ANNEX 12 Major Undertaking to be Taken by Each Government

2 To clear level and reclaim the site when needed 3 To construct the Parking lot 4 To Construct the Parking lot 5 To construct the Parking lot 6 To construct the Parking lot 7 To provide facilities for the distribution of electricity, water supply, dealinage and other incidental facilities 9 Outside the site 2 Outside the site 9 To provide facilities for the distribution of electricity, water supply, dealinage and other incidental facilities 9 To provide facilities for the distribution of electricity, water supply, dealinage and other incidental facilities 9 To provide facilities for the distribution of electricity, water supply, dealinage and other incidental facilities 9 To provide facilities for the distribution of electricity, water supply, dealinage and other incidental facilities 9 The distributing line to the site 9 The distributing line to the site 9 The distribution plant of the site 9 The city water distribution main to the site 9 The city water distribution main to the site 9 The city water distribution main to the site 10 The supply system within the site (receiving and elevated tanks) 11 Dininage 12 The city drainage main (for storm sever and others to the site) 12 The site gas amain to the site 13 The best gas main to the site 14 Gas Supply 15 The gas supply system within the site 15 The legge as main to the site 16 The sear the commissions to the main distribution frame/panel (MDP) of the building 16 The plant has extension after the frame/panel 17 To be are the commissions to the Japanese bank for banking services based upon B/A 18 To ensure prompt customs clearance and to assist internal transportation in the recipient country and to assist internal transportation therein of the products 18 To bear the consumissions to the Japanese bank for banking services based upon B/A 19 To ensure normalisation therein of the products 10 To ensure that contoned date, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the purchase of the Components as well as	No.	Items	To be covered by Grant Aid	To be covered by Recipient Side
To Construct the Parking lot To Construct the Parking lot To Construct roads 1) Within the site 2) Outside the site To construct most 1) Within the site 2) Outside facilities for the distribution of electricity, water supply, drafnage and other incidental facilities 1) Electricity a. The distributing line to the site b. The drop wiring and internal wiring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The supply system within the site (receiving and elevated tasks) 3) Drainage a. The city drainage system (for toilet sower, ordinary wasto, storm drainage and others) within the site 4) Oas Supply a. The city drainage system (for toilet sower, ordinary wasto, storm drainage and others) within the site 5) Telephone System a. The city gas main to the site b. The pas supply system within the site 5) Telephone System a. The telephone trunk line to the main distribution frame/panel (MDF) of the building b. The MDF and the extension after the frameipanel 6) Furniture and Equipment a. General framiture b. Project equipment 8) To bear the commissions to the Japanese bank for banking services based upon BIA To bear the commissions to the Japanese bank for banking services based upon BIA To ober the commissions to the Japanese bank for banking services based upon BIA To bear the commissions to the Japanese bank for banking services based upon BIA To bear the commissions to the Japanese bank for banking services based upon BIA To consure prompt customs elecance and to assist internal transportation the properties of the products To bear the remains and some properties of the products To consure prompt customs elecance and the services of the components of the Propect country with respect to the purchase of the Components as well as the eneployment of the Agent be exempted the Agent be exempted by the representation of the Propect of the Agent be exempted by the represent of the products To ensure that customs d	ı	To secure land		•
To Construct the Parking lot To construct the Parking lot To construct roads 1) Within the site 2) Outside the site 6 To construct the building To provide Actifities for the distribution of electricity, water supply, drainage and other incidental facilities 1) Electricity a. The distributing line to the site b. The drop wiring and internal wiring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The supply system within the site (receiving and elevated tanks) 3) Drainage a. The city drainage main (for storm sever and others to the site) b. The drainage system (for toilet sever, ordinary waste, storm drainage and others) within the site 4) Oas Supply a. The city drainage main to the site b. The pas supply postern within the site 5) Telephone System a. The city pass main to the site 5) Telephone System a. The city pass main to the site 5) Telephone System a. General furniture b. The MDF and the extension after the framedpanel 6) Furniture and Equipment a. General furniture b. Project equipment 8 To bear the commissions to the Japanese bank for banking services based upon BIA 7 To ensure prompt customs elecance and to assist internal transportation in the recipient country and to assist internal transportation the respect to the papers of the complexity of the countries, including such nationals on the Agent be exemplexible borney to designate and other with other as well as the employment of the Agent be exemplexible borney to designated authority without using the Gram and its accrued interest. 1) To ensure that customs dailes, internal taxes and other fiscal levies which may be imposed in the recipient country with the spect to the parkens of the Components on the graph opponents such facilities as may be necessary for their entry into the recipient countries, including such nationals of their countries as much be necessary for their entry into the recipient country and stay therein for the performance o	2	To clear level and reclaim the site when needed		•
