Monitoring & Evaluation Plan for Livelihood Improvement Pilot Activities in SI-SFRM

August 12, 2021

Hiromi YAMAUCHI On behalf of Livelihood Improvement Pilot Activity Team

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

Contents of M&E Plan

(Contents of This Session)

- 1. Introduction
- 2. Concepts of M&E of Livelihood Activities
 - 2.1 What is M&E?
 - 2.2 Keywords for implementing M&E
- 3. M&E Plan
 - 3.1 AF M&E Plan
 - 3.2 M&E for Other Livelihood Activities
- 4. Discussion
- 5. Wrap up

1. Introduction

- M&E is important to proceed activities on tract while making necessary modification.
- Regarding AF, some monitoring activities, such as field inspections and checking records, have been conducted by the project staff in collaboration with community members.
- However, it is necessary to conduct M&E more systematically with common understanding among people concerned including MOFR officials and community members.
- The M&E plan (draft) indicates objectives, items/criteria, methods, implementation structures, and schedule of M&E for livelihood improvement activities, including AF.
- The plan will be finalized through discussion with MOFR officials and the community members.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

2. Concepts of M&E of Livelihood Improvement Activities

2.1 What is M&E?

- "M&E" are often grouped together and used as one word. In this plan, however, monitoring and evaluation are distinct as below though two function related each other. (JICA 2016, OECD 2011)
- Monitoring:
 - ✓ To check progress of activities through periodical and continual data collection based on a plan
 - ✓ To revise the plan to proceed with the activities properly
- Evaluation:
 - ✓ To determine relevance, effectiveness, impact, efficiency, and sustainability of an activity (a project) at the end of the project
 - ✓ To improve the project and reflect lessons learnt to other similar projects

2.2 Keywords for implementing M& E

6 keywords for implementing M&E

- 1) Natural scientific dimension & Socio-economic dimension
- 2) Evidence-based monitoring (data collection & analysis)
- 3) Recording keeping
- 4) Transparency & Accountability
- 5) Participation (Subjectivity)
- 6) Simplicity & Visualization

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

3. M&E Plan

3.1 AF M&E Plan

3.1.1 AF Monitoring

(1) Objectives

- To assess whether AF activities progress according to the AF implementation plan
- To identify challenges and issues related to AF activities and take measurements against them
- To revise the AF implementation plan based on the results of monitoring to conduct AF activities more effectively and efficiently

(2) Monitoring item/Data collection

| Item | Data | Means/Tool | Remarks |
|--------------------------------|--|--|----------------------------|
| Site selection | Location, Boundary | • Drone • GPS | Conducted in FM monitoring |
| Layout (AF plot establishment) | Species, Number of each species, Survival, Growing conditions | Field observation | Monitoring Form-1 |
| Work plan | Activities, Timing | DiscussionRecord checking | Monitoring Form-2 |
| Input | Planting materials, Labor | Record checking | Monitoring Form-4 |
| Management | Management structure, Management rules | Discussion | Monitoring Form-3 |
| Benefit sharing | Harvest, Sales, Usage of benefit, Ratio of benefit sharing | Record checkingDiscussion | Monitoring Form-4 |

(3) Monitoring Form

Form-3: Major Findings & Challenges

| Topic | Findings/Challenges | Lessons/Measurements |
|-------|---------------------|----------------------|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

(3) Monitoring Form Form-4: Cost & Benefit

■ Production Cost & Sales (Financial input & output)

| Iter | m | Cash In | Cash Out | Balance | Remarks |
|------------------------|-------------------------------|---------|----------|---------|---------|
| Production Cost | oduction Cost Material Cost | | | | |
| | Labor Cost | | | | |
| | Total | | | | |
| Sales | Timber | | | | |
| | Crop | | | | |
| | Total | | | | |
| Balance (Sales - P | roduction Cost) | | | | |
| Borrowed from F | und | | | | |

■ Materials & Harvest for Domestic Use (Material input & output)

| Item | Description | Remarks |
|--------------------------|--|---------|
| Materials | Item (e.g. planting materials, charcoal)Number/volumeUsage | |
| Harvest for domestic use | Item (crop, fruit, timber)Volume of yield/useUsage | |

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

Form-4: Cost & Benefit <Sample>

■ Production Cost & Sales (Financial input & output)

| Iter | n | Cash In | Cash Out | Balance | Remarks |
|------------------------|-----------------|---------|----------|---------|-------------------------------|
| Production Cost | Material Cost | | 1,071 | | Tool, Petrol, Transportation |
| | Labor Cost | | 1,096 | | Food for work in AF plot |
| | Total | | 2,167 | | |
| Sales | Timber | 500 | | | @\$10 x 50 pieces (6"x1") |
| | Crop | 135 | | | Bean: @\$5 x 20, Corn:@\$35x1 |
| | Total | 635 | | | |
| Balance (Sales - Pi | roduction Cost) | | | -1,532 | |
| Borrowed from Fu | und | 1,937 | | 405 | Cash in hand |

■ Materials & Domestic Use (Material input & output)

| Item | Description | Remarks |
|--------------------------|--|---------|
| Materials | Chicken manure and charcoal for soil improvement | |
| Harvest for domestic use | 3 pieces of timber for community hall renovation 5 bundles of firewood shared among community members | |

(4) Structure & Role

Data collection Analysis Revise the plan

<MOFR>

- Enter data in tablet in the field?
- Observe conditions
- Check records
- Process the data and present it?
- Facilitate discussion
- Facilitate discussion
- Provide advice

<Community*>

- Observe and count trees and crops
- Discussion
- Provide records
- Participate discussion
- Discuss measures
- Revise the plan

*Note: AF sub-committee takes initiatives, but all other community members are requested to participate.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

3.1.2 AF Evaluation

(1) Purpose

- To assess to what extent the objectives of AF pilot activities have been achieved. <Relevance at community level>
- To assess to what extent AF may contribute to sustainable forest resource management. <Relevance at project level>
- To assess the efficiency of AF in terms of time, cost, and energy in comparison with garden and tree plantation < Efficiency>
- To diagnose strengthen and weakness of AF in terms of land use, product, productivity, labor intensiveness, pest management, etc.
 < Effectiveness >
- To identify positive and negative impact on community society in terms of decision making, institutional capacity and gender <Impact>
- To make provision for continuation of AF practice <Sustainability>

(2) Criteria & Evaluation Questions

| Criteria | Evaluation Question |
|----------------|---|
| Relevance | To what extent have the objectives of AF training plot indicated in the AF Implementation Plan achieved? To what extent may AF contribute to realization of SFRM? |
| Efficiency | Does input and out put balance in terms of cost, time, and labor? Comparing with garden/tree plantation, does AF require much input in terms of cost, time, and labor? |
| Effectiveness | Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, product, productivity, pest problems, etc.? |
| Impact | What kind of positive impact has AF bought?What kind of negative impact has AF brought? |
| Sustainability | Do you want to continue the AF plot? Do you want to expand the AF plot or develop a new AF plot? Do you have any plan to apply AF practice on your garden or forest plantation? |

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

(3) Evaluation Form

| Criteria | Evaluation Question | Description | Evaluation* |
|----------------|--|-------------|-------------|
| Relevance | To what extent have the objectives of AF training plot indicated in the AF Implementation Plan achieved? To what extent may AF contribute to realization of SFRM? | | |
| Efficiency | Does input and out put balance in terms of cost, time, and labor? | | |
| | Comparing with garden/tree plantation, does AF require much input in terms of cost, time, and labor? | | |
| Effectiveness | Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, product, productivity, pest problems, etc.? | | |
| Impact | What kind of positive impact has AF bought? | | |
| | What kind of negative impact has AF brought? | | |
| Sustainability | Do you want to expand the AF plot or develop a new AF plot? | | |
| | Do you have any plan to apply AF practice on your garden or forest plantation? | | |

^{*}Evaluation: (A) Very high/much, (B) High/Much, (C) Relatively low/less, (D) Low/Least

(4) Structure & Role

Explanation on purpose & criteria

Discussion on evaluation questions

Finalisation of evaluation

<MOFR>

- Explain purposes and criteria, as well as steps and methods to community members
- Facilitate discussion
- Check data and information
- Support community members in making consensus and finalizing evaluation

<Community>

- Understand purposes and criteria, as well as steps and methods
- Discuss evaluation questions
- Provide data and information
- Make final evaluation based on the discussion

*Note: AF sub-committee takes initiatives, but all other community members are requested to participate.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

(5) Timing & Schedule

- Monitoring
 - > Periodically & continually
 - ➤ In case of AF in SI-SFRM, once per quarter
- Evaluation
 - Before, Mid-term, End, Post
 - > In case of AF in SI-SFRM, one time toward the end of the project
- M&E Report
 - ➤ 2nd quarter in FY 2022

| | | FY 2 | FY2022 | | | |
|------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| | 1 st | 2 nd | 3 rd | 4 th | 1 st | 2 nd |
| Monitoring | | | | | | |
| Evaluation | | | | | | |
| M&E Report | | | | | | |
| Project | | | | | | |

jica)

3.2 M&E for Other Livelihood Improvement Activities

(1) Monitoring

- 1) Basic policy
 - Conduct monitoring by activity (e.g. pig farming)
 - Prepare monitoring system (incl. format) as simple as possible for future management by Interest Group (IG)
 - Modify the system and format flexibly
 - Encourage relevant stakeholders to participate
- 2) Monitoring items (Pig farming)
 - Number of pigs
 - Growth conditions (body size: length, heart girth)
 - Use (Amount of meat: consumed, given to others, sold; income)
 - Cost (feed, medication, others)
 - Problems / challenges

19

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

Monitoring format - 1

| | Aug | 7 21 | Ser | 21 | Oct | t 21 | Nov | , 21 | Dec | : 21 | Jan | 22 | Feh | 22 | Mai | r 22 |

21

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

3) Structure

Major player: IG members

• Supporters: MoFR, Project staff,

Advisors: MoAL

4) Timing

Initiate upon piglet procurement

Monthly

(Note: MoAL might be invited bi-monthly)

(1) Review / Evaluation

- 1) Basic policy
 - Conduct review/evaluation by activity (e.g. pig farming)
 - Prepare review/evaluation system (incl. format) as simple as possible for future management by Interest Group (IG)
 - Modify the system and format flexibly
 - Encourage relevant stakeholders to participate
- 2) Monitoring items (basically common for all activities)
 - Six assessment criteria
 - Objectives
 - Relevance
 - Performance
 - Effectiveness
 - Cost-effectiveness
 - External factors

23

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

- 3) Structure
 - Major player: IG members
 - Supporters: MoFR, Project staff,
 - Advisors: MoAL
- 4) Timing
 - Bi-annual (Review)
 - Before the project termination (Evaluation)

Review / Evaluation format

| | Criterion for | Question | | Level | | Description/ Explanation | |
|---|---|--|-----|-------|---|--------------------------|--|
| | assessment | Question | A B | | ပ | 2000 paon Explanation | |
| | | What were the original/ primary objectives of this activity? | | NA | | | |
| 1 | Objectives | Are the primary objectives still appropriate? Are there other objectives? | | | | | |
| - | | What do you expect by participating in this activity? | | NA | | | |
| | | What should the future objectives be? | | | | | |
| | | Is the activity appropriate to achieve the objectives? | | | | | |
| 2 | Relevance | If not, what are the alternative options? | | NA | | | |
| | | Are the time allocation and schedule for the activity efficient? | | | | | |
| | implementation of the activity Is the activity carried out according practices (equity, culture, gen) To what extent have the information been made amongst the locathe IG members and other vil What problems/ constraints h | Are the methods (tools, approaches, etc.) applied for implementation of the activity appropriate? | | | | | |
| | | Is the activity carried out according to principles of good practices (equity, culture, gender, etc.) in the community? | | | | | |
| 3 | | To what extent have the information sharing/ exchanges been made amongst the local participants, and between the IG members and other villagers? | | | | | |
| | | What problems/ constraints have arisen? | | NA | | | |
| | | | | NA | | | |
| | | What improvements should be made to the performance of the activity in the future? | | NA | | | |

25

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

| | Effectiveness | To what extent have expected outputs been achieved? If there is no output achieved, what are the reasons? | | |
|---|------------------------|---|----|--|
| 4 | | How satisfactory was the training for the stakeholders? | | |
| | | Is there any more training necessary for the participants to make the activity more effective? If yes, what kind of training areas? | NA | |
| | Cost- effectiveness | Was the cost of the activity reasonable for what it achieved? | | |
| 5 | | Would it be possible to achieve the same outputs at less cost? If yes, what should be done? | NA | |
| | | How realistic would it be to replicate the work, incorporate it in government projects/ programs or make it self-financing? | NA | |
| | | Are there government/ or policy changes? | NA | |
| 6 | External factors | Are there economic and social changes? | NA | |
| | | Are there changes in the policy and practice of the donor (JICA)? | NA | |

Note: Level A: high/outstanding, B: intermediate, C: low/abysmal

Evaluation of Agroforestry Pilot Activity in Komuniboli

25 & 26 July, 2022 **Agroforestry Team** SI-SFRM

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Contents

- Review the Evaluation Plan on AF
- 2. Review the evaluation results at the last meeting
- 3. Conduct evaluation on the AF Pilot Activity from the remaining criteria
- 4. Comments (impression, lessons learnt, recommendation, etc.)

