(Intentionally Blank)

Appendix 13.1 JICA Environmental Checklist

(Intentionally Blank)

JICA Environmental Checklist

Category	Environmental Item	Main Check Items	Yes: Y No: N	Confirmation of Environmental Considerations (Reasons, Mitigation Measures)
1 Permits and Explanation	(1) EIA and Environmental Permits	(a) Have EIA reports been already prepared in official process? (b) Have EIA reports been approved by authorities of the host country's government? (c) Have EIA reports been unconditionally approved? If conditions are imposed on the approval of EIA reports, are the conditions satisfied? (d) In addition to the above approvals, have other required environmental permits been obtained from the appropriate regulatory authorities of the host country's government?	(a) Y (b) N (c) TBC (d) N	(a) IEE Report and EIA TOR were submitted to Department of Environment (DOE). DOE approved them on 8th Sep, 2016. Based on the DOE approved TOR, a draft EIA report has been prepared in December 2016; and has been submitted to DOE. The draft EIA is now being updated and final EIA is expected to be submitted by early March. (b) Approval of EIA report will be requested from DOE after draft EIA report is updated. (c) To be confirmed later (d) "No Objection Certificate" will be obtained from relevant local authority and Department of Forest.
	(2) Explanation to the Local Stakeholders	(a) Have contents of the project and the potential impacts been adequately explained to the Local stakeholders based on appropriate procedures, including information disclosure? Is understanding obtained from the Local stakeholders? (b) Have the comment from the stakeholders (such as local residents) been reflected to the project design?	(a) Y (b) Y	(a) Public consultation meeting and information disclosure meeting are conducted during EIA preparation between November 2016 and January 2017. (b) One comment from the stakeholders regarding water logging has been investigated in the EIA preparation and will be addressed in the Project.
	(3) Examination of Alternatives	(a) Have alternative plans of the project been examined with social and environmental considerations?	(a) Y	(a) Various alternative plans including scope, extent, phaseing, location, construction method, etc. have been examined in EIA. Also a "no project' situation has been examined.
2 Pollution Control	(1) Air Quality	(a) Is there a possibility that air pollutants emitted from the project related sources, such as airplanes will affect ambient air quality? Does ambient air quality comply with the country's air quality standards? Are any mitigating measures taken? (b)If the air pollution situation already exceeds the environmental standards near airports and incidental facilities and then the project will detoriorate the air quality, is the countermeasures of air quality taken?	(a) Y (b) N	(a) The current air quality (such as NOx or SOx) in project site is lower than other monitoring point in Dhaka. That means the influence of construction activity and aircraft emission is limited and there will be less possibility to exceeding the criteria of ambient air quality. And on particulate matter (PM10 and PM2.5), it is predicted that the impact from aircraft is small. (b)This project is not expected to deteriorate air quality.
	(2) Water Quality	(a) Do pollutants, such as Suspended Solids (SS), and oils contained in effluents comply with the country's effluent standards (BOD, COD etc)? Is there a possibility that the effluents from the project will cause areas not to comply with the country's ambient water quality standards?	(a) N	(a) The appropriate wastewater treatment plant will be installed complying with national effluent standard, so there will be no risk of pollution during operation stage. Oil seperator will be installed at fuel farm to prevent oil entering into wastewater. During construction period, proper disposal of watewater is responsibility of contractor and that will be ensured by appropriate clauses in the bidding document, for example, treatment for Suspended Solid, septic tank for sewerage, etc.
	(3) Wastes	(a) Are wastes generated from the airports and other project facilities properly treated and disposed of in accordance with the country's regulations?	(a) Y	(a) During construction period, proper disposal of solid waste is responsibility of contractor and that will be ensured by appropriate clauses in the bidding document, for example, separation of waste based on category, storage and disposal based on category, inventory control, etc. During operation stage, CAAB will be responsible to collect and dispose all internally generated solid waste according to Airport Maintenance Manual.
	(4) Noise and Vibration	(a) Does noise from aircraft comply with the country's standards?	(a) Y (b) N	(a) Airport operation is exempted from country's noise regulation. However, updated EIA will compare the aircraft noise with Japanese standard. During construction period, proper noise management is responsibility of contractor and that will be

