1 Basic Information of the Project

1.1 Country

The Republic of Malawi

1.2 Title of the Project

"The Project for Capacity Development for Air Navigation Services"

1.3 Duration of the Project (Planned and Actual)

The project was implemented for the period from June 2014 to April 2016 as planned.

1.4 Background (from Record of Discussions (R/D))

Malawi Department of Civil Aviation (hereinafter referred to as "DCA") has the mandate to inter alia regulate and facilitate the development of airports and air navigation facilities. Kamuzu International Airport (hereinafter referred to as "KIA") was inaugurated in 1983 after the capital city was transferred from Zomba to Lilongwe. The Government of Japan (hereinafter referred to as "GOJ") provided Japanese ODA loans for the construction of the airport terminal building and installation of air navigation facilities from 1977 to 1982 in three phases. Recently, GOJ also provided a grant aid for the replacement of new navigation systems.

However, DCA faces a serious shortage of trained staff for KIA as well as for the other airports in the Republic of Malawi. Also, upgrading of advanced training for current air navigation staff is deemed necessary to keep up with technological changes in air navigation services.

DCA, in recognition of these issues, plans to strengthen its training functions in order to utilize air navigation facilities that comply with international standards. Those improvements will help secure sustainability in both operation and maintenance of air navigation facilities, and comprises the essence of request from the Government of Malawi (hereinafter referred to as "GOM") for the implementation of the Project for Capacity Development for Air Navigation Services (hereinafter referred to as "the Project").

1.5 Overall Goal and Project Purpose (from Record of Discussions (R/D))

1.5.1 Overall Goal

The Project's overall goal statement is: "Training by the trained instructors is sustainably conducted for officers of air navigation services".

1.5.2 Project Purpose

The Project's purpose statement is: "Trainings for air navigation services are implemented to effectively utilize the improved air navigation facilities".

1.6 Implementing Agency

Department of Civil Aviation (DCA) of the Ministry of Transport and Public Works

2 **Results of the Project**

2.1 Results of the Project

2.1.1 Input by the Japanese side (Planned and Actual)

a. JICA Experts

Table 2-1 shows the list of experts dispatched from Japanese side for the Project. A total of approximately 46.4 person-months of experts have been provided to the Project. This translates into an input of approximately 23.2 person-months per year.

Position/Technical Field	Person-Months	
Position/Technical Fleta	Planned	Actual
Chief Advisor	13.60 months	15.33 months
Deputy Chief Advisor/Capacity Development Specialist	5.40 months	5.42 months
ATC & AIS Training Specialist – 1	8.80 months	9.03 months
ATC & AIS Training Specialist – 2	7.40 months	6.23 months
CNS Maintenance Training Specialist	11.80 months	12.07 months
E/M Maintenance Training Specialist	2.50 months	2.47 months
Flight Procedure Design Specialist	2.50 months	2.50 months
Total	52.00 months	53.05 months

Table 2-1: List of JICA Experts in Person-Months

The number of days which the experts were engaged in the activities in Malawi is shown in Table 2-2.

Position/Technical Field	Duration (days)
Chief Advisor	427
Deputy Chief Advisor/Capacity Development Specialist	119
ATC & AIS Training Specialist – 1	238
ATC & AIS Training Specialist – 2	160
CNS Maintenance Training Specialist	329
E/M Maintenance Training Specialist	59
Flight Procedure Design Specialist	60
Total	1,392

Table 2-2: Dispatched Duration (days) of JICA Experts

b. Training Equipment

The following training equipment was procured for the implementation of the Project under the Grant Aid of Japanese Government.

Table 2-3: List of Training Equipment Procured under the Grant Aid
--

Name of Product	Qty	Procured Date
Computer Based Training for ATC (6 sets of PCs with CBT application)	1	November 2014
Test Instrument and Equipment (Oscilloscopes, Frequency Counter, Tester, Spectrum Analyzer, Signal Generator, etc.)	1	December 2014
PC-based Simulator Training System for ATC (Aerodrome Control, Radar Approach, Radar Area Control Function)	1	May 2015

Besides the above-mentioned training equipment, "Learning Aids and Office Equipment" to facilitate the trainings and overall operations of the Project were also provided in which the details are listed in Table 2-4.

No.	Name of Item	Qty.	Procured Date
1	Display Monitor 40 inch / Hisense LEDN40K20DP	2	01/07/2014
2	A3 Inkjet Printer / CANON IX6840	1	12/07/2014
3	Laptop Computer / DELL DUAL CORE	1	23/06/2014
4	Laptop Computer / HP DC/4GB/500GB	1	27/06/2015
5	Laptop Computer / DELL 3542 13/6GB	2	26/10/2015
6	Microsoft Office Software	4	26/10/2015
7	Microsoft Visio Software	2	02/11/2015
8	Network Router	1	27/06/2014
9	Projector / EPSON EHTW410	1	08/05/2014
10	Projector / EPSON EB-1761/W	1	17/09/2015
11	Photocopy Machine / Gestetner MP2501	1	22/07/2014
12	UPS APC Smart/UPS 1000VA	1	23/06/2014
13	UPS APC-UPS 500VA	1	13/12/2014
14	UPS SU-KAM 2.5KVA/48V	1	16/05/2015
15	UPS SU-KAM 3.5KVA/48V	1	09/10/2015
16	UPS SU-KAM 5KVA/96V	1	07/11/2015
17	Security Alarm System	1	29/02/2016
18	ICAO 021 AIS Course Material	1	13/01/2015
19	ICAO 051 ATC Basic Course Material	1	13/01/2015

Table 2-4: List of Learning Aids and Office Equipment Provided by Japanese Side

As of April 2016

c. Overseas Training

The list of overseas training conducted under Japanese budget is shown in Table 2-5. The number of overseas training was 4, and a total of 26 trainees participated. Out of the 4 trainings, 3 were conducted in Nairobi, Kenya at the East African School of Aviation (EASA) and 1 training was conducted in Johannesburg, South Africa at the Air Traffic & Navigation Services (ATNS).

Name of Training	Target Persons	No. of	Remarks
Nume of Training	Target Persons	Trainees	
Team Resource Management	ATC/CNS/EM	8	26 th – 30 th January 2015
<atns></atns>			
Supervisory Management	Supervisors of	4	2 nd – 27 th February 2015
<easa></easa>	ATM/CNS/EM		
Instructor Development Program	ATC/AIS/ACS/	8	4 th – 21 st August 2015
<easa></easa>	CNS/EM		-
Advanced Instructor Training	ATC/CNS/EM	6	5 th – 23 rd October 2015
<easa></easa>			
Total		26	

Table 2-5: List of Overseas Training Conducted under Japanese Budget

2.1.2 Input by the Malawi side (Planned and Actual)

a. Counterpart Personnel (C/P)

The Counterpart personnel assigned for the Project are shown in Table 2-6.

Role in project	Name (Planned)	Name (Actual as of April 2016)
Project Director	Mr. A. C. Mtilatila (Director of Civil Aviation, DCA)	No change
Project Manager	Mr. A. G. Matiya (Deputy Director (Operations), DCA)	*Co-project Manager (Mr. S. P. Galafa) is acting as the PM
Co-Project Manager	Mr. S. Galafa (Principal, School of Aviation, DCA)	No change
Project Coordinator	Mr. F. Kholowa (Chief Air Traffic Services Officer, Operation Division, DCA)	No change
	Mr. M.F.T. Bongwe (Chief telecommunications engineer, Operation Division, DCA)	Mr. R. C. Kanunkha, (Assistant Chief Aeronautical Telecommunications Engineer, Operation Division, DCA)
ATC and FIS training	Mr. S. P. Galafa (Principal lecturer of ATS, School of Aviation, DCA)	No change
AIS and ACS training	Mr. R. Y. Malanga (Lecturer School of Aviation, DCA)	No change
	Mr. S. Liundi (Lecturer School of Aviation, DCA)	No change
Electronic Engineering (CNS) training	Mr. R. Kanunkha (Senior CNS Lecturer, School of Aviation, DCA) Mr. C. F. Betenigo (Electronics Engineer, KIA, DCA)	Mr. C. F. Betenigo (Electronics Engineer, KIA, DCA)
Electrical/ Mechanical Engineering training	Mr. T. P. M. Mtonga (Electrical Engineer, KIA, DCA)	No change

Table 2-6: List of Counterparts

b. Support Staff

The Support Staff, who act as instructors for respective fields, assigned for the Project are shown in Table 2-7.

Role in project	Name (Planned)	Name (Actual as of April 2016)
ATC and FIS Training Instructor	Ms. L. Manondo (Air Traffic Controller, KIA, DCA)	No change
	Mr. D. Zamaere (Air Traffic Controller, Chileka Airport, DCA)	Mr. Zamaere was transferred to KIA in August 2015.
	Mr. F. Chisepeya (Air Traffic Controller, KIA, DCA)	No change
	Mr. J. Kazito (Air Traffic Controller, KIA, DCA)	Mr. J. Kazito was transferred to Chileka International Airport (CIA)
AIS and ACS Training Instructor	Mr. R. Nkosi (Air Crew Briefing Officer, DCA)	No change
	Mr. N. B. Kaliyasi (Communication Officer, KIA, DCA)	No change
Electronic Engineering (CNS) Training Instructor	Mr. S. Kunje (Electronics Engineer, Chileka Airport, DCA)	No change
		Mr. F. N. Chisale (Electronics Engineer, KIA, DCA) was added as an CNS instructor from June 2015.
E/ M Training Instructor	Mr. O. Yokonia (Electrical Engineer, Chileka Airport, DCA)	No change

Table 2-7: List of Support Staff

c. Project Office Space

Office space for the Project was provided in School of Aviation (SOA), DCA. DCA also provided air-conditioners for the Project office as well as for the CBT and simulator training rooms.

d. Project Office Expenses

Utility cost was paid by the Malawian side and DCA provided the following expenses for the project office as of March 2016.

No.	Item	Cost (MWK)
1	Purchase of two desktop computers:	1,055,000
2	Purchase and installation of two split air conditioners.	989,114
	(Project & CBT)	
3	Purchase and installation of air conditioners for ATC	862,100
	simulator room	
4	Purchase of desks and chairs for CNS Laboratory (May	951,105
	2015)	
5	Purchase of 2 desks and chairs for CBT (May 2015)	477,000
6	Advertising Cost	1,362,589
7	Installing 2 security doors for equipment room	70,000
8	Installing 4 Air-conditioner cages	90,000
9	Building material for class room	30,000
10	Labor charge for installation security items	43,000
11	ESCOM (Power) (Oct. 2015 – Mar. 2016)	1,000,000
12	Water (Oct. 2015 – Mar. 2016)	1,500,000
13	Stationery and Consumables (Oct. 2015 – Mar. 2016)	500,000
14	Fuel (Oct. 2015 – Mar. 2016)	440,000
	Total	9,369,908

Table 2-8: Project Office Expenses

e. Travel Expenses, Allowance and Ration for Counterpart Personnel within Malawi

The travel expenses, Subsistence Allowance for C/P to travel from outside the Lilongwe area provided by SOA and Ration for trainees at SOA were as follows (as of March 2016):

No.	Item	Cost (MWK)
1	CBT Training (Nov. 2014)	75,000
2	Test Equipment Training (Jan.2015)	126,000
3	Team Resource Management Course Internal Training	146,000
	(Jan.2015)	
4	Electro-Mechanical Training (May 2015)	515,100
5	Microsoft Office PC Training (May 2015)	60,000
6	AIS & ACS Working Group (May 2015)	90,000
7	Flight Procedure Design Training (May 2015)	602,000
8	General Communication Training (May 2015)	577,500
9	ATC Aerodrome Control 052 Training (Jun 2015)	783,000
10	Park-Air VHF Maintenance Training (Jun. 2015)	466,000
11		
	(Jun. 2015)	
12	ATC Basic 051 for Freshmen (Oct 2015 - Jan 2016)	7,660,800
13	NORMARC ILS Maintenance (Oct - Dec 2015)	302,400
14	Flight Procedure Design <departure> (Nov 2015)</departure>	144,000
15	AIS for ACS (Nov 2015)	492,000
16	Microsoft Office PC Training II (Dec 2015)	21,600
17	New CNS/ATM (Feb 2016)	357,000
18	MARU DVOR/DME (Feb - Mar 2016)	334,800
19	Microsoft Office PC Training III (Mar 2016)	120,000
20	Basic ATSEP for CNS/EM Freshmen (Mar 2016)	606,400
	Total	14,182,700

Table 2-9: Travel Expenses, Allowance and Ration
--

2.1.3 Activities (Planned and Actual)

a. Activities Related to Output 1

There are 7 activities related to Output 1: "Training of Air Traffic Control (ATC) and Flight Information Services (FIS) are improved" in the PDM. The results of each activity are shown below.

PDM Activities	Results
1-1. Review current training syllabus and training materials	<u>Completed:</u> All the training syllabuses and materials were reviewed. Most of them were made in 1980s.
1-2. Improve/develop training syllabus and training materials	<u>Completed:</u> Six training syllabuses and materials were developed or being developed for completion by April 2016.
1-3. Conduct training of instructors	<u>Completed:</u> Four courses (051 ATC Basic, 052 Aerodrome Control, Conventional Flight Procedure Design (Approach), and Conventional Flight Procedure Design (Departure)) for ATC and FIS instructors (including existing officers) were conducted.
1-4. Implement improved training courses	<u>Continuing:</u> Training of instructors for 053 Procedural Approach Control and 055 Procedural Area Control is continuing. Twelve new students were recruited in October 2015. Course 051 for new students was completed. Course 052 is in progress. Courses 053 and 055 will be completed by December 2016.
1-5. Implement supervisor training	<u>Completed:</u> Team Resource Management Course, Supervisory Management Course, Instructor Development Course, and Advanced Instructor Training Course were conducted in January, February, August, and October in 2015 respectively.
1-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	<u>Continuing:</u> 051 ATC Basic and 052 Aerodrome Control courses for new ATC students implemented by instructors were monitored and evaluated and all of 12 new students obtained more than 70% in the comprehension test. Monitoring and evaluation of the remaining courses (053 and 055) will be continuously conducted for in March, April and May 2016.

Table 2-10: Progress	of Activities related to Output 1

1-7. Improve the training courses based on the results from the monitoring and evaluation	<u>Continuing:</u> The evaluation results of 051 ATC Basic course was utilized for the improvement of the trainings. Course 052 is in progress while the other two courses 053 and 055 will be completed by December 2016.
---	---

In summary, 4 out of 7 activities under Output 1 were completed, and the remaining 3 activities will be completed by December 2016.

b. Activities Related to Output 2

There are 7 activities related to Output 2: "Training of Aeronautical Information Services (AIS) and Aeronautical Communication Services (ACS) are improved" in the PDM. The results of each activity are shown below.