1. Review the Evaluation Plan on AF

■ Purpose

- To what extent the objectives of AF pilot activities has been achieved.
- To assess what extent AF may contribute to sustainable forest resource management.
- To verify the efficiency of AF in terms of time, cost, and energy in comparison with garden and tree plantation.
- To diagnose strengthen and weakness of AF in terms of land use, product, productivity, labor intensiveness, pest management, etc.
- To identify positive and negative impact on the community
- To make provisions for continuation of AF practices

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Evaluation Question

| Criteria | Evaluation Question |
|----------------|---|
| Relevance | To what extent have the objectives of the AF training plot indicated in the AF implementation plan achieved? To what extent may AF contribute to realization of SFRM? |
| Efficiency | Does input and output balance in terms of cost, time, and labor? Comparing with garden/tree plantation, does AF require much input in terms of cost, time, and labor? |
| Effectiveness | Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, variety of product, productivity, pest problems, etc.? |
| Impact | What kind of positive impact has the AF practice brought?What kind of negative impact has the AF practice brought? |
| Sustainability | Do you want to continue the AF plots? Do you want to develop a new AF plot? Do you have any plan to apply AF practice on your own garden or tree plantation? Have you applied AF practice on your own garden or tree plantation? |

2. Review the evaluation results at the last meeting

■ Relevance

| | Question | Achievement | Comment |
|--------|--|-------------|---------|
| the AF | t extent have the objectives of training plot indicated in the AF nentation plan achieved? | | |
| Object | 1. To generate income | | |
| ives | 2. To improve food security | | |
| | 3. To improve knowledge and skills on AF | | |
| | 4. To learn and practice effective land use to maximum benefit | | |
| | t extent may AF contribute to lization of SFRM? | | |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

■ Relevance < Results >

| Question | | Achiev. | Comment | | |
|----------------|--|---------|--|--|--|
| | To what extent have the objectives of the AF training plot indicated in the AF implementation plan achieved? | | | | |
| Object ives | 3. To improve knowledge and skills on AF | A | <men> A: Improve knowledge on planning to plant crops, fruit trees, and trees on one particular field. Women> A: We improved knowledge and skills on management. Improve technique, skills, and knowledge. Those were applied to individual gardens. Youth> A: Gain new ideas how to organize a garden. </men> | | |

<Achievement> A: High, B: Intermediate, C: Low

Relevance < Results >

| | Question | Achiev. | Comment |
|------------------|--|------------|---|
| To what plan ach | | objectives | of the AF training plot indicated in the AF implementation |
| Object ives | 4. To learn and practice effective land use to maximum benefit | A | <men> A: Preserve land and forest from unnecessary clearing. Time management (can save time for moving one garden to other or tree plantation). <women> Maximize land use rather than to use large areas. Like AF plot, there 3 different plants on one plot. Start from short, medium, and long-term (In AF plot, short, medium, and long-term plants were planted on one plot). <youth>A: Through AF Plot 1 we get an idea how to organize garden and practice in AF Plot 2. (The idea got through AF Plot 1 will be practiced in AF Plot 2.)</youth></women></men> |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

11

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Efficiency

| Question | Achieve ment | Comment |
|--|-----------------|---------|
| Comparing with garden/tree plantation, does AF require much input or less input in terms of cost, time, and labor? | | |
| Does input and output balance in terms of cost, time, and labor? | | |

<Achievement> A: High, B: Intermediate, C: Low

Efficiency

| AF | Local Gardening |
|---|--|
| | - more time spent |
| AF is better than | Garden because of |
| time management | (none place) |
| | . (Only one place) (No need to go to different places) |
| oow. More | 1045 |
| AF is better to ga less labour for wea | rlen because of ading, site preparalin etc. |
| +: < Individuals> AF regains mor | e babour than Garden |
| Af an isnot cost | labour intensive. |
| members participat | e in AF activities |

AF vs. Local Gardening

- AF is better than garden because of time management (no need to go to one place to another. All activities are conducted only at one place)
- AF is better than garden because it needs less labour for weeding, site preparation, etc.
- AF needs more cost than garden because of labour intensive. But. If AF is established and managed by the community as a collective activity, AF is not costly because the community members participate in AF activities (no need to pay for the community members.)

13

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Efficiency & Effectiveness

| | Strength/Advantage | Weakness/Disadvantage |
|--------------------|--------------------|-----------------------|
| Agroforestry | | |
| Garden | | |
| Tree Plantation | | |

■ Efficiency

| Question | Achievement | Comment |
|---|-------------|---------|
| Does input and output balance in terms of cost, time, and labor? | | |
| Are you satisfy with benefits obtained through AF pilot activity comparing with your time and energy spent for it? | | |
| Do you think that you could obtain enough benefits (crops) comparing with your time and energy spent for the AF activities? | | |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

15

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Impact

| Question | Achievement | Comment |
|--|-------------|---|
| What kind of positive impact does AF have? | | Improve agricultural skills through AF activities A canteen was developed by using AF revenue, which contributes to improvement of convenience of lives. Improve community's capacity for planning, record keeping, and collective working through AF and other pilot activities. |
| What kind of negative impact does AF have? | | |

<Achievement> A: High, B: Intermediate, C: Low

■ Sustainability

| Question | Achievement | Comment |
|---|-------------|---|
| Do you want to continue the AF plots? Why? | | |
| Do you want to develop a new AF plot? - Why did the community decide to establish AF Plot 2? | | Komuniboli community has began to develop the second plot. |
| Do you have any plan to apply AF practice on your own garden or tree plantation? - Why? | | |
| Have you applied AF practice on your own garden or tree plantation? - Why? | | |

<Achievement> A: High, B: Intermediate, C: Low

■ Evaluation Question

| Criteria | Evaluation Question |
|----------------|---|
| Relevance | To what extent have the objectives of the AF training plot indicated in the AF implementation plan achieved? To what extent may AF contribute to realization of SFRM? |
| Efficiency | Does input and output balance in terms of cost, time, and labor? Comparing with garden/tree plantation, does AF require much input in terms of cost, time, and labor? |
| Effectiveness | Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, variety of product, productivity, pest problems, etc.? |
| Impact | What kind of positive impact has the AF practice brought? What kind of negative impact has the AF practice brought? |
| Sustainability | Do you want to continue the AF plots? Do you want to develop a new AF plot? Do you have any plan to apply AF practice on your own garden or tree plantation? Have you applied AF practice on your own garden or tree plantation? |

2. Assess the AF Pilot Activity

2. Assess the AF Pilot Activity

| ■ Keievance | | |
|---|-------------|--|
| Question | Achievement | Comment |
| To what extent have the objectives of the AF training plot indicated in the AF implementation plan achieved? <objectives> 5. To reduce workload through AF practice</objectives> | A | (Women's group) It is better and easy to do the work without slush and burn (because) consist of all the three planting materials (short, medium, and long-term). Save time, hence provide chance for other family or community activity. ⇒AFは一箇所で短中長期の作物を植えているので維持管理が容易で時間が節約できる。これにより節約できた時間で他の家族やコミュニティの活動を行うことができる)(※ポジティブ・インパクト!?) |
| 6. To produce timber, firewood, NTRFP, and other forest products, without putting pressure on natural forest Note: Through the evaluation, the community members realized and agreed to add "firewood, NTFP, and other forest products" in the objective. | A | (Youth group) AF Plot 1: valuable species – firewood AF Plot 2: thinning – firewood, bedding (for northern-yam) Potential to achieve less pressure on the natural forests Less landmass used instead of slush & burn method saving our natural forest ※AF plot1は植林した樹木がまだ収穫時期になっていないが、ポテンシャルを認識したということから達成度「A」に決定された。 |
| 9 To learn organized ways of crop and tree cultivation and management including record keeping | А | (Men's group) Yes. Men's group members and other community members learned organized way of crop and tree cultivation and management including record keeping. |

■ Effectiveness

| Question | Achievement | Comment |
|---|-------------|---|
| Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, variety of product, productivity, pest problems, etc.? | | Strengthen/Advantage> A community member had positive impression of producing variety of crops. |
| - Do you have impression that the AF plot has much pest, diseases, and animal attack? | | <weakness disadvantage=""></weakness> |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

■ Impact

| 用するようになった。 <men's group=""> Individuals started practicing AF. Backyard gardening implemented using AF know how by households. Individual practice XXXXX and practicing new ideas of planting crops. All participants in AF practice appreciate and comment AF practice is best. See importance of waste/rubbish (家畜の糞を堆肥として使うことを通じて廃棄物が重要だということは気が付いた) See importance of site selection. Women's Group> Jelousy (AF Plotsがうまくいってことを妬む人がいる) <youth group=""> Competition between trees and crops. (←これはAFのdisadvantageまたはmechanismであり、negative impactではないことを説明) Need more crop to plant in plot Lack of nutrients because different type of crop grow in one plot. <men's group=""></men's></youth></men's> | Question | Achv | Comment | |
|---|-------------------|------|--|--|
| impact does AF have? Jelousy (AF Plotsがうまくいってことを妬む人がいる) Youth Group> Competition between trees and crops. | impact does AF | A | It gives new ideas and skills for each individuals will apply it. It help us to plan for generate income. Make good use of our time. It makes for us creative to have more ideas. Highly achieve objectives. Youth Group> Spacing between crops, Selection of variety of crops, mix croppingの考えを個人のガーデンにも適用するようになった。 <merce>Men's Group></merce> Individuals started practicing AF. Backyard gardening implemented using AF know how by households. Individual practice XXXXX and practicing new ideas of planting crops. All participants in AF practice appreciate and comment AF practice is best. See importance of waste/rubbish (家畜の糞を堆肥として使うことを通じて廃棄物が重要だということに気が付いた) | |
| | impact does AF | | Jelousy (AF Plotsがうまくいってことを妬む人がいる) <youth group=""></youth> Competition between trees and crops. (一つれはAFのdisadvantageまたはmechanismであり、negative impactではないことを説明) Need more crop to plant in plot Lack of nutrients because different type of crop grow in one plot. | |

■ Sustainability

8/4/2022

| Question | Achievement | Comment |
|--|-------------|--|
| Do you want to continue the AF plots? - Why? | А | • Yes. |
| Do you want to develop a new AF plot? - Why did the community decide to establish AF Plot3? | A | Falake community has an idea of developing the third plot. (According to the AF Sub-committee chairman, the third plot was decided on his garden area next to the piggery house. It is easy to bring manure to the plot.) |
| Do you have any plan to apply AF practice on your own garden or tree plantation? - Why? | A | 22 people (out of around 30 participants in the meeting on 22nd July)(※今考えると「すでに実施している」と回答している人と重複していたような気がする) |
| Have you applied AF practice on your own garden or tree plantation? - Are there any other members who created an AF plot? - Why? | В | Mr. Philip Saele'a created his own AF plot at his home. 11 (Constantine, jocken, jone, Fedy, Phillipne, Don Bosca, Bress, Sindi, Shera, Hilda, Sally, Rolencia) (out of around 30 participants in the meeting on 22nd July)) |

| 21/10/2021 | Banana | 10.00 | 1 bunch | 10.00 | | |
| 20/10/2021 | Taro | 10.00 | 1 heap | | 10.00 | domestic ? |

3 Updated Cost & Benefit (Form-4)

■ Summary

Cash In

Cash In Crop Corn 202.00 S/Cabbage 250.00 Taro 280.00 105.00 Banana 30.00 Bean 50.00 Ginger Peanut 20.00 Cassava 110.00 70.00 Potato? 1,117.00 Total

Cash Out

(A) Exclude the value of crops cooked for workers

| Total | 179.00 |
|--------|----------|
| Lunch | 49.00 |
| Peanut | 70.00 |
| Petrol | 60.00 |
| Item | Cash Out |

 Cash in hand is the same as the balance.

Period: Dec.2020 - May 2022

(B) Include the value of crops cooked for workers

| Total | 319.00 | |
|--------|----------|--|
| Lunch | 189.00 | |
| Peanut | 70.00 | |
| Petrol | 60.00 | |
| Item | Cash Out | |

- The value of crops cooked for workers and shared among workers is included in "Lunch".
- The labour cost is reflected on the cost for AF management.
- But, cash in hand is different from the balance.

23

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Materials & Domestic Use (Material input & output)

| Item | Description | Remarks |
|--------------------------|--|---------|
| Materials | | |
| Harvest for domestic use | 4 heaps of taro, which was equivalent to \$40, were shared among women who participated in AF activities on 24/03/2021. 6 heaps of cassava, which were equivalent to \$60, were cooked for workers on 23/03/2022. 3 heaps of cassava/taro, which were equivalent to \$30, were cooked for workers on 08/04/2022. | |

4. Comments (Impression, Recommendation, etc.)

- Pull all household together for implementation of AF plots.
- Combine and discuss freely among the community members. This is the first experience.
- Hope to maintain binding among community members. So, young generation will follow and consider the environment.
- ⇒ Through the implementation of the AF pilot activity, the community has had experience that all households freely discussed and worked together (combine, unity, 目的に向かっ て一丸となる). This is the first experience for the community members.

Evaluation Results of Agroforestry Pilot Activity

TSC 28 July, 2022 Hiromi Yamauchi

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Programme

- 1. Review the purposes and criteria of AF evaluation
- 2. Results of Evaluation
 - 2.1 Komuniboli
 - 2.2 Falake
 - 2.3 Summary
- 3. Conclusion
- 4. Discussion

1. Review the purposes and criteria of AF evaluation

■ Purpose

- To what extent the objectives of AF pilot activities has been achieved.
- To assess what extent AF may contribute to sustainable forest resource management.
- To verify the efficiency of AF in terms of time, cost, and energy in comparison with garden and tree plantation.
- To diagnose strengthen and weakness of AF in terms of land use, product, productivity, labor intensiveness, pest management, etc.
- To identify positive and negative impact on the community
- To make provisions for continuation of AF practices

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Evaluation Question

| Criteria | Evaluation Question | |
|----------------|---|--|
| Relevance | To what extent have the objectives of the AF training plot indicated in the AF implementation plan achieved? To what extent may AF contribute to realization of SFRM? | |
| Efficiency | Does input and output balance in terms of cost, time, and labor? Comparing with garden/tree plantation, does AF require much input in terms of cost, time, and labor? | |
| Effectiveness | Comparing with garden/tree plantation, what kind of strengthen and weakness does AF have in terms of land use, variety of productivity, pest problems, etc.? | |
| Impact | What kind of positive impact has the AF practice brought? What kind of negative impact has the AF practice brought? | |
| Sustainability | Do you want to continue the AF plots? Do you want to develop a new AF plot? Do you have any plan to apply AF practice on your own garden or tree plantation? Have you applied AF practice on your own garden or tree plantation? | |

2. Results of AF Evaluation

2.1 Komuniboli

AF evaluation was conducted on 26 May and 25-26 July, 2022.