Category	Environmental Item	Main Check Items	Yes: Y No: N	Confirmation of Environmental Considerations (Reasons, Mitigation Measures)
		(b) Is there a possibility that noise and vibrations from various sources, such as airport users vehicles and vehicles for airport operations will adversely affect ambient noise levels? If impacts are anticipated, are adequate noise mitigation measures considered?		ensured by appropriate clauses in the bidding document, for example, periodic maintenance of construction machinary, noise barrier, etc. (b) Not likely.
	(5) Soil Contamination	(a) Has the soil in the project site been contaminated in the past? Are adequate measures taken to prevent soil contamination by leakage of fuels?	(a)Y	(a) According to the result of the soil quality analysis, there are contaminated soil by lead (Pb) in the project site. During construction period, proper management is responsibility of contractor and that will be ensured by appropriate clauses in the bidding document, for example, contaminated soil will be kept isolated from clean soil, and deposited separately. During operation, soil contamination may happen due to fuel leak, but that will be minimaized by appropriate measures, for example, oil seperator at fuel farm and drainage system.
	(6) Subsidence	(a) In the case of extraction of a large volume of groundwater, is there a possibility that the extraction of groundwater will cause subsidence?	(a) N	(a) Soil improvement will be conducted by the Project for reclamation of large ponds with soft soil layers in order to prevent unequal settlement of pavements and to avoid damages by liquifaction during the event of earthquake.
	(7) Odor	(a) Are there any odor sources? Are adequate odor control measures taken?	(a) N	(a) Not likely.
3 Natural Environment	(1) Protected Areas	(a) Is the project site located in protected areas designated by the country's laws or international treaties and conventions? Is there a possibility that the project will affect the protected areas?	(a) N	(a) Project Site is not located within any protected area.
	(2) Ecosystem	(a) Does the project site encompass primeval forests, tropical rain forests, ecologically valuable habitats (e.g., coral reefs, mangroves, or tidal flats)? (b) Does the project site encompass the protected habitats of endangered species designated by the country's laws or international treaties and conventions? (c) If significant ecological impacts are anticipated, are adequate protection measures taken to reduce the impacts on the ecosystem? (d) Is there a possibility that the amount of water (e.g., surface water, groundwater) used by the project will adversely affect aquatic environments, such as rivers? Are adequate measures taken to reduce the impacts on aquatic environments, such as aquatic organisms?	(a) N (b) N (c) N (d) N	(a) No. (b) No. (c) No. (d) No.
	(3) Hydrology	(a) Is there any possibility that alteration of drainage system due to the constructions of airports and related facilities will adversely affect surface water and groundwater flows? (b) Do the facilities affect adversely flow regimes, waves, tides, currents of rivers and etc if the project facilities are constructed on/by the seas?	(a) N (b) N/A	(a) The airport construction will significantly increase the paved surface and reclaim large ponds that works as regulation ponds of storm water. The Project include the construction of new regulation ponds to store increased run off from the paved area and to compensate the reclaimed regulation ponds. (b) Not applicable
	(4) Topography and Geology	(a) Does the project require the large scale change of topographic/geographic features? (b) Is there a possibility that civil works, such as cutting and filling will cause slope failures or landslides? Are	(a) N (b) N (c) N (d) N/A	(a) No. (b) No.

