Post Project Strategy Paper

The Project for Improvement of Road Maintenance

April 2016

Post Project Strategy Policy Paper

In order that healthy sustainability is maintained upon completion of the project at the end of November 2016, this post project strategy policy paper has been drafted for mutual discussions with MOT and JICA by the JICA Experts Team.

1. Proposed Goals for MOT in 2021

1.1 Pavement Inspection

- to be able to conduct pavement inspection in accordance with Pavement Inspection Manual for the entire international and republican roads in Tajikistan in a standardized manner.
- to maintain a database center in MOT for controlling all pavement inspection data within Tajikistan.

1.2 Pavement Repair

- to be able to conduct pavement repair in accordance with Pavement Repair Manual at 4 SETMs under which road maintenance machineries and equipment are handed over by JICA.
- to maintain a pavement repair data center in Gissar and Kurgan Tyube SETMs.

2. MOT Financial Prerequisites

MOT requires securing the following amount of fund for each concerned SETM for achieving goals in 2021.

Pavement Inspection

For the required IRI survey and visual inspection: 20,000 Somonis each SETM

Pavement Repair

For the required overlay of 5km of 7m width: 1,680,000 Somonis each SETM

Total for Both : 1,700,000 Somonis each SETM

In addition to the above, MOT requires securing the additional nominal amounts of fund as indicated in the attached Detailed Explanation Sheets.

3. Anticipated Strategy for Achieving Goals for MOT in 2021

2.1 Pavement Inspection

Strategy 1

Continuation of training led by master trainers for ensuring that pavement inspection procedures recommended under pavement inspection manual are maintained for Gissar, Kurgan Tyube, Sogd and Kulyab SETMs.

Strategy 2

Establishment of database center in MOT.

Strategy 3

Extension of technical transfer by master trainers for ensuring pavement inspection procedures recommended under pavement inspection manual are implemented by 2 remaining SETMs.

Strategy 4

Updating of pavement inspection manual by MOT

2.2 Pavement Repair

Strategy 1

Continuation of training led by Gissar and Kurgan Tyube SETMs for ensuring that pavement repair procedures recommended under pavement repair manual are adhered to for Gissar, Kurgan Tyube, Sogd and Kulyab SETMs. Each SETM aims at repairing roads at the pace of or more than 5km each year accordingly

Strategy 2

Establishment of pavement repair data center in Gissar and Kurgan Tyube SETM.

Strategy 3

Updating of pavement repair manual by MOT

2.3 Organizational Strengthening within MOT

Strategy 1

Strengthening of RCM to act as the database center for road maintenance in MOT.

Strategy 2

Development in future to transform RCM to database center for all road infrastructure assets and increase management capacity

Detailed explanation sheets indicating action in steps together with the associated time frame are attached.