■ Impact

| Question | Achiev ement | Comment |
|--|-----------------|--|
| What kind of negative impact does AF have? | А | <women's group=""> Competition (Some members want to practice AF, but the others want to continue traditional agriculture system. But, in future, it is expected to harmonize between the two groups.) </women's> |
| | | <men's group=""> • Objectives unclear • Food supply not consistent/inadequate</men's> |
| | | <youth group=""> Time management (Punctuality, laziness) Food security (crops were not shared well in the community members) </youth> |

<Achievement> A: Positive impacts are more than negative ones

- B: The number of positive impacts is nearly the same as that of negative ones
- C: Negative impacts are more than positive ones

■ Sustainability

| Question | Achievement | Comment |
|---|-------------|---|
| Do you want to continue the AF plots? Why? | A | BenefitMinimum land use |
| Do you want to develop a new AF plot? - Why did the community decide to establish AF Plot 2? | A | Komuniboli community has began to develop the second plot. The first plot managed by the community. The second and following plots will be managed by interesting households. Every households will learn how to manage AF. More practice opportunity for interesting households. |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

15

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Sustainability

| Question | Achieve ment | Comment |
|---|-----------------|---|
| Have you applied AF practice on your own garden or tree plantation? - Why? | В | Yes. Beans and pepper to maximize the land space. Put effort and get output by himself. Planting trees, pencil cedar, akwa in between short-term crops like potato and medium term crops pineapple. Under Coconut trees existed, cacao, bettlenut, cassava, and pineapple were planted. About 10 households have already applied ideas of AF. |
| Do you have any plan to apply AF practice on your own garden or tree plantation? - Why? | В | At least 11 households have an idea of applying AF. Make a design and still need to practice by individual after plot2. Put effort and get output by himself. All HHs want to practice AF. But, some HHs have problems of lands. But, the AF site identified by the land use plan, it can be used for AF. So, HHs will apply AF in the AF site. |

■ Relevance

| Question | Achievement | Comment |
|--|-------------|--|
| 4. To obtain long, medium, and short-term benefits | B (Medium) | Short-term :yes Long-term: No Medium-term: not yet, but potential in near future |
| 7. To create shade by planting trees for crops and human being | A | Planting trees have already created shade for crops and human being |
| 8. To protect crops from strong wind | A | AF Plot 1: Trees grew not enough high for breaking wind. But, fruit trees already provided function of windbreak. AF Plot 2: Mahogany trees break wind, but the wind come to the crops. |
| 10. To learn what kind of crops are suitable for shaded area under trees | А | North-yam, kava, Cocoa, vanilla, cassava, ginger |
| 11. To examine how much AF contributes to soil improvement . | А | Top black soil is still good comparing with slush-and-burn. S-a-b soil becomes dry and fragile within 2 years |

■ Relevance

| Question | Achievement | Comment |
|--|-------------|--|
| 5. To reduce workload through AF practice | A | It is better and easy to do the work without slush and burn (because) consist of all the three planting materials (short, medium, and longterm). Save time, hence provide chance for other family or community activity. |
| 6. To produce timber, firewood, NTRFP, and other forest products, without putting pressure on natural forest | A | AF Plot 1: valuable species – firewood AF Plot 2: thinning – firewood, bedding (for northern-yam) Potential to achieve less pressure on the natural forests Less landmass used instead of slush & burn method saving our natural forest |
| 9 To learn organized ways of crop and tree cultivation and management including record keeping | A | Yes. Men's group members and other community members learned organized way of crop and tree cultivation and management including record keeping. |

■ Impact

| Question | Achievement | Comment |
|--|-------------|---|
| Positive impact does AF have? | A | <women's group=""></women's> It gives new ideas and skills for each individuals will apply it. It help us to plan for generate income. Make good use of our time. It makes for us creative to have more ideas. Highly achieve objectives. <youth group=""></youth> Spacing between crops, Selection of variety of crops, mix cropping were applied to individual gardens. <men's group=""></men's> Individuals started practicing AF. Backyard gardening implemented using AF know how by households. Individual practice and practicing new ideas of planting crops. All participants in AF practice appreciate and comment AF practice is best. See importance of waste/rubbish See importance of site selection. |
| Negative impact does AF have? | | <women's group=""> Jealousy Youth Group> Competition between trees and crops. Need more crop to plant in plot Lack of nutrients because different type of crop grow in one plot. <men's group=""></men's> Traditional agriculture practice (slush-and-burn) gradually removed out. </women's> |

Note: Achievement of Impact: positive impact more than negative one: A, the same: B, positive impacts less than negative one: C

■ Efficiency

| Question | Achievement | Comment |
|--|-------------|--|
| Does input and output balance in terms of cost, time, and labor? | A | Input is less than output. Output includes know how. Know how is big value. |

<Achievement> A: High, B: Intermediate, C: Low

8/4/2022

29

30

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

■ Sustainability

| Question | Achievement | Comment |
|--|-------------|---|
| Do you want to continue the AF plots? | А | • Yes. |
| Do you want to develop a new AF plot? | А | Falake community has an idea of developing the third plot. |
| Do you have any plan to apply AF practice on your own garden or tree plantation? | А | 22 people out of around 30 participants in the meeting on 22nd July have a plan to apply AF practice. |
| Have you applied AF practice on your own garden or tree plantation? | В | 11 people out of around 30 participants in the meeting on 22 nd July have already applied. |

Summary of AF Evaluation

Relevance

| Question | Achievement | Description |
|---|-------------|--|
| To that extent were the AF objectives achieved? | High | In Komuniboli, 3 objectives (income generation, improvement of knowledge and skills on AF, learn and practice of effective land use method to maximize benefit) out of 4 were highly achieved. The objective of improvement of food security has been achieved at medium level. In Falake, out of 11 objectives, 10 objectives were highly achieved and 1 was medium. |
| To what extent may AF contribute to realization of SFRM and sustainable land use? | High | In contrast to slush and burn, AF could produce crops at the same land without moving from place to place. This means that AF could reduce pressure on natural forests. Valuable timber tree species, such as akwa and baula, could be produced in AF by using wild seedlings. |

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Efficiency

| Question | Achievement | Description |
|--|-------------|---|
| In contrast to garden or tree plantation, was AF efficient in terms of time, labour and cost? | High | Both communities emphasized AF could save time since they could maintain trees and crops at the same time without moving from place to place. Since the AF pilot activities were conducted as collective work, it was difficult to compare with garden managed by individuals. Records on yields, income, and expenditure of AF were not kept well. On the other hand, there was no such records on garden or tree plantation. Thus, it was difficult to compare AF with garden and tree plantation in terms of efficiency. |
| Does input and output balance in terms of cost, time, and labor, and skills? | High | Both communities were satisfied with the output, including obtaining new knowledge and skills, comparing with inputs. |

■ Effectiveness

| Question | Achievement | Description |
|---|-------------|--|
| What kind of advantages and disadvantages did AF provide in contrast to garden and tree plantation? | Medium | Advantage> In case of slush and burn, the land became degraded and unproductive for several years after harvesting crops. In contrast, the same land could be used for crop production continuously in AF system. In case of slush-and-burn, top soil becomes dry and fragile. But, in AF, top black soil has been kept even two years later. Easy to manage Generate income throughout the year Variety of crops Contribute to food security and balance diet Disadvantage> If spacing is not adequate, nutrient competition occurs among the plants. Pest easily spread one crop to another. Production of the first rotation of garden is higher than that of AF. |

8/4/2022

Windstyl & Rosearch Forestry & Rose

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Impact

| Question | Achievement | Description |
|--|-------------|--|
| What kind of positive and negative impacts did AF provide? | High | In Komuniboli, a canteen was opened by using some money generated through the sales of AF crops. It improved convenience of community members to purchase commodities. Komuniboli community members could obtain food from AF plot while their gardens along a river could not be used due to flood. Through the implementation of the AF plot activities, the communities improved their capability of planning, implementing collective work, and keeping records to promote community activities. AF save time, so the community and family can use the time for other activities. In Falake, individual backyard gardens were created by using knowledge acquired through the implementation of AF activities and manure generated from piggery. |

Sustainability

| Question | Achievement | Description |
|---|-------------|--|
| - Do you want to continue the AF plots? | High | Both communities began to establish a new plot. In Falake, a community member established his own AF plots. At least 11 members applied |
| - Do you want to | | ideas of AF on their own gardens. Furthermore, |
| develop a new AF plot? | | at least 22 community members had intentions to apply AF on their own land. |
| - Do you have any plan | | In Komuniboli, around 10 households have |
| to apply AF practice on | | applied ideas of AF on their own garden. |
| your own garden or tree plantation? | | Moreover, at least 11 households have a plan to apply AF on their own land. |
| ' | | The sustainability is quite high since the |
| - Have you applied AF | | communities established and managed AF plots |
| practice on your own | | by their own efforts with little financial and |
| garden or tree | | material support from the Project. |
| plantation? | | Komuniboli community obtained material |
| | | support from Guadalcanal Provincial |
| | | government. This implied that the community |
| | | had capacity of obtaining support from outside |
| | | agencies. |

Solomon latends Government Mofr/Jica

3. Conclusion

8/4/2022

- Both communities highly appreciated the AF pilot activity by the most criteria.
- Falake community assessed the AF was the best practice of sustainable land use although its productivity was less than that in the first rotation of slush-andburn.
- Several advantages of AF, such as saving time, variety of crops, and income generation throughout the year, were realized.
- Through the implementation of AF pilot activity, the communities developed their capacity for not only agricultural skills, but also planning, implementing collective work by men and women, and record keeping.
- Eleven community members in Falake and around 10 households in Komuniboli have already applied ideas of AF on their own gardens or tree plantation. This clearly shows the impact of the AF pilot activity since no households implemented AF at the beginning of the pilot activity according to the baseline.
- Both communities began to establish a new AF plot.
- The criteria for AF evaluation should be modified to more practical ones like "Benefits of AF", "contribution to SFRM/Sustainable Land Use", "Food security", "Improvement of livelihoods", and "Community capacity development".

1 Introduction

Monitoring:

A systematic and continuous assessment of the progress of a piece of work over time.

Review:

A review is usually defined as an assessment at one point in time of the progress of a piece of work

Evaluation:

An evaluation is an assessment at one point in time of the impact of a piece of work.

Note: The 'piece of work' here means an activity such as a piece of research or programme development, which does not fall into the category of project or programme.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

8/3/2022

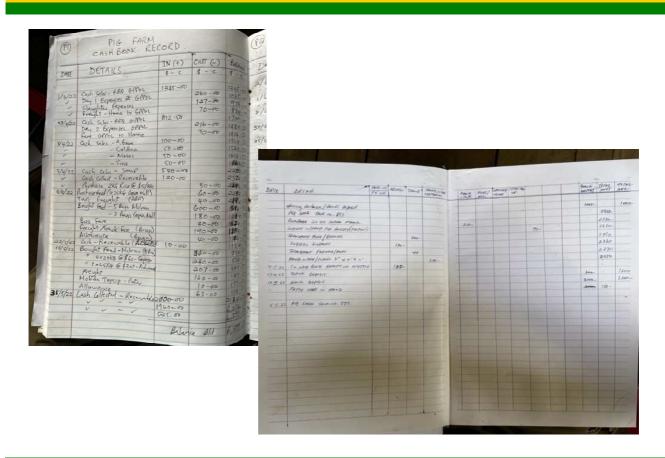

9

10

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Monitoring results

| | Komuniboli | Falake |
|--------------------------------|------------|------------|
| No. of pigs procured | 11 | 12 |
| No. of pigs died | 1 | 6 |
| No. of pigs sold | 3 | 2 |
| No. of pigs currently pregnant | 4 | 2 |
| Income | SBD 9,842 | |
| Expenditure | SBD 4,753 | |
| Balance (current) | SBD 5,089 | SBD 5,000 |
| Balance (expected in Dec 2020) | SBD 20,390 | SBD 28,400 |

Note: The expenditure does not include initial input (pig pen construction materials, feed, etc.) provided by the SFRM Project.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

3 Review 3.1 Method

Six Criteria

- 1) Objectives
- 2) Relevance
- 3) Performance
- 4) Effectiveness
- 5) Cost-effectiveness
- 6) External factors

| | Criterion for | • " | | Level | | 5 10 15 1 0 |
|---|------------------|--|---|-------|---|--------------------------|
| | assessment | Question | Α | В | С | Description/ Explanation |
| | | What were the original/ primary objectives of this activity? | | NA | | |
| 1 | Objectives | Are the primary objectives still appropriate? Are there other objectives? | | | | |
| | , | What do you expect by participating in this activity? | | NA | | |
| | | What should the future objectives be? | | | | |
| | | Is the activity appropriate to achieve the objectives? | | | | |
| 2 | Relevance | If not, what are the alternative options? | | NA | | |
| | | Are the time allocation and schedule for the activity efficient? | | | | |
| | | Are the methods (tools, approaches, etc.) applied for implementation of the activity appropriate? | | | | |
| | | Is the activity carried out according to principles of good practices (equity, culture, gender, etc.) in the community? | | | | |
| 3 | Performance | To what extent have the information sharing/ exchanges been made amongst the local participants, and between the IG members and other villagers? | | | | |
| | | What problems/ constraints have arisen? | | NA | | |
| | | How were the problems/ constraints dealt with/ overcome? | | NA | | |
| | | What improvements should be made to the performance of the activity in the future? | | NA | | |
| | | To what extent have expected outputs been achieved? If there is no output achieved, what are the reasons? | | | | |
| 4 | Effectiveness | How satisfactory was the training for the stakeholders? | | | | |
| | | Is there any more training necessary for the participants to make the activity more effective? If yes, what kind of training areas? | | NA | | |
| | | Was the cost of the activity reasonable for what it achieved? | | | | |
| 5 | Cost- | Would it be possible to achieve the same outputs at less cost? If yes, what should be done? | | NA | | |
| | effectiveness | How realistic would it be to replicate the work, incorporate it in government projects/ programs or make it self-financing? | | NA | | |
| | | Are there government/ or policy changes? | | NA | | |
| 6 | External factors | Are there economic and social changes? | | NA | | |
| | | Are there changes in the policy and practice of the donor (JICA)? | | NA | | |

3 Review

3.1 Results

See another file of 'MS-Word'

13

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

3 Review

3.2 Results (Summary)

1) Objectives:

- The IG members had got more and different objectives at the initial stage than expected.
- The IG members tended to have more objectives during the course of implementation.

2) Relevance:

• The activity (pig farming) is still appropriate to achieve the objectives.

3) Performance:

- In terms of time allocation, overlap of other activities (household, community participation to schools, religion, other project activities) has taken place.
- The IG members appreciated that the activity are carried out according to principles of good practices (equity, culture, gender, etc.) in the community.

3) Performance: (contnd.)

• The IG members have faced a number of problems and constraints; e.g. water, participation, sale on credit (Komuniboli), death of pigs, etc. and been trying to resolve them with best efforts.

4) Effectiveness:

At least 2 or 3 years of time is needed to achieve the objectives.

5) Cost-effectiveness

 It was difficult to implement the activity due to price increase of feeds, hardware materials, stocks, etc. but could be achieved with community participation and contribution

6) External factors

 Covid-19 has affected scheduling of training and other activities necessary for the pig farming production as well as marketing.

5 Lessons learnt and recommendations 5.1 Lesson learnt

- Integrated approach of forest management and livelihood improvement activities
- Enhancement through assistance in establishing community's organisational structure
- Priority in activity selection: capacity development related
- Potential of collective activity

19

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

5.2 Recommendations

- Extension of SFRM pilot activity model
- Dissemination of livelihood improvement activities as a measure for community's organizational capacity development
- Collaboration with other institutions for promoting SFRM pilot activity model
- Approach shift <u>from charity to capacity development</u>

Gender Training Program

Why does gender matter sustainable forest resource management?