Category	Environmental Item	Main Check Items	Yes: Y No: N	Confirmation of Environmental Considerations (Reasons, Mitigation Measures)
		adequate measures considered to prevent slope failures or landslides? (c) Is there a possibility that soil runoff will result from cut and fill areas, waste soil disposal sites, and borrow sites? Are adequate measures taken to prevent soil runoff? (d) In the case of offshore projects, is there any possibility that the project will erode natural beaches?		(c) Not likely during operation. During construction period, proper management is responsibility of contractor and that will be ensured by appropriate clauses in the bidding document, for example, protective measures for steep slope. (d) No.
4 Social Environment	(1) Resettlement	(a) Is involuntary resettlement caused by project implementation? If involuntary resettlement is caused, are efforts made to minimize the impacts caused by the resettlement? (b) Is adequate explanation on compensation and resettlement assistance given to affected people prior to resettlement? (c) Is the resettlement plan, including compensation with full replacement costs, restoration of livelihoods and living standards developed based on socioeconomic studies on resettlement? (d) Are the compensations going to be paid prior to the resettlement? (e) Are the compensation policies prepared in document? (f) Does the resettlement plan pay particular attention to vulnerable groups or people, including women, children, the elderly, people below the poverty line, ethnic minorities, and indigenous peoples? (g) Are agreements with the affected people obtained prior to resettlement? (h) Is the organizational framework established to properly implement resettlement? Are the capacity and budget secured to implement the plan? (i) Are any plans developed to monitor the impacts of resettlement? (j) Is the grievance redress mechanism established?	(a) N (b) N/A (c) N/A (d)N/A (e) N/A (f) N/A (g) N/A (h) N/A (i) N/A (j) N/A	(a) No. (b) Not applicable (c) Not applicable (d) Not applicable (e) Not applicable (f) Not applicable (g) Not applicable (h) Not applicable (i) Not applicable (j) Not applicable
	(2) Living and Livelihood	(a) Is there any possibility that the project will adversely affect the living conditions of inhabitants? Are adequate measures considered to reduce the impacts, if necessary? (b) Is there any possibility that the project causes the change of land uses in the neighboring areas to affect adversely livelihood of local people? (c) Is there any possibility that diseases, including infectious diseases, such as HIV will be brought due to immigration of workers associated with the project? Are adequate considerations given to public health, if necessary?	(a) N/A (b) N (c) Y (d) Y (e) N	(a), (b) Basically this project will be executed in airport area without land acquisition. Therefore, there are no impacts on the living conditions of inhabitants. (c) Workers will increase during construction. When the detailed plan is considered, adequate mitigation measures should be prepared for the risk of diseases. There will be a clause on HIV/AIDS prevention measures. (d) New access road is included in this project. Also, hauling road to construction site will be secured. (e) The projects have no impacts on sunshading and radio interference.

Category	Environmental Item	Main Check Items	Yes: Y No: N	Confirmation of Environmental Considerations (Reasons, Mitigation Measures)
		(d) Is sufficient infrastructure (e.g., roads) available for the project implementation? If the existing infrastructure is insufficient, is a plan developed to construct new infrastructure or improve the existing infrastructure? (e) Is there any possibility that the airports and other project structures will cause a sun shading and radio interference?		
	(3) Heritage	(a) Is there a possibility that the project will damage the local archeological, historical, cultural, and religious heritage? Are adequate measures considered to protect these sites in accordance with the country's laws?	(a) N	(a) No
	(4) Landscape	(a) Is there a possibility that the project will adversely affect the local landscape? Are necessary measures taken?	(a) N	(a) No
	(5) Ethnic Minorities and Indigenous Peoples	(a) Are considerations given to reduce impacts on the culture and lifestyle of ethnic minorities and indigenous peoples? (b) Are all of the rights of ethnic minorities and indigenous peoples in relation to land and resources respected?	(a) N/A (b) N/A	(a), (b) Basically this project will be executed in airport area without land acquisition. Therefore, the projects have no impacts on the culture and lifestyle of ethnic minorities and indigenous peoples.
	(6) Working Conditions	(a) Is the project proponent not violating any laws and ordinances associated with the working conditions of the country which the project proponent should observe in the project? (b) Are tangible safety considerations in place for individuals involved in the project, such as the installation of safety equipment which prevents industrial accidents, and management of hazardous materials? (c) Are intangible measures being planned and implemented for individuals involved in the project, such as the establishment of a safety and health program, and safety training (including traffic safety and public health) for workers etc.? (d) Are appropriate measures taken to ensure that security guards involved in the project not to violate safety of other individuals involved, or local residents?	(a) N (b) Y (c) Y (d) Y	(a) No (b) Included in EIA (e.g. Using Personal Protective Equipment (PPE), hearing protection for workers on demolition of concrete). Also, JICA construction safety guidelines will be included in the Contractor's bid document. (c) Mentioned in EIA, will be included in contractor's bid document as Environmental Construction Specification (ECS) and Occupational Health and Safety (OHS) Manual. Also, JICA construction safety guidelines will be included in the Contractor's bid document. (d) Will be included in contractor's bid document as Contractor's responsibility.
5 Others	(1) Impacts during Construction	(a) Are adequate measures considered to reduce impacts during construction (e.g., noise, vibrations, turbid water, dust, exhaust gases, and wastes)? (b) If construction activities adversely affect the natural environment (ecosystem), are adequate measures considered to reduce impacts? (c) If construction activities adversely affect the social environment, are adequate measures considered to reduce impacts?	(a) Y (b) Y (c) Y	(a) Environmental mitigation measures during construction were studied and draft EMP has already prepared. After this, these measures and plan will be modified corresponding with final EIA study. (b) Not likely to have such impact (c) Not likely to have such impact