This is a draft Post Project Strategy Policy for Discussion Purpose with MOT

No.	Post Project Strategy Items	Before 2013	2013	2014	2015	2016	2017	2018	2019	2020	2021	Remarks and notes
1	<p>Post Project Strategy Policy 1/3</p> <p>Pavement Inspection</p> <p>Strategy 1 Continuation of Training Led by Master Trainers for Ensuring that Pavement Inspection Procedures Recommended under Pavement Inspection Manual are Maintained for Gissar, Kurgan Tyube, Sogd and Kulyab SETMs</p> <p>It is anticipated that upon completion of the Project for Improvement of Road Maintenance (hereafter, the Project), both Gissar SETM and Kurgan Tyube SETM together with SEHMs under their umbrella will have acquired all necessary skills and knowledge required to conduct specified pavement inspection in accordance with the latest version of Pavement Inspection Manual, certified by the designated department under MOT.</p> <p>To perform such pavement inspection after the Project, master trainers and trainers certified under the Project will lead each SETM together with SEHMs under the SETM.</p> <p>It is also anticipated that basic training for pavement inspection will also have completed under the Project through training to be conducted by master trainers to trainees appointed in Sogd SETM and 3 SEHMs under its umbrella and in Kulyab SETM and 3 SEHMs under its umbrella. Necessary DRIMS equipment to both SETMs will be provided by JICA during the Project.</p> <p>As such, it is necessary that continuation of training must be provided by master trainers to trainees in both Sogd and Kulyab SETMs in 2017 so that additional skills and knowledge such as minimization of errors both on site and during use of computers is understood.</p> <p>If the above is successful, it is anticipated that both Sogd and Kulyab SETMs will be able to perform on its own pavement inspection from 2018.</p> <p>Strategy 2 Establishment of Database Center in MOT</p> <p>Since the Project Purpose and the Overall Goal of the Project has been revised to cater for expanding the target group to Sogd and Kulyab SETMs, the Project attempts to provide technical transfer to appointed personnels of Main Department of Road Construction and Maintenance (hereafter RCM) before completion of the Project so that mechanisms of pavement inspection including IRI measurement using DRIMS equipment is well understood by such personnels.</p> <p>The above is taken under the project so that all information collected by 4 SETMs will be stored in a computer in RCM to act as the basic database for pavement inspection in Tajikistan.</p> <p>MOT will require to allocate a budget so that the system is maintained even after the completion of the Project and database is updated as the time comes by JICA Experts Team will support during the Project to assess the financial implications.</p> <p>Strategy 3 Extension of Technical Transfer by Master Trainers for Ensuring Pavement Inspection Procedures Recommended under Pavement Inspection Manual are Implemented by 2 Remaining SETMs.</p> <p>Although an attempt will be made during the Project so that recommendations are transferred to 2 remaining SETMs, it is likely that further workshops and on site training will be required for engineers and managers in these 2 remaining SETMs after 2017.</p> <p>MOT will require to allocate a budget so that the technical transfer is continued after the completion of the Project. JICA Experts Team will support during the Project to assess the financial implications.</p> <p>Strategy 4 Updating of Pavement Inspection Manual by MOT</p> <p>It is recommended that a cycle of 5 years as the basic time for updating information indicated in Pavement Inspection Guideline.</p>											<p>JICA Road Maintenance Project</p> <p>Post Project Period</p> <p>→ Action by Gissar and KT SETM by master trainers, trainers and technical staff.</p> <p>→ Action by Sogd and Kulyab SETM by master trainers, trainers and technical staff.</p> <p>→ Action by RCM</p> <p>■ Budget allocation or action by MOT</p> <p>■ Decision making by MOT</p> <p>■ Road maintenance machineries handover from JICA to Sogd and Kulyab SETM</p>

This is a draft Post Project Strategy Policy for Discussion Purpose with MOT

No.	Post Project Strategy Items	Before 2013	2013	2014	2015	2016	2017	2018	2019	2020	2021	Remarks and notes
2	<p>Post Project Strategy Policy 2/3</p> <p>Pavement Repair</p> <p>Strategy 1 Continuation of Training Led by Gissar and Kurgan Tyube SETMs for Ensuring Pavement Repair Procedures Recommended under Pavement Repair Manual are adhered to for Gissar, Kurgan Tyube Sogd and Kulyab SETMs</p> <p>It is anticipated that upon completion of the Project both Gissar SETM and Kurgan Tyube SETM together with SEHMs under their umbrella will have acquired minimal satisfactory skills and knowledge required to conduct pavement repair in accordance with the latest version of Pavement Repair Manual, certified by the designated department under MOT.</p> <p>To continue improving such pavement repair after the Project, both Gissar and Kurgan Tyube SETMs must always stick to the basic element of pavement repair. This is to understand the repair required, prepare method statement plans to ensure that all perspectives of repair have been considered using the Pavement Repair Manual and perform repair as outlined in the Manual. If some requirements have not been acquired on the repair day, the engineer in charge will be required either to meet all requirements or cancel/postpone the repair.</p> <p>It is also anticipated that Pilot Project #2 will be observed by trainees appointed by Sogd SETM and 3 SEHMs under its umbrella and Kulyab SETM and 3 SEHMs under its umbrella during the Project.</p> <p>MOT will require to allocate a budget so that a repeat workshop training is conducted in both late 2017 and middle of 2018 by trainers to be certified under the Project so that both SETMs are trained on skills and knowledge required upon receiving road maintenance machineries and equipment to be provided by JICA.</p> <p>JICA Experts Team will support during the Project to assess the financial implications.</p> <p>If the above training is successful, it is anticipated that both Sogd and Kulyab SETMs will be able to perform pavement repair from 2018 with support from pavement repair trainers.</p> <p>Strategy 2 Establishment of Pavement Repair Data Center in Gissar and Kurgan Tyube SETMs</p> <p>Since the Project Purpose and the Overall Goal of the Project has been revised to cater for expanding the target group to Sogd and Kulyab SETMs, the Project attempts to recommend an idea of establishing a pavement repair data center in both SETMs and appointing a manager who will be responsible for keeping all of pavement repair update with cooperation of all SEHMs under it umbrella.</p> <p>The above is taken under the Project so that all information collected by each SETM will be stored in a computer in each SETM to act as the basic database for pavement repair in each region. RCM will not be involved at this stage.</p> <p>This data center will continue even after both Sogd and Kulyab SETM commence pavement repair using machineries provided by JICA in 2018.</p> <p>MOT will require to allocate a budget so that the training is conducted in 2018 towards Sogd and Kulyab SETM.</p> <p>Strategy 3 Updating of Pavement Repair Manual by MOT</p> <p>It is recommended that a cycle of 5 years as the basic time for updating information indicated in Pavement Repair Guideline.</p>											<p>JICA Road Maintenance Project</p> <p>Post Project Period</p> <p>→ Action by Gissar and KT SETM by master trainers, trainers and technical staff.</p> <p>→ Action by Sogd and Kulyab SETM by master trainers, trainers and technical staff.</p> <p>→ Action by RCM</p> <p>■ Budget allocation or action by MOT</p> <p>■ Decision making by MOT</p> <p>■ Road maintenance machineries handover from JICA to Sogd and Kulyab SETM</p>

