1. Member List of the Study Team

1. Member List of the Study Team

(1) Field Survey Ⅰ (Sep. 4 ～ Sep. 17, 2013)

Name	Post	Period of Stay	Company name
Mr. KOBAYASHI Naoyuki	Team Leader	Sep. 4～Sep. 7	Deputy Director, Human Development Department, JICA
Mr. TSUMOTO Tadayoshi	Deputy Chief Consultant / Architectural Planning	Sep. 4～Sep. 17	Yamashita Sekkei Inc.
Mr. KOIKE Hiroyuki	Architectural Design	Sep. 4～Sep. 17	Azusa Sekkei Inc.
Ms. MURAMATSU Keiko	Equipment Planning	Sep. 4～Sep. 17	CDC International Corp.
Mr. KITAMURA Kiyoshi	Health Planning	Sep. 7～Sep. 14	CDC International Corp.

(2) Field Survey Ⅱ-1 (Dec. 11 ～ Dec. 22, 2013)

Name	Post	Period of Stay	Company name
Mr. FUJINUMA Masaru	Chief Consultant / Architectural Planning	Dec. 11～Dec. 22	Yamashita Sekkei Inc.
Ms. MURAMATSU Keiko	Equipment Planning	Dec. 11～Dec. 22	CDC International Corp.
Mr. KAMEDA Norikazu	Construction Planning / Cost Estimate	Dec. 11～Dec. 22	Yamashita Sekkei Inc.

(3) Field Survey Ⅱ-2 (Jan. 15 ～ Jan. 31, 2014)

Name	Post	Period of Stay	Company name
Mr. KOROKI Koichiro	Team Leader	Jan. 19～Jan. 29	Senior Assistant Director, Human Development Department, JICA
Mr. AOKI Tsunenori	Cooperation Planning	Jan. 19～Jan. 29	Deputy Director, Health Division 4 Health Group 2 Human Development Department, JICA
Mr. FUJINUMA Masaru	Chief Consultant / Architectural Planning	Jan. 19～Jan. 31	Yamashita Sekkei Inc.
Ms. MURAMATSU Keiko	Equipment Planning	Jan. 19～Jan. 31	CDC International Corp.
Mr. KOIKE Hiroyuki	Architectural Design	Jan. 15～Jan. 31	Azusa Sekkei Inc.
Mr. TSUKUDA Keiichi	Mechanical Design	Jan. 19～Jan. 31	Azusa Sekkei Inc.
Mr. KAMEDA Norikazu	Construction Planning / Cost Estimate	Jan. 15～Jan. 21	Yamashita Sekkei Inc.

Mr. NISHIKAWA Kohei	Construction Planning / Cost Estimate	Jan. 15～Jan. 31	Yamashita Sekkei Inc.
Mr. FUKAMI Chihiro	Equipment Procurement Planning /Cost Estimate	Jan. 15～Jan. 31	CDC International Corp.
Mr. KITAMURA Kiyoshi	Health Planning	Jan. 25～Jan. 29	CDC International Corp.

(4) Environment and Social Considerations (Mar. 29 ～ Apr. 6, 2014)

Name	Post	Period of Stay	Company name
Ms. UMIGUCHI Mitsue	Environment and Social Considerations	Mar. 30 ～ Apr. 5	CDC International Corp.
Mr. KAMEDA Norikazu	Construction Planning / Cost Estimate	Mar. 29～Apr. 6	Yamashita Sekkei Inc.

(5) Explanation of Draft Final Report (Aug. 3 ～ Aug. 10, 2014)

Name	Post	Period of Stay	Company name
Mr. ISONO Mitsuo	Team Leader	Aug. 6 ～ Aug. 9	Special Advisor, JICA
Mr. AOKI Tsunenori	Cooperation Planning	Aug. 3～Aug. 9	Deputy Director, Health Division 4 Health Group 2 Human Development Department, JICA
Mr. FUJINUMA Masaru	Chief Consultant / Architectural Planning	Aug. 3～Aug. 10	Yamashita Sekkei Inc.
Ms. MURAMATSU Keiko	Equipment Planning	Aug. 3～Aug. 10	CDC International Corp.
Mr. KOIKE Hiroyuki	Architectural Design/ Mechanical Design	Aug. 3～Aug. 10	Azusa Sekkei Inc.
Mr. NISHIKAWA Kohei	Architectural Design	Aug. 3～Aug. 10	Yamashita Sekkei Inc.

2. Study Schedule

2. Study Schedule

(1) Field Survey I (Sep. 4, ～Sep. 17, 2013)

No.	Date		JICA	Consultant Team			
			Mr.KOBAYASHI	Mr.TSUMOTO	Mr.KOIKE	Ms.MURAMATSU	Mr.KITAMURA
1	Sep.4	Wed	Narita→UlaanBaatar				
2	Sep.5	Thu	Survey of Project Site／Discussion with JICA／Discussion with EOJ				
3	Sep.6	Fri	Discussion with MNUMS／Discussion with UBC／Discussion with MOE／Discussion with EOJ／Discussion with JICA				
4	Sep.7	Sat	UlaanBaatar→Narita	Analysis of Documents／Survey of UBC／Survey for Natural Conditions			Narita→UlaanBaatar
5	Sep.8	Sun		Survey of Central Clinical Hospital 1			
6	Sep.9	Mon		Discussion with MNUMS／Survey of Central Clinical Hospital 1／UBC Health Department／Estimate of Survey for Natural Conditions		Discussion with MNUMS／Survey of Central Clinical Hospital 1／UBC Health Department／Survey of Hospitals	
7	Sep.10	Tue		Discussion with MOE／Estimate of Survey for Natural Conditions／Survey of Construction Conditions		Discussion with MOE／Discussion with ADB／Discussion with MNUMS	
8	Sep.11	Wed		Discussion with MOH／ Discussion with Health Development Center／Bid Evaluation of Survey for Natural Conditions			
9	Sep.12	Thu		Conclusion of the Contract of Survey for Natural Conditions	Survey of Construction Conditions／Survey of District Hospitals	Discussion with MNUMS	
10	Sep.13	Fri		Discussion with the Persons Concerned to Survey for Natural Conditions ／Survey of Botanical Garden／Survey of Private Hospitals／Report to JICA			
11	Sep.14	Sat		Survey of Central Clinical Hospital 1／ Survey for Natural Conditions／Survey of Construction Conditions		Survey of Equipment Maintenance	UlaanBaatar→Narita
12	Sep.15	Sun		Discussion with Team/Survey of Holiday Medical Examination			
13	Sep.16	Mon		UlaanBaatar→Narita	Survey of Construction Conditions	Survey of Health Sector	
14	Sep.17	Tue			UlaanBaatar→Narita		

※JICA: Japan International Cooporation Agency
※EOJ: Embassy of Japan

4. Minutes of Discussions

Монгол Улс
"Япон-Монголын сургалтын эмнэлэг байгуулах төсөл"-ийн судалгаа
Хурлын протокол

Япон Улсын Засгийн газар нь Монгол Улсын Засгийн газраас гаргасан төслийн хүсэлтийг хүлээн авч "Япон-Монголын сургалтын эмнэлэг байгуулах төсөл" (цаашид төсөл гэх)-ийн бэлтгэл судалгааг хэрэгжүүлэх шийдвэрийг гаргасан ба энэхүү судалгааг Японы Олон Улсын Хамтын Ажиллагааны Агентлаг (цаашид ЖАЙКА гэх) хэрэгжүүлэх болно.

ЖАЙКА нь Хүний хөгжлийн хэлтсийн орлогч дарга Кобаяши Наоюкигээр ахлуулсан судалгааны баг (цаашид Судалгааны баг гэх)-ийг 2013оны 9 дүгээр сарын 22-ны өдрөөс 9дүгээр сарын 25-ны өдрүүдэд Монгол Улсад томилон ажиллуулсан.

Боловсрол шинжлэх ухааны яамны санаачилгаар Боловсрол шинжлэх ухааны яам, Эрүүл мэндийн шинжлэх ухааны их сургууль, Нийслэл Улаанбаатар хот болон Судалгааны багийн оролцоотойгоор хамтарсан хурлыг 2013оны 9 дүгээр сарын 24-ний өдөр Боловсрол шинжлэх ухааны яаман дээр зохион байгуулсан бөгөөд хурлын агуулга нь хавсралтын дагуу болохыг нягтлав. Эрүүл мэндийн яам дээрх хуралд оролцоогүй тул хурлын протоколын хувийг Эрүүл мэндийн яаманд хүргүүлэв.

Хавсралт

I. Боловсрол шинжлэх ухааны яам, Эрүүл мэндийн шинжлэх ухааны их сургууль, Нийслэл Улаанбаатар хот, Судалгааны баг нь доорх асуудлуудын талаар тодруулав.

1. Төслийн зорилго

Энэхүү төслийн зорилго нь 2 дугаар шатлалын эмнэлгийн түвшний үйл ажиллагаатай, их сургуулийн сургалтын эмнэлгийг барих, мөн тоног төхөөрөмжийг нийлүүлэх, эмч, эмнэлгийн ажилтнуудын төгсөлтийн дараах сургалтын чадавхыг сайжруулах, Улаанбаатар хотын иргэдэд үзүүлэх эмнэлгийн үйлчилгээний чанарыг сайжруулах юм.

