Statistics on Program Results

Interpreting the Statistics

The following shows statistics relating to JICA's operations in FY2014.

The methods of calculation and the range of figures are as follows.

- When categorized according to region, figures for bilateral cooperation are based on classification into six regions.
 - Asia (including Central Asia and the Caucasus, excluding the Middle East);
 - Pacific;
 - North America and Latin America;
 - Middle East (west of Iran and north of Sahara except Sudan);
 - Africa (excluding the Middle East);
 - Europe (including Turkey)
- The programs are classified into the following five types in regard to the program results by number of participants.
 - Acceptance of training participants;
 - Dispatch of experts;
 - Dispatch of study teams;
 - Dispatch of Japan Overseas Cooperation Volunteers (JOCV);
 - Dispatch of other volunteers
- Sectoral classification in regard to the Technical Cooperation employs the following 10 categories.
 - Planning/administration;
 - Public works/utilities;
 - Agriculture/forestry/fisheries;
 - Mining/industry;
 - Energy;
 - Business/tourism;
 - Human resources;
 - Health/medical care;
 - Social welfare;
 - and (10) Others
- All other data in connection with JICA's operations and performance together with revisions and updates of achievements and results not appearing in this report shall be posted on JICA's website in a timely and appropriate manner.

Consulting Services	For consulting services, the interest rate will be minimal (0.01%) and the repayment, grace periods and conditions for procurement will be the same as those for main components.							
Options for Program Type Japanese ODA Loans	In case of co-financing, it is possible to apply the same repayment terms as co-financer's lending while maintaining the concessionality of Yen loans.							

* For Low-Income LDCs, the term and condition of 0.01% interest rate and 40-year repayment period including 10-year grace period are applied, irrespective of sectors and fields.

** Preferential Terms are applied for the following sectors and fields: (i) Problems and Issues on Global Environmental and Climate Change (ii) Health and Medical Care and Services (iii) Disaster Prevention and Reduction (iv) Human Resource Development

*** Special Terms for Economic Partnership (STEP) is extended to the projects for which Japanese technologies and know-how are substantially utilized, based on the recipient countries' request to utilize and transfer excellent technologies of Japan.

**** Although the base rate of Variable Loan is the value of the 6-month Japanese Yen LIBOR, the spread shall be fixed. The actual value of interest rate will be capped so that the grant element over the life of the loan is at least 25%, and if the actual value of interest rate is lower than 0.1%, the interest shall be 0.1%.

***** Irrespective of the country category, the term and condition of 0.01% interest rate and 40-year repayment period including 10-year grace period are applied to projects assisting recoveries from disasters, including Stand-by Emergency Credit for Urgent Recovery (SECURE). For Stand-by Emergency Credit for Urgent Recovery (SECURE), the term and condition of 20-year repayment period including 6-year grace period, or 15-year repayment period including 5-year grace period are also available, in order to apply Currency Conversion Option.

Note:

· The concessionality level of optional terms does not exceed that of standard terms.

· Under the EPSA initiative, the loan for projects co-financed with the AfDB are extended using "Preferential Terms," determined for each income category; in the case for Low-Income LDCs, the term and condition of 0.01% interest rate and 40-year repayment period including 10-year grace period are applied.

· A two-step loan extended to the AfDB to cover its sub-loans to private enterprises under EPSA is extended using the term and condition of 0.55% interest rate and 40-year repayment period including 10-year grace period.

· For countries complying with ongoing IMF-supported programs or receiving grants from IDA, it is possible to modify the terms and conditions of the ODA Loans so as to meet the IMF's concessionality criteria.

· For Uppermost-Middle-Income Countries, only LIBOR-based term is applied. For Upper-Middle-Income Countries, LIBOR-based term is applied in principle, although General Terms or Preferential Terms are also available. For Lower-Middle-Income Countries and Middle-Income Countries, General Terms, Preferential Terms or STEP are applied in principle, although LIBOR-based term is also available. For Program Loans of Upper-Middle-Income Countries, only LIBOR-based term is applied, although for Sector Program Loans for Upper-Middle-Income Countries, General Terms or Preferential Terms are also available.

1 Sectors and Fields Eligible for Preferential Terms

- Problems and Issues on Global Environmental and Climate Change
- Health and Medical Care and Services
- Disaster Prevention and Reduction
- Human Resource Development

[Note] 1. To promote the strategic use of ODA loans for priority issues, assistance for which makes use of Japan's outstanding technology and know-how, JICA reviewed sectors to which preferential terms of assistance are applied in accordance with an announcement made on an improvement in policies to encourage the strategic use of ODA Loans by the Ministry of Foreign Affairs on April 15, 2013.

2. In cases where a part of the project is eligible for preferential terms, the terms can be applied to that part.

2 Enhancement Use of Assistance for Upper-Middle-Income Countries and Uppermost-Middle-Income Countries

JICA promotes its use of ODA Loans in upper-middle-income countries and uppermost-middle-income countries, primarily in fields where Japan's knowledge and technology can be put to good use.

For upper-middle-income countries, JICA is adding regional infrastructure and agriculture to the four current fields of application (environment, human resource development, measures to reduce disparities and disaster prevention and recovery measures). Moreover, JICA will provide ODA Loans for other areas that have strategic significance for Japan, such as making maximum use of Japan's knowledge and technology.

Uppermost-middle-income countries will be eligible for ODA Loans if projects are considered to have strategic significance for Japan until they graduate from being eligible for World Bank assistance (normally about five years).

3 Special Term for Economic Partnership (STEP)

Overview

Special Terms for Economic Partnership (STEP) Terms are to raise the visibility of Japan's ODA through technical transfers for developing countries by utilizing Japan's advanced technologies and know-how.

