is obviously contribution of the Project. |
| | Policy Priority (Japan) | <ul style="list-style-type: none"> •Is improvement of implementation capacity of RDEC consistent with the Japan's foreign assistance policy? •Is improvement of implementation capacity of RDEC consistent with JICA Country Program for Bangladesh? | <ul style="list-style-type: none"> In The Country Assistance Program for Bangladesh, the Japanese Government regards Bangladesh as the 'LDC with consistent economic growth', addressing its support development efforts of the people of Bangladesh in accordance with PRSP. The Policy set the economy development as one of the prioritized objectives, and rural infrastructure development is regarded as the indispensable for the integrated development in the agriculture and rural development sector. # JICA issued the Country Program in March 2009, focusing on the pro-poor economic growth and promoting rural infrastructure development. Rural road maintenance, small scale water resource development were to be continuously supported. Also, JICA puts its priority on improvement of infrastructure which resists natural disasters. # The present JICA's strategy for rural development in Bangladesh is consistent with the rolling plan (2010) of MOFA. |
| Relevance | <ul style="list-style-type: none"> Are there any cooperation between this project and other JICA projects such as loan projects or individually dispatched Japanese Experts in Bangladesh? •Was it appropriate to have chosen the LGED all engineers (6,300) as T/G, considering the scale, duties and contents of LGED, RDEC, and the | <ul style="list-style-type: none"> # The fine sand, which proved its effective usage by the Project, will be tested for the rural road infrastructure project in southern area. If the sand is applied for entire loan projects, the construction cost will be reduced. # There was not much of collaboration between the Project and Japanese individual Expert nor JOCV in Bangladesh | |
| Appropriateness as Means | <ul style="list-style-type: none"> •Was a structure of the Project appropriate? •Are there cooperation effects with other donors (ADB, WB, DANIDA, GIZ?) When there is it, what kind of effect is appeared? | <ul style="list-style-type: none"> # It is reasonable for the Project to cover entire land of Bangladesh because the Project has collected data of disaster damage from many Upazila, and Soft and Cold Asphalt Mixture for maintenance will be disseminated all the parts of Bangladesh. # Targeting more than half of all the LGED engineers (more than 10,000) enhances capacity development of HQ engineers. # Phase 1 and 2 were implemented without a long interval and transition from 1 to 2 was very smooth. # The change of some activities after the Mid-term review was appropriate and effective. | |
| | | <ul style="list-style-type: none"> Soft and Cold Asphalt Mixture is applied for the Rural Road & Market Access Infrastructure Development Project of DANIDA. | |

| Evaluation Criteria | Evaluation Questions | | Results |
|---|--|--|--|
| | Main questions | Sub-questions | |
| Have the Outputs been achieved? | Have the three Outputs been achieved respectively? | Refer to Verification of Results | Refer to Verification of Results # Many of Short-term experts who have high level of skills and knowledge were timely dispatched. Japanese Experts and C/P had close communication. # Japanese coordinators were very fluent in Bengali language and contributed to successful achievement of Output <Equipment & Machineries> # All the machineries, software, equipment were appropriately selected and used at maximum level. Maintenance is properly done. |
| | Were the inputs from Japan side appropriate? | Refer to Verification of Results <Japanese Experts> # Participants learned about rural development in Japan, and feed backed the results of training at WGM. | |
| Were the inputs from Bangladesh side appropriate? | Was the training in Japan carried out as planned? | Refer to Verification of Results # Development of PMS at PM&E Unit is delaying due to some rearrangement of system. However, the System will be completed by the end of this year. # Number, qualification of C/P were appropriated at main four Units. # There was no major transfer in GIS Unit which largely consists of local consultants (specialists) | Refer to Verification of Results # All the necessity equipment were provided by LGED. # When the training is conducted in the field, all the logistics and accommodation arrangement were conducted without problem by close communication with field office. |
| | Were the inputs from Bangladesh side appropriate? | Refer to Verification of Results # It is appropriate cost as long as all the provided machineries and equipment are used properly, and will be used with proper maintenance. | |
| Was the budget for the project reasonable? | Was the budget for the project reasonable? Particularly was the cost for capacity development of LGED engineer reasonable? | Refer to Verification of Results # During the Phase 1 project, there were also lots of machineries provided. However, the engineers skill to use was rather low. By conducting many training in the RDEC2, the engineers' skill for maximum use of new technologies increased. # IRI trail survey was very effective. IRI made the survey time very short, which expanded survey road to 30,000Km/year now. The survey used to be conducted by physical eyes before, but now, with the machinery, survey became very accurate. As the survey became objective, it is easy to prioritize the place for maintenance. | Refer to Implementation Process # Since there is very few personnel transfer (in GIS Unit), the skills and knowledge become assets of Unit. |
| Were the activities enough to achieve Outputs? | Have the Outputs been achieved as exact result from activities? What was the particular process to achieve Output? | | |
| Were there any contributing factors other than project activities and inputs? | Were there any contributing factors other than project activities and inputs? | | |

(Handwritten signatures and initials)

| Evaluation Criteria | Evaluation Questions | | Results |
|---------------------|---|---|--|
| | Main questions | Sub-questions | |
| | What are the hindering factors, if any, to achieve the Outputs? | What are the hindering factors to achieve the Outputs? If there is any, how did the Project deal with the factors? | # Due to delay of C/P system development is delaying at PM&E Unit. The specialist has been appointed to deal with and system will be completed by the end of this year. # Due to delay of operator to input data to training history database, the effective use of database is delaying. Operator will be appointed within a month. # There was some difficulties in using internet due to unstable power supply. |
| | *Are the Important Assumption still satisfied ? | Have Local stakeholders participated in the Project field activities? Were the needs for rural infrastructure development remained same? | In case of QC and maintenance, there were lots of field tests and training. When the Project conducted such test/training, the Project always received an approval from Upazila/Union head. There is no change in needs. |

| | Evaluation Questions | | Results |
|--|--|--|--|
| | Main questions | Sub-questions | |
| | Will the Overall goal achieved? | <p>(Indicator1) Types and numbers of developed infrastructure</p> <p>(Indicator2) How much will the target areas and population of beneficiaries of developed infrastructure be expanded?</p> | <p>Refer to Verification of results</p> <p># Maps developed by GIS Unit will be featured on Web near future. Hard copy of Upazila Maps are available at LGED Library.</p> <p># Maintenance Unit will grasp all the Upazila and Union roads based on a fair maintenance plan which will be made as the result of survey on IRI.</p> <p># Construction cost of project including the SWBRDP (2010-2016) by JICA will be reduced by using the Fine sand for construction in southern area.</p> <p># The Soft and Cold Asphalt Mixture are applied for the Rural Road & Market Access Infrastructure Development Project by DANIDA.</p> <p># QC and Maintenance Unit are already using manuals developed by the Project for field seminars. Maintenance Unit will disseminate 1,500 of the Hands-on Manual for Application of Soft and Cold Asphalt Mixture at training for field engineers.</p> <p># Design Unit engineers are confident to maintain their knowledge and skills to design accurate bridges and slope protection, which will benefit the people of Bangladesh.</p> |
| | Budget | <ul style="list-style-type: none"> Is there possibility that LGED will allocate budget and maintain the system? Is the Important Assumption (Necessary budget is allocated to LGED and other institutes for rural infrastructure development) is appropriate at present? Will the Assumption possibly be satisfied? | <p>Refer to Sustainability</p> <p># Rural area is the base of agriculture for 70% of all workable population in Bangladesh, and LGED is indispensable for the development of rural area. In order to inclusive and balanced development, the role of LGED never change and affluent budget for infrastructure is still needed.</p> |
| | Are there any hindering factors to effect achievement of the Overall goal? | <p>policy and / or regulation aspect?</p> <p>Budget and / or financial aspect?</p> <p>LGED's Organizational aspect?</p> <p>Environmental aspect?</p> <p>Is it expected that achievement of the Overall Goal will give an impact to Bangladesh development policy such as the 6th Five Years Plan?</p> <p>Consideration on environment protection</p> | <p>The present policy focus on inclusive development for rural area of Bangladesh. There is no policy change seen at present.</p> <p>GIS Unit concerns that GOB budget does not cover for capacity development of engineers.</p> <p>Heavier volume of work LGED takes care, heavier responsibility on engineers which may cause a damage to maintain the quality of work without an increase of the personnel.</p> <p>Bangladesh is vulnerable to natural disasters. Even if the rural development is expanded as an achievement of overall goal, impact of natural disaster could be larger and wash away the efforts.</p> <p># Application of technical criteria standardized by LGED will realize rural development with standardized quality. That will contribute to promote positive change in National and sectorial policies.</p> <p># Rural Road Master Plan will be revised in FY2011. Since GIS Unit developed a planning guideline for the Master Plan, the Plan will definitely receive impact from the planning guideline.</p> <p># Soft and Cold Asphalt Mixture is expected to give positive effect for environment because it needs no fuel.</p> <p># Expansion of rural road may cause motorization and more industries in rural area which may lead environmental impact.</p> |