Day 1: 8 June 2022 @ The MOFR

Atsuko Nonoguchi, Gender Expert

10:00~

Opening Remarks by Dr. Nishikawa

Outline of the Program (1)

1. Contents

Consisting 3 parts: 1) lectures; 2) workshop/group exercise; and 3) field work

2. Main Objectives

- ◆Understand the <u>basic concept of 'gender'</u> and the <u>structural causes of unequal power relations by gender</u> and other factors
- ◆Understand the importance of identifying contextspecific gender differences and incorporating gender perspectives into the planning and implementation of a program/project
- ◆Learn how to use PRA/Gender Analysis tools and conduct PRA & gender analysis for a gender-responsive planning and implementation

Outline of the Program (2)

• Day 1 (8 June) – lectures on the basic concept of gender

| Time | Contents |
|---------------|---|
| 10:00 - 10:10 | Opening Remarks by Dr. Nishikawa |
| 10:10 - 10:15 | Outline of the Program |
| 10:15 – 10:30 | Self-introduction |
| 10:30 – 12:00 | Differences between sex and gender Characteristics of gender gaps and gender inequality and root causes for those in key sectors in Solomon Islands Key findings on gender differences form the field survey Important concepts for identifying and understanding context-specific gender roles and gender relations |
| 12:00 – 13:00 | Lunch |
| 13:00 – 14:30 | International Initiatives for Gender Equality and the response of the SI government to those initiatives Concept and purposes of 'gender mainstreaming' |

Outline of the Program (3)

• Day 2 (9 June) — Exercise for PRA & Gender Analysis

| Time | Contents |
|---------------|---|
| 10:00 – 10:15 | Review of Day 1 |
| 10:15 – 11:00 | Share of Field Work Experiences, Including PRA & Gender Analysis Discussion on What We Need to Know in Komuniboli & Falake |
| 11:00 – 12:00 | PRA Tools, including 'Resource Mapping', 'Access & Control', 'Activity Profile', 'Problem, Causes, & Opportunities', 'Ranking of Problems/Needs', 'Focus Groups Discussion', etc. |
| 12:00 – 13:00 | Lunch |
| 13:00 - 14:00 | Role Play & Group Work on PRA |
| 14:00 - 15:00 | Designing & planning for field work |

5

Outline of the Program (4)

• Field Work in Komuniboli & Falake - Week of 13 June

| Length of Activity | Contents of PRA Tool/Activity |
|--------------------|--|
| 15 min. | Greetings, self-introduction, the explanation of the purpose of the visit and how to conduct PRA, etc. |
| 30 min. | 'Transect Walk' |
| 30 min. | 'Resource Mapping' and 'Access & Control' |
| 45 to 60 min. | 'Activity Profile' ('Daily Activity'/'Annual Calendar') 'Access & Control' |
| 45 to 60 min. | 'Problems, Cause, and Opportunities'/'Ranking of Problems/Needs' |
| 60 min. | 'Focus Groups Discussion' |
| 15 to 30 min | Wrap-up and Summary of Key Findings |

Self-introduction

- Name
- Position, Department
- Educational or Technical Background
- Why you attended this program or What you expect from this program

7

Rationale for Gender Analysis & Gender-responsive Planning (1)

• Community development projects do not necessarily benefit all community members in an equal way.

Why?

What do we need to do for addressing the equitable distribution of benefits?

Rationale for Gender Analysis & Gender-responsive Planning(2)

- **Social hierarchies** exist in every society and favor some people and disadvantage others.
- The social hierarchies are structured by gender, age, ethnicity, race, class, caste, religion, and other social factors.

Source: Thomas-Slayter, B. et al. 1995. A Manual for Socioeconomic and Gender Analysis.

- Development projects may reinforce the existing unequal power relations if no attention is paid to these and no action is taken for transforming these to more equal ones within the project.
- Therefore, it is necessary to identify context-specific power relations - information on who does what, who has what and who does not have, and who needs what, based on which a development project should be designed.

Concept of Gender (1)

- What is gender?
- What are critical differences between sex and gender?

Concept of Gender (2)

Definitions

♦Sex:

A biologically determined set of differences between women and men

♦Gender:

The social position and relations of women and men constructed by society. In many societies around the world, women are systematically placed in an inferior position both inside and outside the household and deprived, compared to men.

Source: Thomas-Slayter, B. et al. 1995. A Manual for Socioeconomic and Gender Analysis.

11

Concept of Gender (3)

- How is gender constructed and reinforced in the society of Solomon Island?
- What determines women's inferior position in the society of Solomon Islands?
- →Who has what & Who does not have "Control over land and other resources"
- →"Who does what" tends to shape "who can have what" and "who cannot have it"

Concept of Gender (4)

Who has what & Who does not have

Having land rights and decision-making power over land can determine a person's superior/inferior position within the household/community →

'control over land' and 'decision-making power over land'

| Society | Sex | Primary Rights | Secondary Rights | Control over & Decision- making |
|------------------------|-------|-------------------|---------------------|---------------------------------------|
| Matrilineal Society | Women | Yes | Yes | No/△ |
| Society | Men | No | Yes | Yes |
| Patrilineal Society | Women | No | Yes | No |
| Jociety | Men | Yes | No | Yes ₁₃ |

Concept of Gender (5)

• Who does what?

Gender Norms and Stereotypes (Gender Bias)

Are there any gender norms and stereotypes (gender bias) specific to each Island/ matrilineal or patrilineal society, or common to the whole country of Solomon Islands?

- "Politics is men's field."
- "Decision-making and taking leadership are men's roles."
- "Men can understand things better than women. Men can speak better than women."
- "Women should not take part in land issue discussions."
- "Women should not speak up in a public place."

Concept of Gender (6)

- Why are those gender norms and stereotypes problematic?
- ◆ For <u>whose favor</u> are those gender norms and stereotypes constructed?
- ◆ How do gender division of labor/role and gender division of sphere/space affect women and men's social, economic, and political position in society?

gender division of labor/role:

productive work by men and reproductive work for women

gender division of sphere/space:

public space for men and private space for women

15

Concept of Gender (7)

The Structure of Gender Discrimination & Inequality

- ◆Who has what and who does not have?
 - → who can have decision-making power and control over land
- ◆Who does what? / Gender division of labor/role
 - → who can have access to cash income and decision-making power over the use of cash income
- Who does what and where? / Gender division of sphere/space
 - who can have access to information and decision-making processes in public places

Gender Gaps/Inequality in Key Sectors of Solomon Islands (1)

- Education
- ♦ NER in primary education(2008-12): B 87.7%; G 87.3%
- ◆ NER in secondary education (2008-12): B 43.8%; G 41.5%
- ◆Gender Parity Index (GPI) in the enrollment ratio in primary, lower and upper secondary education (2019): 0.91; 1.00; and 0.94
- Health
- ◆ Maternal Mortality Rate (per 100,000 births): 107 (2017)
- ◆85% of delivery takes place at hospital with technicians (2015)
- ◆30% of rural women and 17% of urban women need to get permission from their husbands to go to hospital (2006)
- Economic Activity/Employment
- lacktriangle Labor force participation rate (2009): M 63.5%; F 62.2%
- ◆Paid work engagement (2009): M 50.7%; F- 26%
- ◆Who decides how to use wife's income: wife 14.2%; husband 29.1%; together 55.2% (2015)

Source of all data are referred to The SFRM Project. 2021. Gender Analysis: Solomon Islands

Gender Gaps/Inequality in Key Sectors of Solomon Islands (2)

- Political Participation
- ◆ 2 out of 50 PM seats are taken by women (since 2019)
- ◆Only 4 women have been elected since the independence
- Violence against Women (VAW)/Gender-based Violence (GBV)
- ◆ 64% of women aged 15 to 49 ever experienced <u>physical</u> and/or sexual violence by their intimidate partner (2009)
- ◆Out of those women, 42% experienced such violence by intimidate partner within the past 12 months (2009)
- ◆ 58% of women aged 15 to 49 were controlled their mobility by their partners/husbands (2009)

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (1)

A Field Survey for Gender Analysis conducted

| Survey Sites | Komuniboli & Falake |
|--------------------------|--|
| Survey Period | February and April 2021 |
| Objective | Identify context-specific gender differences which should be incorporated into the planning and implementation of the project |
| Methodology | Qualitative research methods, such as key-informant, focus groups, and in-depth interviews |
| Information collected on | community's socio-economic condition community decision-making system men & women's access to & control over resources gender division of labor/role in productive & reproductive work men & women's daily-based activity profile & annual crop calendar changes in the availability of natural resources over time decision-making power inside & outside the household the way of the project staff's community mobilization and facilitation |

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (2)

1) Access to & Control over Common Land

Komniboli

- Matrilineal Society
- 3 clans: Chaobata/Lunga land-holding clan
- Women of Chaobata are entitled to primary land rights, but actual decision-making power exercised by their uncles/sons
- Women usually leave Komuniboli at their marriage due to bride price
- Men of Chaobata have only secondary land rights, as well as women & men of other 2 clans

<u>Falake</u>

- Patrilineal Society
- 4 clans all men share primary land rights together
- Women of those 4 clans have no primary land rights, but secondary ones
- Women leave Falake at their marriage due to bride price.

20

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (3)

2) Old & New Community Decision-making System

Komuniboli

Before the Project

 Elderly men of Chaobata used to exclusively dominate decision-making processes

Committees

- Only one woman selected as chairperson
- 13 women selected as members out of 31
- Some women hesitated due to a lack of selfconfidence

<u>Falake</u>

Before the Project

 Male representatives of 4 clans used to get together, discuss, and made decisions

Committees

- Only one women selected as chairperson
- 13 women selected as members out of 32
- A few women refused due to a lack of time

21

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (4)

3) Gender division of labor/role

in shifting cultivation

1) Komuniboli

| | Cutting trees & grasses | Cleaning | Burning | Plowing & land prep. | Sowing & Planting seedlings | Weeding | Harvesting | Market- ing |
|-------|-------------------------------|----------|----------|----------------------|-----------------------------|----------|--------------|----------------|
| Men | ✓ | ✓ | | ✓ | | | | |
| Women | | √ | √ | √ | \checkmark | √ | \checkmark | √ |

2) Falake

| | Cutting trees & grasses | Cleaning | Burning | Plowing & land prep. | Sowing & Planting seedlings | Weeding | Harvesting | Market- ing |
|-------|-------------------------------|----------|----------|----------------------|-----------------------------|--------------|------------|----------------|
| Men | ✓ | ✓ | ✓ | \checkmark | ✓ | | | |
| Women | | √ | √ | \checkmark | \checkmark | \checkmark | √ | √ |

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (5)

3) Gender Division of Labor/Role

in Forest Resource Management

1) Komuniboli

| | Planning for Forest Resource Managem't | Cutting Grasses & Ground leveling | Planting Seedlings | Forestry (Taking care of seedlings) | Pruning & Weeding | Patrol of wildfire & illegal logging | Cutting & marketing |
|-------|---|--|-----------------------|--|----------------------|---|---------------------|
| Men | √ | √ | | | V | V | ✓ |
| Women | (🗸) | | ✓ | ✓ | ✓ | | |

2) Falake

| | Planning for Forest Resource Managem't | Cutting Grasses & Ground Ieveling | Planting Seedlings | Forestry (Taking care of seedlings) | Pruning & Weeding | Patrol of wildfire & illegal logging | Cutting & marketing |
|-------|---|--|-----------------------|--|----------------------|---|---------------------|
| Men | √ | √ | √ | | √ | √ | \checkmark |
| Women | (✓) | √ | √ | | | | 23 |

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (6)

3) Gender Division of Labor

in Reproductive Work - household chores &care work - unpaid work

Similar Findings in Komuniboli & Falake

| | Collecting Firewood | Fetching Water | Cooking | Washing Clothes | Child- care | Livestock |
|-------|------------------------|-------------------|----------|--------------------|----------------|--------------|
| Men | (∨) | (✓) | | (✓) | | √ |
| Women | √ | √ | √ | √ | √ | \checkmark |

Women's time-poverty

 The time spent for reproductive work by women is 2 to 3 hours more than by men in both Komuniboli and Falake

Gender Differences/Inequality in Roles & Control over Rural Livelihoods (7)

4) Who has access to cash income earned by selling crops and animals and who has control over the income

| Who has direct access to cash income | | from Vegetable | from Fruits Vetel numts | from Cacao, coconuts, kava | from Pig fish |
|--------------------------------------|-------|-------------------|----------------------------|-------------------------------|----------------------|
| Komniboli | Women | ✓ | √ (mainly) | depends on the household | Together? |
| | Men | | | | |
| Falake | Women | ✓ | √ (banana & betel nuts) | | depends on household |
| | Men | | ✓ (betel nuts) | √ (mainly) | |

Who has decision-making power over HH expenditure

| | Daily shopping | School expenses | Medical expenses | Big shopping | Starting a business |
|------------|-------------------|-----------------|------------------|--------------|---------------------|
| Komuniboli | Women | Both | Both | Women | Men |
| Falake | Women | Both | Both | Women | Both ₂₅ |

Critical Gender Perspectives (1)

For gender-responsive planning & implementation:

What we have to take into account: Risk & Opportunities

Existing decision-making system

Can women participate in decision-making and speak up?

Context-specific gender division of labor/role

Can women not hesitate, but participate in forest resource management planning /agroforestry/income generating activities?

Available/free time & time-constraint during a day/year

Can women manage time to participate in decision-making processes & activities?

Decision-making/power relations over profits

Can women have decision-making power over and share the profit of forest resource management/agroforestry/income generation activities?

Critical Gender Perspectives(2)

Analysis of Risks & Opportunities and Gender Action Plan

| Actual Situation | Risk | Opportunities | What Action/ to be Taken |
|---|---|--|--|
| Land-holding clan's elderly men used to dominate decision-making processes for land distribution/forest & community development issues. | Women and the youth might be excluded from decision-making processes. | Women and youth might participate in decision-making and their voice/needs might be heard. | Facilitate people to develop a new democratic decision-making system Mobilize community people, especially women |
| Women are busy doing both productive & reproductive work | Women might not participate in activities & training and as a result they might not benefit | Women might participate in activities & training and improve their capacity/livelihood | Sensitize both men & women and let men help women doing reproductive work, so that women can participate |
| Women do not have decision-making power over income | Women might end up being exploited their labor only, but no money with them | Women might be distributed some profits earned | Facilitate people to distribute profit on a individual basis, not household basis ⁷ |

International Initiatives for Gender Equality

- Convention on the Elimination of All Forms of Discrimination against Women (CEDAW) in 1979
- The Gov. of Solomon Islands ratified CEDAW in 2002
- Pacific Platform for Action on the Advancement of Women and Gender Equality (PPA) adopted in 1994, reviewed in 2004 – 4 priority areas
- Pacific Platform for Action for Gender Equality and Women's Human Rights (2018-2030)
- Pacific Leaders' Gender Equality Declaration (PLGED)
- SDGs Goal 5: Gender Equality
- UNFCCC/COP Rima Working Plan on Gender Equality
- GCF the preparation and submission of Gender Assessment & Gender Action Plan is compulsory

Gender Mainstreaming (1)

What is "gender mainstreaming"?