STEP Recipient Countries

Low-Income Countries, Lower-Middle-Income Countries and Middle-Income Countries to which tied aid can be extended under OECD rules (excluding the Least Developed among Less Developed Countries and Upper-Middle-Income Countries)

STEP-Eligible Projects

(1) Projects eligible for STEP are those listed in following sectors and fields; (2) and at the same time, for which Japanese technologies and equipment are substantially utilized.

Sectors and Fields

- Bridges and Tunnels
- Ports
- Airports
- Urban mass transit system
- Oil/Gas transmission and storage facilities
- Urban flood control projects
- Communications/Broadcasting/Public information system
- Power stations/Power transmission and distribution lines
- Trunk roads/Dams (limited to projects that substantially utilize Japan's anti-earthquake technology, ground treatment technology and rapid construction technology)
- Environmental Projects (limited to projects that substantially utilize Japan's air-pollution prevention technology, water-pollution prevention technology, waste treatment and recycling technology and waste heat recycling and utilization technology)
- Medical equipment
- Disaster-prevention system/equipment

Even if a project does not fall into the sectors and fields listed above, application of STEP to the project could be positively considered as long as the project substantially utilizes Japanese technologies and/or equipment.

Interest Rates and Repayment Period

Interest rates and repayment periods are set so as to enable the extension of tied aid under OECD rules, and revised annually on 15 January.

Procurement Conditions

Primary contracts are tied to Japanese firms, while subcontracts are generally untied. Joint ventures with recipient countries are accepted for primary contracts, on condition that the Japanese firm is the leading partner.

Coverage Ratio

STEP loans may be used to finance up to 100% of the total project cost.

Country of Origin Rule

Not less than thirty percent (30%) of the total price of contract(s) (excluding consulting services) financed by a STEP loan shall be accounted for by either (i) goods from Japan and services provided by a Japanese company(ies), or (ii) goods from Japan only, depending on the nature of the project.

	Category	Examples
(a)	Projects in which advanced technologies and/or know-how of Japanese companies are identified in services (e.g. construction methods, etc), both goods from Japan and services provided by a Japanese company(ies) can be included in the Ratio (i.e. (i) is applied).	Tunnels, ports, concrete bridges, trunk roads, dams, sewerage systems, urban underground headrace tunnels, public information systems, hydroelectric power, and geothermal power, etc.
(b)	Projects, which consists mainly of the installation of goods or plants and in which Japanese technologies can be identified in such goods or plants, only goods from Japan can be included in the Ratio (i.e. (ii) is applied).	Communications/broadcasting facilities, wind/solar/thermal power generation, oil/gas transmission and storage facilities, waste treatment sites, waste incineration plants, steel bridges, urban mass transit systems, urban flood control projects, power transmission and distribution line, etc.

Procurement Audits

The procurement process is audited by a third party after bidding to ensure fairness, utilizing loan funds or JICA research expenses.

Note: Please refer to page 25 for the classification of principal country income levels.

Significant Accounting Policies

1 Revenue recognition method of operational grants

Revenue from operational grants is recognized as the related expenses are incurred. This is attributable to the difficulties associated with the application of a revenue recognition method based on operation achievement and a revenue recognition method based on term, specifically the significant amount of time required to evaluate operating results objectively, as well as other complexities.

2 Depreciation method

(1) Tangible assets

Straight-line method

The useful lives of major assets are as follows:

Buildings:	1–50 years
Structures:	1–42 years
Machinery and equipment:	1–17 years
Vehicles:	1–6 years
Tools, furniture, and fixtures:	1–18 years

The estimated depreciation costs for specific depreciable assets (Accounting Standard for Incorporated Administrative Agency No. 87) and specific removal costs, etc., associated with asset retirement obligations (Accounting Standard for Incorporated Administrative Agency No. 91) are indirectly deducted from the capital surplus and reported as accumulated depreciation not included in expenses.

(2) Intangible assets

Straight-line method

3 Standard for appropriation of provision and estimation for bonuses

A provision for bonuses is not appropriated since the financial source is secured by operational grants.

The estimated bonus payments not included in the provision in the statement of administrative service operation cost is reported as a current business year estimate of the provision for bonuses, calculated according to the Accounting Standard for Incorporated Administrative Agency No. 88.

4 Standard for appropriation of provision and estimation for retirement benefits

A provision for retirement benefits is not appropriated since the financial source is secured by operational grants.

A provision for retirement benefits is not provided for pension benefits from the Employees' Pension Funds since the financial source for Employees' Pension Funds' insurance fees and reserve shortfall is secured by operational grants.

The estimated increase in retirement benefits not included in the provision in the statement of administrative service operation cost is reported as the current business year increase of provision for retirement benefits, calculated according to the Accounting Standard for Incorporated Administrative Agency No. 38.

5 Basis and standard for appropriation of allowances, etc.

Allowance for loan losses

To provide for loan losses, JICA records the estimated amount of default, taking into account the transition rate to delinquent loans for ordinary loans and specific collectibility of doubtful loans, etc.

6 Standard and method for the valuation of securities

Held-to-maturity securities

Valued using the amortized cost method (straight-line method)

7 Standard and method for the valuation of inventories

(1) Stored goods

Stored goods valuation is based on the lower of cost or market using the first-in, first-out (FIFO) method.

(2) Payments for uncompleted contracted programs

Payments for uncompleted contracted programs valuation is based on the lower of cost or market using the specific identification method.

8 Translation standard for foreign currency-denominated assets and liabilities into yen

Foreign currency money claims and liabilities are translated into Japanese yen at the spot exchange rate at the balance sheet date. Exchange differences are recognized as profit or loss.