| | Evaluation Questions | | Results |
|--|----------------------|---|---|
| | Main questions | Sub-questions | |
| | Ripple Effect | Impact of technical change | # Fine sand will be applied for rural road construction in southern area. # Data of completed Japanese loan project is linked to maintenance system. |
| | | Economical impact to target society, project related stakeholders, beneficiaries | # If new slope protection technologies which have been monitored by Design Unit are applied, they will be a large help for more effective land use. |
| | | Any beneficiaries besides LGED engineers (HQ and field office) | # Upazila Map is available for general use at LGED Library. # Other donors admit the high quality of GIS map # There is no technical assistance for LGED engineer other than RDEC2 project. JICA's presence increased. |
| | | Are there any positive / negative impact by gender, ethnic group or social hierarchy? | <-> If the PMS is completed, monitoring by HQ and reporting by field office will become dramatically simple. <-> LGED's role in rural development may expand <-> Some C/P is going for Master course using new knowledge and skill he received. |

| | Will related regulation, the legal system continue? | | <p># The 6th Five Year Plan underlines promotion of equal development in whole land of Bangladesh, and expand of infrastructure for it.</p> <p># Design Unit is planning to establish a Construction Quality Assurance Plan, which includes 1)Highly Qualified Design, 2) Highly Qualified construction.</p> <p># Design Unit will also conduct Training Needs Assessment to make Training Plan with which they can give advice to field office.</p> |
| Organization, Finance | Does LGED have a capacity to carry out activities after the termination of assistance? (personnel allocation, decision-making process) | | <p># OE, with his strong commitment, has stated that LGED will maintain WGM functions with new name as 'Inter Unit Working Committee'. PM&E Unit will be a secretariat for the Committee.</p> <p># XEN at each Unit is very competent in office management and his technical level.</p> <p># There is very few personnel transfer in LGED. Taking over is also very smooth.</p> <p># As long as local specialists do not leave LGED frequently, it could be an option to maintain specialists to assist LGED's high quality of performance.</p> <p># Every C/P is confident to maintain their skills and knowledge received through project activities. Even if they are transferred, manuals will be effectively used for taking over their tasks.</p> |
| | Are there possibility to increase future budget for Project implementation? Are measures taken for budget security enough? | | <p># Certain budget for 2010/2011 has been already allocated for maintenance .</p> <p># Design Unit is confident to receive budget in future.</p> <p># In GIS Unit, 0.8 million Tk will be allocated for office management and maintenance of facilities. Explanation of Sustainability Plan was very effective to convince the Ministry.</p> <p># Budget for Training Unit has been increasing in stable manner.</p> <p># High level of performance of LGED leads donors' attention and more development fund concentrates on LGED project.</p> |
| | What is the present situation of C/P extension system? | | <p># Training system is fully established in LGED. Contents are developed by technical Units, and Training Unit is responsible for implementation.</p> |
| | Will the experiment method introduced by C/P be applied in their organization? | | <p># Maintenance Unit conducted training for IRI survey. LGED admitted its effectiveness, and Maintenance Unit could purchase additional IRI apparatus. As the results, 500 engineers now can use IRI. Also, based on the revised Maintenance Guideline, dissemination training will start from July 2011 with newly developed hand-on manual on the Soft and Cold Asphalt Mixture application.</p> <p># Seminars on how to collect disaster data are conducted in 25 Upazila. The seminar will be conducted in 100 Upazila by 2013.</p> |
| | Is it possible to extend technologies that was produced by the test results in the pilot are? | | <p># Design Unit plans to extend test construction for slope protection when the present test proves its efficiency.</p> |

(Handwritten signatures and initials)

| Evaluation Criteria | Evaluation Questions | | Results |
|---------------------|-------------------------------|---|---|
| | Main questions | Sub-questions | |
| | Society, Culture, Environment | -Will considerations to women, the poor, socially vulnerable, and environment be continued? | # If the slope protection construction is widely applied, that will lead very effective use of land. # If the Soft and Cold Asphalt Mixture is applied, it will save more constructing cost and environment. |

(8) List of Working Group Meeting

| No. | Date | Agenda | Key Participants |
|------|------------|--|--|
| 1st | 28/11/2007 | 1. Overall Implementation Plan of RDEC2 Project in Year 2007-2008 2. Counterpart Training Program in Japan for the fiscal year 2008 3. Short Term Expert Dispatching Plan in the Fiscal 2008 4. Procurement Schedule of Equipments in Fiscal 2007 | 1. Md. Wahidur Rahman, PD & AddICE, LGED 2. Mr. Koji YAMADA, Chief Project Adviser, RDEC2 3. Mr. Kentario YOKOTA, DRR, JICA Bangladesh Office |
| 2nd | 29/01/2008 | Quality Control Test Assessment | Mr. Haruo HIKI, Short Term Expert on QC |
| 3rd | 07/02/2008 | GIS Data Maintenance | Mr. Yoshitaka GOMI, Short Term Expert on GIS |
| 4th | 05/03/2008 | 1. Wrap-up Presentation by Quality Control Expert 2. Report on Progress of RDEC Activities by Each Unit 3. Briefing for JICA Vice President's visit to LGED on 10 March 2008 | 1. Mr. Haruo HIKI, Short Term Expert on QC 2. All Unit In-charge |
| 5th | 13/03/2008 | Wrap-up Presentation by Short Term Expert on GIS Data Maintenance | 1. Mr. Yoshitaka GOMI, Short Term Expert on GIS 2. Mr. Kozo ITO, Team Director, Rural Dev. Dept., JICA present as Chief Guest |
| 6th | 29/04/2008 | 1. Monitoring Report on RDEC Project in last half year 2. Implementation Plan of RDEC Project in this JFY 3. JICA First Vice President Courtesy Call to CE, LGED and RDEC Project site | 1. Md. Wahidur Rahman, PD & AddICE, LGED 2. Mr. Koji YAMADA, Chief Project Adviser |
| 7th | 01/07/2008 | 1. Kick-off Presentation by Short Term Expert on Design & QC 2. Report on the Progress of "Preparation of RSM-2008" 3. Report on the Progress of GIS Unit Activities | 1. Mr. Haruo HIKI, Short Term Expert on Design & QC 2. Consultant of DPM 3. GIS Unit In-charge |
| 8th | 07/09/2008 | 1. Wrap-up Presentation by Short Term Expert on Design & QC 2. Report on the Progress of Quality Control Unit Activities | 1. Mr. Haruo HIKI, Short Term Expert on Design & QC 2. Quality Control Unit In-charge |
| 9th | 23/10/2008 | 1. Equipment Handover Ceremony for FY:2008-2008 2. Briefing on half yearly achievements and next term plan 3. Kick-off Presentation by Short Term Expert on Design & QC | 1. Mr. Eiji ADACHI, Short Term Expert on Design & QC 2. Mr. Koji YAMADA, Chief Project Adviser |
| 10th | 27/11/2008 | 1. Wrap-up Presentation by Short Term Expert on Design & QC 2. Maintenance Unit Activities | 1. Mr. Eiji ADACHI, Short Term Expert on Design & QC 2. Maintenance Unit In-Charge |
| 11th | 15/01/2009 | 1. Kick-off Presentation by Short Term Expert on GIS 2. Kick-off Presentation by Short Term Expert on Maintenance 3. Report of CP Training in Japan 2008 4. Brief on Training Program | 1. Mr. Yoshitaka GOMI, Short Term Expert on GIS 2. Mr. Haruo HIKI, Short Term Expert on Maintenance 3. Mr. Hasan Mahmud, EXEN, PM&E 4. Mr. Koji YAMADA, Chief Project Adviser |