Category	Environmental Item	Main Check Items	Yes: Y No: N	Confirmation of Environmental Considerations (Reasons, Mitigation Measures)
	(2) Monitoring	(a) Does the proponent develop and implement monitoring program for the environmental items that are considered to have potential impacts? (b) What are the items, methods and frequencies of the monitoring program? (c) Does the proponent establish an adequate monitoring framework (organization, personnel, equipment, and adequate budget to sustain the monitoring framework)? (d) Are any regulatory requirements pertaining to the monitoring report system identified, such as the format and frequency of reports from the proponent to the regulatory authorities?	(a) Y (b) Y (c) Y (d) Y	Draft environmental monitoring plan has already prepared. After this these measures and plan will be modified corresponding with final EIA study. The items, methods, frequency and framework of monitoring are described in draft EMoF.
6 Note	Reference to Checklist of Other Sectors	(a) Where necessary, pertinent items described in the Roads, Railways, and Bridges checklist should also be checked (e.g., projects including large areas of deforestation). (b) If the airport is constructed on the sea, pertinent items described in the Ports and Harbors checklist should also be checked (e.g., projects including installation of power transmission lines and/or electric distribution facilities). (c) Where necessary, pertinent items described in the Forestry Projects checklist should also be checked (e.g., projects including large areas of deforestation).	(a) N/A (b) N/A (c) N/A	Not applicable
	Note on Using Environmental Checklist	(a) If necessary, the impacts to transboundary or global issues should be confirmed, if necessary (e.g., the project includes factors that may cause problems, such as transboundary waste treatment, acid rain, destruction of the ozone layer, or global warming).	(a) N	(a)It is expected that the impact of these issues is small.

Appendix 13.2 Environmental Management Plan

(Intentionally Blank)

Environmental Management Plan

Parameter	Mitigation Measures	Responsible for Implementation	Responsible for Monitoring	Parameters to be Monitored	Frequency of Monitoring	Guidelines/ Standards
Planning Phase						
Updating of safeguard documents	- IEE/ EMP will be updated at the time of detailed design and will be revised by the DSC team if needed.	DSC with input from the contractor	PIU	Updated IEE/EMP	---	JICA Environment Guideline, 2010 ECR 1997
Capacity Building	- Develop and submit for approval a capacity building and training program to to achieve the expected standards.	Contractors	DSC PIU	Capacity building and training program	---	All applicable laws and regulations
Work schedule	- Ensure careful planning and scheduling of the activities (CEMP).	Contractors	DSC PIU	Plan and schedules	Prior to start of construction	EIA report All applicable laws and regulations
Traffic Management Plan	- Prepare a traffic management plan and road safety plan.	Contractors	DSC PIU	Plan and schedules	Prior to start of construction	EIA report All applicable laws and regulations
Barricades and warning signs	- Use easily transportable barricades and warning signs such as those made of high reflector plastic materials. - Also use aluminized rolled warning signs to warn the public.	Contractors	DSC PIU	Lists and samples of warning signs and barricades	Prior to start of construction	Detailed design documents
Workers	- Employ workers with adequate experience, training, and know-how.	Contractors	DSC PIU	Workers list (for internal monitoring)	Prior to start of construction	Detailed Design documents
Legislation, permits, and agreements	- In all instances, CAAB, contractors and consultants must remain in compliance with relevant local and	PIU Contractor	DSC PIU	All applicable permits and approvals	Prior to start of civil works and as necessary	Ensure location clearance and ECC from DOE as per guidance provided in ECR 1997 is obtained