2. Төслийн барилгыг барихаар төлөвлөж буй газар

Энэхүү төслийн хүрээнд баригдах эмнэлэгийг барихаар төлөвлөж буй газар нь Ботаникийн цэцэрлэгийн баруун хойд хэсэг болно.

3. Төслийн харьялал

(1) Боловсрол шинжлэх ухааны яамнаас төслийн хариуцагч байгууллага нь Боловсрол шинжлэх ухааны яам болох, Япон Улсын Засгийн газрын буцалтгүй тусламжаар баригдах сургалтын эмнэлэг нь Эрүүл мэндийн шинжлэх ухааны их сургуулийн харъяа эмнэлэг байх тухай, мөн уг сургалтын эмнэлэг нь урьд өмнө байгаагүй шинэ байгууллага тул түүнийг байгуулах тухай Засгийн газрын тогтоолыг бэлтгэж байгаа талаар, төслийн судалгааг саадгүй явуулах үүднээс Боловсрол шинжлэх ухааны яам (Эрүүл мэндийн шинжлэх ухааны их сургуулийн оролцоотой) болон Эрүүл мэндийн яамны одоогийн ажлын хэсгийн бүрэлдэхүүнд Улаанбаатар хотыг нэмэн оруулах тухай тайлбарлав.

(2) Улаанбаатар хотын зүгээс энэхүү төслийн барилгыг барихаар төлөвлөж буй газрын тухайд хууль тогтоомжийн дагуу шаардлагатай арга хэмжээг авч байгаа талаар, судалгааны ажлыг үргэлжлүүлэн хийхийг хүсч буйгаа илэрхийлэхийн дээр, төслийн үйл ажиллагааг нийслэл хотын зүгээс бүх талаар дэмжин ажиллах, цаашид Засгийн газрын тогтоолоор эмнэлгийн харъяалал шийдэгдвэл тухайн шийдвэрийн дагуу хэрэгцээтэй бүрдүүлэлтийг хийх тухай тайлбарлав.

(3) Судалгааны багаас өнөөг хүртэлх Монгол Улсын Засгийн газраас гаргасан хүсэлтийн агуулгаас харахад уг төслийн хариуцагч байгууллага нь Боловсрол шинжлэх ухааны яам, хэрэгжүүлэгч байгууллага нь Эрүүл мэндийн шинжлэх ухааны их сургууль хэмээн ойлгож байгааг, мөн цаашид судалгааг үргэлжлүүлэхийн тулд Засгийн газрын тогтоол гарч төслийг хэрэгжүүлэх бүтэц зохион байгуулалт тодорхой болсныг бататгах шаардлагатай байгааг тайлбарлав.

II. Боловрсол шинжлэх ухааны яам, Эрүүл мэндийн шинжлэх ухааны их сургууль, Судалгааны баг нь доорх асуудлын талаар тодруулав.

Боловсрол шинжлэх ухааны яам нь Судалгааны багт хандан дараах тайлбарыг хийв.

(1) Эрүүл мэндийн шинжлэх ухааны их сургуулийн харьяа сургалтын эмнэлгийг байгуулах Засгийн газрын тогтоолын хувьд 10 дугаар сарын 11-ний өдрийн Засгийн газрын хуралдаанд оруулахаар бэлтгэх, боломжгүй бол 10 дугаар сарын 18-ны хуралдаанд оруулна.
(2) Засгийн газрын тогтоол батлагдсан тохиолдолд уг тогтоол дээр үндэслэн эмнэлгийн барилгыг барихаар төлөвлөж буй газрын газар эзэмших эрхийн талаар зохих арга хэмжээг яаралтай авна.
(3) Судалгааг саадгүй хэрэгжүүлэхийн тулд ажлын хэсгийн доор гэрэл цахилгаан, ус зэрэг эмнэлгийн дэд бүтэцтэй холбоотой асуудлууд болон эмнэлгийн барилгын стандарт, эмнэлгийн дотоод бүтцийг хариуцах хүнийг томилж, Эрүүл мэндийн шинжлэх ухааны их сургууль, Эрүүл мэндийн яам, Нийслэл Улаанбаатар хоттой хамтарч шаардлагатай арга хэмжээг авч бүрдүүлэлтийг хийх.
(4) Эмнэлгийн барилгыг барихаар төлөвлөж буй газартай холбоотой орчны нөлөөллийн тухайд зохих судалгааг явуулж үр дүнг ЖАЙКА-д бичгээр мэдэгдэнэ.
(5) Энэ удаагийн хуралдааны талаар Эрүүл мэндийн яаманд тайлбарлана.
(6) Энэхүү протоколыг үйлдсэнээр Боловрсол шинжлэх ухааны яам , Эрүүл мэндийн шинжлэх ухааны их сургууль, Эрүүл мэндийн яам болон Нийслэл Улаанбаатар хотын хооронд нэгдсэн нэг ойлголттой болно.

Судалгааны багаас Боловрсол шинжлэх ухааны яам болон Эрүүл мэндийн шинжлэх ухааны их сургуульд дараах тайлбарыг хийв.

(1) ЖАЙКА нь 2013 оны 10 дугаар сард дараагийн судалгааны багийг томилон ажиллуулах төлөвлөгөөтэй байна.

Төгсөв.

MINUTES OF DISCUSSIONS
PREPARATORY MISSION ON
THE PROJECT FOR DEVELOPMENT OF
MONGOLIAN AND JAPANESE UNIVERSITY TEACHING HOSPITAL
IN MONGOLIA

In response to the request from the Government of Mongolia, the Japan International Cooperation Agency (hereinafter referred to as "JICA") decided to dispatch a preparatory mission team (hereinafter referred to as "the Team") on the Project for the development of Mongolian and Japanese University Teaching Hospital (hereinafter referred to as "the Project") headed by Hiroe Ono, Director, Health Division 4, Human Development Department, JICA, visited Mongolia from November 25 to November 29, 2013.

During its stay, the Team and the Ministry of Health of Mongolia held a series of meetings and exchanged their views on the Project as the documents attached hereto.

Ulaanbaatar, November 27, 2013

Dr. Udval Natsag
Minister
Ministry of Health
Mongolia

Ms. Hiroe Ono
Leader
Preparatory Mission Team
Japan International Cooperation Agency
Japan

Witness

Dr. Batbaatar Gunchin
President
Health Sciences University of Mongolia
Mongolia

ATTACHED DOCUMENT

The Minister of Health emphasized the importance of the following points:

- The Project shall follow the policy of the Ministry of Health.
- The teaching hospital under the Project shall provide tertiary healthcare services/specialized consultative healthcare services of high priority at national level. At the same time, the Project shall deliver secondary healthcare services to the population of Bayanzurkh District of Ulaanbaatar City.
- Diagnostic services, in particular, for some of the 33 diseases listed in the Annex of the Health Minister's Order No. 313 of 2013 that are not available in Mongolia, should be incorporated into the Project.
- Seven departments (Internal Medicine, Pediatrics, Surgery, Obstetrics and Gynecology, Traumatology/Orthopedics, Neurology, Infectious Diseases) should be included in the Project.
- The Number of beds for the Project has less priority compared to the quality and safety of diagnostic and treatment capacity as the Ministry of Health has a policy not to substantially increase the total number of beds in the country.
- The Ministry of Health shall be the sole authority to issue the required license for the new hospital when the Project is completed.

JICA has agreed to take above points into consideration when designing the Project, and continue to discuss with Ministry of Health, Ministry of Education and Science, and Health Sciences University of Mongolia.

List of diseases that cannot be currently treated in Mongolia

МОНГОЛ УЛСЫН
ЭРҮҮЛ МЭНДИЙН САЙДЫН ТУШААЛ

2013 оны 08 сарын 29 өдөр Дугаар 313 Улаанбаатар хот

Жагсаалт, журам батлах тухай

Монгол Улсын Засгийн газрын тухай хуулийн 24 дүгээр зүйлийн 24.2, Эрүүл мэндийн тухай хуулийн 8 дугаар зүйлийн 8.2, 8.3 дахь заалтуудыг тус тус үндэслэн ТУШААХ нь:

1. Монгол Улсын иргэн өөрийн оронд эмчлэгдэх боломжгүй өвчин, эмгэгийн улмаас гадаад улсад зайлшгүй шаардлагаар эмчлүүлэх "Өвчний жагсаалт"-ыг нэгдүгээр, "Гадаад улсад зайлшгүй шаардлагаар эмчлүүлэх иргэдэд санхүүгийн дэмжлэг үзүүлэх асуудлаар санал гаргах чиг үүрэг бүхий орон тооны бус зөвлөлийн бүрэлдэхүүн"-ийг хоёрдугаар, "Гадаад улсад зайлшгүй шаардлагаар эмчлүүлэх иргэдэд санхүүгийн дэмжлэг үзүүлэх асуудлаар санал гаргах чиг үүрэг бүхий орон тооны бус зөвлөлийн ажиллах журам"-ыг гуравдугаар, "Гадаад улсад зайлшгүй шаардлагаар эмчлүүлэх иргэдэд эмнэлгийн дүгнэлт гаргах журам"-ыг дөрөвдүгээр, "Гадаад улсад зайлшгүй шаардлагаар эмчлүүлэх иргэдэд эмнэлгийн дүгнэлтийн маягт"-ыг тавдугаар хавсралтаар тус тус баталсугай.