20

Gender Mainstreaming (2)

Gender Mainstreaming:

Fully incorporating gender perspectives into laws, policies, plans, and programs/projects, as well as organizational structure and institutions

Legislation/Policy-making

- ◆ Laws: Constitutions, Penal Code, Family/inheritance Law, Land Law, Forest Law, etc.
- ◆ Policies: NDS (2016-2035); NGEWDP (2016-2020); NFP (2020)
- ◆Plans: MTDP

Gender Mainstreaming (3)

Organizational Structure

- Establishment of national machinery for promoting gender equality: MWYCFA
- Appointment of gender focal points within relevant ministries/agencies and collaboration with MWYCFA

Institutional Correction

- ◆ Promotion of female officers in decision-making/leading position in the ministry/offices
- ◆Provision of equal opportunities for recruitment, promotion, training, and type of work, as well as equal salary
- ◆Protection of workers from a risk of violence at working place

Gender Mainstreaming (4)

- What extent to which has 'gender mainstreaming' been proceeded within the MOFR?
- ◆ National Forestry Policy (2020)

Gender concerns and perspectives are limited to the strategy of 'capacity development' or 'Goal 6', not fully incorporated into this policy

Gender focal points

GFPs have been appointed in the MOFR, but they are not functional and there is no collaboration between MOFR and MWYCFA

- ◆A system for collecting and updating gender-disaggregated data – not yet
- ◆# of female officers working for MOFA: ?
- ◆# of female officers at decision-making/leading position: ?
- ◆Equal opportunities for recruitment; promotion; training; type of work, as well as equal salary: ?

32

Review of the Day

- Is there anything different from what you have 'known' about gender?
- Is there anything you have newly realized?
- Is there anything in which you got interested?

33

Gender Training Program

Why does gender matter sustainable forest resource management?

Day2: 9 June 2022 @ The MOFR

Atsuko Nonoguchi, Gender Expert

Content of Today's Activity

• Day 2 (9 June) - Exercise for PRA & Gender Analysis

| Time | Contents |
|---------------|--|
| 10:00 – 10:30 | Review of Day 1 |
| 10:30 – 11:00 | Share of Field Work Experiences, Including PRA & Gender Analysis Discussion on What We Need to Know in Komuniboli & Falake |
| 11:00 – 12:00 | PRA Tools, including 'Resource Mapping', 'Access & Control', 'Activity Profile', 'Problem, Causes, & Opportunities', 'Focus Groups Discussion', etc. |
| 12:00 – 13:00 | Lunch |
| 13:00 – 14:00 | Role Play & Group Work on PRA |
| 14:00 – 15:00 | Designing & planning for field work |

Content of Field Work

Field Work in Komuniboli & Falake – Week of 13 June

| Length of Activity | Contents of PRA Tool/Activity |
|--------------------|--|
| 15 min. | Greetings, self-introduction, the explanation of the purpose of the visit and how to conduct PRA, etc. |
| 30 min. | 'Village Walk' |
| 30 min. | 'Resource Mapping' |
| 60 to 75 min. | 'Activity Profile' 'Access & Control' |
| 45 to 60 min. | 'Problems, Cause, and Opportunities' |
| 60 min. | 'Focus Groups Discussion' |
| 15 to 30 min | Wrap-up and Summary of Key Findings |

3

Review of Day 1 (1)

- Why do we need to undertake gender analysis & gender-responsive planning & implementation?
- Why gender matters forest resource management?
- What is a critical difference between sex and gender?
- What do we need to focus on in order to identify context-specific gender differences?

Review of Day 1 (2)

- Social hierarchies exist in every society and favor some people and disadvantage others. These unequal social hierarchies are structured by gender and other factors. If no action is taken for transforming such existing unequal power relations within the projects, development projects might reinforce them.
- Although women also play an important role in agriculture and forest resource management, they are often excluded from decision-making processes and do not benefit from development projects. So it is important to involve women from a right-basis perspective and effectiveness.
- Sex is a set of biological differences between men and women, while gender is the social relation of men and women structured by society. Women are usually put in an inferior position.
- Gender analysis should focus on who does what, who has what/who does not what, and who needs what.

5

Review of Day 1 (3)

Gender differences to be identified:

- Who does what and Where
 gender division of labor/role &
 gender division of sphere/space
- Who has what/ Who does not have what
 access to & control over land & other resources
 decision-making power over land/resource &
 cash income
- Who needs what analysis of risk & opportunities

PRA for Gender Analysis (1)

Participatory Rapid Appraisal (PRA) is a participatory & interactive learning process/ research methodology, consisting of 40 tools & strategies

- ◆PRA methodology can facilitate participants to learn from each other, build consensus among participants, and stimulate their initiatives.
- ◆Some tools of PRA methodology are useful for identifying the power dynamics/hierarchical structure of a target community, especially context-specific gender differences in roles, relations (power relationship).

7

PRA for Gender Analysis (2)

Key principle of PRA: People's participation

- Avoid dominance and manipulation by certain local authorities/ leaders
- Avoid the outside party's (researchers') initiative and manipulation
- Promote/facilitate participants' active participation, self-reliance, and initiative

PRA Tools for Gender Analysis (1)

- 1. Village Walk & Resource Mapping
- Objective: to confirm among participants about what resources are available and where in a target village
- Items to be visualize in a map:
- ◆ Infrastructure, such as roads, houses, education/health/religious facilities, etc.
- ◆ Forest agro-forestry plots
- Agricultural land (short-term, mid-term, and longterm/plantation crops)
- ◆ Rivers/watershed
- ◆ Pig & Poultry House

Reference: SEGA Manual pp. 100 - 103

9

PRA Tools for Gender Analysis (2)

- 2. Access & Control Profile
- Objective: to identify who has access to & control over resources
- · Resources/Assets/Skill-Technology/Income to be focused on
- 1) Komuniboli Matrilineal Society

| | Who has | 'Access' | Who has 'Control' | | |
|----------------------------------|--------------|--------------|-------------------|--------------|--|
| | Men | Women | Men | Women | |
| Forest land | ✓ ✓ ✓ | ✓ ✓ | V V V | \checkmark | |
| Agricultural land | ✓ ✓ | ✓ ✓ ✓ | ✓ ✓ ✓ | \checkmark | |
| Pigs & Poultry | | | | | |
| Training/ Technology | | | | | |
| Income from short- term crops | | | | | |
| Income from long- term crops | | | | | |

PRA Tools for Gender Analysis (3)

2) Falake – Patrilineal Society

| | Who has | 'Access' | Who has 'Control' | | |
|-----------------------------------|------------|--------------|-------------------|-------|--|
| | Men | Women | Men | Women | |
| Forest land | ✓ ✓ ✓ | ✓ ✓ | ✓ ✓ ✓ | none | |
| Agricultural land | √ √ | ✓ ✓ ✓ | ✓ ✓ ✓ | none | |
| Pigs & Poultry | | | | | |
| Training/ Technology | | | | | |
| Cash Income from short-term crops | | | | | |
| Cash income from long-term crops | | | | | |

Reference: SEGA Manual pp. 116 - 119

PRA Tools for Gender Analysis (4)

3. Activity Profile – to identify who does what

1) Shifting cultivation

| | Men | Women |
|--------------------------------------|--------------|--------------|
| Making a plan what to plant and when | ✓ | ✓ ✓ ✓ |
| Cutting trees & grasses | ✓ ✓ ✓ | none |
| Cleaning | ✓ ✓ | ✓ ✓ ✓ |
| Burning | \checkmark | ✓ ✓ ✓ |
| Plowing & Land preparation | ✓ ✓ ✓ | ✓ ✓ ✓ |
| Sowing seeds/ planting seedlings | \checkmark | ✓ ✓ ✓ |
| Weeding | none | ✓ ✓ ✓ |
| Harvesting | none | ✓ ✓ ✓ |
| Marketing | \checkmark | ✓ ✓ ✓ |

PRA Tools for Gender Analysis (5)

2) Forest Resource Management

| | Men | Women |
|---|--------------|----------|
| Planning for forest resource management | ✓ ✓ ✓ | √ |
| Cutting grasses & ground leveling | ✓ ✓ | √ |
| Planting Seedlings | ✓ ✓ | √ |
| Forestry (Taking care of seedlings) | none | ✓ ✓ |
| Pruning & Weeding | √ √ √ | ✓ ✓ |
| Patrol of wildfire & illegal logging | ✓ ✓ ✓ | none |
| Cutting & Marketing | ✓ ✓ ✓ | none |

13

PRA Tools for Gender Analysis (6)

3) Reproductive work – household chores & care work

| | Men | Women |
|--------------------------|-----|-------|
| Collecting firewood | | |
| Fetching water | | |
| Cooking & washing dishes | | |
| Washing clothes | | |
| Cleaning house | | |
| Child-care | | |
| Taking care of livestock | | |

PRA Tools for Gender Analysis (7)

4. Daily Activity

Objective: to identify who does what and when is busy & free during a day

| M | en | Woı | men |
|------|------------|------|------------|
| Time | Activities | Time | Activities |
| | Get up | | Get up |
| | | | |
| | | | |
| | | | |
| | | | |
| | Go to bed | | Go to bed |

15

PRA Tools for Gender Analysis (8)

5. Annual Calendar

Objective: to identify who does what for crop cultivation throughout a year

| | | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |
|----------------|--------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Veg. | M F | | | | | | | | | | | | |
| Fruits | M F | | | | | | | | | | | | |
| Cocoa/ Kava | M F | | | | | | | | | | | | |
| Pig | M F | | | | | | | | | | | | |
| Poultry | M F | | | | | | | | | | | | |

Reference: SEGA Manual pp. 107 - 110

PRA Tools for Gender Analysis (9)

6. Analysis of Problems, Causes, and Opportunities

Objective: to identify and analyze critical problems, their causes, and opportunities to solve the problems

| Problems | Opportunities | |
|--|--------------------------------------|---------------|
| Problems | Causes | Opportunities |
| Women hesitate to participate in decision-making and take leadership | Lack of self-confidence | |
| Women cannot afford to actively participate in activities | Too busy doing a lot of duties | |
| Productivity of crops declines drastically | Soil illusion Giant African Snail | |
| Book-keeping/Record- keeping is not properly done | | |

Reference: SEGA Manual pp. 141 - 143

PRA Tools for Gender Analysis (10)

7. Interviews - Focus Groups Discussion

Objective: Researchers can collect ideas/thoughts from the diverse group of people during a limited time

Procedures & considerations

- Set up the main objective of the discussion
- Develop a semi-structured questionnaire to address the objective
- Form a group of 5 to 7 women only/men only/mix with diverse socio-economic/similar background
- Facilitate/encourage all participants to express their ideas, thought, and experiences and prevent particular persons from dominating the discussion

17

PRA Tools for Gender Analysis (11)

Main objective for Focus Groups of Discussion

To address the question: How has the SFRM Project impacted women in terms of their empowerment?

Self-reliance & Empowerment: a person can make a choice, make a decision, and act on her/his own

The example of a Semi-structured questionnaire

- Did women involve in decision-making before the SFRM started?
- · If not, why?
- How were women's ideas and thoughts about their participation in community's decision-making process when the SFRM staff first encouraged them to do so?
- Whv?
- · Are there any changes in their ideas and thoughts?
- Why?
- To what extent have women participated in decision-making, forest resource management, agro-forestry, or other income generating activities?
- Why do you think so?
- If women's participation is not active or constrained, what are main reasons?
- Did you try any measures to solve such problems/constraints?
- Why (or why not)?
- How do you evaluate women's changes in terms of their attitude/self-reliance and capacity?
- · Why do you think so?
- What do you think promoted/contributed to their changes?
- · What else do you think women need to improve their livelihoods?
- · Why do you think so?
- What do you think women need to involve more in decision-making and take leadership?
- Why do you think so?

19

Designing & Planning for PRA (1)

- Who go to Komuniboli and Falake for field work?
 Komuniboli on Monday, 13 June by car
 Falake from 15 to 17 June by air and car
- What is your main objective for PRA/Gender Analysis?
- What tools will you use for addressing your main objective?
- How much time is necessary for collecting information by using each tool?
- How and for what purpose will you use the results of PRA?

Designing & Planning for PRA (2)

| | | Komniboli | Falake |
|---|---------------------|-----------|--------|
| 1 | Who goes | | |
| 2 | Main objectives | | |
| 3 | Tools | | |
| 4 | Time schedule | | |
| 5 | How to use findings | | 21 |

The Project on Capacity Development for Sustainable Forest Resource Management

Gender Training Program

Why does gender matter sustainable forest resource management?