9 Method for computing opportunity cost in the Statement of Administrative Service Operation Cost

Interest rate used to compute opportunity cost of government investment: 0.400% with reference to the yield of 10-year fixed-rate Japanese government bonds at the end of March 2015

10 Accounting treatment for lease transactions

Finance lease transactions with total lease fees of ¥3 million or more are accounted for in a similar manner as ordinary sale and purchase transactions.

Finance lease transactions with total lease fees of less than ¥3 million are accounted for in a similar manner as ordinary rental transactions.

11 Accounting treatment for consumption taxes

Consumption taxes are included in transaction amounts.

Notes to financial statements

(7) Prepaid pension expenses	0
(8) Provision for retirement benefits (6) - (7)	(28,273,243,689)

(Note 1) On March 1, 2014, JICA obtained approval from the Minister of Health, Labour and Welfare for exemption from the obligations of future payments related to return of a substitutional part of Employees' Pension Fund.

The amount corresponding to the refund (minimum actuarial liability) measured at the end of the current business year was ¥6,707,659,149. Assuming this amount had been transferred at the end of the current business year, the estimated deduction amount in the statement of administrative service operation cost would be ¥11,683,928,148, in accordance with Paragraph 44-2 of "Practical Guidelines concerning Accounting Standard for Retirement Benefits (Interim Report)" (Japan Institute of Certified Public Accountants, Accounting System Committee Report No. 13 issued on September 14, 1999).

(Note 2) The plan assets include ¥6,259,175,610 payments to national treasury in relation to the return of the substitutional portion of the Employee's pension funds.

(2) Breakdown of retirement benefit expenses

3 Impairment loss on non-current assets**(1) The non-current assets for which the impairment loss was recognized**

[1] Outline of the usage, type, location, book value, etc.

Impairment loss was recognized in the following assets:

(Unit: Yen)

Name of asset	Usage	Location	Type	Book value before impairment loss	Impairment loss during the period	Accumulated impairment loss at the end of the period
Shinoharacho employee housing	Employee housing	Yokohama City, Kanagawa Prefecture	Buildings	214,600	34,738	34,738
			Land	53,949,000	8,732,862	8,732,862

[2] Background relating to the recognition of impairment loss

JICA decided to dispose of the Shinoharacho employee housing in September 2013, and the previous occupants have all vacated the employee housing units. As a result, the book value of the employee housing units was reduced to the recoverable service value in the current business year. This reduction was treated as an accumulated impairment loss not included in expenses, which is deducted from the capital surplus.

[3] Breakdown of impairment loss which is not recognized in the statement of income and impairment loss which is recognized in the statement of income for each major non-current asset, and an overview of the calculation method for the recoverable service value:

(Unit: Yen)

Name of asset	Type	Impairment loss (Not recognized in the statement of income)	Impairment loss (Recognized in the statement of income)	Calculation method for recoverable service value
Shinoharacho employee housing	Buildings	34,738	—	Recoverable service value is measured by using the net realizable value, which is a valuation by a third party less the estimated expenses for disposal.
	Land	8,732,862	—	

(2) Non-current assets indicating impairment loss

Not applicable

4 Donated funds for grant aid

Grant aid is received in the form of donated funds from the government of Japan. JICA administers this grant aid based on Grant Agreements with the government of the recipient country. At the end of business year 2014, the outstanding balance of unexecuted Grant Agreements stood at ¥199,699,693,668.

(Statement of Cash Flows)

The funds shown in the statement of cash flows are cash, deposit accounts, and checking accounts.

1 Breakdown of balance sheet items and ending balance of funds

(as of March 31, 2015)

Cash and deposits	¥74,554,177,039
Time deposits	¥(5,000,000,000)
Ending balance of funds	¥69,554,177,039

2 Description of significant non-cash transactions**(1) Payment to the national treasury of unnecessary property**

Buildings	¥ 827,504,343
Structures	¥ 824,368
Machinery and equipment	¥489,475
Tools, furniture, and fixtures	¥1,640,532
Land	¥1,342,939,195

(2) Assets granted under finance lease

Tools, furniture, and fixtures	¥192,331,311
--------------------------------	--------------

(Statement of Administrative Service Operation Cost)

Number of public officers temporarily transferred to JICA and accounted for as opportunity cost

Of the estimated increase in retirement benefits not included in the provision, ¥19,110,076 was recognized as the current business year increase of provision for retirement benefits for 31 public officers temporarily transferred to JICA according to JICA's internal rules.

(Status of financial instruments)

The General Account's fund management is limited to short-term deposits and public and corporate bonds while fund-raising consists mainly of operational grants approved by the competent minister. The General Account does not borrow from the government fund for Fiscal Investment and Loan Program (FILP), nor does it borrow funds from financial institutions or issue FILP Agency Bonds.

(Fair value of financial instruments)

Balance sheet amounts, fair value, and difference at the balance sheet date are as follows:

	(Unit: Yen)		
	Balance sheet amount	Fair value	Difference
(1) Cash and deposits	74,554,177,039	74,554,177,039	0
(2) Securities	99,000,000,000	99,000,000,000	0
(3) Accounts payable	(19,111,832,826)	(19,111,832,826)	0

(Note) Liabilities are shown in parentheses.

Note 1: Calculation method for fair value of financial instruments and matters concerning securities

[1] Cash and deposits

Cash and deposits are short term and fair value approximates book value. Thus, fair value for cash and deposits is calculated at book value.

[2] Securities (negotiable deposits)

Negotiable deposits are valued at book value because fair value approximates book value due to the short-term nature of these instruments.

[3] Accounts payable

Accounts payable are short term and fair value approximates book value. Thus, fair value for accounts payable is calculated at book value.