2. Монгол Улсад эмчлэгдэх боломжгүй өвчин, эмгэгийн улмаас гадаад улсад зайлшгүй шаардлагаар эмчилгээ хийлгэх иргэдэд эмч нарын зөвлөлгөөний дүгнэлт гаргах бүрэлдэхүүнийг хууль тогтоомжийн дагуу шинэчлэн чиг үүргийнхээ хүрээнд тушаалаар баталгаажуулан, удирдлагаар хангаж, хяналт тавьж ажиллахыг төв эмнэлэг, тусгай мэргэжлийн төвийн дарга, захирал нарт үүрэг болгосугай.

3. Энэ тушаалыг 2013 оны 10 дугаар сарын 01-ний өдрөөс эхлэн мөрдсүгэй.

4. Тушаалын хэрэгжилтэд хяналт тавьж ажиллахыг Төрийн нарийн бичгийн дарга (А.Эрдэнэтуяа)-д үүрэг болгосугай.

5. Тушаал шинэчлэн батлагдсантай холбогдуулан Эрүүл мэндийн сайдын "Эмнэлгийн дүгнэлт гаргах журам, өвчний жагсаалт батлах тухай" 2011 оны 107, "Зөвлөлийн бүрэлдэхүүн, ажиллах журам батлах тухай" 248 дугаар тушаалууд, 2012 оны 399 дугаар тушаалын хоёрдугаар хавсралтын "Гадаад эмчилгээний зөвлөл" гэсэн хэсгийг тус тус хүчингүй болсонд тооцсугай.

MINUTES OF DISCUSSIONS
PREPARATORY SURVEY ON
THE PROJECT FOR DEVELOPMENT OF
MONGOLIAN AND JAPANESE UNIVERSITY TEACHING HOSPITAL
IN MONGOLIA

In response to a request from the Government of Mongolia, the Government of Japan decided to conduct a Preparatory Survey on the Project for development of Mongolian and Japanese University Teaching Hospital (hereinafter referred to as "the Project") and entrusted the survey to the Japan International Cooperation Agency (hereinafter referred to as "JICA").

JICA sent to Mongolia the Preparatory Survey Team (hereinafter referred to as "the Team"), which is headed by Mr. Koichiro Koroki, Senior Assistant Director, JICA, and is scheduled to stay in the country from 15 January to 30 January 2014.

The Team held discussions with authorities concerned of the Government of Mongolia, collected basic information and conducted a field survey at the survey area. In the course of discussions and field survey, each of the parties confirmed the main items described in the attached sheets.

27 January 2014

Mr. Koichiro Koroki
Leader
Preparatory Survey Team
Japan International Cooperation Agency
Japan

Ms. Urgamaltsetseg Bandikhuu
Vice Minister
Ministry of Education and Science
Mongolia

Dr. Batbaatar Gunchin
President
Health Sciences University of Mongolia
Mongolia

(Witness)

Dr. Amarsanaa Jazag
Vice Minister
Ministry of Health
Mongolia

ATTACHMENT

1. Objective of the Project

The objective of the Project is to construct a teaching hospital with the status of tertiary hospital and to procure equipment for improving quality of post-graduate training and providing tertiary healthcare services/specialized consultative healthcare services of high priority at national level and secondary healthcare services in the city of Ulaanbaatar.

2. Project site

The site of the Project is in the eight hectare land with the number 136010/0095 that locates in the territory of 12th khoroo, Bayanzurkh District in Ulaanbaatar described in Annex 1.

3. Responsible and Implementing Agency

3-1. The responsible agency is the Ministry of Education and Science.

3-2. The implementing agency is Health Sciences University of Mongolia.

4. Items requested by the Government of Mongolia

4-1. Seven departments (Internal Medicine, Pediatrics, Surgery, Obstetrics and Gynecology, Traumatology/Orthopedics, Neurology, Infectious Diseases) were finally requested as healthcare services of the teaching hospital by the Mongolian side.

4-2. The facilities described in Annex 2 and the equipment described in Annex 3 was finally requested by the Mongolian side.

4-3. JICA will assess the appropriateness of the request and will recommend to the Government of Japan for its approval.

5. Japan's Grant Aid Scheme

5-1. The Mongolian side understood the Japan's Grant Aid Scheme explained by the Team, as described in Annex 4 and Annex 5.

5-2. The Mongolian side will take necessary measures, as described in Annex-6, for smooth implementation of the Project, as a condition for the Japanese Grant Aid to be implemented.

6. Schedule of the Survey

6-1. The consultants of the Team will proceed to conduct further survey in Mongolia until 30 January 2014.

6-2. JICA will prepare the draft report in English and dispatch a mission team to explain the outline design of the Project to the Mongolian side around August 2014.

6-3. In case that the contents of the report are accepted in principle by the Mongolian side, JICA will complete the final report and send it to the Government of Mongolia.

7. Other relevant issues

7-1. Mongolian side expressed the importance of development of post-graduate training for improving the quality of healthcare services particularly in rural areas.

7-2. Mongolian side expressed its recognition of the teaching hospital by the project as a tertiary hospital and a facility for post-graduate training.

7-3. Mongolian side agreed to take necessary measures for securing the land of the project, hiring local consultant for application and supply of infrastructure connections, obtaining building permission and construction permit, and clearing and taking any debris off the construction site.

7-4. Mongolian side agreed to submit the plan of organization of the teaching hospital to the end of February 2014 to JICA.

7-5. Mongolian side agreed to secure and allocate necessary budget and human resources to operate and maintain the facilities and equipment provided by the project.

7-6. Both sides will continue to examine a necessity of soft component for operation and maintenance of the facilities and equipment provided by the project and confirm its necessity until 30 January 2014.

Equipment List

Note: All items below are necessary for the Teaching Hospital.
Priority means consideration by the Japanese grant aid project.
A: High priority
B: Medium priority
C: Low priority. Basically these items are to be provided Mongolian side.

Department	Name of Equipment	Priority
Out-patient Area		
Consultation Room		
Common Package	Negatoscope, wall type	A
	Otorhinolaryngo-ophthalmoscope universal set	A
	Family doctors' examination instrument set	B
	Sphygmomanometer	B
	Stethoscope	B
	Height scale	B
	Weight scale	B
	Examination couch	B
	Medical cabinet	B
	Medical desk	B

JAPAN'S GRANT AID

The Government of Japan (hereinafter referred to as "the GOJ") is implementing the organizational reforms to improve the quality of ODA operations, and as a part of this realignment, a new JICA law was entered into effect on October 1, 2008. Based on this law and the decision of the GOJ, JICA has become the executing agency of the Grant Aid for General Projects, for Fisheries and for Cultural Cooperation, etc.

The Grant Aid is non-reimbursable fund provided to a recipient country to procure the facilities, equipment and services (engineering services and transportation of the products, etc.) for its economic and social development in accordance with the relevant laws and regulations of Japan. The Grant Aid is not supplied through the donation of materials as such.

1. Grant Aid Procedures

The Japanese Grant Aid is supplied through following procedures :

- Preparatory Survey
  - The Survey conducted by JICA
- Appraisal &Approval
  - Appraisal by the GOJ and JICA, and Approval by the Japanese Cabinet
- Authority for Determining Implementation
  - The Notes exchanged between the GOJ and a recipient country
- Grant Agreement (hereinafter referred to as "the G/A")
  - Agreement concluded between JICA and a recipient country
- Implementation
  - Implementation of the Project on the basis of the G/A

2. Preparatory Survey

(1) Contents of the Survey

The aim of the preparatory Survey is to provide a basic document necessary for the appraisal of the Project made by the GOJ and JICA. The contents of the Survey are as follows:

- Confirmation of the background, objectives, and benefits of the Project and also institutional capacity of relevant agencies of the recipient country necessary for the implementation of the Project.
- Evaluation of the appropriateness of the Project to be implemented under the Grant Aid Scheme from a technical, financial, social and economic point of view.
- Confirmation of items agreed between both parties concerning the basic concept of the Project.
- Preparation of a outline design of the Project.
- Estimation of costs of the Project.

The contents of the original request by the recipient country are not necessarily approved in their initial form as the contents of the Grant Aid project. The Outline Design of the Project is confirmed based on the guidelines of the Japan's Grant Aid scheme.

JICA requests the Government of the recipient country to take whatever measures necessary to achieve its self-reliance in the implementation of the Project. Such measures must be guaranteed even though they may fall outside of the jurisdiction of the organization of the recipient country which actually implements the Project. Therefore, the implementation of the Project is confirmed by all relevant organizations of the recipient country based on the Minutes of Discussions.

(2) Selection of Consultants

For smooth implementation of the Survey, JICA employs (a) registered consulting firm(s). JICA selects (a) firm(s) based on proposals submitted by interested firms.

(3) Result of the Survey

JICA reviews the Report on the results of the Survey and recommends the GOJ to appraise the implementation of the Project after confirming the appropriateness of the Project.

3. Japan's Grant Aid Scheme

(1) The E/N and the G/A

After the Project is approved by the Cabinet of Japan, the Exchange of Notes(hereinafter referred to as "the E/N") will be singed between the GOJ and the Government of the recipient country to make a pledge for assistance, which is followed by the conclusion of the G/A between JICA and the Government of the recipient country to define the necessary articles to implement the Project, such as payment conditions, responsibilities of the Government of the recipient country, and procurement conditions.

(2) Selection of Consultants

In order to maintain technical consistency, the consulting firm(s) which conducted the Survey will be recommended by JICA to the recipient country to continue to work on the Project's implementation after the E/N and G/A.