PDM Activities	Results
2-1. Review current training syllabus and training materials	<u>Completed:</u> All the training syllabuses and materials were reviewed. Most of them were made in 1980s.
2-2. Improve/develop training syllabus and training materials	<u>Completed:</u> Two Working Groups, consisting of 4 AIS and ACS officers, were established in May 2015 and one combined AIS/ACS training syllabus and materials were developed.
2-3. Conduct training of instructors	<u>Completed:</u> AIS course for ACS instructors/officers was conducted in November 2015.
2-4. Implement improved training courses	No new students were recruited, but retraining of existing officers were conducted as a part of restructuring of AIS/ACS divisions into AIM division.
2-5. Implement supervisor/advanced/specialist training	<u>Completed:</u> Team Resource Management Course, Supervisory Management Course, Instructor Development Course, and Advanced Instructor Training Course were conducted in January, February, August, and October in 2015 respectively.
2-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	<u>Completed:</u> AIS course for ACS officers implemented by instructors was monitored and evaluated and all of the trainees obtained more than 70% in the comprehension test.
2-7. Improve the training courses based on the results from the monitoring and evaluation	<u>Completed:</u> The above evaluation results were utilized for the improvement of the trainings.

Table 2-11: Progress of Activities related to	Output 2
---	----------

In summary, all 7 activities under Output 2 will be completed by the end of project period.

c. Activities Related to Output 3

There are 7 activities related to Output 3: "Training of Electronic Engineering is improved" in the PDM. The results of each activity are shown below.

PDM Activities	Results
3-1. Review current training syllabus and training materials	<u>Completed:</u> All the training syllabuses and materials were reviewed. Most of them were made in 1980s.
3-2. Improve/develop training syllabus and training materials	<u>Completed:</u> Six training syllabuses and materials were developed.
3-3. Conduct training of instructors	<u>Completed:</u> Six courses (General Communications, Park Air T6 VHF Radio, CVOR/DVOR/ILS/DME/RADAR Concept, NORMARC ILS Maintenance, New CNS/ATM, and Maru DVOR/DME) for CNS instructors (including existing officers) were conducted.
3-4. Implement improved training courses	<u>Completed:</u> Training for 7 new students recruited in March 2016 has started.
3-5. Implement equipment-specific training	<u>Completed:</u> Test Equipment Course was conducted in January 2015. NORMARC ILS Maintenance and Maru DVOR/DME Maintenance training were conducted by use of knowledge gained with Test Equipment Course
3-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	<u>Completed:</u> Abovementioned courses implemented by instructors was monitored and evaluated.
3-7. Improve the training courses based on the results from the monitoring and evaluation	<u>Completed:</u> The above evaluation results were utilized for the improvement of the trainings.

Table 2-12: Progress of Activities related to Output	t 3
--	-----

In summary, all 7 activities under Output 3 were completed.

d. Activities Related to Output 4

There are 6 activities related to Output 4: "Training of Electrical/Mechanical Engineering (E/M Eng.) is improved" in the PDM. The results of each activity are shown below.

PDM Activities	Results
4-1. Review current training syllabus and training materials	<u>Completed:</u> All the training syllabuses and materials were reviewed. Most of them were made in 1980s.
4-2. Improve/develop training syllabus and training materials	<u>Completed:</u> Two training syllabuses and materials were developed or being developed by April 2016.
4-3. Conduct training of instructors	Completed:
4-4. Implement improved training courses	Electrical & Mechanical (UPS & Generator, Airfield Lightning) course for instructors (including existing officers) was conducted in April 2015.
	Training for 2 new electrical engineers and 1 new mechanical engineer recruited in March 2016 has started.
4-5. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	<u>Completed:</u> The abovementioned course implemented by instructors was monitored and evaluated.
4-6. Improve the training courses based on the results from the monitoring and evaluation	<u>Completed:</u> The above evaluation results were utilized for the improvement of the trainings.

Table 2-13: Progress of Activities related to Output 4

In summary, all 6 activities under Output 4 will be completed by the end of project period.

2.2 Achievements of the Project

2.2.1 Outputs and Indicators (Target values and actual values achieved at completion)

The achievements of the above-mentioned 4 project outputs are summarized in the following table according to the PDM indicators. As shown in the table 2-14, all of the training syllabuses and materials were developed and all of the target numbers of DCA officers successfully completed trainings (Comprehension test score of all trainees exceeded 80 %). Details of the test results of each trainee are shown in the Annex 1-3.

Indicators for the PDM Outputs		Achievement as of April 2016
X		*
Training syllabuses and training materials are improved or developed for the following number of courses:	Indic ATC/FIS: 6 AIS/ACS: 2 Electronic Eng.: 6	Achieved:1.051: ATC Basic: 100%2.052: Aerodrome Control: 100%3.053: Approach Control: 100%4.055: Area Control: 100%5.CNS/ATM for ATC: 100%6.Flight Information Service: 100%Achieved:1.1.AIS & ACS: 100%*AIS and ACS were combined into oneAIS&ACS materialsAchieved:1.General Communication Equipment: 100%2.Navigation Concept Course: 100%3.Park Air VHF: 100%4.Normarc ILS: 100%5.Maru VOR/DME: 100%

2.2.2 Project Purpose and Indicators (Target values and actual values achieved at completion)

The achievements of the Project Purpose: "Trainings for air navigation services are implemented to effectively utilize the improved air navigation facilities" are summarized in the following table according to the PDM indicators. As shown in the table 2-15, all of the target numbers of instructors appointed by DCA can conduct the improved/developed training courses and comprehension test score of all trainees who received the improved/developed training courses exceeded 70%. Details of the test results of each trainee are shown in the Annex 1-3.

Indio	cators for the P	Achievement	as of April 2016	
Indicator No. 1				
The following number of instructors can conduct the improved/developed training courses (fulltime + part time) *Number in () indicates		ATC/FIS: 6 (1)	Achieved: 6 (4 ATC instructors including 1 original instructor + 2 ATC instructors selected among those who received Flight Procedure Design Training Courses)	
original number instructors at the of the project.		AIS/ACS: 4 (2)	Achieved:4 (2 new instructors + 2 original instructors)Achieved:4 (3 new instructors + 1 original instructor)Achieved:2 (1 new instructor + 1 original instructor)

	Microsoft Office - 3	6	*Not scored
	Total	124	

*CBT and Microsoft Office Courses are not required in the activities of the project, therefore not scored. The trainees were evaluated based on their skills in developing questions using the CBT software and the level of performance in presentation skills using Microsoft Office. **052 Aerodrome Control Training for new students will be finished in May 2016.

2.3 History of PDM Modification

The Project revised the PDM twice from the PDM version 1 dated 30 May 2014 as shown below to suit to assistance needs. The revisions were all related to clarification of indicators and verification method. The details of the revisions are shown in Annex 3.

- (1) The 1st revision dated 1 August 2014
- Indicators of Project Purpose: number of instructors was amended from "AIS: 4 and ACS: 4" to "AIS/ACS: 4", and from "E/M Eng.: 4" to "E/M Eng.: 2". Also, the target value of comprehension test score was set as "80 %" after the baseline survey.
- Means of Verification: amended from "Project Progress Reports" to "Monitoring Sheet".
- Indicators of Outputs: number of officers was amended from "ATC: 4" to "ATC/FIS: 4", and from "AIS: 4 and ACS: 4" to "AIS/ACS: 4".
- (2) The 2nd revision dated 5 June 2015
- Indicator of Overall Goal: defined as "The targeted number of trainees (serving officers and new staff) who will successfully complete the improved/developed training courses between 2016 and 2020 is at least 80".
- Indicators of Project Purpose: minimum score of comprehension test was amended from "80%" to "70%" in accordance with international standard of ICAO.
- Means of Verification: amended from "Terminal Evaluation Report" to "Project Completion Report". In addition, inserted "Results of comprehension test score of trainees".
- Indicators of Outputs: deleted "Comprehension test score of trainees who receive the improved/developed training courses exceeds at least 80%" as this indicator duplicates with that of the Project Purpose.

2.4 Others

2.4.1 New Students to School of Aviation

As an important assumption to the Project, it is assumed that DCA recruit new students for SOA during the project period. The following table 2-16 indicated the results of this assumption.

		Actual	
Planne	d	as of April	Remarks
		2016	
Air Traffic	12	12	Recruited as planned in PDM.
Controllers	October	October	
(ATC)	2015	2015	
Flight	8	0	DCA cancelled the recruitment of FIS
Information	October		officers. DCA will fill this position from
Services (FIS)	2014		ATC students.
Aeronautical	10	0	DCA plans to merge AIS and ACS to form
Information	October		AIM division. DCA cancelled the
Services (AIS)	2014		recruitment of AIS/ACS staff and plans to
Aeronautical	6	0	meet staff requirements for AIM with
Communications	October		existing AIS/ACS officers with AIM
(ACS)	2014		Integration Training.
Electronics	8	7	Recruited as planned with delay. One
Engineers (CNS)	April 2014	March	resigned with no replacement.
	_	2016	
Electrical/Mecha	2/2	2/2	Recruited as planned with delay.
nical Engineers	April 2014	March	
(E/M)	_	2016	
TOTAL	48	23	

Table 2-16: New Students to SOA

As for the training of ATC officers, recruitment of new students was implemented and training for these students by trained instructors was conducted as planned. DCA changed the plan for recruitment of FIS, AIS and ACS officers during the project period. These changes did not influence to the project effects since the Project successfully developed capacity of relevant instructors, and trained existing officers of these fields. Impact of delays in recruitment of CNS and E/M officers to the project effects was also minimal since the instructors were trained during the Project, and those instructors are capable of training new students of CNS and E/M engineering. Therefore, this assumption in the PDM had only minimal impact to indicator of the project purpose.

2.4.2 Results of Environmental and Social Considerations

Not applicable.

2.4.3 Results of Considerations on Gender/Peace Building/Poverty Reduction

Not applicable.

3 Results of Joint Review

3.1 Results of Review based on DAC Evaluation Criteria

The Project is reviewed jointly by both the Japanese side and the Malawian side from the viewpoint of Five Evaluation Criteria, defined by JICA which was originally proposed by DAC (OECD) shown in the following table. The Evaluation Grid is attached as Annex 6-1.

	Criteria	Description
1.	Relevance	Relevance of the Project is reviewed by the validity of the Project Purpose and Overall Goal in connection with the Government development policy and the needs of the target group and/or ultimate beneficiaries in Malawi.
2.	Effectiveness	Effectiveness is assessed to what extent the Project has achieved its Project Purpose, clarifying the relationship between the Project Purpose and Outputs.
3.	Efficiency	Efficiency of the Project implementation is analyzed with emphasis on the relationship between Outputs and Inputs in terms of timing, quality and quantity.
4.	Impact	Impact of the Project is assessed in terms of positive/negative, and intended/unintended influence caused by the Project.
5.	Sustainability	Sustainability of the Project is assessed in terms of institutional, financial and technical aspects by examining the extent to which the achievements of the Project will be sustained after the Project is completed.

Source: JICA Project Evaluation Guideline (2010), JICA

3.1.1 Relevance

The relevance of the Project is judged "High" for the following reasons:

- The "Malawi Growth and Development Strategy II" (2011-2016) positions the transportation infrastructure development as one of the priority areas, and states "Government recognizes the need to continuously improve air transport infrastructure and services to enhance trade, tourism and investment. In the medium term, a number of outcomes will be achieved, including improved air safety and management in line with international standards; improved regulatory and institutional framework, and improved security in airports." Also the National Transport Policy positions the air transportation as one of the political priorities and mentions the importance of development and improvement of aviation infrastructures to promote economic activities. Therefore, the project is consistent with these policies.
- The Japanese "Country Assistance Policy for the Republic of Malawi" (April, 2012) establishes "Infrastructure development for fostering agriculture and the mining industry" as one of the priority areas, and states "the promotion of efficient movement of people and goods in an international corridor and surrounding regions, Japan also helps Malawi develop transportation infrastructure". In addition, the JICA, in the JICA Country Position Paper, establishes the development of infrastructure that becomes the foundation of economic growth as a strategic framework for achieving the medium and long term

development goals of Malawi, and states the need to develop the infrastructure for economic development. Therefore, the project conforms to the Japan and JICA's assistance policy.

• Japan has sufficient experiences in introducing and operating the CNS/ATM and E&M systems, and has been providing various technical assistances in this field in several countries in Southeast Asia. Since Japan has technical advantages necessary for the Project, assistance to the Project is appropriate.

3.1.2 Effectiveness

The effectiveness of the Project is judged "High" for the following reasons:

- As stated in Section 2.2.2, the Project Purpose has been almost achieved at the time of the project completion. All of the instructors obtained skills and knowledge through the Overseas and In-country Trainings and considered to be capable enough to conduct the improved/developed training courses. Most of the equipment (Simulator Training System for ATC, CBT, and Test Equipment) procured by the Project is being utilized effectively in trainings. Also, according to the results of the training evaluation sheet (5-rank evaluation), all of the trainee answer that skills and knowledge obtained through trainings are very useful to their job (average score exceeds 4).
- It is anticipated that the level for maintaining various equipment installed under "The Project for the Replacement of Air Navigation System at Kamuzu International Airport" in 2012, such as ILS, VHF, Air-field Lighting, will be improved and upgraded through the courses conducted under this Project which targeted CNS and E/M engineers at KIA.
- The Project was designed appropriately through amendments of the PDM in the past, and four Outputs in the current PDM are necessary and sufficient for achievement of the Project Purpose.

3.1.3 Efficiency

The efficiency of the Project is judged "High" for the following reasons:

- The Project was designed appropriately through amendments of the PDM in the past, and all the activities in the current PDM are essential for achievement of the Outputs. In addition to the activities planned in the PDM, two courses (CNS Test Equipment and Microsoft Office Training) were added in order to supplement the capacity of instructors upon request of the C/P.
- Regarding the Input made by the Japanese side, the person-months of the JICA Experts were slightly increased from 52.00 to 53.05 in January 2016 in order to support activities under Output 2 and 3. The person-months for the Chief Advisor was increased by 1.7 MM in order to accommodate the realignment of trainings and extending the total period of activities in Malawi. The reason behind such change was due to the limited human resource which prevented from conducting the trainings simultaneously. In addition, the person-months for the Experts for Outputs 2 and 3 also required extension for 0.5MM due to the extended length of training courses. As for the Expert for Output 1, the training period was realigned and with the involvement of trained C/P as core instructors, the person-month was shortened by 1.1 MM. Among the three Experts for Outputs 1, 2 and 3,

a total of 1.05MM was increased. The additional input was essential to achieve the planned outputs.

- Regarding the Input made by the Malawian side, recruitment of new students of Electronic Engineers and Electrical/Mechanical Engineers was delayed due to lack of funds for recruitment. The delay in recruitment reduced the opportunities for instructors to train new students during the project; however, these instructors showed sufficient knowledge and skill when they teach existing officers during the project. It is highly estimated that SOA will continuously conduct trainings for new students by themselves after the completion of the Project.
- Other donors such as European Aviation Safety Agency (EASA) and European Investment Bank (EIB) are also engaged in enhancing the civil aviation safety in Malawi. Meetings were held with such agencies to exchange information on the on-going activities and to discuss future prospects and strategies. It allowed each party to avoid overlapping of activities and also to open discussions on possible areas of coordination and harmonization among their activities in air navigation services in Malawi.
- Answers to questionnaires to the C/P (5-rank self-evaluation) shows that appropriateness of inputs from Japan and Malawi sides are relatively good (average score 4.7 and 3.9 respectively).