(8) List of Working Group Meeting

| No. | Date | Agenda | Key Participants |
|------|-------------------------------|---|--|
| 12th | 03/03/2009 | 1. Wrap-up Presentation by Short Term Expert on GIS 2. Wrap-up Presentation by Short Term Expert on Maintenance | 1. Mr. Yoshitaka GOMI, Short Term Expert on GIS 2. Mr. Haruo HIKI, Short Term Expert on Maintenance |
| 13th | 03/06/2009 | 1. Presentation on Achievement and Activity Plan of RDEC2 2. Deliberations | 1. Mr. Koji YAMADA, Chief Project Adviser |
| 14th | 24/06/2009 | 1. Presentation on Review of the overall plan of RDEC2 Project for the Interim Evaluation 2. Presentation on Application of the new Technology using Geosynthetic Soil Bags to Slope Protection Works of Road Embankment by Researchers from Japan | 1. Mr. Koji YAMADA, Chief Project Adviser 2. Dr. Toshinori SAKAI, Professor, Mie University 3. Dr. Md. Zakaria, Associate Professor, Mie University 4. Mr. Yoshiyuki MOHRI, Chief, Soil Engineering Lab, NIRI |
| 15th | 19/08/2009 | 1. Presentation on Improvement of the SPT apparatus for sub-soil investigation and on introduction of the soft & cold asphalt mixture for Routine Maintenance 2. Wrap-up Presentation by Short Term Expert on GIS | 1. Mr. Kiyotaka YAMAURA, Expert on QC & Maintenance 2. Mr. Yoshitaka GOMI, Short Term Expert on GIS |
| 16th | 03/09/2009 | 1. Self Introduction of Mr. Nakazawa & Mr. Tazawa 2. Briefing on the Outline of LGED | 1. Mr. K. Nakazawa, Chief Project Adviser 2. Mr. Tazawa, Expert on QC & Maintenance 3. CE, LGED & WG Members |
| 17th | 10/12/2009 | 1. Presentation on Achievement and Activity Plan of RDEC2 2. Kick-off Presentation on Design of Soil Bag | 1. Mr. K. Nakazawa, Chief Project Adviser 2. Dr. Matsushima, Short Term Expert on Design |
| 18th | 03/02/2010 | 1. Lecture Session on Soil Bag Method 2. Presentation on Drilling Rig Machine 3. Reporting on TIEP | 1. Dr. Matsushima, Short Term Expert on Design 2. XEN & AE Manikganj 3. Mr. Hida, Short Term Expert on QC 4. Mr. Md. Aminul Islam, XEN, Naogaon |
| 19th | 14/03/2010 | 1. Reporting on Counterpart Training in Japan FY:2009 2. Wrap-up Presentation on Drilling Rig Machine | 1. CP Trainees of 2009 2. Mr. Hida, Short Term Expert on QC |
| 20th | 02/06/2010 | 1. Achievement and this term plan 2. Presentation on Soil Cement Technology | 1. Mr. K. Nakazawa, Chief Project Adviser 2. Mr. Haruo HIKI, Short Term Expert on Design |
| 21st | 12/07/2010 & 14/07/2010 | 1. Wrap-up Presentation on Soil Cement Technology 2. Reporting on Shingles 3. Observation on Soil Cement Work on Slope Protection | 1. Mr. Haruo HIKI, Short Term Expert on Design 2. Mr. Md. Abul Bashar, XEN-QC |

(8) List of Working Group Meeting

| No. | Date | Agenda | Key Participants |
|------|------------|--|--|
| 22nd | 04/08/2010 | Kick off presentation on Integrated Practice on Sub-soil Invest Termigation and Geotechnical Design by Short Term Expert, JICA | Mr. Yuichi MATSUMOTO, Short Term Expert on Design & QC |
| 23rd | 16/09/2010 | 1. Wrap-up presentation on Integrated Practice on Sub-soil Invest Termigation and Geotechnical Design by Short Term Expert, JICA 2. Kick-off presentation on GIS Dev and Short Termrengthening of sust Termainability plan dev capacity by Short Term Expert, JICA 3. Sign & Exchange Equipment Handover documents for FY:2009-2010 4. Farewell & welcome of RDEC 2 Project Coordinator | 1. Mr. Yuichi MATSUMOTO, Short Term Experton Design & QC 2. Mr. Yoshitaka GOMI, Short Term Expert on GIS 3. Officials of JICA BD Office 4. Mr. Takeo Oshima, Leaving Coordinator 5. Mr. Kenji YOKOI, Incumbent Coordinator |
| 24th | 02/11/2010 | 1. Wrap-up Presentation on "GIS Development and Strengthening of Sustainability Plan Development Capacity" 2. Interim Report on Sustainability Plan on GIS Unit Executive Engineer (GIS) 3. Achievement of RDEC2 from April-September 2010 | 1. Mr. Yoshitaka GOMI, JShort Term Expert on GIS 2. Mr. Munir Siddiquee, XEN (GIS) 3. Mr. K. Nakazawa, Chief Project Adviser |
| 25th | 01/12/2010 | 1. Reporting on Counterpart Training in Japan FY:2010 2. Reporting on Impact of RDEC Project in Bangladesh | 1. Mr. Md. Roushan Kabir, SE (Maintenance) 2. Mr. Md. Abdur Razzaque Bhuiyan, XEN 3. Mr. Md. Nurul Huda, XEN (PM&E) 4. Mr. K. Nakazawa, Chief Project Adviser, |
| 26th | 23/02/2011 | 1. Interim Report on "Structural Design (Thickness) of Roads to be improved on Trial Bais on Southern Area 2. Interim Report on Sustainability Plan on QC Unit 3. Report on Soft & Cold Asphalt Mixture and its Training | 1. Mr. Md. Abul Bashar, Project Director-PSB & XEN (QC) 2. Mr. Md. Roushan Kabir, SE (Maintenance) |
| 27th | 21/03/2011 | 1. Interim Report on "Sustainability Plan on QC Unit" 2. Interim Report on "Sustainability Plan on Design Unit" 3. Report on Slope Protection Repair Work at Harirumpur Upazila, Manikganj District | 1. Mr. Md. Abul Bashar, Project Director-PSB & XEN (QC) 2. Mr. Md. Zahedul Islam, XEN (Design) 3. Mr. K. Nakazawa, Chief Project Adviser |
| 28th | 18/05/2011 | 1. Interim Report on "Sustainability Plan on Maintenance Unit" 2. Report on "Joint Terminal Evaluation and achievement of each activities of RDEC-2 Project" | 1. Mr. Md. Roushan Kabir, SE (Maintenance) 2. Mr. K. Nakazawa, Chief Project Adviser |

(9) List of Meeting/Session for Special Events

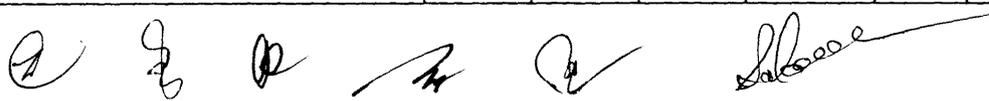

| No | Date | Title of the Meeting / Event | Agenda | Presenter/key presentation by |
|----|-------------|---|--|---|
| 1 | 10/03/2008 | Presentation on LGED Activities | Visit by JICA Vice President to know LGED Activities | Mr. Md. Wahidur Rahman, Additional Chief Engineer & Project Director, LGED |
| 2 | 13/03/2008 | Courtesy Visit by Team Director of JICA | To learn RDEC2 Project and LGED Activity | Mr. Ito, Team Director, JICA |
| 3 | 12/05/2008 | Courtesy Visit by First Vice President of JICA | To learn RDEC2 Project and LGED Activity | Mr. Kuroki, First Vice President, JICA Ms. Kayashima, Chief Representative, JICA BD Office |
| 4 | 14 /09/2008 | Study Visit from Japanese Institute of Irrigation and Drainage | Study on Disaster Prevention in Rural Area | |
| 5 | 15/02/2009 | JICA Partnership Seminar Mission | To learn RDEC2 Project and LGED Activity | 17 Japanese Citizens |
| 6 | 02/02/2009 | Researcher Mission from Japan | To introduce geosynthetic soil bag method to slope protection works of road embankment implementing under LGED | Dr. TOSHINORI SAKAI, Professor Graduate School of Bioresources, Mie University, Japan Dr. MD. ZAKARIA HOSSAIN, Associate Professor Graduate School of Bioresources, Mie University, Japan Dr. YOSHIYUKI MOHRI, Chief of Soil Engineering Lab National Institute of Rural Engineering, Japan |
| 7 | 25/03/2009 | Media Mission | To coverage RDEC2 and LGED Activity | Media Representative JICA HQ |
| 8 | 12/04/2009 | Handover and Courtesy Visit by Ambassador | To handover Portable Steel Bridge Equipment To learn RDEC2 Project and LGED Activity | Mr. Inoue, Amabassador, EOJ, Bangladesh Ms. Kayashima, Chief Representative, JICA BD Office |
| 9 | 11/06/2009 | Handover of Road Structure Manual '08 & Farewell - Ceremony to Chief Representative, JICA Bangladesh Office | Handover of RSM08 to LGED and Farewell to Chief Representative JICA Bangladesh Office | Ms. Nobuko Suzuki Kayashima, Chief Representative, JICA Bangladesh Office Mr. Md. Wahidur Rahman, CE, LGED, Mr. Koji YAMADA, Chief Project Adviser, RDEC2 |
| 10 | 12/07/2009 | Mid Term Evaluation Mission | Project Evaluation | Evaluation Committee Members of JICA HQ, EOJ, JICA, ERD, Planning Commision, MLGRD&C |
| 11 | 16/07/2009 | Meeting on Development of Database on Disaster Damage with field Engineers | Disaster Damage Database | Mr. Gomi, ST Expert, GIS Staff and 20 participants from Field offices |
| 12 | 20/07/2009 | Meeting with JICA Mid Term Evaluation Mission | Mid-Term Evaluation | Mission MembersProject & LGED officials |
| 13 | 21/07/2009 | Kick-off Meeting Joint Mid Term Evaluation Team | Mid-Term Evaluation | Mission Members Ministry (LGD) & (ERD, Planning & IMED Project & LGED officials |
| 14 | 23/07/2009 | Meeting of Joint Mid Term Evaluation Team | Mid-Term Evaluation | Mission Members Ministry (LGD) & (ERD, Planning & IMED Project & LGED officials |
| 15 | 27/07/2009 | Meeting of Joint Coordination Committee for Mid Term Evaluation | Mid-Term Evaluation | Mission Members Ministry (LGD) & (ERD, Planning & IMED Project & LGED officials |