5 To construct roads 1) Within the site 2) Outside the site 4 To construct the building 7 To provide facilities for the distribution of electricity, water supply, durinage and other incidental facilities 1) Electricity a. The distributing line to the site b. The drop wiring and internal wiring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The city water distribution main to the site b. The city water distribution main to the site b. The city drainage main (for storm sever and others to the site) b. The drainage system (for toidet sever, ordinary waste, storm drainage and others) within the site 4) Oas Supply a. The city gas main to the site b. The gas supply system within the site 5) Telephone System a. The relephone frunk line to the main distribution frume/panel (MDF) of the building b. The MDF and the extension after the frune/panel 6) Purniture and Equipment a. General furniture b. Project equipment 8 To bear the commissions to the Japanese bank for banking services based upon B/A 9 To ensure prompt customs elecanace and to assist internal transportation the recipient country and to assist internal transportation therein of the products 10 To ensure that customs dules, internal taxes and other fiscal levies which may be imposed in the recipient country and the Agent be exempted be borne by its designated authority without using the Grant and its accrued interest. 11 To accord Japanese and loads and / or nationals of third countries, including such nationals employed by the Acque, whose services may be required in connection with the supply of the Components such fletilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work (The term "nationals" whenever used in the GAM means Japanese physical persons or hapanese jurided persons or of phapanese jurided persons or of their countries in the case of rainonals of their countries in the case of incomponents such fletilit	3	To construct gates and fences in and around the site		•
1) Within the site 2) Outside the site 6 To construct the building 7 To provide facilities for the distribution of electricity, water supply, dualnage and other incidental facilities 1) Electricity 2. The distributing line to the site 2. The distributing line to the site 3. The drop wiring and internal wiring within the site 4. The drop wiring and internal wiring within the site 5. The main circuit breaker and transformer 2) Water Supply 8. The city water distribution main to the site 9. The supply system within the site (receiving and elevated tanks) 3) Drainage 8. The city drainage main (for storm sewer and others to the site) 9. The drainage system (for toilet sower, ordinary waste, storm drainage and others) within the site 4) Gas Supply 8. The city gas main to the site 9. The gas supply system within the site 9. The gas supply system within the site 9. The gas aupply system within the site 9. The plan supply system within the site 9. The supply system within the site system supply system system supply system system su	4	To Construct the Parking lot		•
2) Outside the site 6 To construct the building 7 To provide Recilities for the distribution of electricity, water supply, drainage and other incidental facilities 1) Electricity a. The distributing line to the site b. The drop wiring and internal viring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The supply system within the site (receiving and elevated tanks) 3) Drainage a. The city drainage main (for storm sewer and others to the site) b. The supply system within the site (receiving and elevated tanks) 4) Oran Supply a. The city drainage main (for storm sewer and others to the site) b. The gars supply system for toilet sewer, ordinary waste, storm drainage and others) within the site 4) Cas Supply a. The city gas main to the site b. The gas supply system within the site 5) Telephone System a. The telephone trunk line to the main distribution frame/panel (MDF) of the building b. The MDF and the extension after the frame/panel 6) Furniture and Equipment a. General firmiture b. Project equipment 7 To ensure prompt customs elerance and to assist internal transportation in the recipient country and to assist internal transportation therein of the products To consure prompt customs elerance and to assist internal transportation in the recipient country and to assist internal transportation therein of the products To consure that customs duites, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the punchase of the Components as well as the employment of the Agent be exempted/be borne by its designated authority without using the Grant and its accrued interest. To accord Japanese nationals and / or nationals of third countries, including such nationals employed by the Agent, whose services may be recupired in connection with the supply of the Components such facilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work (T	5			