(Lease transactions)**1. Future minimum lease payments related to operating lease transactions are as follows**

Future minimum lease payments due within one year of the balance sheet date	¥8,937,433
Future minimum lease payments corresponding to periods more than one year from the balance sheet date	¥19,182,857

2. The amount of the finance lease transactions that influenced the current business year's profits and losses was ¥12,243,396. Total income for the current business year after the deduction of this amount was ¥1,448,541,144.**(Asset retirement obligations)**

JICA has a building lease agreement for its head office building and has obligations to restore the building to its original state at the termination of the lease period. Therefore, these asset retirement obligations have been recorded. The estimate for the asset retirement obligations assumes a five-year lease period for the projected period of use and a discount rate of 0.529%.

At the end of the previous business year, the amount recorded for asset retirement obligations was ¥275,645,506. The balance of asset retirement obligations at the end of the current business year was ¥276,125,850; consisting of the sum of the above ¥275,645,506 and a ¥480,344 adjustment amount for the asset retirement obligations are due to passage of time.

(Payments to the national treasury, etc., for unnecessary property)

A summary of payments to the national treasury for unnecessary property in the current business year is as follows.

Regarding the transfer of 27 employee housing units, the transfer balance of the transactions that were designated as "transfer transactions whose transfer balance shall not be recorded in the profit and loss for calculating profits and losses" as per Article 13-2 of the Ordinance of the Ministry for the Operations, Finances and Accounting of the Japan International Cooperation Agency (Ordinance of Ministry of Foreign Affairs No. 22 of September 30, 2003 (final amendment, March 31, 2015)) and the costs required for the transfer were not recorded in the profit and loss for calculating profits and losses and were deducted from the capital surplus by applying Accounting Standard for Incorporated Administrative Agency No. 99.

1. Employee housing in sectional ownership (27 Units)**(1) Outline of the type and book value, etc., of assets that were paid to the national treasury as unnecessary property**

(Unit: Yen)

(2) Reason for unnecessary property

Based on the Midterm Plan, etc., it was decided that unnecessary property would be disposed of by payments to the national treasury, in accordance with the Act for partial revision of the Act on General Rules for Incorporated Administrative Agencies (Act No. 37 of 2010), which prescribed returns of unnecessary property to the national treasury by Incorporated Administrative Agencies.

(3) Method of payment to the national treasury: Transfer by payment in kind pursuant to Paragraph 1 of Article 46-2 of the Act on General Rules for Incorporated Administrative Agencies.**(4) Amount and date of payment to the national treasury: Payment in kind, December 19, 2014****(5) Capital reduction: ¥3,050,273,698****(Significant Contractual Liabilities)**

Contractual liabilities JICA is obligated to pay from the next business year onward are ¥6,115,524,053

(Significant subsequent events)

On April 1, 2015, JICA obtained approval from the Minister of Health, Labour and Welfare for exemption from the obligations of future payments related to return of a substitutional portion of the Employees' Pension Fund. Accordingly, based on Paragraph 44-2 of the "Practical Guidelines concerning Accounting Standard for Retirement Benefits (Interim Report)" (Japan Institute of Certified Public Accountants, Accounting System Committee Report No. 13), the expiry of retirement benefit obligations corresponding to the substitutional portion and related gain (loss) were recognized as of the date of the approval. In business year 2015, a provisional deduction of ¥11,683,928,148 in the administrative service operation cost is to be recorded as a result of the expiry of retirement benefit obligations corresponding to the substitutional portion.

The financial statements have been audited by an accounting auditor as prescribed in Article 39 of the Act on General Rules for Incorporated Administrative Agencies.

Significant Accounting Policies

1 Depreciation method

(1) Tangible assets

Straight-line method

The useful lives of major assets are as follows:

Buildings:	2–50 years
Structures:	2–46 years
Machinery and equipment:	2–17 years
Vehicles:	2–6 years
Tools, furniture and fixtures:	2–15 years

(2) Intangible assets

Straight-line method

2 Standard for appropriation of provision and estimation for bonuses

The provision for bonuses is calculated and provided for based on estimated amounts of future payments attributable to the services that have been rendered by officers and employees applicable to the current business year.

3 Standard for appropriation of provision and estimation for retirement benefits

The provision for retirement benefits is calculated and provided for based on estimated amounts of future payments attributable to the retirement of employees, and is accrued in line with the projected benefit obligations and estimated plan assets applicable to the business year ended March 31, 2015. The profit and loss appropriation method for actuarial differences and past service liabilities are presented as follows:

Actuarial differences are recognized as a lump-sum gain or loss in the business year in which they occur.

Past service liabilities are recognized as a lump-sum gain or loss in the business year in which they occur.

The estimated increase in retirement benefits not included in provision in the statement of administrative service operation cost is reported as the current-year increase of provision for retirement benefits, calculated according to the Accounting Standard for Incorporated Administrative Agency No. 38.

4 Basis and standard for appropriation of allowance, etc.

(1) Allowance for loan losses

The allowance for claims on debtors who are legally bankrupt (“Bankrupt borrowers”) or substantially bankrupt (“Substantially bankrupt borrowers”) is provided based on the outstanding balance of loan claims after the deductions of the amount expected to be collected through the disposal of collateral and execution of guarantees, or the same amount is written off directly. The allowance for claims on debtors who are not legally bankrupt, but are likely to become bankrupt (“Potentially bankrupt borrowers”) is provided based on an overall assessment of the solvency of the debtors after the deductions of the amount expected to be collected through the disposal of collateral and the execution of guarantees, or the same amount is written off directly. There were no write-offs from the above-mentioned outstanding balance of loan claims.

The allowance for claims on debtors other than Bankrupt borrowers, Substantially bankrupt borrowers, and Potentially bankrupt borrowers is provided primarily based on the default rate, which is calculated based on the actual defaults during a certain period in the past. The allowance for possible losses on specific overseas loans is provided based on the expected loss amount taking into consideration the political and economic situation of these countries.