This is a draft Post Project Strategy Policy for Discussion Purpose with MOT

No.	Post Project Strategy Items	Before 2013	2013	2014	2015	2016	2017	2018	2019	2020	2021	Remarks and notes
3	<p>Post Project Strategy Policy 3/3</p> <p>Organizational Strengthening within MOT</p> <p>Strategy 1 Strengthening of RCM to act as the database center for road maintenance in MOT</p> <p>As outlined in 1.2, the role of RCM will become increasingly important as MOT is readying for the new era of IT based management for road maintenance.</p> <p>It is anticipated that by having the Project Purpose amended to expand the target group and as this is found most beneficial to MOT, RCM will be offered a technical transfer under the Project to be able to secure and maintain pavement inspection data for 4 SETMs from 2017.</p> <p>For pavement repair, it is anticipated that it would be premature to appoint RCM as the database center for such works at the end of the Project. This role will be undertaken by Gissar SETM and Kurgan Tyube SETM until both Sogd SETM and Kulyab SETM receives road maintenance machineries from JICA in 2018.</p> <p>It is recommended that MOT prepares a plan backed up by an adequate budget in 2017 and 2018 to strengthen staffing of RCM so that the data for pavement repair for 4 SETMs will be managed by RCM.</p> <p>Strategy 2 Development in future to transform RCM to database center for all road infrastructure assets and increase management capacity</p> <p>In line with 3.1 above, it is recommended that MOT seriously study transformation of RCM to become the database center for all road infrastructure assets owned by MOT including roads, bridges, tunnels, road maintenance machineries/equipment as well as road disaster statistics so that a comprehensive masterplanning of road maintenance is under a single roof.</p> <p>Necessary decision making will be required by MOT on this subject.</p>											<p>JICA Road Maintenance Project</p> <p>Post Project Period</p> <p>→ Action by Gissar and KT SETM by master trainers, trainers and technical staff.</p> <p>→ Action by Sogd and Kulyab SETM by master trainers, trainers and technical staff.</p> <p>→ Action by RCM</p> <p>By RCM</p> <p>By trainers and technical staff from Gissar and KT SETM</p> <p>Decision making by MOT</p> <p>Transformation of RCM as a database center for all road infrastructure assets</p> <p>Decision making by MOT</p> <p>■ Budget allocation or action by MOT</p> <p>■ Decision making by MOT</p> <p>■ Road maintenance machineries handover from JICA to Sogd and Kulyab SETM</p>

7th JCC Meeting

Minutes of Meeting dated 22 November 2016

**JAPAN INTERNATIONAL COOPERATION AGENCY (JICA)
MINISTRY OF TRANSPORT (MOT)**

**MINUTES OF MEETING
FOR THE
7th JOINT COORDINATING COMMITTEE MEETING
FOR
THE PROJECT FOR IMPROVEMENT OF ROAD MAINTENANCE
THE REPUBLIC OF TAJIKISTAN**

22nd of November 2016

Dushanbe, Tajikistan

The Seventh Joint Coordinating Committee (hereinafter referred to as “JCC”) meeting on the Project for Improvement of Road Maintenance (hereinafter referred to as “the Project”) was held on the 22nd of November, 2016 at the Ministry of Transport (hereinafter referred to as MOT) to confirm progress and achievement made from the start of the Project in October 2013 to the end of the Project including the results of all verifiable indicators and the Post Project Strategy Paper. As a result of the meeting, the JCC members mutually agreed on the matters mentioned in Attachment 1.