3.1.4 Impact

The impact of the Project is predicted as "High" for the following reasons:

• The Project had already given positive impacts on the capacity of instructors in all areas and there is high possibility of achieving of Overall Goal: "Training by the trained instructors is sustainably conducted for officers of air navigation services".

Other impacts of the Project are predicted as follows:

- Since the training system has been established through the implementation of the Project, there could be more staff with sufficient knowledge and experience related to aviation safety activities. Therefore, it is expected to improve the quality of safety of air transportation.
- Facilities and equipment in the airport will be operated and maintained properly and effectively by those trained engineers and staff.
- It is expected to reduce workloads of each officer since the quality of staff was improved and even more staff will be trained in the SOA, which will result in the improvement of working conditions in navigation services and safety of flights.
- The SOA used to send staff for training to the neighboring country but they can conduct trainings by themselves in Malawi now. Therefore, it will be economically effective.
- It is anticipated that the SOA will be able to fully train ATCs in a sustainable manner and that it will contribute to enhanced safety of air navigation services in Malawi.

There is no negative effect observed at the completion of the Project, and no negative impact

is foreseen.

3.1.5 Sustainability

The sustainability of the Project is estimated as "Medium" based on the reasons stated below. The effect of the Project is expected to continue by the Malawi Government even after the Japanese technical cooperation terminates, but financial weakness of SOA should be overcome.

(1) Policy Aspect

As stated in Section 3.3.1, the Project is/will be in line with the policies of the Malawi Government as stipulated in "Malawi Growth and Development Strategy II" (2011-2016) and the National Transport Policy. It is not expected that drastic change in government policy will occur.

(2) Financial Aspect

The financial status of SOA is dependent on DCA since it is a subsidiary organization under DCA. Financial basis of DCA is weak. The Project experienced budget constraints, such as for the recruitment of new staff, the procurement of PC for instructors and provision of travel expense and daily allowance for trainees. Continuous efforts will be required to seek support of the MoTPW and top management of DCA in securing budget for achievement of the Overall Goal of the Project.

(3) Technical Aspect

The SOA developed capacity to provide trainings on the skills and techniques learned through the Project, and have already been conducting such training so as to secure sufficient number of serving officers and new staff to sustain the outcome of the Project. The planned structural reform of the civil aviation administration assisted by EASA, which will create autonomous Civil Aviation Authority (CAA) with air navigation service provider function, should have positive impact on the finance of SOA since the CAA will follow ICAO's principle that aviation user charges should be used for the development and operation of civil aviation. Draft Act for creation of CAA will be under deliberation of the parliament soon.

3.2 Key Factors Affecting Implementation and Outcomes

(1) Input of Project Coordinator

No Project Coordinator was assigned for the JICA expert team at the planning stage of this Project. However, due to the far location between DCA Headquarters and SOA, as well as the various operations affiliated with trainings and overall management of the Project, a Project Coordinator was dispatched from the second assignment to Malawi in November 2014 for a more efficient and smooth implementation of the Project.

(2) Involvement of JCAB, FAA & ICAO official experienced experts

Technical trainings carried out through this Project were aimed to upgrade and strengthen Air Navigation Services in Malawi, which is closely associated with National Licensing System and International Regulations. In order to provide sound advice and recommendations to DCA on licensing and rating procedures besides technical guidance, experts with various experience working in such licensing and regulatory institutions, i.e. Japan Civil Aviation Bureau (JCAB), Federal Aviation Administration (FAA), and International Civil Aviation Organization (ICAO), were selected and dispatched.

(3) Information Exchange with Other Donors

Other donors such as European Aviation Safety Agency (EASA) and European Investment Bank (EIB) are also engaged in activities^{*1} with the aim of enhancing the civil aviation safety in Malawi. On a regular basis, meetings were held with such agencies to exchange information on the on-going activities and to discuss future prospects and strategies. Through these exchanges, the Project members were able to acquire knowledge and increase awareness of the overall aviation safety situation in Malawi from another perspective aside from its own and DCA. Moreover, such consultation not only allowed each party to avoid overlapping of activities, but also opened discussions on possible areas of coordination and harmonization among their activities in air navigation services in Malawi.

(4) Mutual Consultation with Counterpart Personnel

In order to facilitate effective and efficient progress of the Project, Project members and DCA consulted each other whenever any issues arose in the course of Project implementation. Monthly meetings were held and frequent visits to DCA Headquarters and SOA were made, which enhanced communication and higher level of involvement by the Counterparts to the Project. Good communication leads to timely resource allocation of finance and personnel which were vital to the sound implementation of the Project.

(5) Additional Training Input-I: "Test Equipment" Training

Through interviews and visits to the workshops at KIA, it became clear that the engineers had limited knowledge on the Test Equipment, e.g. Oscilloscope and Digital Multi-Meter, etc., which were provided by JICA for the use in Navigation Equipment maintenance courses. Since such equipment is vital in airport operations which directly affects the safety of aviation in Malawi, JICA experts found it necessary to provide a 2 weeks course on "Test Equipment", targeting electronic engineers and electricians of DCA. This in effect, became the basis of a smooth implementation of the succeeding trainings on navigation equipment maintenance.

(6) Additional Training Input-II: PC Training.

Following the current trend in the use of digital course contents and interactive training, basic knowledge and skills on computer literacy are essentials in delivering effective trainings. Through interviews, such skills seemed limited/lacking in some of the assigned instructors. As a means to increase effectiveness of training the instructors and improving the training courses, both which are mandated in this Project, training course to introduce basic computer skills was conducted three times which was outside the scope of TOR.

(7) Dissemination of Knowledge and Skills Obtained through Overseas Training

Trainees of "Team Resource Management Course" (held at ATNS in South Africa), gave a presentation to DCA officers and JICA experts to share the knowledge and skills obtained

¹ Such activities are "Improvement of Aviation Safety and Oversight in Malawi (IASOM)" by EASA and "Airport Safety and Security Equipment Project" by EIB.

through the course. According to their feedbacks, the training experience also led to motivating and creating a spin-off effect for their daily operations. In addition, trainees of "Instructor Development Program" and "Advanced Instructor Training" (both held at EASA in Kenya) have been practicing their skills as instructors in various trainings at the School.

3.3 Evaluation on the results of the Project Risk Management

The Project has taken several measures properly against risks occurred during the project implementation. Therefore, the results of the Project Risk Management are evaluated as "High" for the following reasons:

(1) Visiting ATNS (South Africa) & EASA (Kenya) Training Center

Since the schedules for the Overseas Trainings could have extensive impact on the progress of the Project, the Project team visited the training institutes in South Africa (ATNS) in August 2014 and Kenya (EASA) in April 2015 respectively with the aim of meeting the Dean and instructors, exchanging views and ideas on the training needs which are specific to Malawi, and observing the actual conditions of training facilities and accommodations. These visits, which were not included in the initial plan, enabled to establish a timely communication channel with the contact persons, to acquire necessary information and logistics on a timely basis, which lead to early preparation and sound implementation of overseas trainings.

(2) Installation of appropriate UPS (Uninterrupted Power Supply) at Training Center

Due to frequent power outage, common in Malawi, overhead projectors and lights in classes were affected that interfered/hampered the operation and trainings at the early stage of the Project. Therefore, several large UPS were installed so as to avoid any interference by such power outage. This enabled all training equipment and system, including the ATC Simulator System, to function/run all day despite the shortage of power/electrical power failure, electricity failure, blackout or power cut which in turned out to be highly effective to the Project operation.

(3) Installation of Security System

On 25th December 2015, there was an incident in which several burglars broke-in to SOA and stole a computer. If any of the equipment provided by JICA, i.e. ATC simulator system, CBT and test equipment were robbed or destroyed, it will have a devastating effect and may lead to irreparable damage that will impede further training activities at SOA. Therefore, higher security measures were taken, by installing intrusion sensors and burglar-bars, to upgrade and strengthen safety of the equipment and facilities, which are vital to conducting trainings at SOA.

(4) Securing Sufficient Budget for the Project

Due to the government procedures, securing funds from Malawian side may require many months. Thus, it should be noted that when requesting financial inputs from Malawian side, ample time is necessary.

3.4 Lessons Learnt

(1) Input of Project Coordinator

A Project which includes trainings require extensive coordination and logistical arrangements among various people involved, i.e. trainees, instructors, C/Ps. Therefore, a Project Coordinator shall be assigned from the planning stage of such project.

(2) Involvement of Experts as Policy Advisors to DCA

Institutional support by DCA plays a key role in to what extent the inputs provided to SOA could be fully utilized. Enhancing institutional aspect of DCA is essential and, therefore, experts to be dispatched for such capacity building project should have a background not only in training but also in policy making related to training of officers in the air navigation services.

(3) Information Exchange with Other Donors

Exchanging information with other donors which are involved in the same aviation field, i.e. European Aviation Safety Agency (EASA) and European Investment Bank (EIB), is also important to acknowledge the various activities and to avoid overlapping of such projects and programs. Such coordination may also lead to harmonizing the activities and create a synergy effect in strengthening air navigation services in Malawi.

(4) Assessment of Levels of Basic Skills & Knowledge of the Trainees

It is important to have a good understanding on the levels of basic skills and knowledge of trainees at the initial stage, since it will affect the outcome and overall effectiveness of the Project. If considered necessary, there should be enough mobility and flexibility to include relevant trainings based on the needs, such as those which were included in this Project, i.e. computer skills training and Test Equipment Course.

(5) Serving Refreshments

Serving refreshments in the morning and afternoon sessions during trainings is part of Malawian custom. Understanding towards such socio-cultural norms is necessary and shall be communicated between DCA and the Project Team in advance, so as to secure budget pertaining to trainings.

(6) Access to Public Transport

Since public transportation to the village where most trainees reside is only available until at around 16:30 hrs, it is important to plan all trainings to end before the last transportation.

(7) Addition of Project Evaluation Experts

Addition of a project evaluation expert is necessary to conduct final evaluation of the Project for the Project Completion Report under the new monitoring system recently introduced to JICA Technical Cooperation Projects.

4 For the Achievement of Overall Goals after the Project Completion

4.1 **Prospects to achieve Overall Goal**

Prospect of achieving the Overall Goal: "Training by the instructors is sustainably conducted for officers of air navigation services" is summarized in the following Table 4-1. It is premature to make any conclusive statement in this regard; however, with DCA's success in recruiting new officers despite the financial difficulties, and efforts in minimizing costs for conducting trainings by utilizing the existing dormitory and cafeteria at the SOA, it could be anticipated that target values may be achievable.

Indicators for the	Prospect of Achievement in 2020 (Planned as of March 2016)			
Overall Goal	Course Name	Field	No. of Trainees

4.2 Plan of Operation and Implementation Structure of the Malawian side to achieve Overall Goal

In order to achieve the Overall Goal, the Malawi side prepared the plan of operation by 2020 in the following Table 4-2. The instructors who were trained through the Project shall be allocated in each course properly so as not to disturb their daily work at the airport.

	Year	2016	2017	2018	2019	2020

AIS/ ACS	Flight Data Processing					
	AMHS					
CNS	Basic ATSEP					
& E/M	Radar Maintenance					

Table 4-2: Plan of Operation and Implementation Structure by 2020

4.3 **Recommendations for the Malawian side**

(1) Improve the Financial Structure

Revenues derived from aeronautical charges, i.e. Air Navigation Usage Charge, Landing Fee and Passenger Charge are used for the development and operation of civil aviation worldwide and are usually not diverted into general revenue as the case in Malawi. Therefore, it is highly recommended that the financial structure be arranged so as to ensure that such aeronautical revenues are used for the provision of airport and air navigation services including labor cost, equipment procurement costs, operation and maintenance costs, training costs and other expenses vital for aviation safety in Malawi. It is essential to realize creation of Civil Aviation Authority, of which draft ACT will be under deliberation of the parliament soon.

(2) Improve Recruitment Method

Along with the curriculum vitae, appropriate achievement tests and aptitude tests shall be used to examine and screen the candidates' abilities during recruitment.

The following tests are recommended for an improved recruitment process:

- ATC: English, basic mathematics, aptitude tests (including physical examination and abstract ability);
- AIM: English, general aptitude test;
- CNS: English, basic mathematics and basic electronics;
- E/M: English, basic mathematics and basic electrical/mechanical.

To secure fair and impartial recruitment and to ensure appropriate human resource development of DCA officers, the scores of abovementioned tests shall be the basis for enrollment to DCA.

(3) Structural Change in Recruitment Plan

It is recommended that DCA recruits its officers on an annual or continuous basis rather than hiring a large number once in every several year time. Currently, there is a wide age gap between the senior and junior officers, which hinders appropriate technical transfer of knowledge and skills in every aspect of air navigation services. If the numbers of newly recruited officers are reduced and recruited annually or at shorter intervals, more attention could be placed on each trainee, increasing efficiency and quality of trainings, as well as the load of expenditures could be alleviated on an annual basis which could facilitate budget planning.

4.4 Monitoring Plan from the End of the Project to Ex-post Evaluation

Monitoring Plan was prepared to check if the effects generated by the Project continue after completion of the Project. The Project members agreed on that they would report the progress status by the use of Post-Project Monitoring Format in Annex 7 to DCA and JICA Malawi Office every 6 months until the time of ex-post evaluation planned 3 years after completion of the Project, i.e. April 2019.

Major items of the monitoring are as follows:

- (1) Progress of training for air navigation services at SOA;
- (2) Status of maintenance of major equipment procured by the Project;
- (3) Budget allocation for the human resource training at SOA;
- (4) Progress of reorganization from DCA to CAA and revenue reform.

Project Title: The Project for Capacity Development for Air Navigation Services in the Republic of Malawi

Implementing Agency: DCA

Project Site: School of Aviation

Target Group: Air Traffic Controllers, Flight Information Officers, Aeronautical Information Services Officers,

Aeronautical Communication Officers, Electronic Engineers and Electrical/Mechanical Engineers of DCA

Period of Project: 2 years (24/04/2014-20/05/2016)

Model Site:

Narrative Summary	Objectively Verifiable Indicators	Means of Verification	Important Assumption	Achievement	Remarks
Overall Goal (Long-term objective) Training by the trained instructors is sustainably conducted for officers of air navigation services.	Number of officers who have successfully completed the improved/developed training courses for each year	- Training records			
Project Purpose (Objective at the end of the Project) Trainings for air navigation services are implemented to effectively utilize the improved air navigation facilities.	Number of instructors who can conduct the improved/developed training courses (fulltime + part time) ATC/FIS: 6 (1) AIS: 4 (1) Electronic Eng.: 4 (1) E/M Eng.: 4 (1) Number in () indicates current situation. - Comprehension test score of trainees who receive the improved/ developed training courses exceeds at least XXX %. (Target value "XXX %" will be set with the results of a baseline survey.)	- Project Progress Reports - Terminal Evaluation Report	 Trained counterpart personnel continue to be engaged in the activities of air navigation services. No major change in the national policy on air navigation services within the national plan/ strategy is occurred. 		
Outputs (Objectives to be realized by Activities to achieve the Project Purpose) 1. Training of Air Traffic Control (ATC) and Flight Information Services (FIS) is improved. 2. Training for Aeronautical Information Services (AIS) and Aeronautical Communication Services (ACS) is improved. 3. Training of Electronic Engineering is improved. 4. Training of Electrical/Mechanical Engineering (E/M Eng) is improved.	 Training syllabus and training materials are improved or developed for the following number of courses: ATC/FIS: 6 AIS/ACS: 2 Electronic Eng.: 6 E/M Eng.: 2 The following number of DCA officers successfully complete supervisor/ advanced/specialist training: Instructors: 10 ATC: 4 AIS: 4 ACS: 4 Aeronautical Cartography: 2 PANS/OPS: 2 ILS Maintenance: 4 Comprehension test score of trainees who receive the improved/ developed training courses exceeds at least XXX %. 	 Project Progress Reports Results of completion tests for supervisor/ advanced/specialist training courses 	- Trained counterpart personnel continue to be engaged in the activities of air navigation services. - No major change in the national policy on air navigation services within the national plan/ strategy is occurred.