All claims are assessed initially by the operational departments (including regional departments) based on internal rules for self-assessment of asset quality. The Internal Audit Department, which is independent from the operational departments, reviews these self-assessments, and an allowance is provided based on the results of the assessments.

(2) Provision for contingent losses

Provision for contingent losses is provided to prepare for the occurrence of contingent losses for a portion of the undisbursed balance of loan commitments, which JICA is absolutely obligated to extend. The amount of the provision is estimated based on possible losses in the future.

5 Standard and method for the valuation of securities

(1) Shares of affiliated companies

Shares of affiliated companies are stated at cost, determined using the moving-average method.

However, when the equity-equivalent price has fallen below the cost at acquisition, the equity-equivalent price is used.

(2) Other investment securities (whose fair value is extremely difficult to determine)

Other investment securities are stated at cost, determined using the moving-average method.

6 Standard and method for the valuation of derivative transactions

All derivative financial instruments are carried at fair value.

7 Method for amortization of discount on bonds payable

Discount on bonds payable is amortized over the duration of the bonds.

8 Translation standard for foreign currency-denominated assets and liabilities into yen

Foreign currency money claims and liabilities are translated into Japanese yen mainly at the spot exchange rate at the balance sheet date. Exchange differences are recognized as profit or loss.

9 Method for computing opportunity cost in the statement of administrative service operation cost

Interest rate used to compute opportunity cost concerning government investment:

0.400% with reference to the yield of 10-year fixed-rate Japanese government bonds at the end of March 2015.

10 Accounting treatment for lease transactions

Finance lease transactions with total lease fees of ¥3 million or more are accounted for in a similar manner as ordinary sales and purchase transactions.

Finance lease transactions with total lease fees of less than ¥3 million are accounted for in a similar manner as ordinary rental transactions.

11 Method of hedge accounting

(1) Method of hedge accounting

Interest rate swaps are accounted for using the deferral hedge accounting method. As for interest rate and currency swaps, the interest rate part is accounted for using the accrual method and the currency part is accounted for by the assignment method.

(2) Hedging instruments and hedged items

[1] Hedging instruments...Interest rate swaps

Hedged items...Loans and bonds

[2] Hedging instruments...Interest rate and currency swaps

Hedged items...Foreign currency bonds

(3) Hedging policy

JICA engages in interest rate swaps or interest rate and currency swaps for the purpose of hedging interest rate or currency fluctuation risks.

(4) Method of evaluation of hedge effectiveness

Hedges that offset market fluctuations of loans are assessed based on discrepancies with regard to maturity and notional principal and others between hedged loans and hedging instruments.

Hedges that offset market fluctuations of bonds are assessed by measuring and comparing the change in fair value of both hedging instruments and corresponding hedged items from the date of inception of the hedges to the assessment date. As for interest rate and currency swaps that satisfy the requirements of the accrual method and the assignment method, JICA is not required to periodically evaluate hedge effectiveness.

12 Accounting treatment for consumption taxes

Consumption taxes are included in transaction amounts.

Notes to the financial statements

(Balance Sheet)

1 Joint obligations

JICA is jointly liable for obligations arising from the following bonds issued by the former Japan Bank for International Cooperation which was succeeded by the Japan Bank for International Cooperation:

Fiscal Investment and Loan Program (FILP) Agency Bonds	350,000,000,000 Yen
Government-Guaranteed Foreign Bonds	650,000,000 U.S. Dollars

2 Financial assets received as collateral

The market value of the financial assets received as collateral at our disposal was ¥3,794,858,800.

3 Undisbursed balance of loan commitments

Most of JICA's loans are long term. Ordinarily, when receiving a request for disbursement of a loan from a borrower, corresponding to the intended use of funds as stipulated by the loan agreement, and upon confirming the fulfillment of conditions prescribed under the loan agreement, JICA promises to loan a certain amount of funds within a certain range of the amount required by the borrower, with an outstanding balance within the limit of loan commitments. The undisbursed balance of loan commitments as of March 31, 2015 was ¥4,692,025,149,989.

(Statement of Income)

1 Gain (loss) on valuation of shares of affiliated companies

Gain (loss) on valuation of shares of affiliated companies includes gain (loss) on valuation, sale, or liquidation of shares of affiliated companies.

2 Recoveries of written-off claims

Recoveries of written-off claims include the amount recovered in excess of book value of the loans transferred to JICA on October 1, 2008, that are associated with the Overseas Economic Cooperation Account of the former Japan Bank for International Cooperation.

(Statement of Cash Flows)

The funds shown in the statement of cash flows are deposit accounts and checking accounts.

1 Breakdown of balance sheet items and ending balance of funds

(as of March 31, 2015)	
Cash and deposits	¥127,049,693,819
Ending balance of funds	¥127,049,693,819

2 Description of significant non-cash transactions

Assets granted under finance lease	
Tools, furniture and fixtures	¥38,676,568

(Statement of Administrative Service Operation Cost)

Number of public officers temporarily transferred to JICA and accounted for as opportunity cost

Of the estimated increase in retirement benefits not included in the provision, ¥4,954,995 was recognized as the current-business-year increase of provision for retirement benefits for 31 public officers temporarily transferred to JICA according to JICA's internal rules.

(Financial instruments)

1 Status of financial instruments

(1) Policy regarding financial instruments

The Finance and Investment Account undertakes financial cooperation operations by providing debt and equity financing. In undertaking these operations, it raises funds by borrowing from the Japanese Government under the FILP, borrowing from financial institutions, issuing bonds, and receiving capital investment from the Japanese Government. From the perspective of asset-liability management (ALM), derivative transactions are conducted for mitigating the adverse impact caused by interest rate and foreign exchange

fluctuations.