(9) List of Meeting/Session for Special Events

| No | Date | Title of the Meeting / Event | Agenda | Presenter/key presentation by |
|----|----------------------------|---|--|--|
| 16 | 10/08/2009 | Courtesy Visit | To learn RDEC2 Project and LGED Activity | Mr. Kuniyasu, Liaison Officer, FAO, Japan |
| 17 | 04/10/2009 | Meeting on Safety Operation of Improved Standard Penetration Test Apparatus | Improved Standard Penetration Test | 20 Participants from District offices |
| 18 | 07/10/2009 | JICA Investigation Team (ODA Mission) | To learn RDEC2 Project and LGED Activity | |
| 19 | 07/04/2010 | Meeting with Japanese Board of Audit Team | Audit of RDEC 1 & 2 | Design Unit, 2. QC Unit, 3. GIS Unit Maintenance Unit & LGED |
| 20 | 19/09/2010 | Delegation team from MAFF, Japan | To learn RDEC2 Project and LGED Activity | Takashi MUROMOTO, Principal Technical Officer Yasuji OKUMA, Technical Chief Yuichi INAGAKI, 2nd Secretary, EOJ, Bangladesh Mr. Kazuyuki IKEDA, JICA BD Office |
| 21 | 20/09/2010 | Presentation on Sub-soil Investigation & Geotechnical Design | Mechanical Boring Machine, SPT, Load Test, Sampling, Bore Log, Tri-axial Compression Test, Design and Methodology on Pile Foundation | PD, QC & Design Engineers |
| 22 | 30/09/2010 | Chief Representative, JICA Bangladesh Office | To concern about LGED and RDEC2 Activity | Dr. Takao TODA, Chief Representative, JICA Bangladesh Office |
| 23 | 01/11/2010 | Presentation Meeting on Thematic Maps for Rural Infrastructure Development | To cover additional 15 upazila for Disaster Database | Mr. Yoshitaka GOMI, JICA Expert Mr. Shakhawat Hossain, Database Specialist Mr. Sohel Rana, Assistant Engineer (GIS) |
| 24 | 06/03/2011 | Japanese Study Team (Tokyo YMCA) | To learn about Japanese Assistance in Bangladesh | 7 member lead by Ms. Etsuko Tadokoro |
| 25 | 09/03/2011 | Sr. Representative, JICA Bangladesh Office | To concern about LGED and RDEC2 Activity | Mr. Hiroyuki Tomita, Sr. Representative, JICA Bangladesh Office |
| 26 | 19/04/2011 | Review Workshop on Thematic Maps for Rural Infrastructure Development | To learn utilize "Disaster Damage Location Map" for Rural Infrastructure Disaster Planning | Mr. Yoshitaka GOMI, JICA Expert Mr. Shakhawat Hossain, Database Specialist Mr. Sohel Rana, Assistant Engineer (GIS) |
| 27 | 18/05/2011 | Sr. Representative, JICA Bangladesh Office | Pre Terminal Evaluation visit to LGED's unit | Mr. Shigeki Furuta, Sr. Representative, JICA Bangladesh Office |
| 28 | 22 May ~ 09 Jun 2011 | Terminal Evaluation Mission | Project Evaluation | Evaluation Committee Members of JICA HQ, EOJ, JICA, ERD, Planning Commission, MLGRD&C |

(10) List of Training under RDEC2

| No | Title of Training | Participant | | | Date | Days | Venue | Concern Unit |
|----|---|-------------|----------|-------|------------|------|-----------------------|-----------------|
| | | HQ | District | Total | | | | |
| 1 | Field CBR Test (Batch-1) | 9 | 4 | 13 | 06/08/2008 | 2 | Vakurta, Savar, Dhaka | Quality Control |
| 2 | Disaster Database Development for Rural Infrastructure | 0 | 4 | 4 | 06/08/2008 | 2 | GIS Unit | GIS |
| 3 | Tri-axial Compression Test (Batch-1) | 9 | 1 | 10 | 11/08/2008 | 4 | QC Unit | Quality Control |
| 4 | Tri-axial Compression Test (Batch-2) | 1 | 6 | 7 | 25/08/2008 | 4 | QC Unit | Quality Control |
| 5 | Manual Boring Method for Sub-Soil Investigation | 6 | 0 | 6 | 28/10/2008 | 1 | Dhaka LGED Office | Quality Control |
| 6 | Pile Foundation Design | 8 | 12 | 20 | 16/11/2008 | 7 | ICT Room, RDEC | Design |
| 7 | Facilitate Data Collection for Disaster Map | 0 | 4 | 4 | 17/11/2008 | 2 | GIS Unit | GIS |
| 8 | Field CBR Test (Batch-2) | 0 | 9 | 9 | 01/02/2009 | 2 | QC Unit | Quality Control |
| 9 | User Training on Progress Monitoring Software (1st Batch) | 12 | 0 | 12 | 01/02/2009 | 5 | ICT Room, RDEC | PM&E |

(14) News Coverage of RDEC2 Project & JICA Activities in Quarterly LGED Newsletter

(A news Bulletin of Local Government Engineering Department)

| Issue No. | Month & Year | Topics | Remarks |
|-----------|-----------------------|---|------------|
| 86 | July-September 2007 | 1. Second Phase of RDEC Project in LGED comes into operation in September, 2007 2. Japan provides Taka 36 crore for LGED's Portable Steel Bridge Project 3. JBIC Mission visits SSWRDSP-II, Mymensingh (10 August 2007) | with Photo |
| 87 | October-December 2007 | A nine-member Need Assessment Mission from Japan visit LGED (Cyclone Sidr) | with Photo |
| 88 | January-March 2008 | JICA Vice President visit LGED HQ (Mr. Matsumoto Ariyuki, 10 March 2008) | with Photo |
| 89 | April-June 2008 | JICA Vice President lauds strong leadership in LGED and assures further assistance (Mr. Karoki Masafumi, 12 May 2008) | with Photo |
| 90 | July-September 2008 | Japanese ODA Monitoring Team visits EBRIDP in Greater Chittagong District (23 July 2008) | with Photo |
| 91 | October-December 2008 | 1. JICA hands-over technical equipment to LGED to strengthen Japan-Bangladesh Cooperation (23 October 2008) 2. LGED Chief Engineer inaugurates a training course for design engineers | with Photo |
| 92 | January-March 2009 | 1. Picture of 12th Working Group Meeting of RDEC Project-2 2. Japanese Mission visit LGED (Led by Mr. Motoo Taki, Director, Partnership Co-ordination Division, JICA on 15 February 2009) 3. JICA Mission impressed to see progress of EBRIDP (Headed by Mr. Yasuo Fujita, Principal Sr. Representative, JICA Bangladesh Office on 2-3 February 2009) 4. JICA Vice President visited EBRIDP works (Mr. Izumi Arai on 2 March 2009) | with Photo |
| 93 | April-June 2009 | 1. Japan Provides assistance to Bangladesh Portable Steel Bridges (by His Excellency Mr. Masayuki Inoue, Ambassador of Japan in Bangladesh on 12 April 2009) 2. JICA Chief in Bangladesh lauds LGED's effort in developing rural infrastructure (On the occasion of Handing over RSM-08 & farewell to her on 11 June 2009) | with Photo |
| 94 | July-September 2009 | Training in Japan "Participatory Irrigation Management System" | |
| 95 | October-December 2009 | Technical Information Exchange Program in Cambodia | |
| 97 | April-June 2010 | Japanese Audit Mission visit LGED HQ | with Photo |
| 98 | July-September 2010 | 1. JICA Expert in RDEC Project-2 given farewell (to Mr. Takeo Oshima on 16 September 2010) 2. Training in Japan "Participatory Irrigation Management System" | |
| 99 | October-December 2010 | JICA Chief visits LGED HQ (Dr. Takao Toda) | with Photo |
| 100 | January-March 2011 | What makes LGED so effective? A case study by JICA Research Institute (by Yasuo Fujita) | |