Field Work @ Komuniboli on 13 June 2022

Atsuko Nonoguchi, Gender Expert

Today's Activity

PRA & Gender Analysis Workshop

| Length of Activity | PRA Tools/Activities |
|--------------------|---|
| 30 min | 'Village Walk' |
| 30 min. | 'Resource Mapping' |
| 30 min. | 'Activity Profile' and 'Access & Control' |
| 30 min. | 'Daily Activity' and 'Annual Calendar' |
| 30 min. | 'Problems, Cause, and Opportunities' |
| 60 min. | 'Focus Groups Discussion' |
| 10 min | Review of the Day |

Today's Goal

- Share the thoughts and experiences of participants and learn from each other
- Identify who does what and who has what/who does not have what
- Think about your problems and what action you need to take

3

1. Resource Mapping

Drawing a Village Map

| Roads |
|---|
| Forest land & Agro-forestry Plots |
| Agricultural land |
| Rivers, springs, and ponds |
| Social facilities (school, health post, |
| community center, church, etc.) |
| houses |

2. Activity Profile (1)

to identify who does what

1) Shifting Cultivation: Short-term Crop Production

| | Steps/Activities | Men | Women |
|----|------------------------------------|-----|-------|
| 1 | Making a plan what to plant & when | | |
| 2 | Cutting trees & grasses | | |
| 3 | Clearing | | |
| 4 | Burning | | |
| 5 | Making a nursery for seedlings | | |
| 6 | Plowing & Land preparation | | |
| 7 | Sowing seeds/ planting seedlings | | |
| 8 | Weeding | | |
| 9 | Harvesting | | |
| 10 | Marketing | | |

2. Activity Profile (2)

2) Forest Resource Management: long-term forest tree species (Timber)

| | Steps/Activities | Men | Women |
|----|---|-----|-------|
| 1 | Planning, including selection of site and species, layout of plantation, etc. | | |
| 2 | Cutting grasses & ground leveling | | |
| 3 | Developing a nursery | | |
| 4 | Seed preparation, sowing seeds, preparing for seedlings | | |
| 5 | Planting Seedlings | | |
| 6 | Tending | | |
| 7 | Weeding, Mulching, Shading, etc. | | |
| 8 | Patrol of wildfire & illegal logging | | |
| 9 | Cutting & Milling | | |
| 10 | Marketing | | |

2. Activity Profile (3)

3) Household chores & care work

| | Activities | Men/ Boys | Women/ Girls |
|---|--------------------------|-----------|--------------|
| 1 | Collecting firewood | | |
| 2 | Fetching water | | |
| 3 | Cooking | | |
| 4 | Washing dishes | | |
| 5 | Washing clothes | | |
| 6 | Cleaning house | | |
| 7 | Child-care | | |
| 8 | Taking care of livestock | | |

7

3. Access & Control Profile

to identify who has access & control and decision-making power

| | Who has 'Access' | | Who has 'Control' | | | |
|---------------------------|------------------|--------------|-------------------|---------------|--|--|
| | Men & Boys | Women & Boys | Men & Boys | Women & Girls | | |
| Forest land | | | | | | |
| Agricultural land | | | | | | |
| Pigs | | | | | | |
| Chickens | | | | | | |
| Fish | | | | | | |
| Employment & Salary | | | | | | |
| Short-term crops & Income | | | | | | |
| Long-term crops & Income | | | | | | |

4. Daily Activity

to identify who does what and when are women & men free during a day

| N | len | Women | | |
|------|------------|-------|------------|--|
| Time | Activities | Time | Activities | |
| AM | Get up | | Get up | |
| | | | | |
| | | | | |
| PM | | | | |
| | | | | |
| | Go to bed | | Go to bed | |

5. Annual Crop Calendar

to identify who does what for each crop cultivation throughout a year

| Crop | M/F | Jan | Feb | Mar | Apr | May | Jun | Jul | Aug | Sep | Oct | Nov | Dec |
|---------------|--------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|
| Cab bage | M F | | | | | | | | | | | | |
| Pota toes | M F | | | | | | | | | | | | |
| Pinea pple | | | | | | | | | | | | | |
| Cacao | M F | | | | | | | | | | | | |
| Pig | M F | | | | | | | | | | | | |
| Poul try | M F | | | | | | | | | | | | |

6. Problems, causes, & Opportunities

to identify and analyze critical problems, causes, and opportunities to solve the problems

| Problems | Causes | Opportunities |
|----------|--------|---------------|
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |
| | | |

11

7. Focus Groups Discussion

How do you evaluate the impact of the Project on your empowerment?

Changes in women's attitude and capacity

- Women and men's attitude towards women's involvement in decision-making processes
- Women's access to information, technology, and financial resources
- Women's capacity to solve problems by themselves
- Women's capacity to negotiate with men and other relevant people
- ◆ Women's initiatives & leadership to take an action on their own
- Problems & challenges faced by women and reasons

8. Review of the Day

- How was today's workshop?
- Did you notice anything you have never known?
- Did you find anything interesting?

13

Introduction

- Today websites have become a major part of our lives.
- Through a blog or a wiki or a webpage, everyone these days is present on the web, one way or the other.
- So, does that mean everyone who wants to be on the web has to be a geek? No.

All you need is a Content Management System

• Well, not any CMS would do. What you need is Joomla!.

JOOMLA IS YOUR FRIEND

Content Management System In simple words, content management system is a system that manages content.

- What is Content? Content is any type or unit of digital information. It can be text, images, graphics, video, sound, documents, records, etc or anything that we would like to manage in an electronic format.
- What is the CM System ? A CMS is a tool that enables us to create, edit, delete and finally publish in a varying format a variety of content as well as site maintenance from a central page. It provides a collection of procedures used to manage workflow in a collaborative environment.

Benefit of CMS

- Consistent website design.
- Website is easy to update.
- Site can be updated from anywhere.
- No need to pay someone to keep our Site Updated.
- Availability of site modules and templates.
- An open source community (for support).
- Design changes are easy.
- Content and structure can easily be adapted.
- Content is well organized and searchable.
- You can assign different webmasters to administer the content.

Various CMS product PhpNuke (www.phpnuke.org)

Plone (www.plone.org)

Drupal (www.drupal.org)

Mambo (www.source.mambo-foundation.org)

Moodle(www.moodle.org)

Wordpress(www.wordpress.org)

Joomla (www.joomla.org)

What is Joomla?

- The name Joomla is derived from the Swahili(East African Language) word "Jumla", which means "all together" or "as a whole".
- Joomla! is one of the most powerful Open Source Content Management Systems. It is used all over the world for everything from simple websites to complex corporate applications.
- Joomla! is easy to install, simple to manage, and reliable.
- It is a modular CMS.
- 2.7 percent of the Web is running on Joomla.
- It enables you to build websites and powerful online applications.
- With the minimal amount of instructions.
- It is highly extensible, and thousands of extensions(Most for free) are available.
- Joomla runs on PHP/MySql.

Why to use Joomla?

- Its FREE!
- Fully supported as number 1 preferred CMS by ICTSU for all SIG ministries
- Cross Platform for client: LINUX and Windows for hosting
- Pro-Active Support Joomla! Teams and Community members.
- Simplicity Intuitive Graphical Web User Interface (WebUI)
- Flexibility Highly configurable and tailorable
- Robust Extremely stable core infrastructure
- Extensible 3rd Party Extension and Plug-In capabilities
- Dynamic Content MySQL database driven

Why Joomla is Better Than Other CMS

| JOOMLA | OTHER CMS |
|--|--|
| It is designed to work perfectly in basic shared web hosting environments, a package that is least expensive and most common. Installer is simple and just like any other common desktop software. | The installation process is a bit complicated. |
| It is supported by several extensions, add-on, and plug in. They are written in PHP, which is most widely used, general purpose scripting language and best suited for web development. | Add-ons, Plug-ins, although deeply integrated, but are less powerful compared to Joomla. |
| Joomla probably has a pre built module to transform it in a social bookmarking website. | It is not known to support it. |
| Joomla's greatest advantage is availability of a large number of extensions that you can use to Plug-in extra features into your website and transform your website into anything you like. | Very Limited extensibility |

Website
Webmaster and
Administrator
system
requirement

The following are the minimum system recommendations for the web master:

- Computers or mobile devices that support recommended internet browsers.
- Web browsers: Firefox 70+, Chrome 78+, Internet explorer 8+.

GETTING INTO MOFR WEBSITE

• URL for MOFR site (Frontend) is http://www.mofr.gov.sb

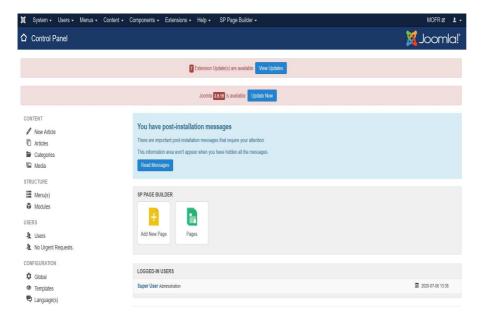

635

 URL for CMS (Backend) is http://www.mofr.gov.sb/Adm inistrator
 LOGIN IN THE BACKEND (CMS)

CONTROL PANEL

 The CONTROL PANEL on the Home page contains quick links to site and component management tools, and an Activity panel showing statistics for most-used administrative activities.

- Top Level Menus
- File Path (where you are)
- Quick Link Icons
- Quick Link Tabs
- Activity Panel Tabs showing admin activity statistics – for example, Users who are currently logged in, most updated items, and most recently created items. Also allows an Administrator to log users out.

EXCITING THE CONTROL PANEL

• To exit the system, the following image displays the steps to successfully exit or log out from the system. It is always important to log out after every session or update and you must ensure that your browser does not store your login username and password.

Recognizing different elements of MOFR site and how they relate to the CMS

All websites are different, based on their design and business function requirements. A Joomla! site will give you a wide range of flexibility in design and functionality from very simple to extremely elaborate; but whatever the degree of complexity, you will always be in control. Each element of your website is managed by a different function within the Content Management System.

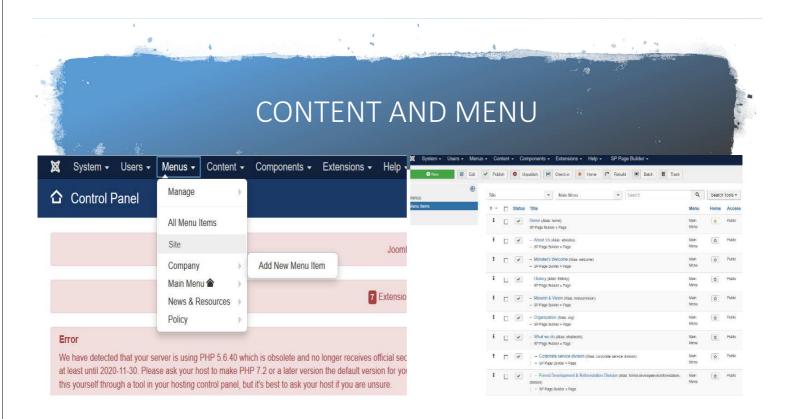

A TEMPLATE is created to a specified design – this will dictate what type of font is used, where different menus appear, where modules (such as a newsflash) will appear.

UPDATING THE WEBSITE

In order to properly update the website, it is important to discuss first how the main menu or navigation of the front end is set up. This is very important because the content of the website is categorized mainly under each menu item and, in order to view specific content, the user will need to know the site menu in order to navigate and find information easily.

MAIN MENU

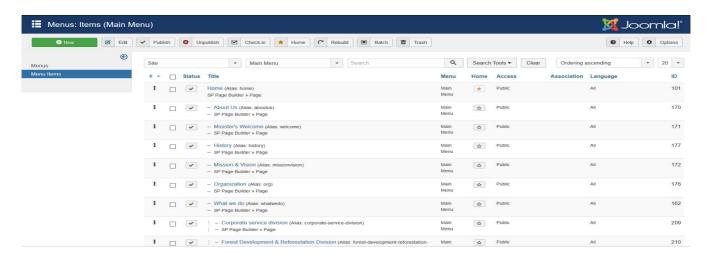

The menu of the website is categorized in the following items: (Refer to 1.4 SITE MAP)

- 1. Home
- 2. Forest Policy
- 3. News & Resources
- 4. Forest Information

The menu is organized into a 3 level hierarchy. This ensures that users will not click more than 3 times to find information on the site. Reducing the number of clicks on the menu is a way of achieving a clean and simple navigation system. Having a simple menu means less problem solving for the user or visitor, thus giving them the freedom to freely navigate the site and easily get to main content pages.

THE MENU MANAGER

Toolbar Buttons: **Publish, Unpublished, Move, Copy, Trash, Edit, and New** are available. The following information is displayed:

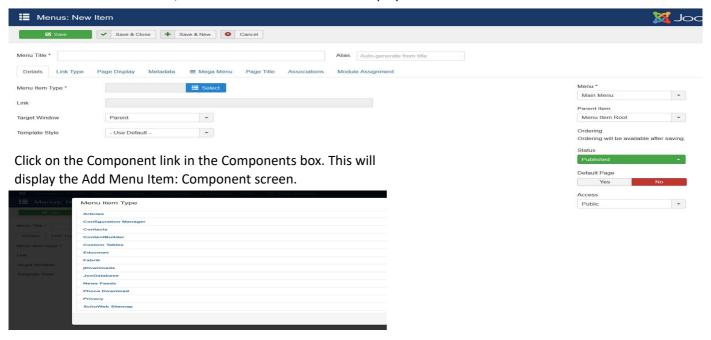

MENU MANAGER DETAIL OPTION

• Details/Options

- Menu Item: This is the name given to the menu item and is displayed on the menu on the Front-end
- **Published**: This indicates whether the menu item is published, or not published. Clicking on the button will switch the state of that menu item between Published and Unpublished.
- Reorder: You can use the drag and drop to alter the order in which the menu items are displayed.
- **Order**: You can enter the order in which you want the menu items displayed. Use the Save button to save the changes.
- Access: This indicates what type of user has access to the menu item. By clicking on the title, you can toggle between, Public, Registered, and Special.
- Itemid: This shows the ID (identification code) for this specific Menu Item used in the database.
- **Type**: This indicates the type of link used for this menu item. If it is a Link Content Item, or a Link Static Content, you may directly edit the content by clicking the type of menu item.
- CID: This shows the Component ID of this specific Menu Item in the database. Other functions available on this screen include
- Max Levels: This drop down allows you to select the maximum levels of menu displayed. Useful if you have a long and complex hierarchical menu.
- **Display #**: This drop down allows you to select the maximum number of menu items displayed per page. Note the << Start < Previous [page number] Next > End >>navigation to move between pages

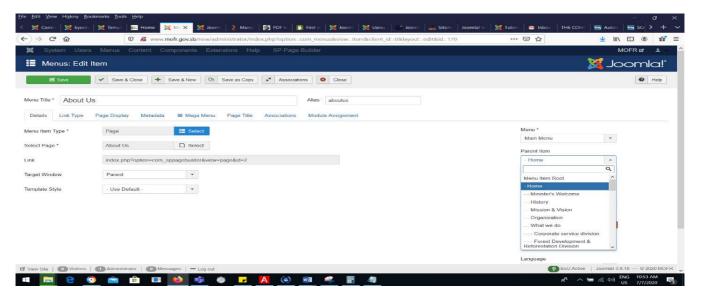

Cont. (MENU)

To create a new menu item, click on the New button. This displays the New Menu Item screen.

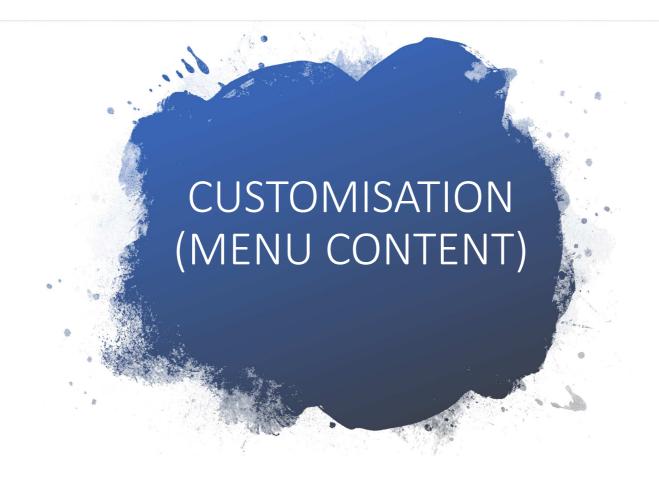

MOVE A MENU ITEMS

To move a menu item between menus, change the parent item to a menu you wish to move it to.