(3) Eligible source country

Under the Japanese Grant Aid, in principle, Japanese products and services including transport or those of the recipient country are to be purchased. When JICA and the Government of the recipient country or its designated authority deem it necessary, the Grant Aid may be used for the purchase of the products or services of a third country. However, the prime contractors, namely, constructing and procurement firms, and the prime consulting firm are limited to "Japanese nationals".

(4) Necessity of "Verification"

The Government of the recipient country or its designated authority will conclude contracts denominated in Japanese yen with Japanese nationals. Those contracts shall be verified by JICA. This "Verification" is deemed necessary to fulfill accountability to Japanese taxpayers.

(5) Major undertakings to be taken by the Government of the Recipient Country

In the implementation of the Grant Aid Project, the recipient country is required to undertake such necessary measures as Annex.

(6) "Proper Use"

The Government of the recipient country is required to maintain and use properly and effectively the facilities constructed and the equipment purchased under the Grant Aid, to assign staff necessary for this operation and maintenance and to bear all the expenses other than those covered by the Grant Aid.

(7) "Export and Re-export"

The products purchased under the Grant Aid should not be exported or re-exported from the recipient country.

(8) Banking Arrangements (B/A)

a) The Government of the recipient country or its designated authority should open an account under the name of the Government of the recipient country in a bank in Japan (hereinafter referred to as "the Bank"). JICA will execute the Grant Aid by making payments in Japanese yen to cover the obligations incurred by the Government of the recipient country or its designated authority under the Verified Contracts.

b) The payments will be made when payment requests are presented by the Bank to JICA under an Authorization to Pay (A/P) issued by the Government of the recipient country or its designated authority.

(9) Authorization to Pay (A/P)

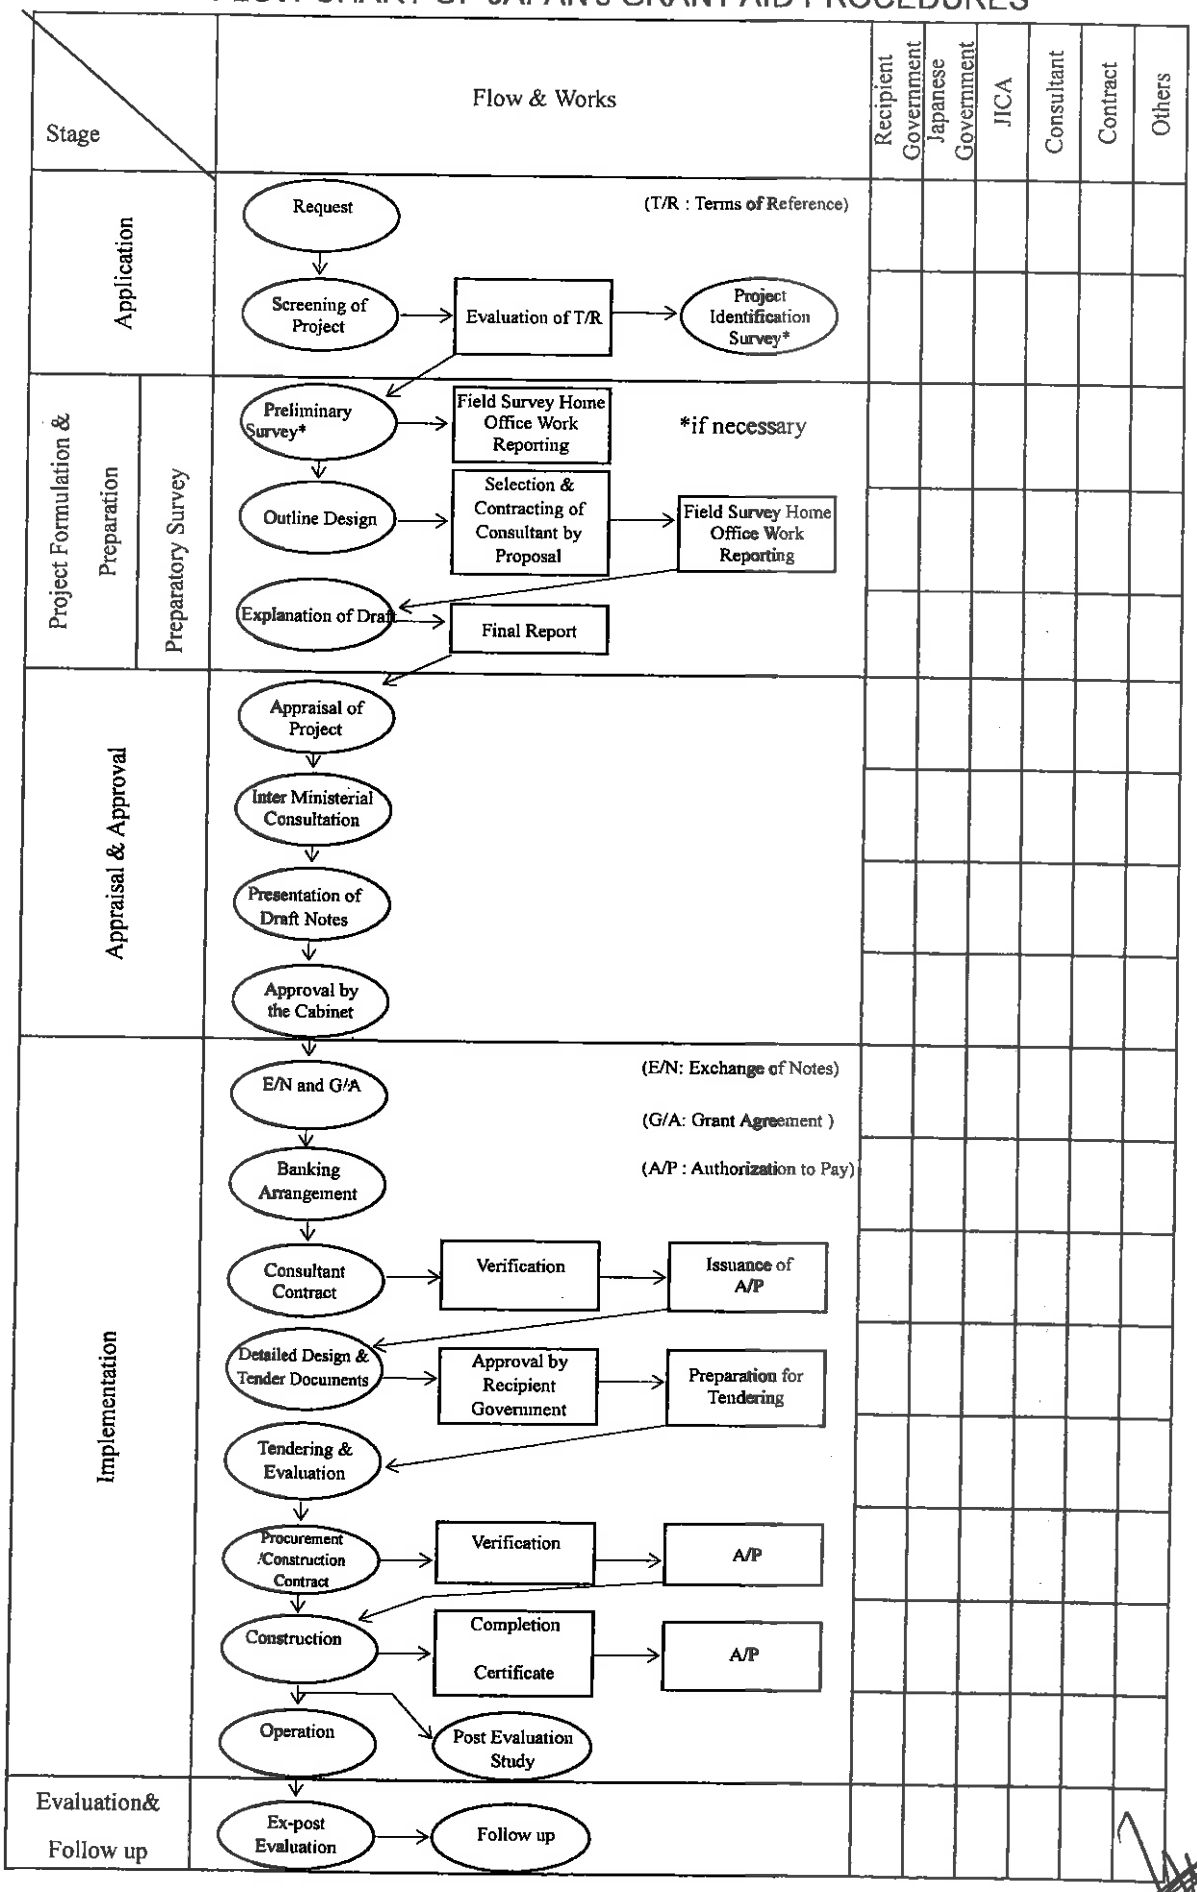
The Government of the recipient country should bear an advising commission of an Authorization to Pay and payment commissions paid to the Bank.

(10) Social and Environmental Considerations

A recipient country must carefully consider social and environmental impacts by the Project and must comply with the environmental regulations of the recipient country and JICA socio-environmental guidelines.