Mr. Ganjalzoda Sherali
Acting Chairman,
Joint Coordination Committee
The Minister of Transport

Mr. Kiyoshi Ishii
Vice Chairman,
Joint Coordination Committee
Resident Representative,
JICA Tajikistan Office

ATTACHMENT 1: DETAILS OF MEETING

1. The JCC Meeting commenced at 9:40 AM with an introduction of participating members by Mr. Yatimov Olim, Project Manager.
2. Acting chairman, Your Excellency Mr. Ganjalzoda Sherali, the Minister of Transport, made an opening speech. Acting Chairman thanked the Japanese side for their assistance for support of transport sector in the Republic of Tajikistan. He also thanked that the Project enabled training of the staff from Gissar, Kurgan Tyube, Sogd and Kulyab regions in the field of pavement inspection and pavement repair.
3. Resident Representative of JICA Mr. Kiyoshi Ishii and Vice Chairman of JCC explained about the uniqueness of the technical cooperation scheme under JICA, and that this Project was the first technical cooperation project in the transport sector implemented by JICA Tajikistan office. He then confirmed the objective of the 7th JCC Meeting as well as the project goal. He also asked the Acting Chairman, the Minister of Transport to consider retaining the project office currently occupied by the JICA Experts Team (hereinafter referred to as the Experts) for use under the planned new technical cooperation project.
4. The Chief Advisor of the Experts Mr. Hiroshi Mita conducted presentations regarding the activities for the past 6 months as well as the activities conducted from the beginning of the Project to present the outcome of all verifiable indicators under PDM Version 3 using PowerPoint presentation slides. He also presented 2 minor changes made on the Post Project Strategy Paper which was originally presented on 24 May 2016 under the 6th JCC meeting. At that time, the paper was agreed by all JCC members for basic acceptance. He requested this time for full acceptance informing the members that this was the request jointly agreed by the Experts and Road Construction and Maintenance Department of MOT. Two changes were 1) the change in MOT financial prerequisites and 2) consideration for pavement repair on local roads. He explained that the second change would require minor changes to PDM and hence, introduction of Version 4 of PDM.
5. Representatives of the Counterparts from Gissar SETM, Kurgan Tyube SETM presented their comments on how the Project contributed deeply in improving their day to day operation for pavement inspection and repair.

6. Acting Chairman made the following comments on the results of the Project;
 - 1) Acting chairman praised the Experts and the Counterparts for publication of Pavement Inspection Guideline and Pavement Repair Guideline, which would be most useful for SETM and SEHM engineers on site.
 - 2) For necessary funding required for proper road maintenance as estimated by the Experts of 1,518,000 Somonis per year per each SETM, Acting Chairman confirmed that MOT will try its best to allocate such funds in future.
7. All members reconfirmed the following two topics presented by the Chief Advisor as outlined in 5 above.

The 2 changes requested for the Post Project Strategy Paper (Attachment PP-1):

All JCC members approved adopting the Post Project Strategy Paper in Attachment PP-1.

Version 4 of PDM (Attachment PP-2)

All JCC members approved adopting the Version 4 of PDM in Attachment PP-2.

8. To end the meeting and on behalf of the Tajikistan Side, Acting Chairman reaffirmed that the results of the Project would contribute to the development of transport sector in Tajikistan. He also assured that MOT would always closely cooperate with JICA. Furthermore, he stated that MOT would retain the project office currently occupied by the Experts for use under the planned new JICA technical cooperation project.
9. In return and on behalf of the Japanese side and as the Vice Chairman, Mr. Kiyoshi Ishii of JICA Tajikistan Office concluded that the Project achieved significant improvement in both pavement inspection and pavement repair and thanked MOT for full cooperation. He also thanked MOT for assuring the use of the current project office for further use under the planned new JICA technical cooperation project.