(2) Details of financial instruments and related risks

The financial assets held in the Finance and Investment Account are loans mainly to developing regions, and are exposed to credit risk attributed to defaults by its borrowers and interest rate risk. Securities, investment securities, and shares of affiliated companies are held for policy-oriented purposes, and are exposed to credit risk of issuers, interest rate risk, and market price volatility risk.

Borrowings and bonds are exposed to liquidity risk as their payments or repayments cannot be duly serviced in such a situation where the account is unable to have access to markets for certain reasons. In addition to the above, foreign currency bonds are exposed to foreign exchange fluctuation risk.

(3) Risk management system for financial instruments

[1] Credit risk management

The Finance and Investment Account has established and operates a system for credit management. This system encompasses credit appraisal, credit limit setting, credit information monitoring, internal rating, guarantee and collateral setting, problem loan management, etc., in accordance with integrated risk management rules and various credit risk-monitoring rules. This credit management is carried out by the respective department responsible for each region in addition to the Credit Risk Analysis and Environmental Review Department and General Affairs Department. Additionally, the Risk Management Committee of the Finance and Investment Account and Board of Directors convene on a regular basis for the purpose of deliberating or reporting. Moreover, the Office of Audit monitors the status of credit management.

The credit risks of issuers of investment securities and shares of affiliated companies are monitored by the Private Sector Partnership and Finance Department, which regularly confirms their credit information, etc.

Counterparty risk in derivative transactions is monitored by regularly confirming the exposure and credit standing of counterparties and by securing collateral as necessary.

[2] Market risk management

(i) Interest rate risk management

Interest rates are determined in accordance with the methods prescribed by laws or statements of operational procedures. Interest rate swap transactions are conducted to hedge against the risk of interest rate fluctuations in light of their possible adverse impact.

(ii) Foreign exchange risk management

Foreign currency bonds are exposed to foreign exchange fluctuation risk; as such, interest rate and currency swaps are employed to avert or reduce foreign exchange risk.

(iii) Price volatility risk management

Stocks that are held for policy-oriented purposes are monitored for changes in values affected by the market environment or financial condition of the companies, exchange rates, and other factors.

This information is reported on a regular basis to the Risk Management Committee of the Finance and Investment Account and Board of Directors.

[3] Liquidity risk management related to fund raising

The Finance and Investment Account prepares a funding plan and executes fund raising based on the government-affiliated agencies' budgets, as resolved by the National Diet.

[4] Derivative transaction management

Pursuant to rules concerning swaps, derivative transactions are implemented and managed by separating the sections related to execution of transactions, assessment of hedge effectiveness, and logistics management based on a mechanism with an established internal system of checks and balances.

2 Fair value of financial instruments

Balance sheet amount, fair value, and difference at the balance sheet date are as follows:

(Unit: Yen)

	Balance sheet amount	Fair value	Difference
(1) Loans	11,223,480,672,780		
Allowance for loan losses	(145,266,937,934)		
	11,078,213,734,846	11,246,854,590,044	168,640,855,198
(2) Claims probable in bankruptcy, claims probable in rehabilitation, and other	68,324,707,686		
Allowance for loan losses	(60,988,674,161)		
	7,336,033,525	7,336,033,525	0
(3) Borrowings from government funds for FILP (including borrowings due within one year)	[1,703,585,530,000]	[1,786,676,890,929]	[83,091,360,929]
(4) Derivative transactions	[35,132,994,389]	[35,132,994,389]	0

* Liabilities are shown in brackets [].

(Note 1) Method for calculating fair values of financial instruments

[1] Loans

Fair values of loans with floating interest rates are calculated at their book values, as policy interest rates (bank rates) are immediately reflected in their floating interest rates, and therefore, fair value approximates book value. On the other hand, fair values of loans with fixed interest rates are calculated by discounting the total amount of the principal and interest using a rate that combines a risk-free rate with the respective borrowers' credit risk.

[2] Claims probable in bankruptcy, claims probable in rehabilitation, and other

Regarding claims probable in bankruptcy, claims probable in rehabilitation, and other, the estimated uncollectible amount is calculated based on the expected recoverable amount through collateral and guarantees. Therefore, fair value approximates the balance sheet amount, less the current estimated uncollectible amount, and hence is calculated accordingly.

[3] Borrowings from government funds for FILP (including borrowings due within one year)

Fair value of borrowings from government funds for FILP (including borrowings due within one year) is calculated by discounting the total amount of principal and interest using interest rates expected to be applied to new borrowings for the same total amount.

[4] Derivative transactions

Derivative transactions are interest rate-related transactions (interest rate swaps), and fair values are based on discounted present values.

(Note 2) The following are financial instruments whose fair values are deemed to be extremely difficult to determine. They are not included in the fair value information of financial instruments.

(Unit: Yen)

	Balance sheet amount
Investment securities *1	139,850,556
Shares of affiliated companies *1	43,046,266,782
Undisbursed balance of loan commitments *2	0

*1 These financial instruments have no market prices, and the calculation of their fair values is deemed to be extremely difficult.

*2 The fair values of the undisbursed balances of loan commitments are deemed to be extremely difficult to determine. The main reason is the difficulty of reasonably estimating future extensions of loans, because of the extremely diverse range of implementation formats for projects in the developing countries where these loans are provided.

(Note 1) On March 1, 2014, JICA obtained approval from the Minister of Health, Labour and Welfare for exemption from the obligations of future payments related to return of a substitutional portion of Employees' Pension Fund.

The amount corresponding to the refund (minimum actuarial liability) measured at the end of the current business year was ¥1,739,210,451. Assuming this amount had been transferred at the end of the current business year, an estimated gain and an estimated deduction amount in the statement of administrative service operation cost would be ¥3,029,493,522, in accordance with Paragraph 44-2 of "Practical Guidelines concerning Accounting Standard for Retirement Benefits (Interim Report)" (Japan Institute of Certified Public Accountants, Accounting System Committee Report No. 13 issued on September 14, 1999)

(Note 2) Plan assets include ¥1,622,924,390 paid in advance to the National Treasury in relation to the return of the substitutional portion of the Employees' Pension Funds.