DELETE A MENU

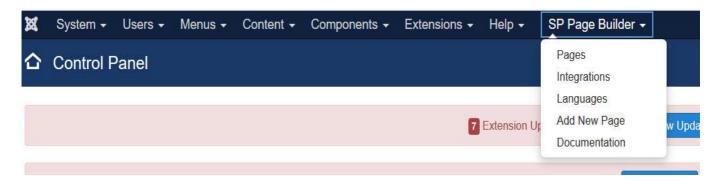

- Delete a Menu Item
- Toolbar Buttons: Trash
- This function allows you to delete menu item(s).
- In the Menu Manager, select the menu item(s) you wish to delete by checking the check box to the left side of the item(s).
- Click the Trash button.

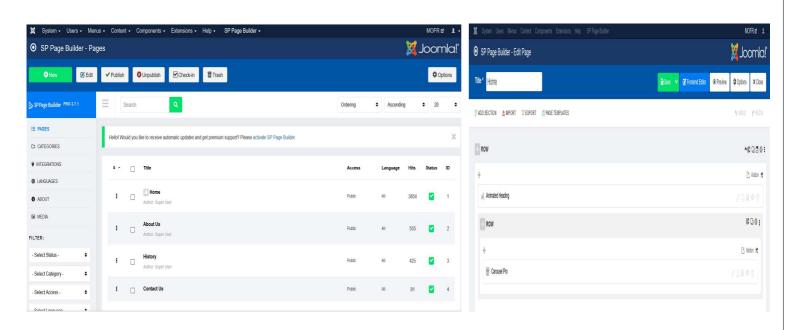

HOMEPAGE

The Home Page is made up of the following components and to make updates to each individual component the following steps are followed:

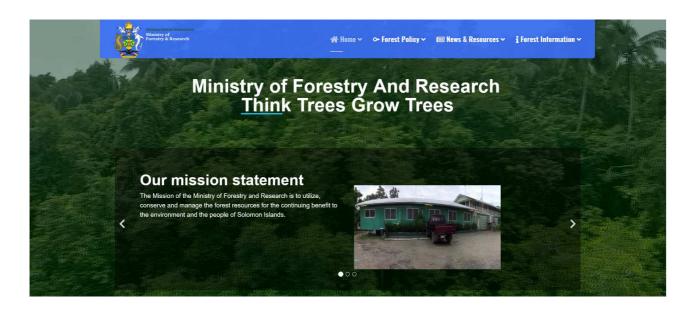

Login to the control panel (Backend). Go to SP Builder and click Pages. Refer to screenshot below.

Cont. HOMEPAGE

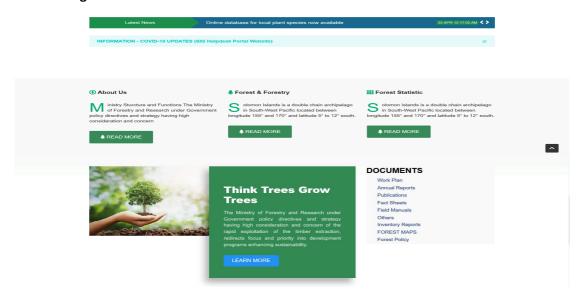

.Cont HOMEPAGE

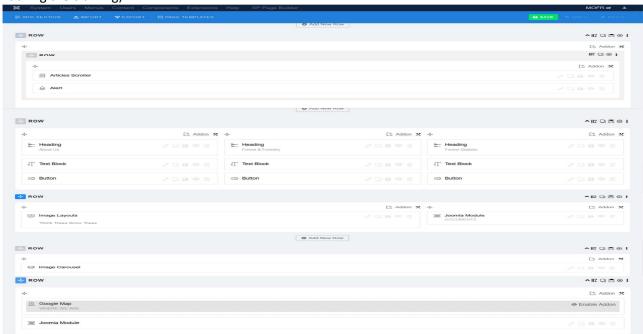

Cont. HOMEPAGE

• Home Page – Content section

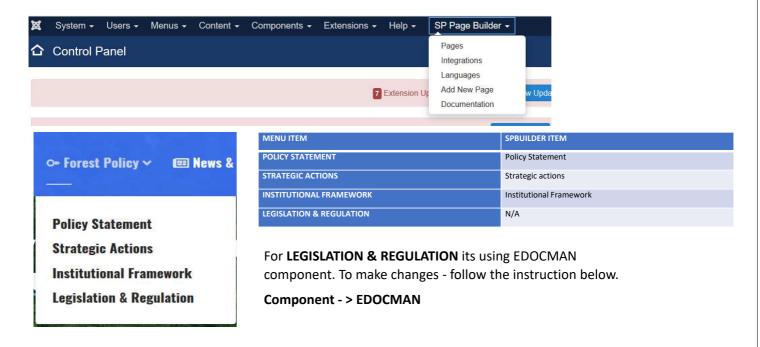

Cont. HOMEPAGE

For content section go to Home and make changes to the row as per below screenshot (More will be covered during the training).

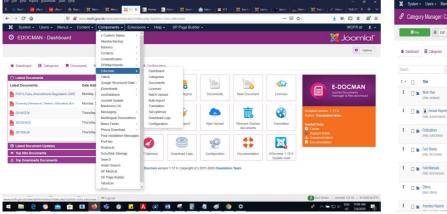

FOREST POLICY MENU

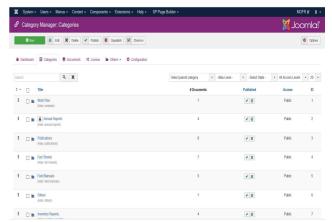

LEGISLATION AND REGULATION

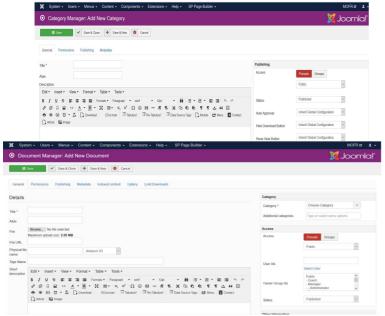

For **LEGISLATION & REGULATION** its using EDOCMAN component. To make changes - follow the instruction below.

Component - > EDOCMAN

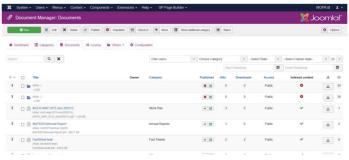

Cont. LEGISLATION AND REGULATION

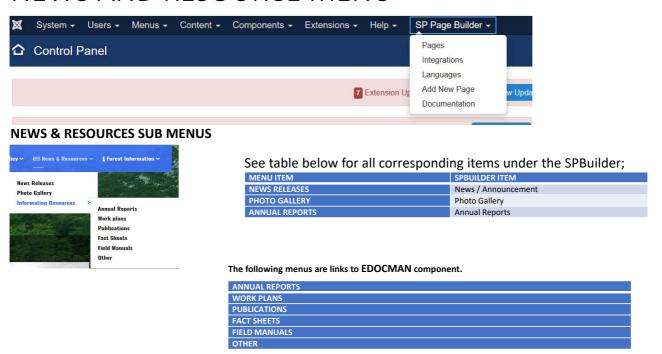

Input name and change publishing option to suite your preferences.

Secondly go to EDOCMAN document and add new to attach the document file you wish to have appear on your page or if you wish to replace an existing file. Delete the existing file and upload a new one.

Input a name and set Category to the one you just created earlier. Set access to registered if you wish to make available the document to registered users and public to public view.

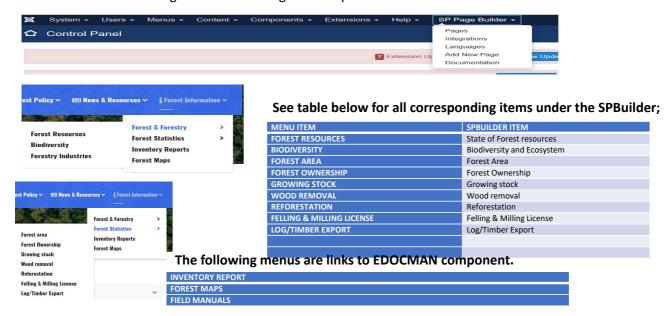

NEWS AND RESOURCE MENU

FOREST INFORMATION MENU

To make changes to the Forest Information and its child menu on the frontend and in the backend follow the steps below.

SPBuilder - > Make changes to the following items as per screenshot below.

Document management is handled and manage through Joomla component called "Docman".

Instruction:

Components -> Documents -> Documents & Files

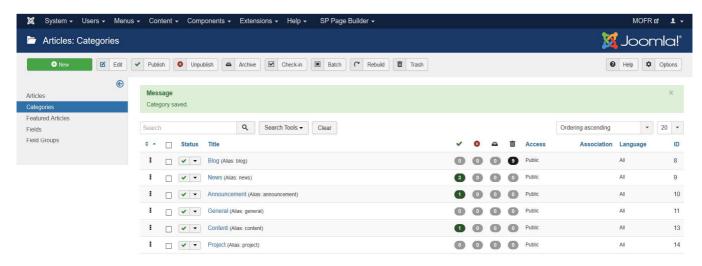

Refer to DOCMAN user manual for full detail instruction on how to use this module. Docman is attached with this manual.

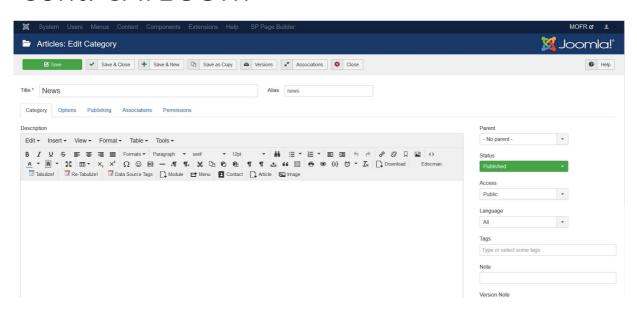

CATEGORY

To create a category, the following steps are followed:

Steps: Content -> Categories

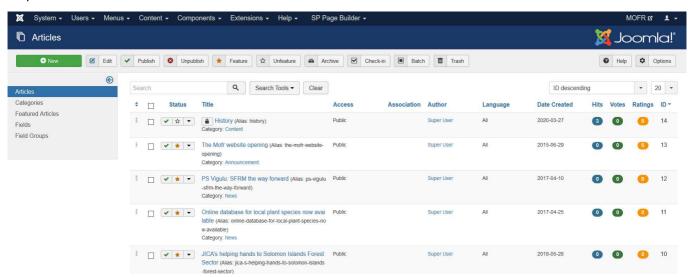

Cont. CATEGORY

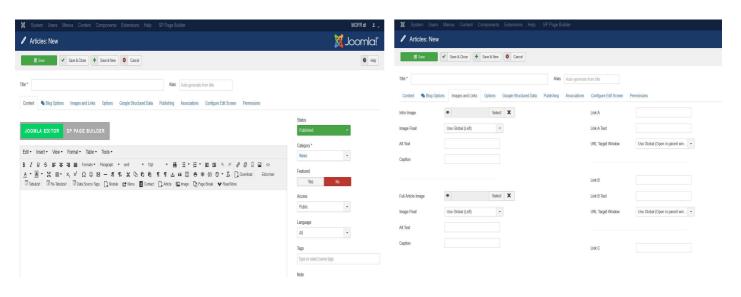

ARTICLE

An article is created using the following steps:

Steps: Content -> Articles

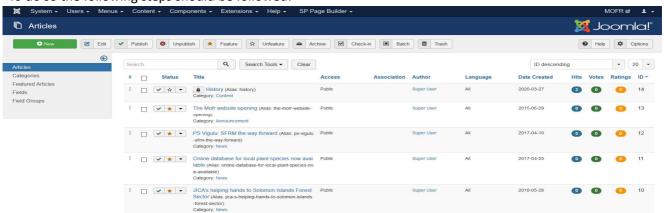

Cont. Article

PUBLISHING AND DELETING ARTICLE

For the article to be available to the public it has to be set to Published. At times an article is out of date or no longer regarded as useful content for the site, you will need to hide them from public access, thus you will need to know how an article is Unpublished in the Articles list page.

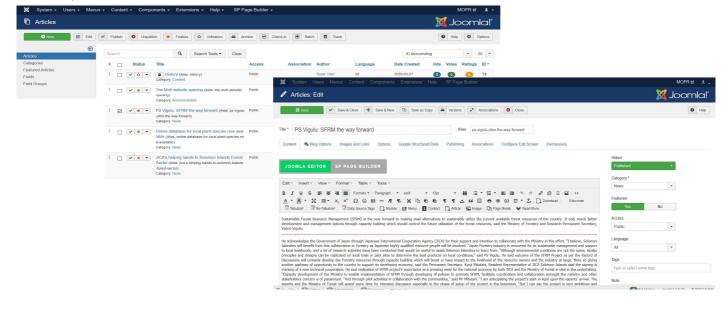

To do so the following steps should be followed:

UPDATES FOR EXISTING ARTICLE

To make changes to existing article the following is required:

Steps: Content -> Articles

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands

Geonode Migration Overview

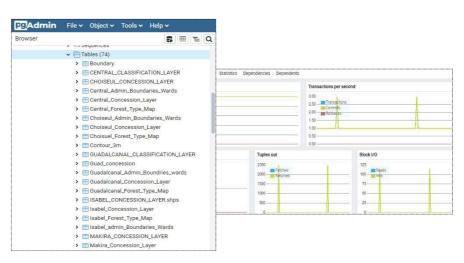

PostgreSQL & PostGIS : Spatial Database

The database component manage data and configuration information for Geonode/Django and Geoserver. All of these tables and data are stored within the geonode database on PostgreSQL.

We will use the pgAdmin4 & Putty application to Manage the PostGIS database directly. Note: pgAdmin4 & Putty are third party tools therefore it is not installed by default.

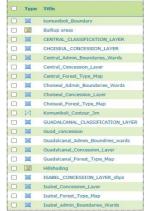

SSH Tunnel Access to Geonode Database-http://127.0.0.1:8272/browser/

Geonode Stack-Geoserver

GeoServer: GeoSpatial Data Manager

GeoServer is a Java-based server with an OGC-compatible data store that can provide WMS, WFS, WCS and other services in common formats like GML, GeoJSON, KML and GeoTiff.