7 To provide facilities for the distribution of electricity, water supply, drainage and other incidental facilities 1) Electricity 2. To provide facilities for the distribution of electricity, water supply, drainage and other incidental facilities 2. The drap wiring and internal wiring within the site 2. The main efecult breaker and transformer 2. Water Supply 3. The city water distribution main to the site 3. The city water distribution main to the site 4. The supply system within the site (receiving and elevated tasks) 3. Drainage 4. The city drainage main (for storm sever and others to the site) 4. Cas Supply 5. The drainage system (for toilet sower, ordinary waste, storm drainage and others) within the site 4. Cas Supply 6. The drainage system within the site 7. The gas supply system within the site 8. The city pas main to the site 9. The pass supply system within the site 10. The gas supply system within the site 10. The gas supply system within the site 10. The stelephone trunk line to the main distribution frame/panel (MDF) of the building 10. The MDF and the extension after the frame/panel 10. Furniture and Equipment 10. Purniture and Equipment 11. To be a the commissions to the Japanese bank for banking services based upon B/A 12. To ensure prompt customs elerance and to assist internal transportation in the recipient country and to assist internal transportation therein of the products 10. To ensure prompt customs elerance and other discal levies which may be imposed in the recipient country with respect to the purchase of the Components as well as the employment of the Agent be exempted be bome by its designated authority without using the Grant and its accrued interest. 11. To accord Japanese nationals and / or nationals of third countries, including such nationals employed by the Agent, whose services may be requipment of the Ord Amessa Japanese physical persons or flatic co				
To provide facilities for the distribution of electricity, water supply, drainage and other incidental facilities 1) Electricity a. The distributing line to the site b. The drop wiring and internal wiring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The supply system within the site (receiving and elevated tanks) 3) Drainage a. The city drainage main (for storm sewer and others to the site) b. The drainage system (for toilet sewer, ordinary waste, storm drainage and others) within the site 4) Gas Supply a. The city gas main to the site b. The gas supply system within the site 5) Telephone System a. The relephone trunk line to the main distribution frame/panel (MDF) of the building b. The MDF and the extension after the frame/panel 6) Furniture and Equipment a. General furniture b. Project equipment 8 To bear the commissions to the Japanese bank for banking services based upon B/A 9 To ensure prompt customs elearance and to assist internal transportation in the recipient country and to assist internal transportation therein of the products 10 To ensure prompt customs elearance and to assist internal transportation in the recipient country with respect to the purchase of the Components as well as the employment of the Agent be exempted/be borne by its designated authority without using the Grant and its accrued interest. 10 To accord Japanese nationals and / or nationals of third countries, including such nationals employed by the Agent, whose services may be required in connection with the supply of the Components such facilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work (The term "autionals" whenever used in the GIA means Japanese physical persons or Japanese judical persons of third countries.) 10 To ensure that the Facilities and the Components be maintained and used properly and effectively for the implementation of the Project			•	
1) Electricity a. The distributing line to the site b. The drop wiring and internal wiring within the site c. The main circuit breaker and transformer 2) Water Supply a. The city water distribution main to the site b. The supply system within the site (receiving and elevated traits) 3) Drainage a. The city drainage main (for storm sewer and others to the site) b. The drainage system (for toilet sewer, ordinary waste, storm drainage and others) within the site 4) Gas Supply a. The city gas main to the site b. The gas supply system within the site 5) Telephone System a. The relephone trunk line to the main distribution frame/panel (MDF) of the building b. The MDF and the extension after the frame/panel 6) Furniture and Equipment a. General furniture b. Project equipment 5) To bear the commissions to the Japanese bank for banking services based upon B/A To ensure prompt customs clearance and to assist internal transportation in the recipient country and to assist internal transportation in the recipient country and to assist internal transportation therein of the products 10 To ensure that customs duties, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the purchase of the Components as well as the employment of the Agent be exempted been bey its designated authority without using the Grant and its accrued interest. 11 To accord Japanese nationals and / or nationals of third countries, including such nationals employed by the Agent, whose services may be required in connection with the supply of the Components such facilities as may be necessary for their entry into the recipient country and stay therein of the proposed in the Grant and its accrued interest. 11 To accord Japanese nationals and / or nationals of third countries, including such nationals employed by the Agent, whose services may be required in connection with the supply of the Components such facilities as may be necessary for their entry into the recipient country and stay t