RECORD OF DISCUSSIONS

ON

THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES

IN

THE REPUBLIC OF MALAWI

AGREED UPON BETWEEN

THE MINISTRY OF TRANSPORT AND PUBLIC WORKS

AND

JAPAN INTERNATIONAL COOPERATION AGENCY

Lilongwe, 13th January 2014

3

b

Katsuro Saito Chief Representative Malawi Office Japan International Cooperation Agency

Hon. Mohammed Sidik Mia, (MP) Minister of Transport and Public Works Government of Malawi

Based on the minutes of meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services (hereinafter referred to as "the Project") signed on 6 September 2013 between Department of Civil Aviation (hereinafter referred to as "DCA"), under the Ministry of Transport and Public Works, and Japan International Cooperation Agency (hereinafter referred to as "JICA"), JICA held a series of discussions with DCA and relevant organizations to develop a detailed plan of the Project.

Both parties agreed on the details of the Project and the main points discussed as described in Appendices 1 and 2 respectively.

Both parties also agreed that DCA, the counterpart to JICA, will be responsible for the implementation of the Project in cooperation with JICA, coordinate with other relevant organizations and ensure that the self-reliant operation of the Project is sustained during and after the implementation period in order to contribute toward social and economic development of the Republic of Malawi.

The Project will be implemented within the framework of the Agreement on Technical Cooperation signed on 1 March 2006 (hereinafter referred to as "the Agreement") and the Note Verbales to be exchanged between the Government of Japan (hereinafter referred to as "GOJ") and the Government of the Republic of Malawi (hereinafter referred to as "GOM").

Appendix 1: Project Description

. . .

- Appendix 2: Main Points Discussed
- Appendix 3: Minutes of Meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services

PROJECT DESCRIPTION

Both parties confirmed that there is no change in the Project Description agreed on in the minutes of meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services signed on 6 September 2013 (Appendix 3).

I. BACKGROUND

Department of Civil Aviation (hereinafter referred to as "DCA") has the mandate to inter alia regulate and facilitate the development of airports and air navigation facilities. Kamuzu International Airport (hereinafter referred to as "KIA") was inaugurated in 1983 after the capital city was transferred from Zomba to Lilongwe. The Government of Japan (hereinafter referred to as "GOJ") provided Japanese ODA loans for the construction of the airport terminal building and installation of air navigation facilities from 1977 to 1982 in three phases. Recently, GOJ also provided a grant aid for the replacement of new navigation systems.

However, DCA faces serious shortage of trained staff for KIA as well as for the other airports in the Republic of Malawi. Upgrading of training for current air navigation staff is also deemed necessary to keep up with technological progress in air navigation services.

DCA, in recognition of these issues, plans to strengthen its training functions in order to utilize air navigation facilities in compliance with international standards and to secure sustainability in operation and maintenance of air navigation facilities, and requested GOJ for the implementation of the Project for Capacity Development in Air Navigation Services.

II. OUTLINE OF THE PROJECT

Details of the Project are described in the Logical Framework (Project Design Matrix: PDM) (Annex 1) and the tentative Plan of Operation (Annex 2).

1. Input

- (1) Input by JICA
 - (a) Dispatch of Experts
 - Chief Advisor/Training Manager
 - Air Traffic Controller (ATC) Training Specialist
 - Aeronautical Information Service (AIS) Training Specialist
 - Communications, Navigation and Surveillance (CNS) Maintenance Training Specialist
 - Electrical/Mechanical Maintenance Training Specialist
 - Flight Procedure Design Specialist
 - Others as necessary

- (b) Overseas Trainings
- (c) Machinery and Equipment
 - Training equipment

In case of importation, the machinery, equipment and other materials under II-1 (1) (c) above will become the property of GOM upon being delivered C.I.F. (cost, insurance and freight) to the Republic of Malawi authorities concerned at the ports and/or airports of disembarkation.

Input other than indicated above will be determined through mutual consultations between JICA and DCA during the implementation of the Project, as necessary.

(2) Input by DCA

DCA will take necessary measures to provide at its own expense:

- (a) Services of DCA's counterpart personnel and administrative personnel as referred to in II-2;
- (b) Suitable office space with necessary equipment;
- (c) Supply or replacement of machinery, equipment, instruments, vehicles, tools, spare parts and any other materials necessary for the implementation of the Project other than the equipment provided by JICA;
- (d) Information as well as support in obtaining medical service;
- (e) Credentials or identification cards;
- (f) Available data (including maps and photographs) and information related to the Project;
- (g) Running expenses necessary for the implementation of the Project including the project office expenses and travel expenses of DCA staff within the Republic of Malawi;
- (h) Expenses necessary for transportation within the Republic of Malawi of the equipment referred to in II-1 (1) as well as for the installation, operation and maintenance thereof; and
- (i) Necessary facilities to JICA experts for the remittance as well as utilization of the funds introduced into the Republic of Malawi from Japan in connection with the implementation of the Project

2. Implementation Structure

The Project organization chart is given in the Annex 3. The roles and assignments of relevant organizations are as follows:

1) DCA

- (a) Director, DCA, as the Project Director, will bear overall responsibility for the administration and implementation of the Project.
- (b) Deputy Director, DDCA (Operations), as the Project Manager, will be responsible for the managerial and technical matters of the Project.
- (c) Principal, School of Aviation, DCA, as the Co-Project Manager, will be responsible for the managerial and technical matters of the Project.
- (d) The Project Coordinators, Heads of Divisions, DCA, will assist the Project Manager for respective fields of management.
- (2) JICA Experts

*

٠

ţ

The JICA experts will give necessary technical guidance, advice and recommendations to DCA on any matters pertaining to the implementation of the Project.

(3) Joint Coordinating Committee

Joint Coordinating Committee (hereinafter referred to as "JCC") will be established in order to facilitate inter-organizational coordination. JCC will be held at least once a year and whenever deems it necessary. JCC will approve an annual work plan, review overall progress, conduct monitoring and evaluation of the Project, and exchange opinions on major issues that arise during the implementation of the Project. A list of proposed members of JCC is shown in the Annex 4.

3. Project Site(s) and Beneficiaries

The project sites are DCA, School of Aviation, airports and relevant facilities. Beneficiaries of the Project are Air Traffic Controllers, Flight Information Officers, AIS Officers, Aeronautical Communication Officers, Electronic Engineers and Electrical/Mechanical Engineers of DCA. The Project will benefit airlines and air travelling passengers flying Malawi airspaces.

4. Duration

The duration of the technical cooperation for the Project under the attached documents will be two (2) years from the date of arrival of the first expert.

5. Reports

DCA and JICA experts will jointly prepare the following reports in English.

- (1) Progress reports on semiannual basis until the project completion.
- (2) Project completion reports at the time of project completion.
- 6. Environmental and Social Considerations

ICCA agreed to libide by IICA Guidelines for Environmental and Social Considerations in

· C.

order to ensure that appropriate considerations will be made for the environmental and social impacts of the Project.

III. UNDERTAKINGS OF DCA AND GOM

DCA and GOM will take necessary measures to;

- (1) ensure that the technologies and knowledge acquired by the Republic of Malawi nationals as a result of Japanese technical cooperation contributes to the economic and social development of the Republic of Malawi, and that the knowledge and experience acquired by the personnel of the Republic of Malawi from technical training as well as the equipment provided by JICA will be utilized effectively in the implementation of the Project; and
- (2) grant privileges, exemptions and benefits to JICA experts referred to in II-1 (1) (a) above and their families, which are no less favorable than those granted to experts and members of the missions and their families of third countries or international organizations performing similar missions in the Republic of Malawi.

Other privileges, exemptions and benefits will be provided in accordance with the Agreement on Technical Cooperation signed on 1 March 2006 between the Government of Japan and GOM.

IV. EVALUATION

. •

÷

JICA and DCA will jointly conduct the Terminal evaluation during the last six (6) months of the cooperation term.

Subsequently JICA will conduct the following evaluations and surveys to mainly verify sustainability and impact of the Project and draw lessons. DCA is required to provide necessary support for them.

- 1. Ex-post evaluation three (3) years after the project completion, in principle
- 2. Follow-up surveys on necessity basis

V. PROMOTION OF PUBLIC SUPPORT

For the purpose of promoting support for the Project, DCA will take appropriate measures to make the Project widely known to the people of the Republic of Malawi.

VI. MUTUAL CONSULTATION

JICA and DCA will consult each other whenever any major issues arise in the course of Project implementation.

VII. AMENDMENTS

The record of discussions may be amended by the minutes of meetings between JICA and DCA.

The minutes of meetings will be signed by authorized persons of each side who may be different from the signers of the record of discussions.

The Project for Capacity Development for Air Navigation Services Date: 6 September 2013 Project Design Matrix (PDM) Ver. 1.0 Target Group: Air Traffic Controllers, Flight Information Officers, Aeronautical

Target Group:Air Traffic Controllers, Flight Information Officers, Aeronautical
Information Services Officers, Aeronautical Communication Officers,
Electronic Engineers and Electrical/Mechanical Engineers of DCAImplementation Period:2 years from April 2014

Narrative Summary	Performance Targets/ Indicators	Data Source/ Reporting Mechanism	Assumptions and Risks
Overall Goal (Long-term objective) Training by the trained instructors is sustainably conducted for officers of air navigation services.	Number of officers who have successfully completed the improved/developed training courses for each year	- Training records	
Project Purpose (Objective at the end of the Project)			
Trainings for air navigation services are implemented to effectively utilize the improved air navigation facilities.	 Number of instructors who can conduct the improved/developed training courses (fulltime + part time) ATC/FIS: 6 (1) AIS: 4 (1) ACS: 4 (1) Electronic Eng.: 4 (1) E/M Eng.: 4 (1) E/M Eng.: 4 (1) Comprehension test score of trainees who receive the improved/ developed training courses exceeds at least XXX %. (Target value "XXX %" will be set with the results of a baseline survey.) 	 Project Progress Reports Terminal Evaluation Report 	 Trained counterpart personnel continue to be engaged in the activities of air navigation services. No major change in the national policy on air navigation services within the national plan/ strategy is occurred.
Outputs (Objectives to be realized by Activities to achieve the Project Purpose)			
 Training of Air Traffic Control (ATC) and Flight Information Services (FIS) is improved. Fraining for Example 4 	 Training syllabus and training materials are improved or developed for the following number of courses: MC FIS 6 MS ACS 	 Project Progress Reports 	 No major change of the international standards on air navigation arvices is occurred

MAIN POINTS DISCUSSED

This part of the R/D notes remarkable issues for the implementation of the Project that were confirmed by DCA and JICA through the discussions during the Detailed Planning Survey in August and September 2013.

1. Training of Instructors and Improvement of Training Courses

The Malawi taskforce members with assistance of JICA experts will implement training of instructors and improvement of training courses at School of Aviation for the following subjects.

- 1.1 Training of Air Traffic Controllers and Flight Information Officers
 - (a) Basic Training for Air Traffic Controllers
 - (b) Aerodrome Control Services
 - (c) Procedural Approach Control Services
 - (d) Procedural Area Control Services
 - (e) New CNS/ATM Technology for Air Traffic Controllers
 - (f) Basic Training for Flight Information Officers
- 1.2 Training of Aeronautical Information and Communication Services Officers
 - (a) Basic Training for AIS Officers
 - (b) Basic Training for Aeronautical Communication Officers
- 1.3 Training of Electronic Engineers
 - (a) General Communication Maintenance
 - (b) Concept Courses for ILS, DVOR, DME and Radar
 - (c) Maintenance Course for Park Air VHF
 - (d) Maintenance Courses for Normarc ILS
 - (e) Maintenance Courses for Maru DVOR/DME
 - (f) New CNS/ATM Technology for Electronic Engineers
- 1.4 Training of Electrical/Mechanical Engineers
 - (a) Concept Course for Airfield Lighting System
 - (b) Concept Course for Uninterrupted Power Supply System (UPSS)
- 2. Instructors

___**∳** - *

e m

DCA will assign the flowing instructors for the implementation of the Project.

Areas of Specialization	Instructors
Air Traffic Services (ATC and FIS)	3 full-time and 3 part-time and OJT
AIS and Aeronautical Communication Services	4 full-time
Electronic Engineering	2 full-time and 2 part-time
Electrical/Mechanical Engineering	2 full-time and 2 part-time

3. New Students to School of Aviation

DCA will train the following number of students for which basic training will be undertaken at the School of Aviation.

Areas of Specialization	Number	Start of Training
Air Traffic Controllers	12	October 2015
Flight Information Officers	8	October 2014
AIS Officers	10	October 2014
Aeronautical Communication Officers	6	October 2014
Electronic Engineers	8	January 2014
Electrical/Mechanical Engineers	2/2	March 2014

4. Overseas Training

Based on the assessment of HRD needs in DCA's air navigation services, the following were identified for training of instructors, supervisors and specialists. These training needs are efficiently conducted at overseas training institutes of ATNS Aviation Academy in South Africa, East Africa School of Aviation (EASA) in Kenya and others. JICA does not commit the implementation of those specialized training at this stage, but will make best effort to meet the needs of DCA for effective implementation of the Project.

Training Subjects	Number of Trainees	Probable Venue
Instructor Development Program (Train the Trainer Course)	10	EASA/ATNS
Supervisor Training for Air Traffic Controllers (Team Resource Management)	4	ATNS
Supervisor/Advanced Training for AIS Officers	4	ATNS
Supervisor/Advanced Training for Aeronautical Communication Officers	4	EASA
Aeronautical Cartography (Aeronautical Charts)	2	EASA/ATNS
PANS/OPS Instrument Procedure Design Conventional Flight Procedures	2	EASA
Maintenance of Normarc ILS 7013B/7033B	-4	Tbd

The selection of trainees of the above courses will require consensus between DCA and JICA

4.2

experts, and those trainees who have completed the above courses should conduct echo seminar or cascade training to share the knowledge and skills obtained through the training to relevant DCA officers.