ANNEX-6

List of interviewee

| Name | Title | Organization |
|------------------------------|--|---|
| Mr. Md. Wahidur Rahman | Chief Engineer | LGED |
| Mr. Md. Roushan Kabir | Superintending Engineer (Additional Charge) | Maintenance Unit, LGED |
| Mr. Md. Abul Kalam Azad | Superintending Engineer | Design & Quality Unit, LGED |
| Mr. Md. Zahedul Islam | Executive Engineer | Design Unit, LGED |
| Mr. Md. Mostadar Rahman | Specialist | Design Unit, LGED |
| Mr. Md. Abul Bashar | Executive Engineer | Quality Control Unit, LGED |
| Mr. Munir Siddiquee | Executive Engineer | GIS Unit, LGED |
| Mr. Md. Sohel Rana | Senior Assistant Engineer | |
| Mr. Md. Nurul Huda | Executive Engineer | PM&E Unit, LGED |
| Mr. Md. Shakhawat Hossain | Database Specialist | PM&E Unit, Training Unit, LGED |
| Mr. S.M. Munirul Islam | Executive Engineer | Mechanical Unit, LGED |
| Mr. Md. Abul Kalam Pramanik | Executive Engineer | Training Unit, LGED |
| Mr. A.N.M. Enayet Ullah | Executive Engineer | Manikganji District, LGED |
| Mr. Khawaja M. Minnatullah | Senior Specialist, Environment & Water South Asia Environment, Water Resource and Climate Change | World Bank, Dhaka |
| Mr. ASM Harun Ur Rashid | Senior Program Officer | Royal Danish Embassy |
| Mr. Karsten Tolle | Principal Advisor/Team Leader, Second Rural Infrastructure Improvement Project (RIIP-2) | German Technical Cooperation (GIZ) |
| Mr. Mohammad Shafiqul Azam | Additional Secretary | Economic Relations Division, Ministry of Finance |
| Mr. Abu Alam Md. Shahid Khan | Secretary | Local Government Division, Ministry of Local Government and Rural Development & Cooperation |
| Dr. Md. Sarwar Bari | Senior Assistant Secretary | |
| Mr. Rafiqul Islam | Senior Project Officer | Asian Development Bank (ADB) |
| Ms. Elma Morsheda | Project Officer (Urban Infrastructure) | |
| Mr. Toshiro Tsubota | Rural Infrastructure Development Advisor | JICA Expert |
| Mr. Hiroto Sobajima | Second Secretary | Economic and Development Cooperation, Embassy of Japan in Bangladesh |

ANNEX-7

List of respondents to questionnaire

| Name | Title | Organization |
|-----------------------------|--|-----------------------------|
| Mr. Md.Roushan Kabir | Superintending Engineer (Additional Charge) | Maintenance Unit, LGED |
| Mr. Md Zahedul Islam | Executive Engineer | Design Unit, LGED |
| Mr. Md. Abul Bashar | Executive Engineer | Quality Control Unit, LGED |
| Mr. Munir Siddiquee | Executive Engineer | GIS Unit, LGED |
| Mr. Md. Nurul Huda | Executive Engineer | PM&E Unit, LGED |
| Mr. S.M Munirul Islam | Executive Engineer | Mechanical Unit, LGED |
| Mr. Md. Abul Kalam Pramanik | Executive Engineer | Training Unit, LGED |
| Mr.Katsuhiko Nakazawa | Japanese long-term Expert | Chief Advisor/GIS/Design |
| Mr. Hiroyuki Tazawa | Japanese long-term Expert | Quality Control/Maintenance |
| Mr. Kenji Yokoi | Japanese long-term Expert | Coordination/Training |

Impact of RDEC Project in Bangladesh

Before RDEC Project

Scanty updating of digital Upazila/Paurashava base maps, and doing without polisy

Strengthening of Activities in Rural Development Engineering Center Project (RDEC Phase 1-2) 2003~2011

- Updated data of the DUBM
- Data back-up server of the disaster sites → GIS data management of damaged road sites

Results and Cost Reduction Trend of RDEC Project

- Release on Web-Site scheduled (as Nationwide Property)
- Availability (damaged road location and photograph) from disaster information database
- Appropriate construction priority in terms of emergency and importance degrees → (Clarification of application of slope protection works location)
- Increase of organization which GIS Unit provides the map (32 organizations from 2008 to 2009 → 40 organizations from 2009 to 2010)

Road sites damaged by flood

Bridges damaged by washing away

- Preparation of road structure manual (Creation of new standard drawings in consideration for each condition)
- Development of slope protection works
- Soil bag method
- Concrete block retaining wall

No measuring of correct N-value by manual boring
Need for low-priced locally available construction materials

- Introduction of Rotary Drilling Rig Machine and Improved SPT
- Effective use of locally available construction material (Fine Sand)

No selection of maintenance sites
Higher of cost for maintenance due to road extension
<UGED Maintenance budget>
92-93: Tk. 300 million
09-10: Tk5,090million

- Provision of IRI (International Roughness Index) apparatus with automatic system for road profile
- Introduction of soft and cold asphalt mixture for routine maintenance

- Efficient design of bridges and culverts by setting up road structure manual
- Increment of bridge design 65bridges on 2007 to 08 → 120bridges on 2009 to 10
- Total cost reduction effect (Construction and Maintenance) by applying concrete block retaining wall
Cost Effect Tk. 46.3 million/year
- Availability for gained land and raised road by making slope steep

- Measurement of Foundation Strength
- Improvement for safety of bridge foundation and accurate measurement of N-value
- Cost reduction trend by applying Fine Sand
Cost Effect Tk. 61million /year (Case of Barisal Division)

- Cost reduction trend by objective evaluation for the specific maintenance location
Cost Effect Tk. 165 crore /year
- Practicable IRI performance after automatic system
Ten times workable efficiency / day after IRI introduction
- Cost reduction trend by Soft and Cold Asphalt Mixture
Cost Effect Tk. 4.4 million/year

Total Expected Cost Effect Tk. 176 crore /year

(Handwritten signatures and marks)

2. 改訂 PDM (和文)

PDM(1)

プロジェクト名: バングラデシュ国農村開発技術センター (RDEC) 機能強化計画フェーズ2

協力期間: 2007年9月～2011年9月 (4年間)

日本側実施機関: JICA

バ国側実施機関: LGED

ターゲットグループ: 全LGED技術者 (すべての階層)