Annex 5

FLOW CHART OF JAPAN's GRANT AID PROCEDURES



Major Undertakings to be taken by Each Government

No.	Items	To be covered by Grant Aid	To be covered by Recipient Side
1	to secure a lot of land necessary for the implementation of the Project and to clear the site;		●
2	To construct the following facilities		
	1) The building	●	
	2) The gates and fences in and around the site		●
	3) The parking lot	●	●
	4) The access road to the building within the site	●	
	5) The road outside the consruction site		●
3	To provide facilities for distribution of electricity, water supply and drainage and other incidental facilities necessary for the implementation of the Project outside the sites		
	1) Electricity		
	a. The distributing power line to the site		●
	b. The drop wiring and internal wiring within the site	●	
	c. The main circuit breaker and transformer	●	
	2) Water Supply		
	a. The city water distribution main to the site		●
	b. The supply system within the site (receiving and elevated tanks)	●	
	3) Drainage		
	a. The city drainage main (for storm sewer and others to the site)		●
	b. The drainage system (for toilet sewer, common waste, storm drainage and others) with the site	●	
	4) Gas Supply		
	a. The city gas main to the site		●
	b. The gas supply system within the site	●	
	5) Telephone System		
	a. The telephone trunk line to the main distribution frame/panel (MDF) of the building		●
	b. The MDF and the extension after the frame/panel	●	
	6) Furniture and Equipment		
	a. General furniture		●
	b. Project equipment	●	
4	To ensure prompt unloading and customs clearance of the products at ports of disembarkation in the recipient country and to assist internal transportation of the products		
	1) Marine (Air) transportation of the Products from Japan to the recipient country	●	
	2) Internal transportation from the port of disembarkation to the project site	●	●
5	To ensure that customs duties, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the purchase of the products and the services be borne by the Authority without using the Grant		●
6	To accord Japanese physical persons and / or physical persons of third countries whose services may be required in connection with the supply of the products and the services such facilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work		●
7	To ensure that the Facilities and the products be maintained and used properly and effectively for the implementation of the Project		●
8	To bear all the expenses, other than those covered by the Grant, necessary for the implementation of the Project		●
9	To bear the following commissions paid to the Japanese bank for banking services based upon the B/A		
	1) Advising commission of A/P		●
	2) Payment commission		●
10	To give due environmental and social consideration in the implementation of the Project.		●

(B/A : Banking Arrangement, A/P : Authorization to pay)

MINUTES OF DISCUSSIONS
ON THE EXPLANATION OF THE DRAFT REPORT OF THE PREPARATORY SURVEY
FOR THE PROJECT FOR DEVELOPMENT OF
MONGOLIAN AND JAPANESE UNIVERSITY TEACHING HOSPITAL IN MONGOLIA

In January 2014, the Japan International Cooperation Agency (hereinafter referred to as "JICA") dispatched the Preparatory Survey Team on the Project for Development of Mongolian and Japanese University Teaching Hospital (hereinafter referred to as "the Project") to Mongolia, and through discussions, field surveys and technical examination of the results in Japan, JICA prepared the draft report of the preparatory survey.

In order to explain and to consult the contents of the draft report with the Government of Mongolia, JICA sent to Mongolia the Draft Report Explanation Team (hereinafter referred to as "the Team"), headed by Dr. Mitsuo ISONO, Senior Advisor for Health, JICA from 3 August to 10 August 2014.

As a result of the series of discussions with authorities concerned of the Government of Mongolia and the Team (hereinafter referred to as "both sides") have confirmed the main items described in the attached sheets.

Ulaanbaatar, 8 August 2014

Dr. Mitsuo Isono
Leader
Draft Report Explanation Team
Japan International Cooperation Agency
Japan

Ms. Baavgai Nasanbayar
Director
Department of Strategic Policy and Planning
Ministry of Education and Science
Mongolia

Dr. Batbaatar Gunchin
President
The Mongolian National University of Medical Science
Mongolia

(Witness)

Dr. Buyanjargal Yadamsuren
Director
Department of Policy Implementation and Coordination
Ministry of Health
Mongolia

ATTACHMENT

1. Components of the Draft Report

The Mongolian side agreed and accepted in principle the contents of the draft report explained by the Team. The outline of the Project is described in Annex 1-1, 1-2, 1-3.

2. Schedule of the Study

JICA will complete the final report in accordance with the confirmed items and send it to the Mongolian side by the end of October 2014.

3. Japan's Grant Aid scheme

The Mongolian side understood Japan's Grant Aid scheme and necessary measures to be taken by the Mongolian side which was explained by the Team and described in Annex-4 and Annex-5 of the Minutes of Discussions signed by both sides on 27 January, 2014.

4. Measures to be taken by the Mongolian side

4-1. The Mongolian side agreed to take necessary measures described in Annex 2, for smooth implementation of the Project, as a condition for the Japanese Grant Aid to be implemented.

4-2. The Mongolian side agreed to take necessary measures for hiring local consultant for application and acquisition of technical conditions of infrastructure connections and submit the technical condition documents by the end of September 2014 to JICA.

4-3. The Mongolian side agreed to take necessary measures for supply of infrastructure connections, obtaining building permission and construction permit, and clearing and taking any debris off the construction site by the time the actual construction work starts.

4-4. The Mongolian side agreed to submit the updated plan of organization of the university teaching hospital by the middle of September 2014 to JICA.

4-5. The Mongolian side agreed to allocate necessary staff at least six months before facility completion and cover the costs for operation and maintenance described in Annex 3.

4-6. The Mongolian side agreed to examine future financial plan of university teaching hospital by utilizing multi-financial resources including the budget from the Ministry of Education and Science and the Ministry of Health, and Social Insurance Scheme for sustainable operation and management of the hospital.

5. Confidentiality of the project cost estimation

The Team explained the project cost estimation of the Project described in Annex 4. Both sides agreed that the project cost estimation should never be duplicated or released to any outside parties before signing of all the Contract(s) for the Project. The Mongolian side understands that the project cost estimation is not final and is subject to change.

6. Maintenance Contracts

The Mongolian side requested the Team to include maintenance contracts of specific medical equipment regarding MRI, CT scanner, and Angiography in the Project. The Team agreed to plan the maintenance cost for two years in the Project.

7. The Tentative Project Schedule

The Team explained the tentative project schedule as described in Annex 5.

Annex 1-1 The Outline of the Project
Annex 1-2 Facility Plan
Annex 1-3 Equipment List
Annex 2 Major Undertakings to be taken by Each Government
Annex 3 Cost Estimation to be borne by the Mongolian side
Annex 4 Project Cost Estimation
Annex 5 Tentative Project Schedule

Annex 1-1

The Outline of the Project

Facility

(1) Building outline

Item	Floor Area (m^2)
Main Building: 3 story building with 1 basement level	
① Outpatient Departments (Surgery, Traumatology, Ophthalmology, ENT, Internal Medicine, Neurology, Obstetrics and Gynecology, Pediatrics, Infectious Diseases), Imaging Diagnosis Department, Endoscopy Department, Emergency Unit, ICU Department, Surgery Department, Examination Department, Pharmacy Department, CDDS, Kitchen Department, Administration Department, Education Department (lecture rooms, conference rooms, library), Medical Records Department, Morgue, General Service Department (medical equipment repair, laundry, medical waste) ② Inpatient Ward (104 beds)	15,730 m^2
Boiler Building (single story)	775 m^2
Total	16,505 m^2

(2) Building service outline

- Electrical facilities: Power-supply equipment (incoming/substation/power distribution), emergency power generation system, lights, outlets, communication equipment, fire alarm system, lightning protector
- Mechanical facilities: Air conditioning and ventilation system
- Water supply/discharge and hygiene facilities: Sanitary fixtures, water and hot water supply system, wastewater discharge system, fire-fighting equipment
- Special facilities: Medical gas equipment, elevator system

Medical Equipment

(1) Image diagnosis/treatment equipment
MRI, CT scanner, Angiography, X-ray fluoroscopy unit, General X-ray unit, Mammography, Ultrasound diagnostic equipment, Video-endoscopy system, etc.

(2) Bio-information monitoring/measuring equipment
Patient monitor, Electrocardiograph(ECG), Electroencephalograph(EEG), Electromyograph (EMG), Spirometer, Fatal monitor, etc.

(3) Operation/treatment equipment
Operating table, Operating light, Electrosurgical unit, Anesthesia equipment, Ventilator, Laparoscope operating unit, Microsurgery scope, etc.

(4) Laboratory equipment
Automatic biochemistry analyzer, Automatic immunoassay analyzer, Blood cell counter, Blood gas analyzer, Urine sediment analyzer, Coagulation measuring system, Blood culture apparatus, Fluorescence microscope

(5) Central sterilization and supply department equipment
Large autoclave, Medium autoclave, etc.

(6) PACS (Picture archiving and communication system)
Component: Image report server system, Image interpretation terminal, RIS terminal, Reference PACS terminal, etc.

(7) Other's equipment
Equipment for Out-patient , Equipment for ENT, Equipment for Ophthalmology, Equipment for Emergency, Equipment for Pharmacy, Morgue refrigerator, etc.