5. Training Equipment

JICA will provide the following equipment for the implementation of the Project:

- (a) PC-based Simulator Training System for Air Traffic Controllers
- (b) Computer Based Training (ATC)
- (c) Test Instrument and equipment such as Oscilloscope, Digital Multi-Meter, Frequency Counter, RF Power Meter, Level Meter, Function Generator, Spectrum Analyzer, etc.
- (d) Learning Aids and Office Equipment such as Personal Computer, Copier/Printer/ Scanner, Projector, Network Equipment, Voltage Regulator, etc.
- 6. Update of Manuals of Air Traffic Services and CNS Equipment Maintenance Procedures

DCA will update the Manual of Air Traffic Services and the CNS Equipment Maintenance Procedures by the middle of 2014 as it is an important reference material for training for various air navigation services.

7. Project Office

DCA will provide Project office space at School of Aviation or wherever may seem necessary. The office space should accommodate 6 desks and chairs and other office facilities, and have access to internet. DCA will also provide air-conditioners for the Project office and simulator training rooms.

8. PBN Flight Procedure Design Training

JICA organizes a PBN Flight Procedure Design Training Course in Tokyo every year. Flight procedure designers, who will successfully complete PANS/OPS Instrument Procedure Design Training under this Project, are expected to apply for the PBN training in Japan.

d

MINUTES OF MEETING

THE DETAILED PLANNING SURVEY ON THE JAPANESE TECHNICAL COOPERATION FOR THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES

The Government of the Republic of Malawi (hereinafter referred to as "GOM") made an official request to the Government of Japan (hereinafter referred to as "GOJ) for the Project for Capacity Development for Air Traffic Safety in August 2010.

In response to the request, the Japan International Cooperation Agency (hereinafter referred to as "JICA") dispatched a detail planning survey team (hereinafter referred to as "the feam") headed by Mr. Hiroyuki UEDA, Senior Advisor on Transport Sector, to the Republic of Malawi from 25 August to 11 September 2013.

During its stay, both the Team and authorities of GOM concerned had a series of discussions and exchanged views on the Project based on the field observations at various air navigation facilities. Both Japanese and Malawi sides also held meetings to prepare the drafts of the Record of Discussions (R/D), the Project Design Matrix (PDM) and the Plan of Operation (PO) of the Project.

As a result of the discussions, both sides agreed to the matters referred to in the documents attached hereto.

Lilongwe, 6 September 2013

Hirosoki Cada

Ecader (7) Defailed Planning Survey Team (i) an Interactional Cooperation Agency (IICA) (7)

Alfred C. Mtilatila Director of Civil Aviation Department of Civil Aviation (DCA) The Government of the Republic of Malawi

I. Title of the Project

Both sides confirmed that the title of the Project should be "the Project for Capacity Development for Air Navigation Services" (hereinafter referred to as "the Project"). Both sides confirmed to undertake necessary actions to formalize the title of the Project with relevant government authorities.

11. Draft PDM and PO

The drafts of the PDM and the PO of the Project were prepared in consultation of stakeholders and through meetings as attached in Appendices I and II. The PDM and the PO will be used as a management tool of the Project, and will be finalized by the time of signing of the R/D.

III. Draft Record of Discussions (R/D)

The draft R/D, as the official document which defines the contents of a technical cooperation project, was prepared and agreed through a series of discussions as attached in Appendix III. The draft R/D will be finalized in the course of further consultations towards the signing.

IV. Provisional Schedule until the Project Commencement

- (1) Signing on the R/D in October 2013
- (2) Commencement of the Project in March 2014

# RECORD OF DISCUSSIONS ON THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES IN THE REPUBLIC OF MALAWI

### AGREED UPON BETWEEN

# THE DEPARTMENT OF CIVIL AVIATION AND JAPAN INTERNATIONAL COOPERATION AGENCY

Lilongwe, xxx October 2013

Katsuro Saito Chief Representative Malawi Office Double Committional Cooperation Agency

Alfred C. Mtilatila Director Department of Civil Aviation (DCA) The Government of Malawi

المتحد فارالعوه

ANNEX 4(1

Based on the minutes of meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services (hereinafter referred to as "the Project") signed on 6 September 2013 between Department of Civil Aviation (hereinafter referred to as "DCA") and Japan International Cooperation Agency (hereinafter referred to as "JICA"), JICA held a series of discussions with DCA and relevant organizations to develop a detailed plan of the Project.

Both parties agreed on the details of the Project and the main points discussed as described in Attachments 1 and 2 respectively.

Both parties also agreed that DCA, the counterpart to JICA, will be responsible for the implementation of the Project in cooperation with JICA, coordinate with other relevant organizations and ensure that the self-reliant operation of the Project is sustained during and after the implementation period in order to contribute toward social and economic development of the Republic of Malawi.

The Project will be implemented within the framework of the Agreement on Technical Cooperation signed on 1 March 2006 (hereinafter referred to as "the Agreement") and the Note Verbales to be exchanged between the Government of Japan (hereinafter referred to as "GOJ") and the Government of the Republic of Malawi (hereinafter referred to as "GOM").

Attachment 1: Project Description

- 22-

- Attachment 2: Main Points Discussed
- Attachment 3: Minutes of Meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services

### Attachment 1 to the R/D

#### PROJECT DESCRIPTION

Both parties confirmed that there is no change in the Project Description agreed on in the minutes of meetings on the Detailed Planning Survey on the Project for Capacity for Air Navigation Services signed on 6 September 2013 (Attachment 3).

#### I. BACKGROUND

.

.

Department of Aviation (DCA) has the mandate to inter alia regulate and facilitate the development of airports and air navigation facilities. Kamuzu International Airport (KIA) was inaugurated in 1983 after the capital city was transferred from Zomba to Lilongwe. The Government of Japan (GOJ) supported the Government of Malawi (GOM) with Japanese Yen loan for the construction of the airport terminal building and installation of air navigation facilities from 1977 to 1982 in three phases. Recently, GOJ also implemented a grant aid project for the replacement of new navigation systems.

However, DCA faces serious shortage of trained staff for KIA as well as for other airports in Malawi. Upgrading of training for existing air navigation staff is also deemed necessary to up with technological progress in air navigation services.

DCA, in recognition of these issues, plans to strengthen its training functions in order to best utilize air navigation facilities in compliance with international standards and to secure sustainability in operation and maintenance of air navigation facilities, and requested GOJ for the implementation of the Project for Capacity Development in Air Navigation Services.

# II. OUTLINE OF THE PROJECT

Details of the Project are described in the Logical Framework (Project Design Matrix: PDM) (Annex 1) and the tentative Plan of Operation (Annex 2).

1. Input

(1) Input by JICA

(a) Dispatch of Experts

Chief Advisor/Training Manager

ATC Training Specialist

AIS Training Specialist

CNS Maintenance Training Specialist

Electrical/Mechanical Maintenance Training Specialist

Thers as necessary

Second Contracts

- (c) Machinery and Equipment
  - Training equipment

In case of importation, the machinery, equipment and other materials under II-1 (1) (c) above will become the property of GOM upon being delivered C.I.F. (cost, insurance and freight) to the Republic of Malawi authorities concerned at the ports and/or airports of disembarkation.

Input other than indicated above will be determined through mutual consultations between JICA and DCA during the implementation of the Project, as necessary.

(2) Input by DCA

.

.

DCA will take necessary measures to provide at its own expense:

- (a) Services of DCA's counterpart personnel and administrative personnel as referred to in II-2;
- (b) Suitable office space with necessary equipment;
- (c) Supply or replacement of machinery, equipment, instruments, vehicles, tools, spare parts and any other materials necessary for the implementation of the Project other than the equipment provided by JICA;
- (d) Information as well as support in obtaining medical service;
- (e) Credentials or identification cards;
- (f) Available data (including maps and photographs) and information related to the Project;
- (g) Running expenses necessary for the implementation of the Project including the project office expenses and travel expenses of DCA staff within Malawi;
- (h) Expenses necessary for transportation within the Republic of Malawi of the equipment referred to in II-1 (1) as well as for the installation, operation and maintenance thereof; and
- (i) Necessary facilities to JICA experts for the remittance as well as utilization of the funds introduced into the Republic of Malawi from Japan in connection with the implementation of the Project

#### 2. implementation Structure

The Project organization chart is given in the Annex 3. The roles and assignments of relevant organizations are as follows:

(1) DCA

a) Director DCA, as the Project Director, will bear overall responsibility for the connistration and implementation of the Project.

- Company

n este stra es

- (b) Deputy Director, DDCA (Operations), as the Project Manager, will be responsible for the managerial and technical matters of the Project.
- (c) Principal, School of Aviation, DCA, as the Co-Project Manager, will be responsible for the managerial and technical matters of the Project.
- (d) The Project Coordinators, Heads of Divisions, will assist the Project Manager for respective fields of management.

#### (2) JICA Experts

4

.

The JICA experts will give necessary technical guidance, advice and recommendations to DCA on any matters pertaining to the implementation of the Project.

(3) Joint Coordinating Committee

Joint Coordinating Committee (hereinafter referred to as "JCC") will be established in order to facilitate inter-organizational coordination. JCC will be held at least once a year and whenever deems it necessary. JCC will approve an annual work plan, review overall progress, conduct monitoring and evaluation of the Project, and exchange opinions on major issues that arise during the implementation of the Project. A list of proposed members of JCC is shown in the Annex 4.

#### 3. Project Site(s) and Beneficiaries

The project sites are DCA, School of Aviation, airports and relevant facilities. Beneficiaries of the Project are Air Traffic Controllers, Flight Information Officers, Aeronautical Information Services Officers, Aeronautical Communication Officers, Electronic Engineers and Electrical/Mechanical Engineers of DCA. The Project will benefit airlines and air travelling passengers flying Malawi airspaces.

#### 4. Duration

The duration of the technical cooperation for the Project under the Attached Documents will be two (2) years from the date of arrival of the first expert.

#### 5. Reports

DCA and JICA experts will jointly prepare the following reports in English.

- (1) Progress reports on semiannual basis until the project completion.
- (2) Project completion reports at the time of project completion.

# 6. Environmental and Social Considerations

OCA agreed to abide by 'JICA Guidelines for Environmental and Social Considerations' in other to ensure that appropriate considerations will be made for the environmental and social oddts of the Project.

# III. UNDERTAKINGS OF DCA AND GOM

DCA and GOM will take necessary measures to;

- (1) ensure that the technologies and knowledge acquired by the Republic of Malawi nationals as a result of Japanese technical cooperation contributes to the economic and social development of the Republic of Malawi, and that the knowledge and experience acquired by the personnel of the Republic of Malawi from technical training as well as the equipment provided by JICA will be utilized effectively in the implementation of the Project; and
- (2) grant privileges, exemptions and benefits to JICA experts referred to in II-1 (1) (a) above and their families, which are no less favorable than those granted to experts and members of the missions and their families of third countries or international organizations performing similar missions in the Republic of Malawi.

Other privileges, exemptions and benefits will be provided in accordance with the Agreement on Technical Cooperation signed on 1 March 2006 between the Government of Japan and GOM.

#### IV. EVALUATION

JICA and DCA will jointly conduct the Terminal evaluation during the last six (6) months of the cooperation term

JICA will conduct the following evaluations and surveys to mainly verify sustainability and impact of the Project and draw lessons. DCA is required to provide necessary support for them.

- 1 Ex-post evaluation three (3) years after the project completion, in principle
- 2. Follow-up surveys on necessity basis

# V. PROMOTION OF PUBLIC SUPPORT

For the purpose of promoting support for the Project, DCA will take appropriate measures to make the Project widely known to the people of the Republic of Malawi.

#### VI. MUTUAL CONSULTATION

JICA and DCA will consult each other whenever any major issues arise in the course of Project implementation.

#### VII. AMENDMENTS

The record of discussions may be amended by the minutes of meetings between JICA and OCA

a manage of meetings will be signed by authorized persons of each side who may be received in the express of the lecond of tiscussions.

Both sides confirmed to undertake necessary actions to formalize the title of the Project with relevant government authorities.

### II. Draft PDM and PO

The drafts of the PDM and the PO of the Project were prepared in consultation of stakeholders and through meetings as attached in Appendices I and II. The PDM and the PO will be used as a management tool of the Project, and will be finalized by the time of signing of the R/D.

### III. Draft Record of Discussions (R/D)

The draft R/D, as the official document which defines the contents of a technical cooperation project, was prepared and agreed through a series of discussions as attached in Appendix III. The draft R/D will be finalized in the course of further consultations towards the signing.

### IV. Provisional Schedule until the Project Commencement

- (1) Signing on the R/D in October 2013
- (2) Commencement of the Project in March 2014

### Appendices

Appendix I: Project Design Matrix (PDM)

Appendix II: Tentative Plan of Operation (PO)

# RECORD OF DISCUSSIONS ON THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES IN

THE REPUBLIC OF MALAWI

# AGREED UPON BETWEEN

# THE DEPARTMENT OF CIVIL AVIATION AND JAPAN INTERNATIONAL COOPERATION AGENCY

Lilongwe, xxx October 2013

Katsuro Saito Chief Representative Malawi Office Japan International Cooperation Agency

Alfred C. Mtilatila Director Department of Civil Aviation (DCA) The Government of Malawi

Based on the minutes of meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services (hereinafter referred to as "the Project") signed on 6 September 2013 between Department of Civil Aviation (hereinafter referred to as "DCA") and Japan International Cooperation Agency (hereinafter referred to as "JICA"), JICA held a series of discussions with DCA and relevant organizations to develop a detailed plan of the Project.

Both parties agreed on the details of the Project and the main points discussed as described in Attachments 1 and 2 respectively.

Both parties also agreed that DCA, the counterpart to JICA, will be responsible for the implementation of the Project in cooperation with JICA, coordinate with other relevant organizations and ensure that the self-reliant operation of the Project is sustained during and after the implementation period in order to contribute toward social and economic development of the Republic of Malawi.

The Project will be implemented within the framework of the Agreement on Technical Cooperation signed on 1 March 2006 (hereinafter referred to as "the Agreement") and the Note Verbales to be exchanged between the Government of Japan (hereinafter referred to as "GOJ") and the Government of the Republic of Malawi (hereinafter referred to as "GOM").

- Attachment 1: Project Description
- Attachment 2: Main Points Discussed
- Attachment 3: Minutes of Meetings on the Detailed Planning Survey on the Project for Capacity Development for Air Navigation Services

# Attachment 1 to the R/D

# PROJECT DESCRIPTION

Both parties confirmed that there is no change in the Project Description agreed on in the minutes of meetings on the Detailed Planning Survey on the Project for Capacity for Air Navigation Services signed on 6 September 2013 (Attachment 3).

# I. BACKGROUND

Department of Aviation (DCA) has the mandate to inter alia regulate and facilitate the development of airports and air navigation facilities. Kamuzu International Airport (KIA) was inaugurated in 1983 after the capital city was transferred from Zomba to Lilongwe. The Government of Japan (GOJ) supported the Government of Malawi (GOM) with Japanese Yen loan for the construction of the airport terminal building and installation of air navigation facilities from 1977 to 1982 in three phases. Recently, GOJ also implemented a grant aid project for the replacement of new navigation systems.

However, DCA faces serious shortage of trained staff for KIA as well as for other airports in Malawi. Upgrading of training for existing air navigation staff is also deemed necessary to up with technological progress in air navigation services.