| プロジェクトの要約 | 指標 | 入手手段 | 外部条件 |
|--|---|--|---|
| 上位目標 標準化された技術基準を適用し、農村インフラが整備される | 1. プロジェクトで標準化された技術の種類と数 2. インフラ整備の対象地域、裨益人口 | LGED資料 LGED資料 | |
| プロジェクト目標 RDECの事業実施体制が強化される | 1. プロジェクト終了時までに、2種類の設計、1種類の品質管理と維持管理のガイドラインが作成される 2. プロジェクトにより計画策定・設計・品質管理・維持管理技術を習得し、地方技術者を教えることができるLGEDのコア技術者の人数 | 1. LGED及びプロジェクト報告書 2. LGED及びプロジェクト報告書 (研修記録、定例会議事録) | 1. インフラ整備事業に必要な予算が、LGEDその他の実施機関に十分配分される |
| アウトプット 1. RDEC技術者の計画策定/設計能力が向上する | 1-1. 50%のRDEC (GISユニット) の技術者が道路被災データベースを自ら維持、運営することができる (GIS) 1-2. 50%のRDEC (GISユニット) 技術者がGIS・リモートセンシング (RS) を活用し、ウバジャラ地図を自ら更新することができる (GIS) 1-3. Rural Road Master Planのマニュアル作成計画が開発される (GIS/維持管理) 1-4. 適正建設手法と技術導入に関するガイドラインが作成される (設計) 1-5. 50人のLGED技術者が構造設計研修を受講する (設計) 1-6. 法面保護工に関する設計ガイドラインが開発され、LGEDにより承認される (設計) 1-7. RDEC2プロジェクトで開発/改訂された道路構造物マニュアルを適用するLGED技術者数 (設計) | 1. LGED及びプロジェクト報告書 (研修記録、定例会議事録) | 1. 技術強化の対象となるLGED技術者の大幅な人員削減が行われない 2. RDECの役割が大きく変更しない |
| 2. RDECの技術者の品質・維持管理能力が向上する | 2-1. 全LGED本部中央試験室技術者と10人の地域事務所試験室の中心的な技術者が、新規に導入された品質管理試験*1を自ら実施することができる (品質管理) 2-2. 全県事務所試験室の技術者が新規に導入された現場CBR試験を自ら実施できる (品質管理) 2-3. 全県事務所試験室の技術者がRDEC2プロジェクトで改訂された品質管理マニュアルを適用する (品質管理) 2-4. すべてのLGED県事務所において、RDEC2プロジェクトで改訂された品質管理マニュアルが活用される (維持管理) | 2. LGED及びプロジェクト報告書 (研修記録、定例会議事録) | |
| 3. RDECの技術普及体制が強化される | 3-1. LGED技術者が個人の研修履歴を入手できるようになる (研修) 3-2. LGED自ら作業部会を開催できる 3-3. プロジェクト終了前にLGEDによりSustainability Planが策定される | 3. LGED及びプロジェクト報告書 (研修記録、定例会議事録) | |
| 活動 1. 計画策定・設計能力の向上 <GIS/計画> 1-1. GIS/計画のためのモデル地域を選定する 1-2. GIS・リモートセンシング (RS) を活用した郡内市街地 (ポウルジョバ) 及び郡 (ウバジャラ) 地図更新のための研修を実施する 1-3. GISとRSを活用した農村インフラ被災状況データベース開発のための研修を実施する 1-4. GISとRSを活用したRural Road Master Planの策定ガイドラインを開発する <設計> 1-5. 適正建設手法及び技法の導入ガイドラインを準備する 1-6. 現地適応化技術を検証する 1-7. 試験施工モデル地域を選定する 1-8. 盛土道路の法面保護工の設計・施工に係る代替技術を開発する 1-9. 既存の道路構造物マニュアルの改善・更新を行う 2. 農村インフラの品質・維持管理能力の向上 <品質管理> 2-1. 新品質管理手法*1の導入に関する研修を実施する 2-2. 地域特産資材実用化のための、検証試験実施サイトを選定する 2-3. 道路建設や道路構造のための建設資材として地域特産材料を適用する 2-4. 品質・施工管理マニュアル、試験室マニュアル及び階層別研修マニュアルを改訂する <維持管理> 2-5. ラフネス指標を使った道路状況調査法に関する研修を実施する 2-6. 維持管理マニュアルを改訂する 3. RDECの技術波及体制強化 <研修その他> 3-1. 研修縦横データベースの開発を行う 3-2. 事業モニタリング評価ユニット、テクニカルライブラリー及び建設機器整備室を強化する 3-3. 作業部会開催と支援を行う 3-4. 作業部会を通じたRDECの活動を継続させるためのSustainability Plan策定へ支援を行う | 投入 日本側 (総額3.26億円) 1. 長期専門家3名 ① チーフアドバイザー/計画/設計 ② 品質管理/維持管理 ③ 業務調整/研修 2. 短期専門家 3. 機材 必要に応じ 4. 予算 プロジェクトに関する現地活動費 5. 日本・第三国での研修 関連分野における日本・第三国研修 | バ国側 (総額約1億円) 1. 人員 ① 各日本人長期専門家に対応する3名のフルタイム雇用カウンターパート ② プロジェクト活動実施に必要なLGEDエンジニア ③ 短期専門家のカウンターパート ④ 日本人専門家及びLDEC職員のためのコンピューターオペレーター、運転手、秘書 2. 機材 ① 事務所 ② 家具 ③ 通信手段及び業務用機材 3. 予算 ① カウンターパート給与及び必要経費 ② 研修経費 | 1. 地元ステークホルダーがプロジェクトの現場活動に参加する 2. 大規模災害による農村インフラ整備ニーズに大きな変更がない 前提条件 特になし |

*1: 現場CBR試験、三軸圧縮試験、圧密試験、機械ボーリング試験、孔内水平載荷試験

妥当性

| 評価項目 | | 評価設定 | 調査結果 |
|------------------------|--|--|--|
| 大項目 ・日本の技術の優位性はあったか | 小項目 ・技術面での比較優位があったか？(日本の対象技術の経験が生かされたかなど) | ・基礎杭設計手法に関し、日本での方法を参考に推定方法が改善され、安全基が構造物の規模によって選択されることとなった。 ・LGED技術者がやりたこと(ニーズ)をJICAが汲み取ったこと、短期専門家のため細かい指導がLGED技術者に大きな影響を与えていた。また、彼らは自分たちの能力をわきまえて、休日やラマダン時も研修に参加するといった勤勉さも日本人と似ているところがある。 ・本邦研修での研修先の選定に日本の技術の優位性は役立った。結果として、研修生は熱心に各研修先で学び、研修の経験は帰国後生かされている、と作業部会でも報告されている。 ・RDECIは、日本の農村インフラ整備事業(農業農村整備事業)における技術的知識・経験の蓄積を担うところの土地改良技術事務所(農林水産省における出先機関のひとつ)ともいうべき機関をめざしていると考えられることから、調査・計画・設計・施工・維持管理を1つのサイクルとして実践することが日本の事例と同じく確立されている。他方、日本の農村インフラ整備事業では、土地改良区に代表される参加型管理方式の分野において(例えば灌漑排水の分野)が多い(例えば灌漑排水の分野)点は日本とバングラデシュで異なる(バングラデシュは食料、現金など現物支給を伴う)。 | |
| | ・中間レビュー以降、プロジェクトをとりまく環境(政策、経済、社会など)の変化はあったか。 | ・日本の対バングラデシュ政策に大きな変化が生じたか？ ・バングラデシュの農業・農村開発に係る政策に大きな変化が生じたか？ | 変化は生じていない。 ・農村道路整備は、PRSPでは単なる拡張から質の高い工事と農村と都市を結ぶ選択的な拡張、市場整備とアクセス、排水施設整備に重点が置かれていた。PRSP II、NSA PR IIでは農村道路マスタープランの策定、維持管理優先の計画の適用、質の高い道路建設をめざし、積載量規制による舗装道路保護、貧困層促進、維持管理のための地方政府機関の更なる巻き込みが戦略として挙げられている。 |
| | ・バングラデシュの経済状況に伴う大きな変化が生じたか？ | ・GDPは2009年5.7%、2010年は5.8%と堅調な伸びを示しているものの、輸出(特に衣料)は10.1%から4.2%と下落する一方で輸入は4.2%から5.4%に上昇。また、2011年のDDGP成長は6.1-6.3%と予想されている。 | |
| | ・社会状況での大きな変化が生じたか？ | 変化は生じていない。 | |