(Lease transactions)

Future minimum lease payments related to operating lease transactions are as follows

Future minimum lease payments due within one year of the balance sheet date	¥161,903
Future minimum lease payments corresponding to periods more than one year from the balance sheet date	¥0

(Asset retirement obligations)

JICA has a building lease agreement for its head office building, and has an obligation to restore the building to its original state at the termination of the lease period. Therefore, the asset retirement obligations have been recorded. The estimate for the asset retirement obligations assumes a five-year lease period for the projected period of use and a discount rate of 0.529%.

At the end of the previous business year, the amount recorded for asset retirement obligations was ¥70,251,729. The balance of the asset retirement obligations at the end of the current business year was ¥70,251,729; consisting of the sum of the above ¥122,421 and a ¥70,374,150 adjustment amount for the asset retirement obligations are due to passage of time.

(Profit and loss under the equity method)

JICA does not maintain any specific affiliated companies and, as such, does not prepare consolidated financial statements. However, profit and loss under the equity method related to affiliated companies are as follows:

Investment amount in affiliated companies	¥43,046,266,782
Investment amount when applying the equity method	¥57,344,816,592
Capital gain amount from investments when applying the equity method	¥35,891,477,087

(Significant act to assume debts)

Not applicable

(Significant subsequent events)

On April 1, 2015, JICA obtained approval from the Minister of Health, Labour and Welfare for exemption from the obligations of future payments related to return of a substitutional portion of the Employees' Pension Fund. Accordingly, based on Paragraph 44-2 of the "Practical Guidelines concerning Accounting Standard for Retirement Benefits (Interim Report)" (Japan Institute of Certified Public Accountants, Accounting System Committee Report No. 13), the expiry of retirement benefit obligations corresponding to the substitutional portion and related gain (loss) were recognized as of the date of the approval. As for the related gain (loss), ¥3,029,493,522 in gain from the return of a substitutional portion is to be reported in the financial statements for business year 2015.

Total	189,180	206,256

Note: The allowance for claims on debtors who are legally bankrupt ("Bankrupt borrowers") or substantially bankrupt ("Substantially bankrupt borrowers") is provided based on the outstanding balance of loan claims after the deductions of the amount expected to be collected through the disposal of collateral and execution of guarantees, or the same amount is written off directly. The allowance for claims on debtors who are not legally bankrupt but are likely to become bankrupt ("Potentially bankrupt borrowers") is provided based on an overall assessment of the solvency of the debtors after the deductions of the amount expected to be collected through the disposal of collateral and the execution of guarantees, or the same amount is written off directly. There were no write-offs from the above-mentioned outstanding balance of loan claims. The allowance for claims on debtors other than Bankrupt borrowers, Substantially bankrupt borrowers and Potentially bankrupt borrowers is provided primarily based on the default rate, which is calculated based on the actual defaults during a certain period in the past. The allowance for possible losses on specific overseas loans is provided based on the expected loss amount taking into consideration the political and economic situation of these countries.

All claims are assessed initially by the operational departments (including regional departments) based on internal rules for self-assessment of asset quality. The Internal Audit Department which is independent from the operational departments reviews these self-assessments, and an allowance is provided based on the results of the assessments.

Information on the Quality of Assets of Japan International Cooperation Agency (JICA) Finance and Investment Account

Although the Banking Act and Act on Emergency Measures for the Revitalization of the Financial Functions of 1998 (the "Financial Revitalization Act") do not apply to JICA, JICA has made self-assessments of the quality of its assets since the fiscal year ended March 31, 2001, in accordance with the standards set forth in the Inspection Manual for Deposit-Taking Institutions of the Financial Services Agency of Japan. This was aimed at increasing disclosure on its asset quality and improving the internal management of credit risks.

One characteristic of JICA's operation is that a considerable portion of its loans is official credit for the governments of developing countries. Thus, when an indebted country is temporarily unable to service debt due to economic difficulties, debt rescheduling will sometimes take place, based on an international agreement among the creditor countries in the Paris Club, in order to ensure sustainable debt service.^(Note 1) A debtor country receiving such temporary support for overcoming the liquidity problem will implement economic restructuring programs agreed upon with the IMF to acquire sustainable debt service capacity.

The loans rescheduled under the agreement in the Paris Club have a high probability of repayment, because, unlike loans provided by private financial institutions, their nature as official credit provides an asset-securing mechanism under the above international framework. Nonetheless, to facilitate comparison with private financial institutions, JICA, in principle, discloses the loans rescheduled in the Paris Club and whose debtor countries are categorized as "needs attention" in its self-assessments of asset quality, as loan assets require to be disclosed classifying them either as "Restructured Loans" (under the Banking Act) or "Special Attention Assets" (under the Financial Revitalization Act).

Note 1. An international consensus was reached at the creditor nation conference (Paris Club Meeting) on rescheduling foreign government debt (where the debtor is a country, and debt originates from such government entities as trade insurance or export credit agencies) of debtor nations temporarily unable to make payments due to a deterioration in their balance of payments. As a result, a temporary liquidity support program for debtor nation governments (balance of payments assistance under the framework of international cooperation) will be shortly executed. In conjunction with this temporary liquidity assistance, debtor nations will implement an economic reform program agreed upon with the International Monetary Fund (IMF), making it possible for the country to continue to service its debt obligations. The total foreign government debt principal applicable to the debt rescheduling agreement at the Paris Club Meeting held in JICA's Finance and Investment Account was ¥979,224 million as of the end of FY2014.