Total 272 items

Annex 2

Major Undertakings to be taken by Each Government

No.	Items	To be covered by Grant Aid	To be covered by Recipient Side
1	To secure a lot of land necessary for the implementation of the Project and to clear the site;		●
2	To construct the following facilities		
	1) The building	●	
	2) The gates and fences in and around the site		●
	3) a The patient parking lot	●	
	b. The staff parking lot		●
	4) The access road to the building within the site	●	
	5) The road outside the consruction site		●
3	To provide facilities for distribution of electricity, water supply and drainage and other incidental facilities		
	1) Electricity		
	a. The distributing power line to the site		●
	b. The drop wiring and internal wiring within the site	●	
	c. The main circuit breaker and transformer	●	
	2) Water Supply		
	a. The city water distribution main to the site		●
	b. The supply system within the site (receiving and elevated tanks)	●	
	3) Drainage		
	a. The city drainage main (for storm sewer and others to the site)		●
	b. The drainage system (for toilet sewer, common waste, storm drainage and others) within the site	●	
	4) Gas Supply		
	a. The city gas main to the site		●
	b. The gas supply system within the site	●	
	5) Telephone System		
	a. The telephone trunk line to the main distribution frame/panel (MDF) of the building		●
	b. The MDF and the extension after the frame/panel	●	
	6) Furniture and Equipment		
	a. General medical equipment,		●
	Kitchen equipment, Washing equipment, Waste management equipment		●
	Administration equipment, Furniture, Laboratory glassware,		●
	Audio Visual equipment, IT system for hospital management and operation		●
	Linen/uniforms, Ambulances and other vehicles		●
	b. Major medical equipment	●	
	PACS	●	
4	To ensure prompt unloading and customs clearance of the products at ports of disembarkation in the recipient country and to assist internal transportation of the products		
	1) Marine (Air) transportation of the Products from Japan to the recipient country	●	
	2) Internal transportation from the port of disembarkation to the project site	●	●
5	To ensure that customs duties, internal taxes and other fiscal levies which may be imposed in the recipient country with respect to the purchase of the products and the services be borne by the Authority without using the Grant		●
6	To accord Japanese physical persons and / or physical persons of third countries whose services may be required in connection with the supply of the products and the services such facilities as may be necessary for their entry into the recipient country and stay therein for the performance of their work		●
7	To ensure that the Facilities and the products be maintained and used properly and effectively for the implementation of the Project		●
8	To bear all the expenses, other than those covered by the Grant, necessary for the implementation of the Project		●
9	To bear the following commissions paid to the Japanese bank for banking services based upon the B/A		
	1) Advising commission of A/P		●
	2) Payment commission		●
10	To give due environmental and social consideration in the implementation of the Project.		●
(B/A : Banking Arrangement, A/P : Authorization to pay)

Annex 4

Project Cost Estimation

The total project expenses required when this cooperation project is implemented are estimated to be [redacted] .yen. According to the estimation conditions described in (3) below for the breakdown of expenses to be covered by Japan and expenses to be covered by Mongolia for the items described earlier, the expenses for Japan and Mongolia are described by item (1) and (2) respectively. However, these amounts are the grant limit amounts in the Exchange of Notes.

(1) Expenses Covered by Japan Rough Total project Expenses Approx. [redacted] yen

Table 5-1 Expenses Covered by Japan

Item / Description	Amount (million yen)	Remarks
1. Facility Construction	[redacted]	
2. Procurement of Equipment	[redacted]	
3. Building Design / Construction Supervision / Technical Instruction	[redacted]	
Total	[redacted]	

(2) Expenses Covered by Mongolia Approx. 453 mil. yen (Approx. 7,600,668 thousand Tg)

Table 5-2 Expenses Covered by Mongolia

Item / Description	Amount (thousand yen)	(Tg)
1. project Site Grading/Preparation	56,000	939,597
2. Application/Acquisition of Building Permits (Including fees for local architects)	16,000	268,456
3. project Site Landscaping	116,000	1,946,308
4. Infrastructure Connection Work (Lead-in lines for electricity, hot water, water supply, sewage, gas, telephone)	13,000	218,120
5. Medical Devices / Furniture / Fixtures etc. Not Included in Grant	249,000	4,177,852
6. Bank Service Charges/Payment Fees	3,000	50,335
Total	453,000	7,600,668

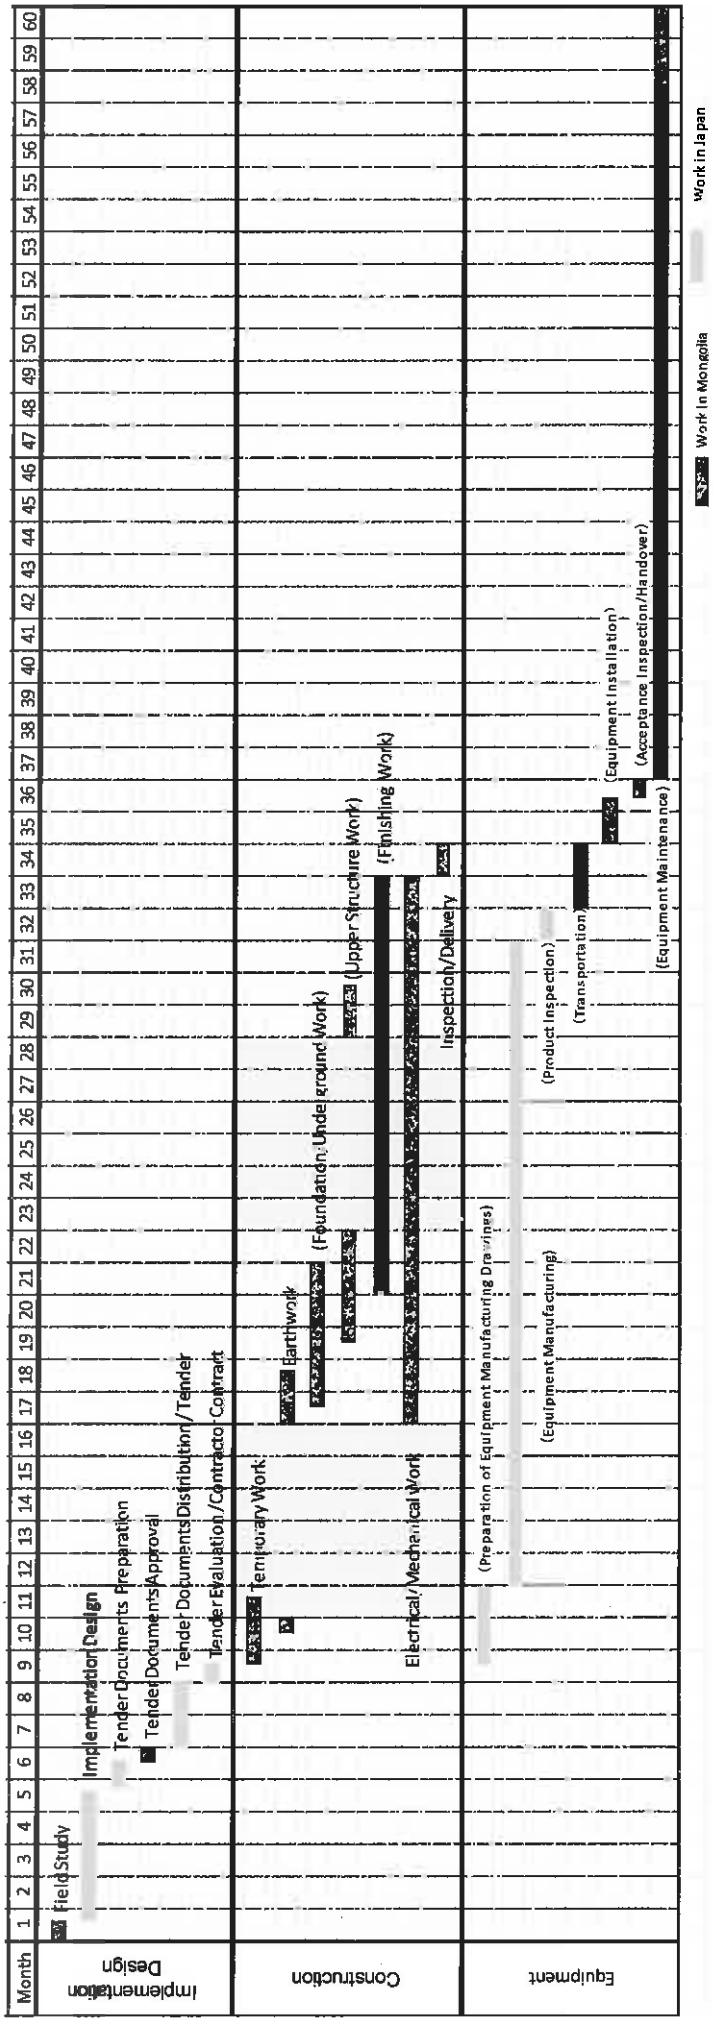
* Prices and the foreign exchange rate as of January 2014, with no consideration to the price escalation or the change in exchange rate

(3) Estimation Conditions

The above amounts were calculated based on the estimation conditions described below.
Time of Estimation: January 2014
Currency Exchange Rate: 1.0 US$ = 101.37 yen = 1,699.18 Tg
1 Tg=0.0596 yen
Construction Period: As described in project implementation schedule.
Other: This project will be implemented in accordance with the grant aid scheme of the Japanese government.

Annex 5

Tentative Project Schedule



5. References

1 GENERAL GEOTECHNICAL INVESTIGATION

1.1 Purpose of Geotechnical Investigation

Geotechnical investigation to provide subsurface information for the engineering design of proposed building for the Project for Construction of Mongolian and Japanese Teaching Hospital of Health Sciences University was carried out by Soil Trade LLC based on contract dated 10th September 2013 with Yamashita Sekkei Inc. Investigation site is located within 12 horoo of Bayanzurkh district, Ulaanbaatar city.