The meeting ended at 11:20 PM.

ATTACHMENT 6: Meeting Photos

ATTACHMENT 4: Post Project Strategy Paper (Attachment PP-1)

The Project for Improvement of Road Maintenance

November 2016

This is the revised version based on the change made to Pavement Inspection Guideline 2016.

Post Project Strategy Policy Paper

In order that healthy sustainability is maintained upon completion of the project at the end of November 2016, this post project strategy policy paper has been agreed by MOT and JICA Experts Team. This paper is in line with PDM Version 4.

1. Proposed Goals for MOT in 2021

1.1 Pavement Inspection

- to be able to conduct pavement inspection in accordance with Pavement Inspection Manual for the entire international and republican roads in Tajikistan in a standardized manner.
- to maintain a database center in MOT for controlling all pavement inspection data within Tajikistan.

1.2 Pavement Repair

- to be able to conduct pavement repair in accordance with Pavement Repair Manual at 4 SETMs under which road maintenance machineries and equipment are handed over by JICA.
- to maintain a pavement repair data center in Gissar and Kurgan Tyube SETMs.

2. MOT Financial Prerequisites

MOT requires securing the following amount of fund for each concerned SETM for achieving goals in 2021.

Pavement Inspection

For the required IRI survey and visual inspection: 20,000 Somonis each SETM

Pavement Repair

For the required overlay of 5km of 7m width: 1,498,000 Somonis each SETM

Total for Both : 1,518,000 Somonis each SETM

In addition to the above, MOT requires securing the additional nominal amounts of fund as indicated in the attached Detailed Explanation Sheets.

3. Anticipated Strategy for Achieving Goals for MOT in 2021

2.1 Pavement Inspection

Strategy 1

Continuation of training led by master trainers for ensuring that pavement inspection procedures recommended under pavement inspection manual are maintained for Gissar, Kurgan Tyube, Sogd and Kulyab SETMs.

Strategy 2

Establishment of database center in MOT.

Strategy 3

Extension of technical transfer by master trainers for ensuring pavement inspection procedures recommended under pavement inspection manual are implemented by 2 remaining SETMs.

Strategy 4

Updating of pavement inspection manual by MOT

2.2 Pavement Repair

Strategy 1

Continuation of training led by Gissar and Kurgan Tyube SETMs for ensuring that pavement repair procedures recommended under pavement repair manual are adhered to for Gissar, Kurgan Tyube, Sogd and Kulyab SETMs. Each SETM aims at repairing roads at the pace of or more than 5km each year accordingly

Strategy 2

Establishment of pavement repair data center in Gissar and Kurgan Tyube SETM.

Strategy 3

Updating of pavement repair manual by MOT

2.3 Organizational Strengthening within MOT

Strategy 1

Strengthening of RCM to act as the database center for road maintenance in MOT.

Strategy 2

Development in future to transform RCM to database center for all road infrastructure assets and increase management capacity

Detailed explanation sheets indicating action in steps together with the associated time frame are attached.

ATTACHMENT 5: Version 4 PDM dated 22 November 2016 (Attachment PP-2)

LOGICAL FRAMEWORK (PROJECT DESIGN MATRIX: PDM) 4

PROJECT TITLE: Project for Improvement of Road Maintenance	DURATION: Originally 31 months from Oct 2013 to May 2016, Extended for 6 months to November 2016	PDM Ver.4
TARGET GROUP: 22 SEHM ^{*1} s and 2 SETMs ^{*2} in Gissar and Kurgan – Tyube and Ministry of Transport (MOT) (original target group), 6 SEHMs and 2 SETMs in Sogd and Kulyab (additional target group in the extended period)	TARGET AREA: International & Republican roads in Gissar and Kurgan-Tyube (original target area) and in Sogd and Kulyab (additional target area)	DATE: 22-Nov.-2016

^{*1}SEHM: State Enterprise on Highway Management, ^{*2} SETM: State Enterprise of Transport Management