Parameter	Mitigation Measures	Responsible for Implementation	Responsible for Monitoring	Parameters to be Monitored	Frequency of Monitoring	Guidelines/ Standards
	national legislation. - A copy of the EIA must be kept on-site and disclosed in CAAB websites.					
Access to site	- Access to site will be via existing roads. The contractor will need to ascertain the existing condition of the roads and repair damage due to construction.	Contractor	DSC PIU	Traffic management plan Road condition	Prior to start of construction	Minimal traffic disturbance
Setting up of construction camp	Finding Suitable location as approved by the concerning authority.	Contractor	DSC PIU	Location plan Facilities plan	Prior to start of construction	Approved location plan Construction method Facilities plan
Establishing equipment lay-down and storage area	- Storage areas should be secure to minimize the risk of crime and should be safe from access by children, animals, etc. - Hazardous materials should store at secure place.	Contractor	DSC PIU	Location plan Facilities plan	Prior to start of construction	Approved location plan Construction method Facilities plan
Education of site staff on general and environmental conduct	- Environmental awareness training for staffs. - Staff must be trained up for operating equipment - All employees must undergo safety training.	Contractor	DSC PIU	Records of training	Prior to start of civil works and every new employee	Revised/Updated IEE/EMP (capacity building) Bid document CEMP
Construction Phase						
Occupational health and safety	-Using PPE, hearing protection for workers on demolition of concrete -Avoiding direct	Contractor	DSC	-The number of workers and the number of installation of hearing protections on demolition site	As work progresses	Construction method Detailed design documents Bid document JICA Construction Safety Guidelines

Parameter	Mitigation Measures	Responsible for Implementation	Responsible for Monitoring	Parameters to be Monitored	Frequency of Monitoring	Guidelines/ Standards
	contact with the contaminated water and soil			Use of PPE		
Construction camps and storage areas	-Open areas or surrounding bushes are not being used as toilet facility. - Litter is to be collected daily. - Bins and/or skips should be emptied regularly and waste should be disposed of at the pre-approved site. - Camp and working areas are kept clean and tidy at all times. - Camp is to be checked for spills of substances i.e. oil, paint, etc. - Camp is to be remake to its initial situation.	Contractor	DSC	As mentioned in relevant impacts & mitigation section of the report	As work progresses	Approved location plan Bid document JICA Construction Safety Guidelines
Dust and air pollution	-Sprinkling water to the carrying road and working site in the airport area. -Cleaning of carrying route in airport area and around the entrance of the airport. -Using of low air pollutant emission type machinery for construction	Contractor	DSC	-The number of sprinkling times and the number of cleaning times to the carrying road and entrance of the airport	As work progresses	No visible increase in dust and particulate matters Compare against baseline data Bid document JICA Construction Safety Guidelines

Parameter	Mitigation Measures	Responsible for Implementation	Responsible for Monitoring	Parameters to be Monitored	Frequency of Monitoring	Guidelines/ Standards
Noise levels	-Using of low noise type machinery for construction	Contractor	DSC	Complaints from community Noise level monitoring record	Regular monitoring during construction (e.g. 3 monthly)	ECR 1997 Compare against baseline data Bid document JICA Construction Safety Guidelines
Water quality	-Using appropriate measures for avoiding spread of pollution based on chemical analysis -Using wastewater treatment such as sedimentation tank for discharge to the canals (if any)	Contractor	DSC	Complaints from community Waste disposal manifest/record -The concentration of SS in the treated discharge water	-Regular monitoring during discharging (e.g. 3 monthly)	No increase in water pollution due to the project Compare against baseline data Bid document JICA Construction Safety Guidelines
Waste management	-Segregation and sorting of the waste	Contractor	DSC	Complaints from community Waste disposal manifest/record	Regular monitoring during construction (e.g. 3 monthly)	No dumped wastes and litter at work sites at all times Bid document JICA Construction Safety Guidelines
Conservation of natural environment	-Avoid unnecessary tree cutting -Plantation of tree	Contractor	DSC	-The number of cutting tree and planting tree	-Before the construction and after the construction	
Cultural and historical environment	-Complying with relevant law and order of relevant department	Contractor	DSC	sudden finding	As necessary	All finding shall be reported and turned over to the Department of Archaeology.
Operation and Maintenance phase						
Land contamination	-Securing that contaminated soil will be isolated from clean soil.	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	As specified in the O&M Manual and all applicable laws and regulations
Wastewater	- After treatment, the discharge standards need to be followed similar to the standards mentioned in Schedule 10 of the ECR 1997 for inland	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	ECR 1997 (Rule 13: The standard limits of the discharge of liquid wastes shall be determine in accordance with the standards specified in Schedule 10)