DCA, in recognition of these issues, plans to strengthen its training functions in order to best utilize air navigation facilities in compliance with international standards and to secure sustainability in operation and maintenance of air navigation facilities, and requested GOJ for the implementation of the Project for Capacity Development in Air Navigation Services.

# II. OUTLINE OF THE PROJECT

Details of the Project are described in the Logical Framework (Project Design Matrix: PDM) (Annex 1) and the tentative Plan of Operation (Annex 2).

- 1. Input
  - (1) Input by JICA
    - (a) Dispatch of Experts
      - Chief Advisor/Training Manager
      - ATC Training Specialist
      - AIS Training Specialist
      - CNS Maintenance Training Specialist
      - Electrical/Mechanical Maintenance Training Specialist
      - Others as necessary
    - (b) Overseas Trainings

- (c) Machinery and Equipment
  - Training equipment

In case of importation, the machinery, equipment and other materials under II-1 (1) (c) above will become the property of GOM upon being delivered C.I.F. (cost, insurance and freight) to the Republic of Malawi authorities concerned at the ports and/or airports of disembarkation.

Input other than indicated above will be determined through mutual consultations between JICA and DCA during the implementation of the Project, as necessary.

(2) Input by DCA

DCA will take necessary measures to provide at its own expense:

- (a) Services of DCA's counterpart personnel and administrative personnel as referred to in II-2;
- (b) Suitable office space with necessary equipment;
- (c) Supply or replacement of machinery, equipment, instruments, vehicles, tools, spare parts and any other materials necessary for the implementation of the Project other than the equipment provided by JICA;
- (d) Information as well as support in obtaining medical service;
- (e) Credentials or identification cards;
- (f) Available data (including maps and photographs) and information related to the Project;
- (g) Running expenses necessary for the implementation of the Project including the project office expenses and travel expenses of DCA staff within Malawi;
- (h) Expenses necessary for transportation within the Republic of Malawi of the equipment referred to in II-1 (1) as well as for the installation, operation and maintenance thereof; and
- Necessary facilities to JICA experts for the remittance as well as utilization of the funds introduced into the Republic of Malawi from Japan in connection with the implementation of the Project
- 2. Implementation Structure

The Project organization chart is given in the Annex 3. The roles and assignments of relevant organizations are as follows:

- (1) DCA
  - (a) Director, DCA, as the Project Director, will bear overall responsibility for the administration and implementation of the Project.

- (b) Deputy Director, DDCA (Operations), as the Project Manager, will be responsible for the managerial and technical matters of the Project.
- (c) Principal, School of Aviation, DCA, as the Co-Project Manager, will be responsible for the managerial and technical matters of the Project.
- (d) The Project Coordinators, Heads of Divisions, will assist the Project Manager for respective fields of management.

# (2) JICA Experts

The JICA experts will give necessary technical guidance, advice and recommendations to DCA on any matters pertaining to the implementation of the Project.

(3) Joint Coordinating Committee

Joint Coordinating Committee (hereinafter referred to as "JCC") will be established in order to facilitate inter-organizational coordination. JCC will be held at least once a year and whenever deems it necessary. JCC will approve an annual work plan, review overall progress, conduct monitoring and evaluation of the Project, and exchange opinions on major issues that arise during the implementation of the Project. A list of proposed members of JCC is shown in the Annex 4.

3. Project Site(s) and Beneficiaries

The project sites are DCA, School of Aviation, airports and relevant facilities. Beneficiaries of the Project are Air Traffic Controllers, Flight Information Officers, Aeronautical Information Services Officers, Aeronautical Communication Officers, Electronic Engineers and Electrical/Mechanical Engineers of DCA. The Project will benefit airlines and air travelling passengers flying Malawi airspaces.

4. Duration

The duration of the technical cooperation for the Project under the Attached Documents will be two (2) years from the date of arrival of the first expert.

5. Reports

DCA and JICA experts will jointly prepare the following reports in English.

- (1) Progress reports on semiannual basis until the project completion.
- (2) Project completion reports at the time of project completion.
- 6. Environmental and Social Considerations

DCA agreed to abide by 'JICA Guidelines for Environmental and Social Considerations' in order to ensure that appropriate considerations will be made for the environmental and social impacts of the Project.

# III. UNDERTAKINGS OF DCA AND GOM

DCA and GOM will take necessary measures to;

- (1) ensure that the technologies and knowledge acquired by the Republic of Malawi nationals as a result of Japanese technical cooperation contributes to the economic and social development of the Republic of Malawi, and that the knowledge and experience acquired by the personnel of the Republic of Malawi from technical training as well as the equipment provided by JICA will be utilized effectively in the implementation of the Project; and
- (2) grant privileges, exemptions and benefits to JICA experts referred to in II-1 (1) (a) above and their families, which are no less favorable than those granted to experts and members of the missions and their families of third countries or international organizations performing similar missions in the Republic of Malawi.

Other privileges, exemptions and benefits will be provided in accordance with the Agreement on Technical Cooperation signed on 1 March 2006 between the Government of Japan and GOM.

# IV. EVALUATION

JICA and DCA will jointly conduct the Terminal evaluation during the last six (6) months of the cooperation term

JICA will conduct the following evaluations and surveys to mainly verify sustainability and impact of the Project and draw lessons. DCA is required to provide necessary support for them.

- 1. Ex-post evaluation three (3) years after the project completion, in principle
- 2. Follow-up surveys on necessity basis

# V. PROMOTION OF PUBLIC SUPPORT

For the purpose of promoting support for the Project, DCA will take appropriate measures to make the Project widely known to the people of the Republic of Malawi.

# VI. MUTUAL CONSULTATION

JICA and DCA will consult each other whenever any major issues arise in the course of Project implementation.

# VII. AMENDMENTS

The record of discussions may be amended by the minutes of meetings between JICA and DCA.

The minutes of meetings will be signed by authorized persons of each side who may be different from the signers of the record of discussions.

- Annex 1: Logical Framework (Project Design Matrix: PDM)
- Annex 2: Tentative Plan of Operation (PO)
- Annex 3: Project Organization Chart
- Annex 4: A List of Proposed Members of Joint Coordinating Committee

Annex 1 to the Project Descriptions: Project Design Matrix (PDM)

(PDM in the Minutes of Meeting with necessary modifications agreed between JICA and DCA will be here)

fro

Annex 2 to the Project Descriptions: Tentative Plan of Operation (PO)

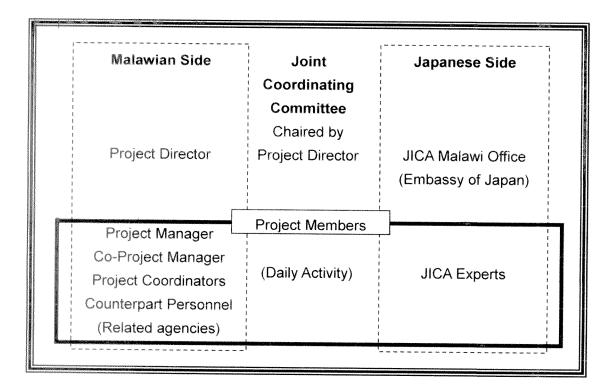

(Tentative PO in the Minutes of Meeting with necessary modifications agreed between JICA and DCA will be here)

# Annex 3 to the Project Descriptions: Organization Chart

The Project will be implemented by DCA in cooperation with JICA. The Project Organization Chart indicating joint implementation structure is shown below:

# Joint Implementation Structure of the Project

# Annex 4: A List of Proposed Members of Joint Coordinating Committee

Chairperson and members of the JCC will be as follows:

- 1) Chairperson
- Director, Department of Civil Aviation (DCA)
- 2) Members from the Malawian Side
- Deputy Director, DDCA (Operations)
- Principal, School of Aviation, DCA
- Project Coordinators
- Members of the Counterpart Teams
- Heads of Relevant Sections
- Personnel concerned to be decided by the Malawian Side
- 3) Members from the Japanese Side
  - Japanese Experts
  - Chief Representative, JICA Malawi Office
  - Personnel concerned to be decided by the Japanese Side
- 4) Others
  - Officials of the Embassy of Japan in Malawi may attend the meeting as observers.
  - Persons who are invited by the Chairperson may attend the meeting as observers.

# Attachment 2 to the R/D

# MAIN POINTS DISCUSSED

This part of the R/D notes remarkable issues for the implementation of the Project that were confirmed by DCA and JICA through the discussions during the Detailed Planning Survey in August 2013.

1. Training of Instructors and Improvement of Training Courses

The Malawi taskforce members with assistance of JICA experts will implement training of instructors and improvement of training courses at School of Aviation for the following subjects.

- 1.1 Training of Air Traffic Controllers and Flight Information Officers
  - (a) Basic Training for Air Traffic Controllers
  - (b) Aerodrome Control Services
  - (c) Procedural Approach Control Services
  - (d) Procedural Area Control Services
  - (e) New CNS/ATM Technology for Air Traffic Controllers
  - (f) Basic Training for Flight Information Officers
- 1.2 Training of Aeronautical Information and Communication Services Officers
  - (a) Basic Training for AIS Officers
  - (b) Basic Training for Aeronautical Communication Officers
- 1.3 Training of Electronic Engineers
  - (a) General Communication Maintenance
  - (b) Concept Courses for ILS, DVOR, DME and Radar
  - (c) Maintenance Course for Park Air VHF
  - (d) Maintenance Courses for Normarc ILS
  - (e) Maintenance Courses for Maru DVOR/DME
  - (f) New CNS/ATM Technology for Electronic Engineers
- 1.4 Training of Electrical/Mechanical Engineers
  - (a) Concept Course for Airfield Lighting System
  - (b) Concept Course for Uninterrupted Power Supply System (UPSS)
- 2. Instructors

DCA will assign the flowing instructors for the implementation of the Project.

Areas of Specialization	Instructors
Air Traffic Services (ATC and FIS)	3 full-time and 3 part-time and OJT
AIS and Aeronautical Communication Services	4 full-time
Electronic Engineering	2 full-time and 2 part-time
Electrical/Mechanical Engineering	2 full-time and 2 part-time

#### 3. New Students to School of Aviation

DCA will train the following number of students for which basic training will be undertaken at the School of Aviation.

Areas of Specialization	Number	Start of Training
Air Traffic Controllers	12	October 2015
Flight Information Officers	8	October 2014
AIS Officers	10	October 2014
Aeronautical Communication Officers	6	October 2014
Electronic Engineers	8	January 2014
Electrical/Mechanical Engineers	2/2	March 2014

#### 4. Overseas Training

Based on the assessment of HRD needs in DCA's air navigation services, the following were identified for training of instructors, supervisors and specialists. These training needs are efficiently conducted at overseas training institutes of ATNS Aviation Academy in South Africa, East Africa School of Aviation (EASA) in Kenya and others. JICA does not commit the implementation of those specialized training at this stage, but will make best effort to meet the needs of DCA for effective implementation of the Project.

Training Subjects	Number of Trainees	Probable Venue
Instructor Development Program (Train the Trainer Course)	10	EASA/ATNS
Supervisor Training for Air Traffic Controllers (Team Resource Management)	4	ATNS
Supervisor/Advanced Training for AIS Officers	4	ATNS
Supervisor/Advanced Training for Aeronautical Communication Officers	4	EASA
Aeronautical Cartography (Aeronautical Charts)	2	EASA/ATNS
PANS/OPS Instrument Procedure Design – Conventional Flight Procedures	2	EASA
Maintenance of Normarc ILS 7013B/7033B	4	Tbd

The selection of trainees of the above courses will require consensus between DCA and JICA experts, and those trainees who have completed the above courses should conduct echo

seminar or cascade training to share the knowledge and skills obtained through the training to relevant DCA officers.

5. Training Equipment

JICA will provide the following equipment for the implementation of the Project:

- (a) PC-based Simulator Training System for Air Traffic Controllers
- (b) Computer Based Training (ATC)
- (c) Test Instrument and equipment such as Oscilloscope, Digital Multi-Meter, Frequency Counter, RF Power Meter, Level Meter, Function Generator, Spectrum Analyzer, etc.
- (d) Learning Aids and Office Equipment such as Personal Computer, Copier/Printer/ Scanner, Projector, Network Equipment, Voltage Regulator, etc.
- 6. Update of Manuals of Air Traffic Services and CNS Equipment Maintenance Procedures

DCA will update the Manual of Air Traffic Services and the CNS Equipment Maintenance Procedures by the middle of 2014 as it is an important reference material for training for various air navigation services.

#### 7. Project Office

DCA will provide Project office space at School of Aviation or wherever may seem necessary. The office space should accommodate 6 desks and chairs and other office facilities, and have access to internet. DCA will also provide air-conditioners for the Project office and simulator training rooms.

8. PBN Flight Procedure Design Training

JICA organizes a PBN Flight Procedure Design Training Course in Tokyo every year. Flight procedure designers, who will successfully complete PANS/OPS Instrument Procedure Design Training under this Project, are expected to apply for the PBN training in Japan.

- END -

#### (e) Attachment 3 to the R/D

(Minutes of Meetings on the Project for Capacity Development for Air Navigation Services signed on 6 September 2013 will be attached here)

for

# MINUTES OF MEETING OF THE FIRST JOINT COORDINATION COMMITTEE FOR THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES IN MALAWI BETWEEN THE GOVERNMENT OF THE REPUBLIC OF MALAWI AND JAPAN INTERNATIONAL COOPERATION AGENCY

The first meeting of the Joint Coordination Committee (hereinafter referred to as "JCC") for the Project for Capacity Development for Air Navigation Services for the Republic of Malawi (hereinafter referred to as the "Project") was held in Lilongwe on June 30, 2014.

The meeting was co-chaired by Mr. Iijima, a member of the JICA Malawi Office (hereinafter referred to as "JICA") and Mr. Matiya, Deputy Director General of Malawi Department of Civil Aviation (hereinafter referred to as "DCA"). The other attendants were representatives from JICA, the chief advisor of the Project, and Project team members. A list of participants is shown in Annex-1.

During the meeting, JICA proposed the use of a Monitoring Sheet to track the Project progress. The Monitoring Sheet will be used instead of reports for interim and final evaluation of Project progress. Other matters of the Project, and desirable actions to be taken by both Governments towards successful completion of the Project were discussed. A summary of discussions during the first JCC is shown in Annex-2. As a result of those discussions, an agreement was reached for Project matters listed in the attached.