MINUTES OF DISCUSSIONS ON PREPARATORY SURVEY ON

THE PROJECT FOR CONSTRUCTION OF A TEACHER TRAINING COLLEGE FOR SECONDARY SCHOOL TEACHERS IN LILONGWE IN

THE REPUBLIC OF MALAWI

From February 2011, Japan International Cooperation Agency (hereinafter referred to as "JICA") had conducted a field survey as a part of the Preparatory Survey on the Project for Construction of a Teacher Training College for Secondary School Teachers in Lilongwe (hereinafter referred to as "the Project") in the Republic of Malawi (hereinafter referred to as "Malawi"). Based on the results of the field survey and subsequent technical examinations conducted in Japan, JICA decided to conduct another field survey as a part of the Preparatory Survey on the Project and send the Survey Team (hereinafter referred to as "the Team"), which is headed by Mr. Toru SHIMODA, Senior Representative, JICA Malawi Office, and is scheduled to stay in the country from December 10, 2012 to December 17, 2012.

The Team had a series of discussions with the Malawian officials concerned and conducted the field survey.

In the course of discussions and the field survey, both parties confirmed the main items described on the attached sheets.

Lilongwe, Malawi December 14, 2012

Dr. Macphail Magwira

Secretary for Education, Science and

Technology

Ministry of Education, Science and

Technology,

The Republic of Malawi

Mr. Toru SHIMODA

Leader

Preparatory Survey Team

Japan International Cooperation Agency

ATTACHMENT

1. Contents of the Draft Report

The Malawian side agreed and accepted in principle the contents of the draft report as explained by the Team.

2. Components of the Project

Both sides agreed on the list of components and facilities to be covered by the Project as shown in ANNEX-1. The Malawian side requested expansion of Multi-purpose hall/Kitchen block for additional space of 100 people or more. The Malawian side agreed that the Japanese side would make a final decision on this matter through further study in Japan.

The Malawian side understood there was a possibility to adjust the volume of components as a result of the tenders. In case the volume of components should be reduced, in accordance with the order of priority shown in ANNEX-1. In case fund remaining occurred as a result of the tenders, staff houses will be considered as one of options for an additional component of the Project.

3. Japan's Grant Aid Scheme and Major Undertakings

The Malawian side understood the Japan's Grant Aid Scheme, and the Malawian side assured that it shall take necessary measures as indicated in ANNEX-2 of this Minutes of Discussions, which was the same as described in ANNEX-12 of the Minutes of Discussions signed by both parties on February 28, 2011. Particularly, the Malawian side ensured that it would complete to acquire any necessary approvals for construction before starting of construction work and to set up branch pipe from city water main to the site during the construction. The obligations to be covered by the Government of Malawi are described in ANNEX-3.

4. Final Report of the Preparatory Survey

JICA will finalize the report in accordance with the result of discussions and forward it to the Government of Malawi soon after the Government of Japan approves the Project officially.

5. Project Cost Estimation

The Malawian side understood that the Project cost estimation described in ANNEX-4 was not final at this stage and would be set and approved by the Government of Japan after thorough examinations.

6. Confidentiality of the Information Related to the Project

Both sides confirmed that all information related to the Project including design documents of facilities, furniture and equipment shall not be released to any outside parties before concluding all contracts for the Project. Furthermore, both sides agreed that the estimated cost of the Project as described in ANNEX-4 shall never be duplicated or released to any outside parties before concluding all contracts for the Project.

7. Other Relevant Issues

7-1. Water Supply

In order to cover shortage of water supply from the boreholes found in this survey, the Malawian side agreed to set up branch pipe from city water main to the site during the construction. Malawian side requested the additional boreholes due to instability of public water supply.

7-2. Allocation of Necessary Budget and Personnel

The Malawian side assured to allocate necessary budget and personnel for the proper operation and maintenance of the facilities to be covered by the Project. Particularly, Malawian side is to make utmost effort for the opening of TTC-L based on detailed plan, such as schedule of staff employment, selection of students, budgeting, etc. It is also confirmed that the Malawian side will constantly share the preparation progress with JICA.

A

2

7-3. Proper Use and Maintenance

Both sides understood that proper use and maintenance of the facilities was indispensable for their long-term use. The Malawian side assured the Team that it would facilitate the proper use and maintenance of the facilities to be covered by the Project with the active involvement of concerned parties.

7-4. Schedule of the Project

The team explained that the implementation schedule of the Project shown in ANNEX 5 was not fixed yet.

JICA will inform the Malawian side once the schedule is confirmed.