農村開発技術センター機能強化計画
フェーズ2終了時評価調査評価グリッド
効率性

| 評価項目 | 評価項目 | 調査結果 |
|----------------------|--|--|
| 大項目 アウトプットは達成されたか | 小項目 3つのアウトプットはそれぞれ達成されたか | 「実績の検証」及び、有効性の「アウトプット達成」を参照。 |
| 日本側投入は適切だったか | 専門家（長期・短期）の派遣人数、専門分野、派遣タイムラグ、供与機材はアウトプット達成のため適切で、活用されたか | 「実績の検証」参照。 ・長期専門家はもとより、若い技術と知識を兼ね備えた短期専門家が数多く派遣され、コミュニケーションも密に取れたことから、技術の向上につながった。 ・調整員はベンガル語が堪能であり、アウトプットを達成するために十分な貢献をした。 ・短期専門家が2か月、県事務所に出向き定期的に緊密な連携の下、事業を進めることができた。 |
| 外国側投入は適切だったか | 本邦研修は役立ったか | 機材類は的確に運定され、使用されている。維持管理にも問題は見られない。 「実績の検証」参照。 ・受講者は日本の農村開発の事例を学び、帰国後作業部会で発表をし学んだ知識を共有した。 |
| 外国側投入は適切だったか | C/P、運営管理スタッフは適切に配置されたか、他業務との兼任状況、賃賃、配置のタイミングはプロジェクト実施に適切だったか | 「実績の検証」参照。 ・活動3-2-1事業管理システムの開発はIGEDの人材を使うこととなったが、専属スタッフが未配置で2011年中の完成をめざしている。 ・C/Pの人数（フルタイムとその他活動に参加する技術者）については、LGED本部から地方事務所へ派遣するにあたっては、少なすぎず、日本人専門家の配属人数に対しては多すぎず、適切な配置人数と考える。他業務との兼任をしているC/Pもいるが、プロジェクトの推進に支障が出ることはなく、技術・経験ともに十分な資質を有しており、英語でのコミュニケーションも含め大きな問題はない。配置については、「維持管理」のC/Pが2010年7月に交代したが、後任への引き継ぎもスムーズであり、タイミングとしても活動に支障を来すものではなかった。 ・GISユニットではコンサルタントの職員は結果をだす能力を備えた人材である。 ・設計ユニットの技術者とマネジメント系の職員は結果をだす能力を備えた人材である。 |
| 予算規模は適切だったか | LGEDは事務所、家具、通信手段及び業務用機材を適切に供与し、それらは活用されたか | 「実績の検証」参照。 ・品質管理・維持管理ユニットにおける活動の場合、各種資機材を用いて、現場における実証試験、研修を行うケースが多く、外泊を伴うような場合は、宿泊施設の手配から、資機材の運搬、現地での設備の使用など地方事務所と連携を取りながら適切な供与がなされた。 |
| 効率性 | プロジェクトの予算規模は適正であったか、また、技術士育成にかかると1人当たりのコストは適正規模であったか | 供与した機材が適切に活用されて、今後も維持されていく限り、予算規模は適切であったといえる。 |
| 効率性 | ・アウトプットを産出するために十分な活動であったか（アウトプット達成への貢献要因） | 「現地調査（IR）」は非常に役立つ。IR機器使用により調査時間が短縮し、今では年間30000kmの調査が可能となった。また、目標調査であった以前と比べて正確性も格段に向上した。また、メンテナンスが必要な場所が定期的に分かるので、優先順位が容易に付けられるようになった。 ・ Light Weight Deflect meter - LWD（道路を破壊することなく強度を測定する機械を導入したことにより施工中の検査にも役立たせることができる。 ・ 本プロジェクトで導入されたさまざまな機材やコンピューターが大きく役立つ。 ・ フェーズ1前まで、技術者のレベルはとて低かったが、その後フェーズ1により研修が行われ、多少ラボを運搬していかれるまでに至った。本プロジェクトでは、フェーズ1を土台に、新しい実験を新しい機材で行ってきており、その内容は高い。機材も国内でLGED本部ラボと民間で多少設置されているだけの質の高い機材である。こうした機材の使用に関する研修や試験を行うことで技術者の能力が格段に上がった。フェーズ1でも機材は供与されたが、使いこなすだけの能力が足りなかったが、本プロジェクトで、研修を数多く実施し、能力向上を図ることができた。 |
| 効率性 | ・アウトプットが出るまでのプロセスはどのようなものであったか | 「実施プロセスの検証」参照 |
| 効率性 | ・同じアウトプットを出すのに、より効果的/効率的な活動はあったか | 現状分析に基づいた、効果的・効果的な活動内容が選択され実施された。 |
| 効率性 | プロジェクトの活動・投入以外のアウトプット達成の貢献要因はあったか | ・2つのプロジェクトの間が比較的短期間で、かつスムーズに移行したこと ・中間レビュー時に、実際の進捗に基づき一部の活動を適切に変更したこと ・LGEDでは技術者が比較的長期間（5-6年間）同じ職場で勤務が長く、今後も異動は見込まれないことから、技術者が蓄積する環境にある。 |
| 効率性 | アウトプット達成への阻害要因はあったか | ・事業進捗モニタリングシステム（PMS）は人員の配置の遅れによる協力期間内でのシステム開発に支障が出ていた。LGEDの事業に詳しいローカルコンサルタントを雇用し作業中。 ・研修履修入力専属オペレーター（PMS）の配置の遅れによる、協力期間内の全面運用が遅れている。近々配置がなされ、作業はプロジェクト終了までに完成予定。 ・電力の安定供給とそれに伴う通信状況（主にインターネットの接続）に多少難があった。 |
| 効率性 | ・活動からアウトプットに至るまでの外部・地元ステークホルダーはプロジェクトの現場活動に参加したか ・条件は、現時点においても正しいか。外部条件による影響はあったか | ・品質管理・維持管理ユニットにおける活動の場合、各種資機材を用いて現場における実証試験、研修を行うケースが多く、例えば、地元の道路を利用して研修を実施する際は、それに関係する自治体の長（村や郡）の認可を要したうえで行われた。しかし、地元ステークホルダーの認可もあついても、あいつつに出向いた際の口頭によるものであり、現時点で支障を来たしたケースは特になかった。 ・二一のの変化は起きていない。 |

| 評価項目 | 評価説明 | 小項目 | 調査結果 |
|---|--|-----|---|
| 大項目 | | | <p>プロジェクト終了後、各ユニットが継続すべき活動が、サステナビリティプランの案に以下のように述べられている。</p> <p>【GISユニット】</p> <ol style="list-style-type: none"> 1. 郡マップの更新（河川データの更新、土地被覆状況の更新） 2. 被災データベースの作成 <p>第1段階：100郡 第2段階：追加200郡</p> <p>【設計ユニット】</p> <ol style="list-style-type: none"> 1. 橋梁設計研修の実施 2. 設計マニュアルの5年ごとの更新 3. 試験法面施工のモニタリングの継続 <p>【維持管理ユニット】</p> <ol style="list-style-type: none"> 1. IRV自動測定機を活用した道路維持管理調査 2. 定期的維持管理（常温アスファルト、道路維持管理ガイドラインの改訂など）の実施 3. LWDの活用による道路舗装非破壊検査の実施 <p>【品質管理ユニット】</p> <ol style="list-style-type: none"> 1. 改良された機材を活用した地盤調査の実施 2. F-CBR試験等の実施 3. フィールドエンジニアに対する継続した研修の実施 <p>・4つのユニットは、これまで行ってきたことを今後も行っていくというスタンスでサステナビリティプランを作っており、実施不可能なことは書いていない。 ・「サステナビリティプラン」はなくても、LGEDは自ら発展していく、また、プランを作っても、行うものを行わないものがあるといった、計画作成自体の意識を問う意見も。</p> |
| 政策・制度面 | <p>・関連規制、法制度は整備されているか。整備される予定か。</p> | | <p>・第6次5カ年計画では地球環境の是正の促進とそのためインフラを拡大させることを強調。</p> |
| 組織・財政面 | <p>・協力終了後も効果を上げていくための活動を実施するに足る組織能力はあるか（人材配置、意思決定プロセスなど）</p> | | <p>【高層以下LGED技術者について】</p> <p>・LGED局長は、プロジェクト終了後も名前をInter Units Coordinatin Committee(IUCC)と変えて作業部会的機能継続していくと表明している。PM&Eが事務局になることになった。プロジェクトごとの作業部会的な会合は従来から行われてきたが、ユニット間のこうした会合は本プロジェクトまでなかった。LGEDには全部で12ユニットあるが、いずれは全部のユニットが参加するのが望ましいとの意見もある。</p> <p>・現在の設計及び品質管理ユニット担当、維持管理ユニット担当総括部長（Superintending Engineer）は非常に効率的かつ情熱を持った人材であり、各ユニット長にも優秀な人材が配置されている。</p> <p>・人事異動が他の八国政府機関と比較して格段に少ない。普通は技術を身に着けた人材は関係のない部署に異動するか、辞めていくかが大半のところ、LGEDでは人事異動は然程頻繁ではなく、異動があっても引き継ぎがスムーズに行われていることからあまり問題にならない。こうした人事政策もLGED技術者の高い仕事を戻す要因。</p> <p>・政府には質の高い技術者を継続的に雇用することは困難であり、外部コンサルタントに頼る現状維持も致し方ないとの見方もある。一方で、引き続きLGEDの中央のスタッフが技術、知識、マネジメント能力が向上できるよう、また地方の技術者の能力強化は不可欠。</p> <p>・主要4ユニットの主たる技術者は、本プロジェクトを通じて、導入された技術を活用し維持・発展させる能力を身に着けた。また、たとえば、中長期的に見ても、マニユアル等にもとめられた仕様にに基づき引き継ぎは十分に可能である。</p> <p>・中長期的には、LGED局長のリーダーシップの低下による組織力の低下や、LGEDの業務量増大による質的低下を懸念する声も聞かれた。</p> |
| 経常経費を含む予算の確保は行われているか。八国の予算措置はプロジェクト終了後も十分に講じられるか。 | <p>・経常経費を含む予算の確保は行われているか。八国の予算措置はプロジェクト終了後も十分に講じられるか。</p> | | <p>【各ユニットの予算状況、取組】</p> <ul style="list-style-type: none"> ・維持管理ユニット：2010-2011年度予算に機材の維持費も含む、機材費とラフネス調査費計60 Lac BDTが政府予算に組み込まれ、機材も自前で購入している。 ・設計ユニット：ユニットの強化は終わりに近づきつつあり、今後とも自らの予算により能力向上のプロセスを進めていくと表明。 ・GISユニット：来年度（2011/2012）は40.8million BDT（約7万円）の政府予算が既に承認され、運営と機器の維持管理に使用される。サステナビリティプランでGISの必要性を説明したところ認められたので、同プランを作成した意義は大きい。来年度の予算がついたことで、来年度効率的・効果的に事業を実施し、きちんと予算を消化すれば、例年予算は増加していく。他方、政府予算はGISユニットの運営資金は出しても、キャパシティには出さないのが課題。 ・研修ユニット：毎年八国政府のLGEDによる研修への予算は増え続けている。 <p>【LGED全体】</p> <ul style="list-style-type: none"> ・LGEDの高い事業実施能力はあらゆるドナーの信頼を得、より多くの資金が集まっている。 ・他ドナーのプロジェクトでは、農村インフラの事業費の中に、建設費だけでなく、administrative costも含まれていることから、LGEDはJICAがこれまで抜プロで支援してきた、技術者の能力向上のための、例えば研修費用などはそこから削っていくことが可能。 ・予算は、ERD他が確保しており、予算確保の必要性をLGEDがうまく説明できれば予算は確保されるだろう、との見方もある。 |