Narrative Summary	Objectively Verifiable Indicators	Means of Verification	Important Assumptions
Overall Goal Pavement condition of the roads in Tajikistan is improved.	1. By the end of 2019, at least 30 km and 15 km of lengths of road repairing is implemented by hot-mix asphalt by the original and additional target groups respectively at International, Republican and Local roads according to the Road Repairing Guidelines 2. The average Road Repair Index (RRI) of roads repaired under 1 above in the original target area has a reduction of at least 60% compared to the same before repairing 3. The average IRI of the roads repaired under 1 above in the additional target area has a reduction of at least 50 % compared to the same before repairing	1. Road maintenance record sheet of each SETM (monthly and yearly) 2. 2&3 Form 1 of Road Inspection Guideline Final Version	
Project Purpose	1. At least 90% of the results of roughness survey at original target 22	1. & 2 Road Inspection	-Current

<p>Implementation capacity for road maintenance is improved.</p>	<p>SEHMs, using the revised Guidelines is assessed accurate by the JICA experts by the end of the Project</p> <ol style="list-style-type: none"> 2. At least 80% of visual inspection results by original target 22 SEHMs, using the revised Guidelines is assessed accurate by the JICA experts by the end of the Project 3. At least 80% of results of the road repairing works #2 by three fourths of original target SEHMS, planned based on the results of the road inspection and implemented according to the revised Guidelines, meet requirements of time, cost, quality, and safety specified in the plans 4. Road Inspection and Repairing Guidelines for SETM/SEHM revised through the Project are approved by MOT by the end of the Project 	<p>Record and its assessment summary</p> <ol style="list-style-type: none"> 3. Repairing record and its assessment summary 4. Subject: Hand over VIMS equipment's for measurement of International
Roughness Index (IRI)

Dear Sir,

Please kindly be informed you that we planned to hand over VIMS equipment
for measurement of International Roughness Index (IRI) in Gissar SETM and
Kurgan-Tyube SETM.

Due to this, we kindly please your promotion and support on the above
mentioned subject.

We look forward for your continuous cooperation and support.

Very truly yours,

For  (TAKASHI NAKAJIMA)

Исх. No.: JICA-CTI November 14

14 November, 2016

To: Ministry of transport
of the Republic of Tajikistan

Reference: The Project for Improvement of Road Maintenance

Subject: Hand over DRIMS Case under the framework of the
Project for Improvement of Road Maintenance

Dear Sir,

The Experts Team is pleased to inform your good selves that the team will provide DRIMS equipment case as mentioned below.
The DRIMS equipment case will be handed over based on the ID of DRIMS Equipment such as Case ID 01, 02 for Gissar SETM and Case ID 03, 04 for Kurgan-tyube SETM.

ID	Item	SETM	Piece	Production year	Unit price USD	Total USD
01,02	DRIMS Case	Gissar	2	2016	530	1060
03,04	DRIMS Case	Kurgan-tyube	2	2016	530	1060

Provision is based on understanding that such supply will be effective for the long lasting use of equipment.

Very truly yours,

Hiroshi MITA
Chief Advisor, JICA Experts Team

Subject: Hand over and Installation of JICA Supplied laboratory equipment
for Quality Control

Dear Sir,

Please kindly be informed that on the 16th of June, 2015 we have successfully handed over JICA supplied laboratory equipment to Gissar and Kurgan-Tyube regions for quality control.

The installation of laboratory equipment for Quality Control was done on the 22nd of June, 2015 in Gissar region in Vahdat laboratory and on the 15th of July, 2015 was successfully installed and checked by connecting in power in Kurgan-Tyube region in Jilikul laboratory.

We look forward for your continuous cooperation and support.

Very truly yours,

For 小川 淳一郎

Mr. Hirosii MITA
Chief Adviser, JICA Project Team

The Project for Improvement of Road Maintenance

Исх. No.: JICA-CTI November 28

28 November, 2016

**To: Ministry of Transport
of the Republic of Tajikistan**

Reference: The Project for Improvement of Road Maintenance

**Subject: Hand over printer Canon 2520i
under the framework of the Project for Improvement of Road Maintenance**

Dear Sir,

The Experts Team is pleased to inform your good selves that due to completion of the Project for Improvement of Road Maintenance printer Canon 2520i will be handed over to Ministry of Transport.

Current printer Canon 2520i was used during realization of the Project for Improvement of Road Maintenance.

Very truly yours,

A handwritten signature in black ink, appearing to read 'Hiroshi Mita' in a cursive style.

Hiroshi MITA
Chief Advisor, JICA Experts Team