Lilongwe, June 30, 2014

K. Jokuhashi

Mr. Kazuhiko Tokuhashi Chief Representative Malawi Office Japan International Cooperation Agency

for Acquinatinga

Mr. A.C. Mtilatila Project Director Director General Department of Civil Aviation Republic of Malawi

# Annex-1

# List of participants

Date: 30th June, 2014 Venue: DCA conference room Time; 09:50-10:35 Attendance:

#### DCA

Director of Civil Aviation; Mr. Alfred C. Mtilatila Deputy Director of Civil Aviation; Mr. A.G. Matiya Chief Aeronautical Telecommunications Engineer; Mr. M.F.T. Bongwe Ex-Principal for School of Aviation; Mr. R. Kanunkha Principal for School of Aviation; Mr. S. Galafa

#### JICA Malawi Office

Resident Representative; Mr. Kazuhiko Tokuhashi Project Formulation Advisor; Mr. Atsushi Iijima

# JICA Project Team

The Team Leader; Mr. Hiroshi Mizumasa Deputy Chief; Mr. Masayuki Takazawa Expert in CNS; Mr. Reynaldo A. Batacan Expert in ATS/AIS-1; Ms. Tomoko Kida Expert in ATS/AIS-2; Mr. Daniel P. Diggins

# Annex-2

# Summary of meeting and discussions

# 1) Kicked off the meeting by Mr. Matiya and confirmation of today's agenda

#### 2) Self-Introduction

#### 3) Opening remarks by Mr. Tokuhashi

#### 4) Project Briefing by Mr. Mizumasa

- Project Described each member's background, activity schedule and expected role and responsibilities. It was emphasized that JICA cannot provide Malawi human resources. JICA hoped that DCA aggressively pursue additional staff recruitment plans. Member's background and outline of activity schedule are shown in Attachment-1
- DCA Responded that they understand the issue and will do whatever possible to increase technical staffing.

#### A comment from Mr. Diggins (Project Team ATC/AIS Expert)

Initial ATM Assessment Resulted in Two Types of Recommendations

- a) Immediate Recommendations for DCA Consideration will achieve higher risk management and will provide a stable foundation for long term training recommendations below
- b) Long Term ATM Training Recommendations develop and deliver to DCA ICAO compliant ATM training course, including lesson plans, tests and practical exercises. Practical exercises will be both procedural and electronic simulator based.
- 5) Briefing on Amendment of Record of Discussion (hereinafter, R/D) by Mr. Iijima

JICA – JICA would like to suggest introducing Monitoring Sheet instead of a project evaluation form. As previously explained, a Monitoring Sheet has the same function as project evaluation and provides more functional information. We would like you to confirm the Amendment of Record of Discussion_o

DCA – Understood introducing Monitoring Sheet.

#### 6) Signing on the M/M to amend the R/D done by Mr. Matiya and Mr. Tokuhashi

#### 7) Any other business

# **Budget for coming fiscal years**

DCA - The provisionally budget for 2014-2015 allocated to DCA is around MK210 billion

- Project As is already discussed and mutually confirmed with written document, your effort to put high priority on the issues regarding to this Project is essential.
- DCA The budget for the School of Aviation will be set based on the demand from the Principal, and then the Director places all demands from each division together for final submission.

#### Human resource assignment in DCA

Project – 3 weeks have passed since the Project team arrived and began work. The team is still trying to construct an accurate organizational chart and personnel assignments. Please assist us in completing this task.

There is an opportunity to accomplish a successful meeting with all project stakeholders in July. We ask that that each DCA counterpart member be identified prior to that meeting. In addition, please confirm any special budgetary allocations by DCA for the project at that time. Please consider a DCA-only meeting, prior to the next JCC meeting, to discuss counterpart assignments and budgetary progress.

DCA-Agreed.

Project – We should set an agreed upon date for the next JCC, sometime in July. DCA – Agreed.

# How to proceed trainings for ILS, VOR and DME

DCA - Does the project provide training for ILS, VOR and DME?

Project – The project will provide the theoretical training for ILS, VOR and DME and maintenance training for specific equipment which DCA currently uses.

# VISA for team staff, Duty free procedure for purchasing training equipment

DCA -- Were team members successful in acquiring long-term VISA's?

Project – Yes, we received 2-year VISA's. Thank you for your support.

- DCA Duty free processing procedure for project supplied equipment will take at least 2-months. Please provide a detailed equipment list at least 2-months prior to arrival dates of equipment.
- Project Agreed. Currently equipment is scheduled to arrive in early November 2014. JICA will provide detailed equipment list as soon as possible.

(Confirm that Equipment list information will be sent from JICA Malawi Office)

#### Holding next JCC meeting

JICA – JICA proposed that the next JCC meeting be sponsored by DCA. DCA-Agreed.

8) Way forward and closing remarks by the Project Director, Mr. Alfred Mtilatila We express our appreciation and future support for the Project. We ask that JICA bring any concerns or questions to our staff or me. We believe the project will benefit Malawi aviation and extend our thank you for your assistance.

Attachment-1 : Project Summary (Member & Schedule)

# MINUTES OF MEETING OF THE SECOND JOINT COORDINATING COMMITTEE FOR THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES IN MALAWI BETWEEN THE GOVERNMENT OF THE REPUBLIC OF MALAWI AND THE JAPAN INTERNATIONAL COOPERATION AGENCY

The second meeting of the Joint Coordinating Committee (hereinafter referred to as "JCC") for the Project for Capacity Development for Air Navigation Services in the Republic of Malawi (hereinafter referred to as the "Project") was held in Lilongwe on August 1, 2014.

The meeting was co-chaired by Mr. Bongwe, Chief Aeronautical Telecommunications Engineer of Malawi Department of Civil Aviation (hereinafter referred to as "DCA") and Mr. Matiya, Deputy Director of Malawi DCA. Others in attendance were Program officer of the Japan International Cooperation Agency (hereinafter referred to as "JICA"), the chief advisor of the Project, and Project team members. A list of participants is shown in Attachment-1.

As a result of the discussions, both sides agreed to the matters in the documents attached as Attachment-2.

ZAS

# Attachment-2: Matters Agreed

#### 1) Approval of the Work Plan

The Project Team explained the Work Plan of the Project with PDM, Plan of Operations, and Project Achievement. The JCC in principle accepted the Work Plan as attached.

#### 2) Confirmation of the Instructor Nomination

DCA agreed to nominate new instructors to meet requirements of the Project as follows:

- six instructors for ATC/FIS;
- four instructors for AIS/ACS and possibly additional two for AIS/ACS;
- four instructors for Electronic Engineer; and
- two instructors for Electrical/Mechanical.

#### 3) Approval of updated PDM

DCA agreed on the updated PDM attached to the Work Plan as Annex-1.

#### 4) Confirmation of expense for domestic training/counterparts works

DCA confirmed that it will provide necessary expenses for transportation, accommodation and allowances for DCA staff for counterpart training or collaboration work conducted at the School of Aviation (SOA).

(Note: JICA will provide expenses for transportation, accommodation and tuition for training conducted in other countries, such as in Nairobi or Johannesburg.)

#### 5) Personal Computers for the DCA counterparts

DCA will provide at least 6 personal computers equipped with Microsoft Office (Power Point, when necessary) for the DCA counterparts by November 2014. The computers are to be used for training material update and for the provision of future technical training.

Project Work Plan is attached.

Z.

# MINUTES OF THE MEETING THE THIRD JOINT COORDINATING COMMITTEE FOR THE PROJECT FOR CAPACITY DEVELOPMENT FOR AIR NAVIGATION SERVICES IN MALAWI BETWEEN THE GOVERNMENT OF THE REPUBLIC OF MALAWI AND THE JAPAN INTERNATIONAL COOPERATION AGENCY

The third meeting of the Joint Coordinating Committee (hereinafter referred to as "JCC") for the Project for Capacity Development for Air Navigation Services in the Republic of Malawi (hereinafter referred to as the "Project") was held in Lilongwe on January 27, 2015.

The meeting was co-chaired by Mr. Bongwe, Chief Aeronautical Telecommunications Engineer of Malawi Department of Civil Aviation (hereinafter referred to as "DCA") and Mr. Matiya, Deputy Director of Malawi DCA. Others in attendance were Project Formulation Advisor and Chief Programme Officer of Japan International Cooperation Agency (hereinafter referred to as "JICA"), Chief Advisor of the Project, and Project team members. List of participants is shown in Attachment-1.

As a result of the discussions, both sides agreed to the matters in the documents attached as Attachment-2.

Lilongwe, January 27, 2015

Aron not.

Mr. A.G. Matiya For Project Director Director of Civil Aviation Republic of Malawi

Mr. Kazuhiko Tokuhashi
 Chief Representative
 Malawi Office
 Japan International Cooperation Agency

# Attachment-1: List of Participants

Date: January 27, 2015 Venue: DCA conference room Attendance:

#### DCA

Deputy Director of Civil Aviation: Mr. A.G. Matiya Chief Aeronautical Telecommunications Engineer: Mr. M.F.T. Bongwe Acting Principal for School of Aviation: Mr. S. Liundi

#### JICA Malawi Office

Project Formulation Advisor: Mr. Atsushi Iijima Chief Programme Officer: Mr. Kapalamula Godfrey

#### JICA Project Team

Chief Advisor: Mr. Hiroshi Mizumasa Deputy Chief Advisor: Ms. Mie Nagayasu Expert in CNS: Mr. Reynaldo A. Batacan Project Coordinator: Ms. Aya Horiuchi

Argmetinge

# Attachment-2: Matters Discussed

#### 1) Report on Progress of the Project

The Project Team reported on the progress and status of the Project which were as follows:

- CBT Equipment was installed at SOA in November 2014;
- Test Equipment was installed at SOA in December 2014;
- Test Equipment Training Course was held at SOA from 12th to 23rd of January 2015;
- 8 DCA staff were dispatched to Air Traffic & Navigation Services (ATNS) in South Africa for Team Resource Management Course from 25th January to 31st of January 2015;
- 4 DCA executive staff will be dispatched to East African School of Aviation (EASA) in Kenya for Supervisory Management Course from 1st February to 28th of February 2015.

#### 2) Briefing on Project Schedule

DCA approved the Project Schedule for the following:

- ATC Simulator Procumbent & Delivery to SOA (scheduled in May 2015);
- Third Country Training for Instructor Development Course to be held in August and Advance Instructor Course in October 2015;
- Domestic training for Electrical & Mechanical staff (to be held in April 2015);
- Domestic training for PANS/OPS related staff (to be held in May 2015);
- Domestic training for Electronics Engineer staff (to be held in April 2015).

#### 3) Draft Monitoring Sheet Ver. 1

Both parties reviewed and agreed on the contents of the draft Monitoring Sheet Ver. 1 with Project Design Matrix and Plan of Operation (see Attachment-3).

#### 4) Progress on new recruitment

DCA reported on the progress of the new recruitment which had been approved by the Department of Public Service Management. The recruitment process would be done by the Malawi Public Service Commission through advertisement and interview process. Hopefully it would be finalized by May 2015.

#### PROJECT MONITORING SHEET

# Project Title: The Project for Capacity Development for Air Navigation Services Version of the Sheet: Ver.1 (Term: 24 April, 2014 - 20 May, 2016)

Name: Hiroshi Mizumasa

Title: Chief Advisor

Submission Date: January, 2015

#### I. Summary

#### **1** Progress 1-1. Progress of Inputs (1) The Japanese Side 1) Experts Six experts (except Flight Procedure Design Expert) were assigned according to plan. [JICA Experts] Mr. Hiroshi Mizumasa, Chief Advisor Ms. Mie Nagavasu, Deputy Chief Advisor Mr. Kiichiro Hirano, ATC & AIS Training Specialist - 1 Mr. Daniel Paul Diggins, ATC & AIS training Specialist - 2 Mr. Reynaldo Alido Batacan, CNS Maintenance Training Specialist Mr. Kiyoshi Suzuki, E/M Maintenance Training Specialist * Expert for Flight Procedure Design Specialist will be named in 2015 Details of their assignment are shown in Project Monitoring Sheet (Plan of Operation) (see Annex-2). 2) Training Materials Progress on the following training materials was made by the experts: L Air Traffic Control Assistant/Basic 50% II. Aerodrome Control 30% III. CNS/ATM for ATC 70% IV. Aeronautical Information Service 40% V. Electronic Maintenance - Communication 20% VI. Communication Equipment and System 30% VII. Navigational Aids and Radar Theory 30% 70% VIII. CNS/ATM for ATSEP (Engineer) Other training materials, i.e. "Approach Control - Non Radar", "Area Control - non Radar",

"Flight Information Service", "Aeronautical Fixed Service Operator" will be prepared in due

Amostinga

PM Form 3-1 Monitoring Sheet Summary

course.

3) Training Equipment

The following training equipment were procured:

I. Computer Based Training ATC (November, 2014)

II. Test Instrument and Equipment (December, 2014)

III. Learning Aids and Office Equipment (June, 2014)

4) Overseas Training (as of February 2015)

DCA officials participated/are participating in the following two overseas trainings:

I. Team Resource Management Course: January 26th to 30th, 2015 <South Africa>*1

II. Supervisory Management Course: February 2nd to 27th, 2015 <Kenya>*² [Organizers]

*1: Air Traffic and Navigation Services (ATNS) / Johannesburg, South Africa

*2: East African School of Aviation (EASA) / Nairobi, Kenya

5) Training in School Of Aviation (SOA) (as of February 2015)

Two trainings for instructors were held at the School of Aviation as follows:

I. Computer Based Training (ATC)

i) Date: November 24th, 2014 (1/2 day)

ii) No. of Participants: 6

II. Test Equipment Course

i) Date: January 12th - 23rd, 2015 (10 days)

ii) No. of Participants: 5

(2) The Malawi side

1) Counterpart Personnel (C/P)

The following DCA Officials were assigned for an effective and sound management of the project (see also Annex-2 "Plan of Operation").

[Counterpart Personnel]

Project Director (P/D): Mr. A. C. Mtilatila, Director of Civil Aviation

Project Manager (P/M): Mr. A. G. Matiya, Deputy Director (Operations)

Co-project Manager (Co-P/M): Mr. S. Galafa, Principal, School of Aviation

Project Coordinator: Mr. F. Kholowa, Chief Air Traffic Services Officer, Operation Division

Project Coordinator: Mr. M.F.T. Bongwe, Chief Telecommunications Engineer, Operation Division

Trainers: Mr. S. Galafa, Principal, School of Aviation [ATC and FIS training]

Armatiga

- Mr. R. Y. Malanga, Lecturer School of Aviation [AIS and ACS training]
- Mr. S. Liundi, Lecturer School of Aviation [AIS and ACS training]
- Mr. R. Kanunkha, Head of Engineering Section, KIA [Electronic Engineering & Electrical Engineering (CNS) training]
- Mr. C. F. Betenigo, Electronics Engineer, KIA [Electronic Engineering (CNS) training]
- Mr. T. Mtonga, Electrical Engineer, KIA [Electrical/ Mechanical Engineering training]
- 2) Support Staff

Eight instructors in total were assigned to the Project as support staff personnel: [Support Staff]

- Ms. L. Manondo, ATC, KIA [ATC and FIS Training Instructor]
- Mr. D. Zamaele, ATC, Chileka Airport [ATC and FIS Training Instructor]
- Mr. F. Chiespeya, ATC, KIA [ATC and FIS Training Instructor]
- Mr. J. Kazito, ATC, KIA [ATC and FIS Training Instructor]
- Mr. R. Nkosi, Air Crew Briefing Officer, DCA [AIS & ACS Training Instructor]
- Mr. N. B. Kaliyasi, Communication Officer, KIA [AIS & ACS Training Instructor]
- Mr. S. Kunje, Electronics Engineer, Chileka Airport [Electronic Engineering (CNS) Training Instructor]
- Mr. O. Yokonia, Electrical Engineer, Chileka Airport [E/M Training Instructor]
- 3) Project Office Space

Office space for the Project was provided in School of Aviation (SOA), DCA.