1 Risk Monitored Loans ^(Note 2)

The following table shows the classification of Risk Monitored Loans based on the self-assessments of asset quality in accordance with the disclosure standard of Risk Monitored Loans applied to commercial financial institutions (under the Banking Act). Each category of Risk Monitored Loans is defined as follows:

(1) Loans to Debtor in Legal Bankruptcy ^(Note 3)

Among loans that are placed in non-accrual status (except the portion deduced as allowance for loan losses), when collection of either principal or interest becomes doubtful for the reason that principal or interest is past due for a considerable period of time or for other reasons, those loans which there is filing of reorganization procedures under the Corporate Reorganization Act or bankruptcy procedures under the Bankruptcy Act or special liquidation procedures under the Companies Act or other relevant laws, or there is suspension of transactions in promissory notes issued by the borrowers in the clearing house.

(2) Past Due Loans ^(Note 3)

Loans that are placed in non-accrual status except those classified as "Loans to Debtor in Legal Bankruptcy" or those whose interest payments are deferred in order to expedite the borrowers' business restructuring or support their business operations

(3) Loans in Arrears by 3 Months or More

Loans whose principal or interest is past due three months or more from the date following the contractually scheduled payment date and not classified as "Loans to Debtor in Legal Bankruptcy" or "Past Due Loans"

(4) Restructured Loans

Loans whose terms and conditions are modified in favor of the borrowers in order to expedite the borrowers' business restructuring or support their business operations by, among others, reducing the stated interest rate, deferring interest payments or write-downs, and that are not classified as "Loans to Debtor in Legal Bankruptcy," "Past Due Loans" and "Loans in Arrears by 3 Months or More"

(Unit: Millions of yen)

	March 2015 Reporting Period
Loans to Debtor in Legal Bankruptcy	—
Past Due Loans	68,325
Loans in Arrears by 3 Months or More	—
Restructured Loans	771,263
Total (1)	839,588
Balance of Loans Receivable (2)	11,291,805
(1)/(2)	7.44%

Note 2. Deferred principal included in loans as shown in the chart above accounts for ¥3,227 million of the Past Due Loans of ¥68,325 million, and for ¥701,234 million of the Restructured Loans of ¥771,263 million. Other deferred principal, accounting for a total of ¥274,763 million, are of loans that are not categorized as Risk Monitored Loans.

Note 3. Under the framework of the Ordinance for Enforcement of Banking Law 19, 2-1-5, which establishes the disclosure standards of risk-management loans held by private financial institutions, debt owed by foreign debtors must be disclosed as bankrupt debtor debt for all debtors fulfilling each of the following conditions: 1) nonpayment of interest or principal within the most recent previous three-year period from the end of the term; 2) no contract signed regarding the extension of the redemption deadline within the most recent previous three-year period from the end of the term; and 3) no specific plans to sign a contract regarding the extension of the redemption at the end of the term. In making disclosures based on the above, JICA, in line with its asset self-assessments and taking into consideration the international framework for cooperation, has classified the aforementioned foreign government debt as debt with bankruptcy concern, while in the disclosure of Risk Monitored Loans, this debt is included as "Past Due Loans."

2 Loan Assets Required to Be Disclosed under the Financial Revitalization Act ^(Note 4)

The below table shows the classification of loans based on the self-assessments of asset quality in accordance with the disclosure standard of the Financial Revitalization Act.

Each category of Loan Assets to be disclosed under the Financial Revitalization Act is defined as follows.

(1) Bankrupt or De Facto Bankrupt Assets

"Bankrupt or De Facto Bankrupt Assets" are loans and other credits to debtors who have begun proceedings under the Bankruptcy Act, the Corporate Reorganization Act, the Financial Revitalization Act and other similar laws of Japan and have financially failed. In the asset quality self-assessments, these loans are loans to debtors who are legally or substantially bankrupt.

(2) Doubtful Assets

"Doubtful Assets" are loans and other credits to debtors whose financial and operational conditions have deteriorated and who have a possibility that payment of principal and/or interest will not be made on a contractual basis. In the asset quality self-assessments, these loans are loans to the debtors who are likely to become bankrupt.

(3) Special Attention Assets

"Special Attention Assets" are loans to debtors who are categorized as "needs attention borrower" in the asset quality self-assessments, and

- (i) loans whose principal and/or interest is overdue for three months or more from the date following the scheduled payment date but which are not categorized as "Bankrupt or De Facto Bankrupt Assets" and "Doubtful Assets" ("Past due loans (three months or more)");
- (ii) restructured loans on which JICA granted concessions to borrowers in financial difficulties through amending terms and conditions of the loans to assist them to recover and eventually be able to pay to creditors, but which are not categorized as "Bankrupt or De Facto Bankrupt Assets", "Doubtful Assets" or "Overdue loans (three months or more)."

(4) Normally Performing Assets

"Normally Performing Assets" are loans to borrowers with no particular

*1 Based on JICA's self-assessments of assets, the difference between the debt exposure to bankrupt debtors and debtors in bankruptcy and the amount recognized as recoverable by means of collateral or guarantees is considered as the projected amount that cannot be collected on, and so is subtracted directly from the total debt exposure. As such, this figure is not included in the above chart under "Loans Payable" or "Loan-loss Reserve."

*2 Coverage amount refers to the combined total of the loan-loss reserve set aside for each debt and the value of collateral and guarantees, while the coverage ratio represents the ratio of the coverage amount as a percentage of total loans payable.

problem in their financial conditions, categorized in the asset quality self-assessments either as "loans to normal borrowers" or "loans to needs attention borrowers (excluding Special Attention Assets)," but which are not categorized as "Bankrupt or De Facto Bankrupt Assets," "Doubtful Assets" and "Special Attention Assets."