Parameter	Mitigation Measures	Responsible for Implementation	Responsible for Monitoring	Parameters to be Monitored	Frequency of Monitoring	Guidelines/ Standards
	water discharge					
Air quality	Implementation of the multistory parking for reducing exhaust gas from cars waiting for entering to the parking.	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	As specified in the O&M Manual and all applicable laws and regulations
Noise	-Implement of the complaint section for noise. CAAB will accept the complain of aircraft noise and will consider remedial measures.	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	As specified in the O&M Manual and all applicable laws and regulations
Water use	- Minimize water use through dedicated metering of water consumption	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	As specified in the O&M Manual and all applicable laws and regulations
Health, hygiene, and safety	-Safety training for all staff	Contractor (up to service delivery period) CAAB	CAAB Independent Monitoring Agency	Specifications in the O&M Manual	As determined in the O&M Manual	As specified in the O&M Manual and all applicable laws and regulations

Note: DSC = Design and Supervision Consultants, PIU = Project Implementation Unit

Appendix 13.3 Environmental Monitoring Plan

(Intentionally Blank)

Environmental Monitoring Plan

Project stage	Monitoring Item	Parameter	Method of monitoring	Monitoring area/ point	Term / Frequency	Place of submission
Construction Phase	Occupational health and safety	1.W=The number of workers on demolition site 2.I=The number of installation of hearing protections on demolition site 3. Ratio (IR)=I/W 4. Number of PPE must be equal or more than W.	To monitor the state of implementation/ Collecting implementation data from contractor	Whole of the project site	During the demolition of concrete/ Reporting for once in 3 months	CAAB, DOE
	Dust, Air pollution	1. The number of times of water sprinkling to the carrying road and entrance of the airport 2. The number of times of cleaning of the equipment and work site	To monitor the state of implementation/ Collecting implementation data from contractor	Carrying road and entrance of the airport Equipment and work site	During the construction/ reporting for once in 3 months	CAAB, DOE
	Noise	Construction Noise	Noise survey	Around the construction area	During the construction/ Every 3-month survey at a.m. and p.m. of typical day	CAAB, DOE
	Water quality	pH, Temp, Turbidity, EC	Water quality survey	Discharging point to the canal	During the construction/ Every 3-month survey at typical day	CAAB, DOE
	Solid waste	1.Types of waste 2.Monthly quantity of waste	Collecting data from contractor	Whole of the project site	During the construction/ Reporting for once in 3 months	CAAB, DOE
	Natural environment	1.The number of cutting tree 2.The number of planting tree	1.Inventory survey 2.Implementation survey	Whole of the project site	1.Befor the construction 2.After the construction	CAAB, DOE
Operation	Land	1.Quantity of	To monitor the state of	Whole of the	During operation/	CAAB,

Project stage	Monitoring Item	Parameter	Method of monitoring	Monitoring area/ point	Term / Frequency	Place of submission
and Maintenance Phase	contamination	contaminated soil 2.Method of the storing and managing contaminated soil	implementation	project site	Annual report	DOE
	Air quality	NOx, SO2, PM10, PM2.5	Air quality survey	Project site	During operation/ Annual report	CAAB, DOE
	Wastewater	pH, Temp, SS, EC, TDS, NH3, COD, BOD, Coli, Oil & Grease	Water quality survey with laboratory analysis	Discharging point of the treated water	During operation/ Annual report	CAAB, DOE
	Noise	1.The status of implementation complaint section 2.Ambient noise level(Leq) 3. Aircraft noise (Lden)	1.To monitor the state of implementation 2.Ambient noise level monitoring 3.Continuous measurement and calculating L(den) and compare with baseline	1. Project site 2. Bboudary of the project area 3. At the point of near residential area	1,2. During operation/ Annual report 3. During operation/ Once	CAAB, DOE