4) Project Office Expenses

Utility cost was paid by the Malawi side. As of January 2015, DCA provided the following expenses for the project office.

I. Purchase of two desktop computers:1,055,210.00 MKWII. Purchase and installation of two split air conditioners:989,114.98 MKW

5) Travel Expenses of Counterpart Personnel within Malawi

The travel expenses for C/P to travel outside the Lilongwe area provided by DCA were as follows:

- I. Transport costs and subsistence allowances for students from Chileka (Team Resource Management Course/ from Chileka to Lilongwe) 76,000.00 MKW
- II. Transport costs for Lilongwe students 70,000.00 MKW

(Team Resource Management Course/ from Blantyre to Lilongwe)

Ramatinga

6) Others mentioned in Appendix 1, II, 6, of R/D

As agreed in R/D (Appendix 1, II, 6), appropriate considerations were made by DCA for environmental and social impacts of the Project, based on "JICA Guidelines for Environmental and Social Considerations".

#### 1-2. Progress of Activities

(1) Summary of Work Progress (June – August 2014)

1) Holding of the first JCC meeting

The first JCC meeting was held on 30th June 2014. Five people from the DCA side including the Director, the Deputy Director and other three officials, two officials from the JICA Malawi Office, and five members from the JICA Expert Team (hereinafter referred to as "JET") participated in the first JCC meeting. The JET Leader, Mr. Hiroshi Mizumasa presented summary of the Project. The minutes of meeting for implementation of the Project was signed between Mr. Alfred C. Mtilatila, DCA Director and Mr. Kazuhiko Tokuhashi, Resident Representative, JICA Malawi Office.

2) Holding of the second JCC meeting

The second JCC meeting was held on 1st August 2014. Five people from the DCA side including the Director, the Deputy Director and other three officials, one official from the JICA Malawi Office, and two members from the JICA Expert Team (hereinafter referred to as "JET") participated in the second JCC meeting. The issues discussed and agreed were as follows:

I. Approval of the Work Plan

II. Confirmation of the Instructor Nomination

III. Approval of updated PDM

IV. Confirmation of expense for domestic training/counterparts works

The minutes of meeting was signed between Mr. Alfred C. Mtilatila, DCA Director and Mr. Hiroshi Mizumasa, the JET Leader.

3) Baseline survey

JET conducted the baseline survey on capacity of SOA which includes the capacities of ATM (ATC, FIS, AIS, ACS), Electronics Engineering (CNS), Electrical and Mechanical (E/M).

a. Survey methods

They assessed their capacities from the following assessment viewpoints or items which are based on the ICAO's standard of assessing training organization. Assessment items for ATM, CNS and E/M:

K Grown They K

- 1) Training Regulation and Policy;
- 2) Organization;
- 3) Instructor (Full time), Supporting Staff (Part time) and Qualification;
- 4) Quality Control;
- 5) Curriculum/Syllabus;
- 6) Operating Rules;
- 7) Training Facilities (Aids);
- 8) Reference Material;
- 9) Examination and Examination Development;
- 10) On-the-Job Training;
- 11) Training, Certificate and License;
- 12) International Cooperation, Certification and Recognition; and
- 13) Training Demand, potential training participants (Both International and National)

*In addition to above 13 items, the following items are added for CNS and E/M respectively;

- 14) CNS System Admin on Laboratory, Simulator and Workshop,
- 14) E/M System Admin on Laboratory, Simulator and Workshop.
- b. Survey results
- b.1 Results of the capacity of ATM

As the result of the above survey, ATM qualifications of instructors are not well established. Instructor training programs for ATM instructors did not exist. Current instructors rely solely on their personally developed teaching skills and techniques. Most instructors are close to retirement age. ATM curriculum/syllabus is informal and not structured. Some have been used since the 1970's. Consequently, most of them are outdated. Training facilities are not enough and generally inadequate at the School of Aviation.

The result of the survey is shown in Annex-4 of the work plan.

#### b.2 Results of the capacity of CNS

The Aeronautical Telecommunication qualifications of instructors are not well established. Instructor training programs for CNS instructors did not exist. A structured CNS curriculum/syllabus was not used for at least the last 5 years. There was no CNS training laboratory facilities for practical application/certification of students. There was no System Administration on Laboratory, Simulator and Workshop. Reference materials were outdated and not responsive to new CNS/ATM technology systems.

The result of the survey is shown in Annex-5 of the work plan.

Aromiting

X

b.3 Results of the capacity of E/M

The E/M Unit has no instructor position at the MSOA. There are three (3) identified part time instructors ready to assume duties when training commences. There was no E/M curriculum/syllabus. E/M had no training laboratory test equipment and tools for practical application/certification of students.

The result of the survey is shown in Annex-6 of the work plan.

# 4) Review of the existing training materials

The Project team, composed of JET members and the counterpart personnel (C/P) observed existing training syllabus and textbooks for all training courses conducted in School of Aviation (see "Results of the PDM Activities", described below).

5) Preparation of a work plan

The Project team prepared a work plan describing the material development, instructor training, as well as the method and schedule for the implementation of 16 training courses, on which agreement was reached with Malawi side.

6) Preparation of base materials for training courses

The Project team is proceeding to preparation of training course materials which follows ICAO guideline.

7) Procurement of equipment

The Project team procured equipment necessary for operating the Project in line with the JICA equipment procurement guideline.

(2) Results of the PDM Activities

Following is the summary of the Project activities having been conducted from June 2014 to January 2015. It is described according to the original PDM Activities.

r) improvement of , the and the maining		
PDM Activities	Results	
1-1. Review current training syllabus and training materials	It has already reviewed and all syllabi are 1980's material. Project will make renew it.	
1-2. Improve/develop training syllabus and training materials	Two Base training materials were prepared and under proceeding for third one.	
1-3. Conduct training of instructors	<ul> <li>The training will be held in April 2015</li> <li>The training will be held at Nairobi in August</li> </ul>	
	and October 2015	

1) Improvement of ATC and FIS Training

A Jam intiger

1-4. Implement improved training courses	-
1-5. Implement supervisor training	The training will be held at Johannesburg in January and Nairobi in February
1-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	-
1-7. Improve the training courses based on the results from the monitoring and evaluation	-

# 2) Improvement of AIS and ACS Training

PDM Activities	Results
2-1. Review current training syllabus and training materials	It has already reviewed and all syllabi are 1980's material. Project will make renew it.
2-2. Improve/develop training syllabus and training materials	One Base training material was prepared and under proceeding for second one.
2-3. Conduct training of instructors	- The training will be held at Nairobi in August and October 2015
2-4. Implement improved training courses	-
2-5. Implement supervisor training	The training will be held at Johannesburg in January and Nairobi in February
2-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	-
2-7. Improve the training courses based on the results from the monitoring and evaluation	-

# 3) Improvement of Electronic Engineering Training

PDM Activities	Results	
3-1. Review current training syllabus and training materials	g It has already reviewed and all syllabi are 1980's material. Project will make renew it	
3-2. Improve/develop training syllabus and training materials	One Base training material is prepared and under proceeding for others.	
3-3. Conduct training of instructors	<ul> <li>The training will be held at Nairobi in Augus and October 2015</li> <li>Test equipment training instructors was already done and communications training will be held in May.</li> </ul>	

Assonatinga

3-4. Implement improved training courses	-
3-5. Implement supervisor training	The training will be held at Johannesburg in
	January and Nairobi in February
3-6. Conduct monitoring and evaluation of	Partial monitoring and evaluation was done
the trainings implemented by the trained	through the test equipment training.
instructors	
3-7. Improve the training courses based on the	-
results from the monitoring and evaluation	

#### 4) Improvement of Electrical/Mechanical Engineering Training

PDM Activities	Results
4-1. Review current training syllabus and training materials	It has already reviewed and all syllabi are 1980's material. Project will make renew it.
4-2. Improve/develop training syllabus and training materials	-
4-3. Conduct training of instructors	<ul> <li>The training will be held at Nairobi in August and October 2015</li> <li>AFL &amp; UPS training will be held in April 2015</li> </ul>
4-4. Implement improved training courses	-
4-5. Implement supervisor training	The training will be held at Johannesburg in January and Nairobi in February 2015
4-6. Conduct monitoring and evaluation of the trainings implemented by the trained instructors	-
4-7. Improve the training courses based on the results from the monitoring and evaluation	-

#### 1-3. Achievement of Output

Achievement of each output is observed according to the PDM indicators.

(1) Achievement of "Output 1. Training of Air Traffic Control (ATC) and Flight Information Services (FIS) is improved."

Six course syllabuses and materials were reviewed and one course syllabus was prepared at this stage. One ATC instructor is identified to be able to conduct CBT exercise.

(2) Achievement of "Output 2. Training for Aeronautical Information Services (AIS) and

Aronting

prepared at this stage.

(4) Achievement of "Output 4. Training of Electrical/Mechanical Engineering (E/M Eng) is improved."

Two course syllabuses and materials were reviewed at this stage.

Original Indicators for the PDM Outputs		Baseline date as of July 2014	Achievement as of January 2015
-Training syllabus and training materials are improved or	ATC/FIS: 6		1 syllabus is prepared
developed for the following number of courses:	AIS/ACS: 2		1 syllabus is prepared
	Electronic Eng.: 6	-There were 6 kinds of syllabus, prepared in March, 2001. -Training materials were prepared for every syllabus. They were prepared in the 1970's or in the beginning of the 1980's	1 syllabus is prepared
	E/M Eng.: 2		
-The following number of DCA	Instructors: 10		
officers successfully complete supervisor/advanced/ specialist training:	ATC/FIS: 4		
	AIS/ACS: 4		
	Aeronautical Cartography: 2		
	PANS/OPS: 2		
	ILS Maintenance: 4		
-Comprehension test score of tra receive the improved/ developed exceeds at least 80%.			

Achievement of Outputs

#### 1-3. Achievement of the Project Purpose

Achievement of the project purpose is observed according to the PDM indicators. Number of instructors who can conduct the improved/developed training courses is increased slightly since the baseline date.

Original Indicators for the Project	ct Purpose	Baseline date as of July 2014	Achievement as of January 2015
-Number of instructors who can A conduct the improved/developed A	ATC/FIS: 6	1	1
	AIS/ACS: 4	2	2
training courses (fulltime + part time)	Electronic Eng.: 4	1	1

9

#### Achievement of the Project Purpose

A toron strage

#### PM Form 3-1 Monitoring Sheet Summary

	E/M Eng.: 4	1
-Comprehension test score of receive the improved/ develo courses exceeds at least 80%.		

#### 1-5. Changes of Risks and Actions for Mitigation

No major changes were seen in the PDM Pre-conditions and Important Assumptions, therefore no special actions need to be taken.

#### (1) Pre-conditions

PDM Pre-conditions	Current Situations	Actions for mitigation
necessary for preparation of the Project Office and allocation of counterpart personnel before the	at the time of initiation of the work in Malawi in June 2014. -Counterpart personnel (C/P) was engaged in the Project, although	-No special actions were taken.
2) New trainees are recruited as scheduled.	-New trainees were not seen at the time of initiation of the work in Malawi in June 2014.	-No special actions were taken.

#### (2) Important Assumption when proceeding from Activities to Outputs

Importa	nt Assumptio	n	Current Situations	Actions for mitigation
,	with suffi	the icient	-DCA's ownership was seen.	-No special actions were taken.

#### (3) Important Assumptions when proceeding from Outputs to the Project Purpose

Important Assumption	Current Situations	Actions for mitigation
international standards on air	-No major changes were seen. It did not affect to the Project operation.	-No special actions were taken.

#### (4) Important Assumptions when proceeding from the Project Purpose to the Overall Goal

Important Assumption	Current Situations	Actions for mitigation
1) Trained counterpart personnel continue to be engaged in the activities of air navigation services.		-No special actions were taken.

Agmitigh

PM Form 3-1 Monitoring Sheet Summary

2) No major change in the national policy on air navigation services within the national plan/ strategy is occurred.	-Air Transportation Infrastructure Planning Policy is in force. No major changes in the policy were seen.	-No special actions were taken.
----------------------------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------------	---------------------------------

#### 1-6. Progress of Actions undertaken by JICA

At the time of first arrival of JET, project office facility had not been prepared yet; therefore the JICA Malawi office sent a letter of request on installation of equipment to the DCA in late April, 2014.

#### 1-7. Progress of Actions undertaken by Gov. of Malawi

No actions have been taken.

#### 1-8. Progress of Environmental and Social Considerations (if applicable)

This Project focuses on enhancement of capacity for the DCA personnel concerned in the Project to conduct the trainings for air navigation services. It does not have a plan to construct any new large-scale infrastructures. It is expected that the Project will have a minimal negative impact on the environment.

# 1-9. Progress of Considerations on Gender/ Peace Building/ Poverty Reduction (if applicable)

No considerable issues were observed.

# 1-10 Other remarkable/considerable issues related/affect to the project (such as other JICA's projects, activities of counterparts, other donors, private sectors, NGOs etc.)

(1) European Aviation Safety Agency (EASA) workshop

EASA is currently assisting DCA in training on safety management system (SMS) and auditing techniques. However this training is targeted for the higher executives of the DCA, whereas the JICA project is targeted for the professionals and engineers. Their project has no adverse impact on JICA training participation.

(2) European Investment Bank (EIB) fund

EIB is funding for the procurement of some safety equipment such as fire trucks in KIA. JET already had several meetings with EIB officers in order to avoid any overlapping on equipment provided for the DCA.

# 2 Delay of Work Schedule and/or Problems (if any)

2-1. Detail

Aronating

The test equipment training was supposed to be held for instructors in December 2014. However arrival of the test equipment was delayed so the training was postponed one month later.

#### 2-2. Cause

The procedures of the custom clearance in Malawi had not been through smoothly upon arrival of the equipment.

#### 2-3. Action to be taken

The abovementioned training was rescheduled to be held in late January, 2015. However, JET will be flexible in rescheduling the future trainings taking into account the possible delay of equipment.

#### 2-4. Roles of Responsible Persons/ Organization (JICA, Gov. of Malawi, etc.)

JET requests that the DCA might be of any help on smooth custom clearance, if possible.

# 3 Modification of the Project Implementation Plan

#### 3-1. PO

No major modification was made. However, some of the JICA expert members were changed due to personal health issues, which affected the original PO. Updated PO is attached as Annex 2.

#### 3-2. Other modifications on detailed implementation plan

(Remarks: The amendment of R/D and PDM (title of the project, duration, project site(s), target group(s), implementation structure, overall goal, project purpose, outputs, activities, and input) should be authorized by JICA HDQs. If the project team deems it necessary to modify any part of R/D and PDM, the team may propose the draft.) None.

4 Preparation of Gov. of Malawi toward after completion of the Project N/A yet.

II. Project Monitoring Sheet I & II (Version 1) as attached

                                                                                                                                                       | 5                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 7                                                                                                                                                                                                                                                                                                                                                                     | 2nd                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 
                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 111

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 111                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | 111                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |             |