| 評価項目 | 評価設問 | 調査結果 |
|-----------|--|---|
| 技術面 | <p>大項目</p> <p>小項目</p> <p>プロジェクトで導入した技術が今後とも定着しているか</p> | <p>・道路橋・建物・マンユールは基本的・標準的な状況での使用が前提の基礎的な内容であることから、研修を受ければ使用可能。現場の土壌がマンユールでは対応しきれない応用的な場合も、地方技術者は、本部の設計ユニットに判断を仰ぐことになっているので、問題ない。また、技術は日々進歩するものがあり、6年程度ごとにマンユールは改訂しないといけないが、設計ユニットでは現在の能力があれば可能と認識されている。さらに、短期専門家に移転した技術は現在同ユニットでは日常業務で実践されている。</p> <p>・設計関連の研修で、八国政府予算で行った「行われる研修」(設計、施行、マンユール使用方法など)は以下のとおり。</p> <p>① 今年度(2010/2011)、5月に2つの設計に関する研修が終了</p> <p>② 今年度(2010/2011)のうち、あと1つの研修を5月29日から開催予定。30-35人の郡、県レベルのアシスタントエンジニアを対象に実施。</p> <p>③ 来年度(2011/2012)は、6つの研修が行われる予定。合計で200名程度の受講者を募り込んでいる。</p> <p>・設計ユニットでは、①質の高い設計、②質の高い施行をめざし、「Construction Quality Assurance Plan」の策定を検討中。さらに、どの地域でどのような研修が必要か、地方にアドバイスできるようにするために、設計ユニットのTraining Needs Assessment(研修ニーズ)を行い、Training Planを作り、アウトルックをまとめること。</p> <p>・道路地図についてはGISユニットが毎年更新、データ管理している。GIS内の印刷機でプリントアウト可能。</p> <p>・LGEDのローカルコンサルタントが、「スペシャリスト」と呼ばれており、さまざまなプロジェクト予算により継続的に雇用されている。多くのスペシャリストは長期間雇用されており、民間コンサルタントに研修を行う=技術の定着が望めない」との通常のプロジェクトの抱える課題は異なつていない。こうした点は八国政府機関の中でも、LGEDならではの特殊性、他にも、規模が大きいこと、農村インフラプロジェクトを多数計画・実施していること、能力が高いといった点もLGEDの組織的な特徴として挙げられる。</p> <p>・導入した技術は、必要性が高いものであり、LGED技術者もその有効性を理解しており、かつプロジェクトで得た技術を使っていくに足る技術をも身に着けたことから、技術の定着に問題はなないと見られる。</p> |
| | <p>これまでプロジェクトで投入した資機材がプロジェクト終了後も適切に管理されるか。</p> | <p>・研修履歴データベースは研修ユニットのインシデントにより独自に運用し、日常的にデータベースによる検索も専属職員に限ること適切に管理していく方向。</p> <p>・中央試験室をはじめ各地方事務所試験室があり、その試験室において今後導入された資機材に係る維持管理は可能と考えられる。また、大型建設機材などに関しては、LGEDの建設機維持管理部門の協力を得ながら、必要に応じてアウトソーシングも含め、管理能力の維持に努めることが可能。</p> <p>・GIS、設計、維持管理ユニットにおいても、今後の機材の維持管理に技術的、予算的な自信を持っている。</p> |
| | <p>LGED(本部)の地方事務所技官への技術普及体制の現状と今後の方針は</p> | <p>・地方には10カ所(地域ごと)のトレーニングセンターがあり、シニアオフィサー達が研修の講師となって実施している。LGED職員はすべて基礎的な研修を受講する必要があるが、受講者の様子もシニアオフィサー達が観察しつつ素質のある人材を将来的に講師として推薦していく仕組み。</p> <p>・LGEDには構造物設計担当技術者が1,162人いるなかで本プロジェクトでのターゲットはそのうち80人だけであった。そこで、人材育成は今後八国予算により、大規模にかつ安定的に行われる必要があると認識されている。設計関連の研修で、八国政府予算で行った「行われる研修」(設計、施行、マンユール使用方法など)は以下のとおり。</p> <p>① 今年度(2010/2011)、5月に2つの設計に関する研修が終了</p> <p>② 今年度(2010/2011)のうち、あと1つの研修を5月29日から開催予定。30-35人の郡、県レベルのアシスタントエンジニアを対象に実施。</p> <p>③ 来年度(2011/2012)は、6つの研修が行われる予定。合計で200名程度の受講者を募り込んでいる。</p> <p>・研修以外にも、3カ月に1度、県事務所が集まる機会を活用し新しい考え方を、新しい技術について普及している。彼らが職場に戻り、今後はそれを更に下のレベルの技術者に伝えていく。アシスタントエンジニアレベルの技術者が集まっていることから、1-2年後にはLGEDの中で更にトレーナーの数を増やす方向。</p> <p>・LGEDによる研修の予算は年々増え続けている。</p> |
| | <p>現在LGED関係者で試験導入を試みている各種の実験・調査方法は組織内に定着しているか。</p> | <p>・IRI調査のための研修を実施したところ、LGEDでも有効性が認められ、自らの予算で機材を購入した。現在JICAからの供与分を含め、17機あり、結果として現在500名の技術者がIRIを使用することができる。また、改訂した維持管理ガイドラインに基づき、「常温アスファルトハンディマンユール」を作成。2011年7月から本格的普及活動に入る。</p> <p>・GISユニットによる被災テータの収集説明会の実施は現在25郡のところ、2013年までに100地域に拡大予定。</p> |
| 社会・文化・環境面 | <p>・ハイロップ地域で実施した試験結果によっては、他地域への普及があり得るか。</p> <p>・女性、貧困層、社会的弱者、環境面への配慮が今後も持続的になされるか</p> | <p>・法面保護工法に関する試験施行(2011年1月施工)は25m²程度BDI(=54万円)程度の費用で実施できることから、設計ユニットでは現在の試験施行のモニタリングをあと4-5年続け、試験施工として行った3種類の工法の有効性を確認した後、基礎部分(土質)の状況が違ってもさまざまな地域で試験施行を実施していく意向を表明。</p> <p>・常温アスファルトによる維持管理が普及すれば、従来の方法より、コスト面、燃料を使わないことから環境面でも改善が図られる。</p> |
| | <p>自立発展性を阻害するその他の要因はあるか。</p> | <p>・質の高い施工業者を確保することが困難な時期など、季節によっては末端の労働力不足もある。</p> <p>・LGED方式(LGEDが地方行政組織に呼びかけて工事発注(県事務所、監督(県事務所)を行う)では、郡や村の能力が着たないのが問題である。本来LGEDによる農村インフラ工事は、郡や村が策定した総合的な基本計画に基づいて行われるべきで、LGEDはあくまでそれを支える立場であるが、郡や村には技術的に妥当な総合計画策定とそれに基づくプロジェクト間の調整を行う能力がなく、LGEDが行う70以上の農村インフラプロジェクトがそれぞれに実施しているのが現状である。</p> |