1.2 Site Location and Scope of Service

Investigation site of proposed construction building of Teaching Hospital for Health Sciences University is located in the territory of Botanical Park locating in 12th khoroo of Bayanzurkh district.

Location of investigation areas and completed boreholes is shown on Figure 1. Information of completed boreholes is listed in below table:

Information of Completed Boreholes

Table 1

No	Borehole Number	Coordinates, m		Elevation, m	Depth, m	Date of Completion y/m/d
		X	Y			
1	BH-1	5310555.4	648982.2	1311.89	15.0	2013.09.16
2	BH -2	5310609.6	649066.9	1312.98	15.0	2013.09.16
3	BH -3	5310465.9	648991.6	1311.77	15.0	2013.09.17

6	BH -6	5310430.5	649085.8	1312.70	15.0	2013.09.18
7	BH-7	5310574.3	649161.2	1313.57	15.0	2013.09.19
8	BH -8	5310485.0	649170.6	1313.65	15.0	2013.09.19

1.3 Technical Guideline and Method of Analyses

The actual geotechnical investigation was performed according to Mongolian Design Code Document No. CNR 11-03-01 and consists of 8 boreholes to depths of 15.0 m. Total drilling work was 120 length meters.

Boreholes were performed using a truck-mounted UGB-1VS capable of auger drilling with a rotary push tube of 168 mm, 146 mm and 127 mm in diameter, under supervision of geotechnical engineer J.Odonchimeg and following drilling crew: drilling operators R.Sambuunyam and B.Batchuluun. Field work includes of field logging and sampling.

In situ Standard penetration tests (SPTs) were performed during the borehole drilling in order to obtain in situ strength profiles of the subsurface soils and were carried out on 120 points in accordance the ASTM D 1586 standard. The SPTs were conducted using 63.5kg hammer from 0.76 m free fall to free fall to drive sampler into the ground. Log of boreholes including of record of SPT results is attached in Appendix A.

Based on in situ SPT test results number of blows at 1.0-2.0 m depth ranges to (N_{value})=23-38 and unconfined compressive strength ranges to R_c>400KN/m^2. Unconfined compressive strength for clayey soil below 1.0-2.0 m reaches to R_c>400KN/m^2.

engineer T.Altanchimeg senior technician D.Tungalag, and auxiliary worker M.Enkhbayar in the laboratory of Soil Trade LLC.

Based on observations during field investigation and laboratory test results a senior engineer J.Odonchimeg has completed this geotechnical investigation report for the design study.

2 PHYSICAL AND GEOGRAPHICAL CONDITION

2.1 Geomorphology

Site for proposed construction building is situated in the west terrain of Tuul river basin, within Uliastai and Tuul rivers basin, and comprise of even ground surface predominating transported and accumulative alluvium proluvium deposit. Elevation of investigation area of proposed construction building varies between 1311.12 m and 1313.57 m with relative difference of 2.5 m.

2.2 Hydrogeology

Groundwater was encountered in depths between 9.0m and 10.0m, and stabilized at depth between 8.9m and 9.5m. Groundwater enriches by Tuul, Uliastai rivers water and by seasonal precipitation. Due to infiltration and evaporation groundwater level may increase up to 1.0m from current measurement.

2.3 Climate

According to the Climatic region for construction of Mongolia the climatic condition of the investigation site has cold winters, with relative high snow load and dry hot summers. Climatic characteristics of the area were obtained from the Norms and Regulations on Climate Data (CNR – 23-01.09) and the results from meteorological center of Amgalan as given below table.

Climatic Data

Table 2

No	Description			Unit	Measure
1	Average annual temperature of air			°C	-1.2
2	Absolute maximum temperature of air /1984.07.14/				33.5
3	Computational maximum temperature of air in July				30.2
4	Absolute minimum temperature of air /1995.01.12/				-39.0
5	Absolute minimum temperature of air in the coldest month				-32.0
6	Computational minimum temperature of outside air	The coldest	1 day		-33.7
			3 days		-32.7
			5 days		-31.6
			Air vent		-23.0
		The warmest 1 day			24.7
7	Average annual total precipitation	The maximum seasons humidity	Warm season	%	67
			Cold season		72
		Precipitation	Year	mm	245.2
			Warm season		232.5
			The maximum day/1996.07.31/		68.6
8	Average annual wind speed	Annual		m/sec	2.4
		The maximum wind speed once in 20 years			21-25 /23/
9	Calculation of wind pressure, q_{max}	Once in 5 years		gH/m^2	33
		Once in 10 years			34
		Once in 20 years			42
10	Specified snow load			kg/m^2 /gPa/	50 /0.5/

3 SITE GEOTECHNICAL CONDITION

Investigation site is located within not active developed physical and geological phenomenon, ground surface is relative even. However, encountered groundwater hasn't any effect on construction foundation the existing clayey GRAVEL with sand and poorly graded GRAVEL with sand and clay soils' degree of saturation range to 0.72-0.70 and determine as slightly heaving soils in seasonal freezing depth. Degree of heaving of clayey SAND with gravel varies to K=0.04 and determines as medium heaving soil. Based all these arguments the proposed construction building is located within medium complicated geotechnical condition.

3.1 Subsurface Condition and Soil Classification

Based on laboratory testing encountered soils are subdivided into 3 engineering geological elements. A geological profile was generated based on the subsurface information obtained from the investigation as attached on Figure 2. Laboratory test results are summarized in Appendix C. Groundwater chemical test result is attached in Appendix D and soil chemical test result is attached in Appendix E.

3.2 Physical and Mechanical Properties of Soils

The grading size analysis and physical properties of soils are given based on laboratory test results, mechanical properties of soil are given according to construction norm and calculation of CNR-2.02.01-94.

Top Soil

Clayey sand with gravel: including vegetation roots, dark grey colored, with thickness ranging of 0.4 m.

Degree of earthwork trouble should be calculated as I

3.2.1 Clayey GRAVEL with sand /GC/

Upper and Modern Quaternary aged alluvium proluvium deposit (apQ_{III-IV}) light yellowish colored, stiff consistency, including boulders.

Particle Size of Distribution:

Poorly graded Gravel	52.9%
Poorly graded Sand	29.3%
Silt and Clay	17.8%

Physical Properties of Soil:

Natural Moisture Content, (W)	9.4
Liquid Limit, (LL)	22.0
Plastic Limit, (PL)	14.2
Plasticity Index, (PI)	7.8
Specific Gravity, (gs)	2.70g/cm^3
Unit Weight, (g)	2.19g/cm^3
Dry Density, (gd)	2.00g/cm^3
Porosity ,(n)	25.95
Voids Ratio, (e)	0.351
Degree of Saturation, (Sr)	0.72
Consistency	< 0

Mechanical Properties of Soil:

Cohesion	C_H =27 kPa

Angle of Internal Friction	$\varphi_{H=}39^0$
Module of Deformation	E= 37MPa
Design Strength	R_0 =450 kPa

Degree of saturation for clayey GRAVEL with sand soil ranges to 0.72, thus this soil determines as slightly heaving soil.

3.2.2 Poorly graded GRAVEL with sand and clay / GP-GC/

Upper and Modern Quaternary aged alluvium proluvium deposit (apQ_{III-IV}) light yellowish colored, stiff consistency, including boulders.

Particle Size Distribution:

Poorly graded Gravel	60.6%
Poorly graded Sand	31.2%
Silt and Clay	8.4%

Physical Properties of Soil:

Natural Moisture Content, (W)	7.8
Liquid Limit, (LL)	22.9
Plastic Limit, (PL)	16.2
Plasticity Limit, (Pl)	6.7
Specific Gravity, (gs)	2.68g/cm^3
Unit Weight, (g)	2.23g/cm^3
Dry Density, (gd)	2.07g/cm^3
Porosity, (n)	22.84
Voids Ratio, (e)	0.296
Degree of Saturation, (Sr)	0.70
Consistency	< 0

Mechanical Properties of Soil:

Cohesion	C_H =16 kPa
Angle of Internal Friction	$\varphi_{H=}44^0$
Module of Deformation	E= 45MPa
Design Strength	R_0 =450 kPa

Degree of saturation for poorly graded GRAVEL with sand and clay soil ranges to 0.70, thus this soil determines as slightly heaving soil.

3.2.3 Clayey SAND with gravel /SC/

Upper and Modern Quaternary aged alluvium proluvium deposit (apQ_{III-IV}) yellowish brown colored, soft to stiff consistency.

Particle Size Distribution:

Poorly graded Gravel	31.7%
Poorly graded Sand	45.9%
Silt, Clay	22.4%

Physical Properties of Soil:

Natural Moisture Content, (W)	10.6
Liquid Limit, (LL)	24.6
Plastic Limit, (PL)	15.8
Plasticity Index, (Pl)	8.8

Specific Gravity, (gs)	$2.72g/cm^3$
Unit Weight, (g)	$2.05g/cm^3$
Dry Density, (gd)	$1.85g/cm^3$
Porosity, (n)	31.82
Voids Ratio, (e)	0.469
Degree of Saturation, (Sr)	0.62
Consistency	< 0

Mechanical Properties of Soiil:

Cohesion	C_H =47 kПа
Angle of Internal Friction	$\varphi_{H=}25^0$
Module of Deformation	E= 33МПа
Design Strength	R_0 = 300 kПа

Degree of heaving for clayey SAND with gravel soil ranges to K_f=0.04, thus this soil determines as medium heaving soil.

4 SOIL CHEMICAL PROPERTIES

Determination of soil chemical properties is given in below table 3.

Table 3

No.	Soil Name	Soil Symbol	Reduction in Alkalinity (Rc mmol/l)	Dissolved Silica (Sc,mmol/l)
1	Clayey GRAVEL with sand	GC	0.0215	22.0

5 CONCLUSION AND RECOMMENDATION

5.1 Investigation site of proposed construction building for the Project for Construction of Mongolian and Japanese Teaching Hospital of Health Sciences University is situated within even ground surface, physical geological phenomenon is not developed, groundwater does not any influence on construction foundation, clayey Gravel with sand and poorly graded Gravel with sand and clay soils determine as slightly heaving soils in seasonal freezing depth (degree of saturation range between 0.72 and 0.70), coefficient of heaving for the clayey Sand with gravel soil ranges to K=0.04 determines as medium heaving soil. Based all these arguments the actual investigation site is belong to medium complicated geotechnical condition.

5.2 Norms and calculations of mechanical properties of soil and bedrock, their degree of earthwork troubles are given in below table 4 (6.1 and 6.6)

Table 4

#	Soil Name	Normative Mechanical Properties of Soils			Design Strength, R_0,κPa	Degree of Earthwork Trouble
		Cohesion, C^N, κPa	Angle of Internal Friction, φN, degree	Module of deformation, E^N, MPa		
1	Clayey GRAVEL with sand	27	39	37	450	III
2	Poorly graded GRAVEL with sand and clay	16	44	45	450	III
3	Clayey SAND with gravel	47	25	33	300	II

5.3 Standard freezing depth should be taken as follow: (6.3)

Clayey GRAVEL with sand Poorly graded GRAVEL with sand and clay	2.55 m
Clayey SAND with gravel	2.65m

5.4 Degree of saturation for clayey GRAVEL with sand and poorly graded GRAVEL with sand and clay soils range between 0.72 and 0.70, thus these soils determine as slightly heaving soils; coefficient of heaving for clayey SAND with gravel is K = 0.04, thus this soil determines as medium heaving soils in seasonal freezing depth. (6.1)

5.5 Groundwater was encountered at depths between 9.0m and 10.0m and stabilized at depths between 8.9m and 9.5m.

5.6 The investigated site is situated within seismic zone of 7 degree of and intensity (6.4)

5.7 Electric conductivity of encountered soils are given in below (6.5)

Clayey SAND with gravel	40-80 Om.m
Clayey GRAVEL with sand Poorly graded GRAVEL with sand and clay	2000-10000 in natural moisture condition 200-600 in saturated condition

5.8 The coefficient of Permeability should be taken as follow (5.5)

Poorly graded GRAVEL with sand and clay (GP-GC)	20-60 m/day
Clayey GRAVEL with sand (GC)	100-200 m/day
Clayey SAND with gravel (SC)	1.0-0.5 m/day

6.1 Engineering Standard for Construction of Foundations, Anand.A, Badgai.L, Choibalsan.N, SharaaT, and Magmut. CNR 2.02.01 – 94

6.2 Geotechnical Investigations for Construction Work, CNR 11–03-01

6.3 Climatic and Geotechnical Features for Construction Design. CNR 23-01-09

6.4 Seismology Standard of Design and Construction Work in Earthquake Zone, CNR 22-01-01. (2006)

6.5 Hand book of engineering construction work, Stroiizdat, Moscow 1975

6.6 SNiP IV-5-82. Part-Earthwork

Summary of classification by identical properties of soil

Client: Yamashita Sekkei INC

Location areo: Ulaanbaatar city, BZD-12 district, Botanical garden

Object Name: The Project for Construction of Mongolia and Japanese Teaching Hospital

Total	396.4	6.91	100.0	Total	132.7	6.91	100.0

∑ half of NCO_3^- Anion+Cation	370.5 mg/dm^3	Total Dissolved Solids (TDS)	362 ppm
∑ Total Anion+Cation	529.1 mg/dm^3	Free Co_2	26.4 mg/l
Dry Residual	- mg/dm^3	EC	680 µS/sm
pH	6.85	Corrosion	-mg/dm^3
General Hardness	4.30 mg-equ/dm^3	Oxygen Dissolved	-
Solubility	10.24mg/dm^3	Oxygen Reduction potential	-
Dissolved Hardness	- mg-equ/dm^3	Electrical Conductivity (EC)	-
Alkalinity	94,6 mg/l	Oxygen	mg/dm^3
Carbonate Hardness	4.3 mg-equ/l	Permanganate Oxidize	mg-O/l
Silica Acidize SiO_2		Caustic CO_2	3 mg/l

Physical Properties

Color	grey	Turbidity	cm
Odor	6 degree	Sediments	mudy
Taste	0	Temperatur	-°C
		Clarity	0 cm

Formula of chemical composition is given by following equation:

$$M_{0.5}\frac{HCO_3^{2-}75SO_4^{2-}16}{Ca^{2+}42(Na+K)31Mg^{2+}20}$$

Chemical laboratory analysis indicates as nearly to a soft and clear water of hydrocarbon type of calcium group, 1st class. Based on laboratory testing result content carbonate hardness varies high but caustic properties ranges low. The water sample meets to the requirement of norm and standard "Specifications of Water Usage for Concrete Mixture" MNS 12439-2012.

Water sample was analyzed by chemist B.Oyu-Erdene
approved by M.Enkhtuya

APPENDIX E Soil Chemical Test Result

Appendix E

Soil Chemical Test Result
1/312

Soil Trade, LLC 2013.10.02

On following soil sample was conducted Reduction (R_c), Dissolved Silica (S_c):

No.	Soil Sample (depth) date	Reduction in Alkalinity (R_c, mmol/l)	Dissolved Silica (S_c, mmol/l)
1	BH-02 (0.8-1.0m)	0.0215	22.0

Tested by Dr. Sh.Nyamdelger, Magister O.Nasantogtoh

Approved by Academician D. Batsuren

APPENDIX F Technical Specification

A. SPECIFICATION OF THE SOIL INVESTIGATION

This specification is applied to the subsoil exploration to carry out the study on "The Project for Construction of Mongolia and Japanese Teaching Hospital" in Mongolia."

1. Scope of Work

(1) Site Location:

The project site for construction is one block of the botanical garden, Ulaanbaatar.

The exploration shall be carried out to research the stratum, soil condition, characteristics of the soil dynamics, etc. of the site necessary for building construction.

(2) Field Test

1) Boring:

The number of boreholes shall be 6 and the depth of boreholes shall be maximum 12 meters or 4 meters deeper from the supporting layer if the supporting layer appears within 10 meters.

Expenses for increase/decrease of borehole depth shall be adjusted at the time of completion of the work.

The standard penetration test shall be required at every 1.0m intervals and/or at each different stratum.

2) Collection of the sample soils:

Undisturbed samples of soil shall be obtained from where the standard penetration tests are not carried out at every borehole.

(3) Laboratory Test

1) Atterburge limit test
2) Specific gravity of soil
3) Moisture content test
4) Wet & dry density
5) Unconfined compression test
6) Consolidation test

All field and laboratory tests shall be performed in accordance with ASTM specifications.

2. Expenses of the Contractor

The expenses such as materials, tools, articles of consumption, water and power supply, to carry out the work shall be borne by the Contractor.

3. The Contractor should obtain permission from the Client for the following cases;

(1) Any revision of this specification, caused by inevitable reason.
(2) Accident or incident during the exploration.

4. Submission of the Report

4 sets of technical report required should be submitted to the Client within the period contracted.

The technical report should include;

(1) Introduction
(2) Scope of work
(3) Geological setup
(4) Engineering properties of soil samples & foundation type
(5) General notes on soil investigation review
(6) Conclusion and recommendations
(7) Site plan
(8) Soil investigation review sheet
(9) Bore chart of boreholes
(10) Photograph of undisturbed samples of soil
(11) Geological section diagram

B. SPECIFICATION OF THE SITE SURVEY

This specification is applied to the site survey to carry out the study on "The Project for Construction of Mongolia and Japanese Teaching Hospital" in Mongolia."in Mongolia

1. Scope of Work

The site survey shall be carried out by means of transit and level to set out the boundary line, elevation of site, location of existing facilities and roads within the site.

(1) Condition

1) Site Location: The project site for construction is one block of the botanical garden, Ulaanbaatar.
2) Survey Area: approx. 10 ha.
3) Survey Map:
   A map which indicates the topographic conditions, site boundaries, location of internal roads, location of infrastructures (electricity power line, water line, sewage line with depth, telephone line) and location of existing building.
4) Longitudinal and cross section:
   which indicates levels of the site per 0.5m contour lines

(2) Final Product to be submitted

1) Survey map in scale of 1:200 and AutoCAD file indicating;
   ① the boundary line, ② elevation of the site in every 5 meter grid, ③ location of existing facilities and roads within the survey area.
2) Longitudinal and cross section in scale of 1:200
   sectional drawings.

2. Expenses of the Contractor

The expenses such as materials, tools, articles of consumption, etc. to carry out the works shall be borne by the Contractor.

3. Submission

4 sets of blue print copy of survey map and one CD listed in 1-2) of this specification shall be submitted to the Client within the period contracted.