It is connected with Geonode therefore data added to geoserver can be fetched directly in to geonode and vice versa.

GeoServer has a Web front-end to handle data storage, styling and Web service configuration directly, but this should be avoided in the context of GeoNode.

http://solgeofims.mofr.gov.sb/geoserver/

Geonode Stack-Django

■ Django: The GeoNode front-end Manager

Django is a high-level *Python Web framework* that encourages rapid development and clean, pragmatic design. It allows the user to easily tweak the content and look and feel and to extend GeoNode to build customized GeoPortals.

It includes tools to handle user registration and accounts, avatars, and helper libraries to interact with GeoServer and GeoNetwork.

There is a wide range of third party apps that can be plugged into a GeoNode-based site.

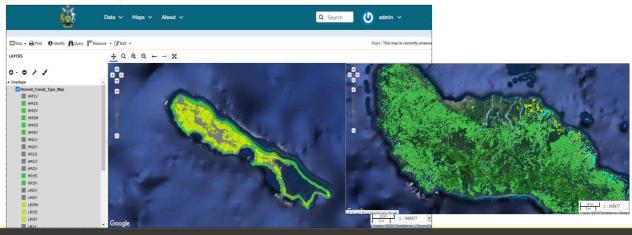

http://solgeofims.mofr.gov.sb/en/admin/

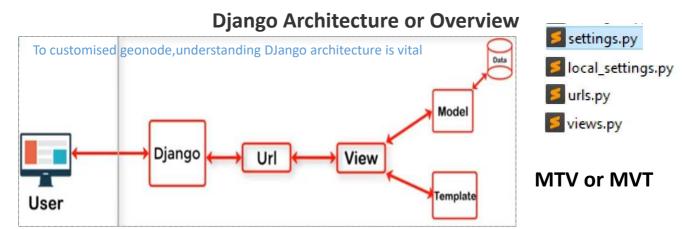

Geonode Stack- GeoExt & OpenLayer

■ GeoExplore: The Mapping Components

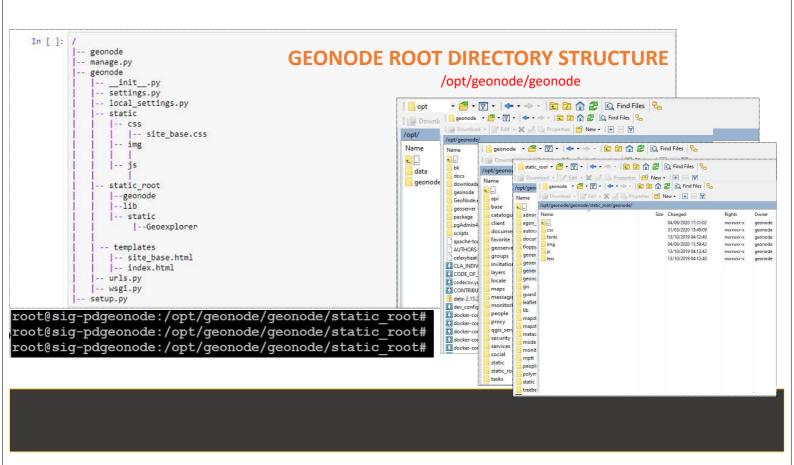

The main map interface for MOFR GeoNode front-end is the Map Composer / Editor. It is built on top of GeoExt and uses OpenLayers, GXP.

It Communicates to the other components via HTTP and JSON as well as standard OGC services.

- This section introduces some basic concepts of DJango, the Python based web framework on top of which GeoNode has been developed.
- The main objective of Django is to facilitate the creation of complex sites oriented databases. Django emphasizes reusability and "pluggability" of components, rapid development, and the principle of not repeating yourself. Python is used everywhere, even for settings, files, and data models.
- Django also provides an administrative interface to create, read, update and delete models that is dynamically generated by introspection and configured through the Administrative Templates.

Geonode Basic Configuration- Add geonode App & GeoExplore App INSTALLED_APPS

```
# Now edit settings.py & add geonode app to INSTALLED APP
 In [ ]: INSTALLED_APPS = (
                # Apps bundled with Django
                 'django.contrib.sessions',
                 'django.contrib.sites',
                 'django.contrib.admin',
                 'django.contrib.sitemaps',
'django.contrib.staticfiles',
                 'django.contrib.messages',
'django.contrib.humanize',
                                                                                    settings.py
                'django.contrib.gis',
                # Utility
                'dj_pagination',
'taggit',
                'treebeard',
                'leaflet',
'bootstrap3_datetime',
                 django_filters',
                'django_forms_bootstrap',
              + GEONODE_APPS
```

Geonode Basic Configuration- Check Static & Static_ROOT Files Binds to

Project_Root Directory

```
In []: # Absolute path to the directory that holds static files

In []: STATIC_ROOT = os.getenv('STATIC_ROOT', os.path.join(PROJECT_ROOT, "static_root"))

In [2]: # URL that handles the static files

In []: STATIC_URL = os.getenv('STATIC_URL', '%s/static/' % FORCE_SCRIPT_NAME)

In []: # Additional directories which hold static files

In []: __DEFAULT_STATICFILES_DIRS = [ os.path.join(PROJECT_ROOT, "static"), ]

STATICFILES_DIRS = os.getenv('STATICFILES_DIRS', __DEFAULT_STATICFILES_DIRS)

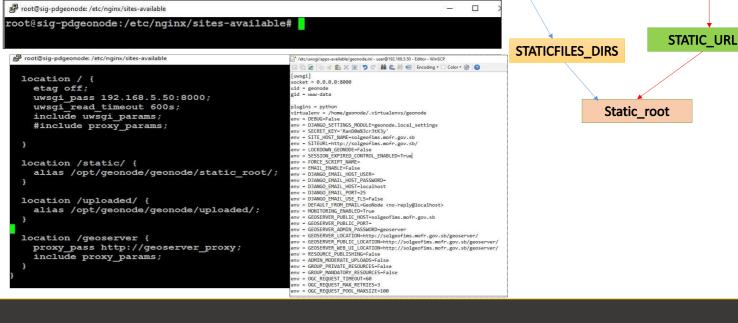

In []: # List of finder classes that know how to find static files in # various locations.
STATICFILES_FINDERS = ( 'ddango.contrib.staticfiles.finders.FileSystemFinder', 'django.contrib.staticfiles.finders.AppbirectorlesFinder', 'django.contrib.staticfiles.finders.DefaultStorageFinder', 'django.contrib.staticfiles.DefaultStorageFinder', 'django.contrib.staticfiles.Defaul
```

Geonode Basic Configuration-templates

• Check that that templates folder bind to Project root directory as well.

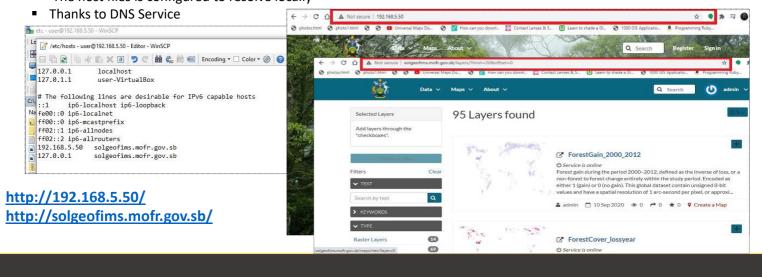

```
In [ ]: # Django automatically includes the "templates" dir in all the INSTALLED_APPS.
In [ ]: TEMPLATES = [
                'NAME': 'GeoNode Project Templates',
                 'BACKEND': 'django.template.backends.django.DjangoTemplates',
                'DIRS': [os.path.join(PROJECT_ROOT, "templates")],
                 'APP DIRS': True,
                 'OPTIONS': {
                     'context_processors': [
                         'django.template.context_processors.debug',
                         'django.template.context_processors.i18n',
                                                                                                       settings.py
                         'django.template.context_processors.tz',
                         'django.template.context_processors.request',
                         'django.template.context_processors.media'
                         'django.template.context_processors.static'
                         'django.contrib.auth.context_processors.auth',
                         'django.contrib.messages.context_processors.messages',
                         'django.contrib.auth.context_processors.auth',
                         'geonode.context_processors.resource_urls',
                         'geonode.geoserver.context_processors.geoserver_urls',
                         'geonode.themes.context_processors.custom_theme
```

Geonode URL Configuration

- Before the Migration Geonode is accessible throughout the Network using IP Address
- Now the IP Address 192.168.5.50 is bind with <u>Solgeofims.mofr.gov.sb</u>, hence either the IP Address or domain name is accessible throughout the SIGNET Network.
- The host files is configured to resolve locally

Web Customization-Theming of Solgeofims.gov.sb

- There are a range of options available to you if you want to change the default look and feel of your GeoNode project.
- Since GeoNode's style is based on Bootstrap you will be able to make use of all that Bootstrap has to offer in terms
 of theme customization.
- You should consult Bootstrap's documentation as your primary guide once you are familiar with how GeoNode implements Bootstrap and how you can override GeoNode's theme and templates in your own project.

Let's walk through!! : To change default logo.

1. Change to the geonode static_root directory and drop your logo.png image in to image folder

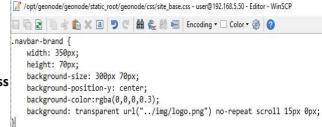

\$ cd /opt/geonode/geonode/static_root/geonode/img.

2. Change to the css directory

\$ cd /opt/geonode/geonode/static_root/geonode/css.

4. Override the CSS that displays the logo by editing **site_base.css**

\$ sudo vi site_base.css

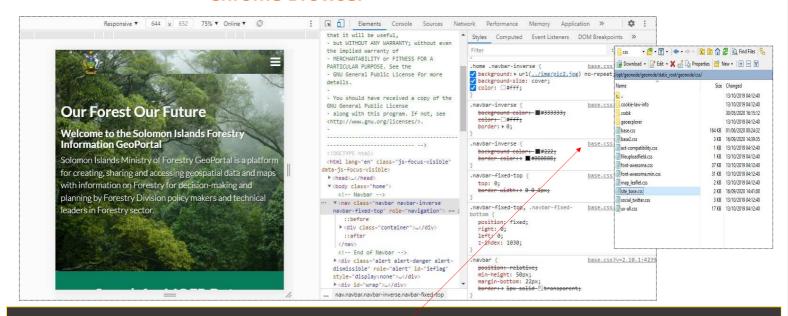

Note ..Adding Many CSS Rules to the site_base.css you can customized various parts of the geonode

Now let's check either base.css serve is through the browser.

Web Customization-Inspecting CSS Overrides in

Chrome Browser

Base.css serve to browser

Web Customization-Update templates & static pages

- Next update the content of the Home page
- Geonode projects includes two basic template {site base.html & site index.html}
- Lets Override the default setting.

Change to the geonode templates directory and edit **site_base.htm** \$ cd /opt/geonode/geonode/templates.

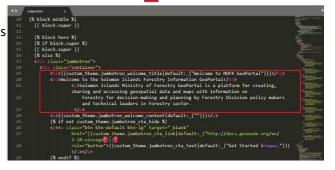

NOTE: It extends from geonode_base.html and loads from staticfiles

```
{% extends "geonode_base.html" %}
{% load i18n %}
{% load static from staticfiles %}
{% load base_tags %}
```

Now let's override the **site_index.html** or **index.html** and make changes to geonode home page.

\$ sudo vi index.html

Server Administration-{Ubuntu}

- Server administration is also important role to perform by the admin
- Not sure WHO going to perform this role-{Guess ICT Team}
- Geonode admin need to know Minimal server admin so he/she can diagnosis problem when the application is not function properly {before escalating to IT team}.
- We will cover basic Linux command to perform the roles, e.g dmesg,
- Also we will look at python tool called glances that output all system parameter in one window which system admin can use to analysis the health of the system.
- Visit directories for application Logs & system logs for following:
 - geonode {main.log}
 - Geoserver {geoserver.log}
 - -Nginx {Ngixn.log}
 - -PostgreSQL {main.log}

{Thank you}

{Second Part of Training- Geonode Basic Administration}

The workflow training How to use the map data on SolGeo-FIMS for the concession workflow

11th Nov, 2021 Nobuhiko Yoshimura Forest Info Management team

This presentation is based on the report of "Commercial Logging and Reforestation for Forest Resource Management Status & Issues (2021)"

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

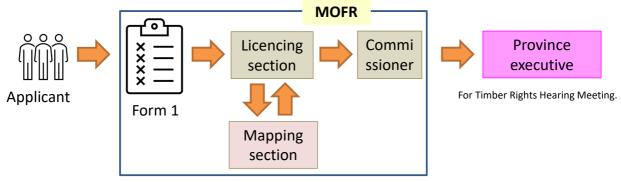

1. Licensing Process for Logging Activities at Large and Small Scale

2-1. Form1 Application for timber rights acquisition workflow

- Overlap of concession area
- Forest condition
 Hight, Volume,
 Previous logging activity

Paper map → Scan → Digitizing by GIS
The basemap is 1:50000 of NGIC

2022/9/6

3

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

2. Timber rights acquisition

2-2. Form1 Application for timber rights acquisition

Applicant submit the form1 with the area to acquire the timber rights

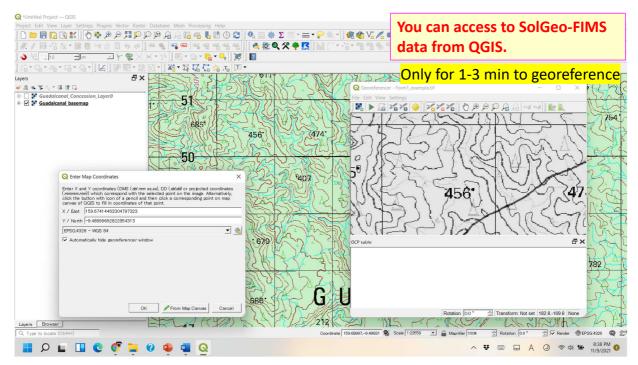

5. Area(s) within which applicant wishes to carry out logging and acquire timber rights
 Note: (1) The answer to question 5 must be supported by detailed maps
 Showing the areas involved.

| SCHEDULE | b) Approximate area to be logged annually |
|---|---|
| FORM 1 | |
| FOREST RESOURCES AND TIMBER UTILILISATION ACT APPLICATION FOR APPROVAL FOR NEGOTIATION TO AQUIRE TIMBER RIGHTS | c) Proposed location of base camp |
| (Section 7) (To be submitted to the Commissioner of Forest Resources) 1. Name of annicant: | d) Proposed location of sawmill and /or export port |
| | |
| 2. Address of Applicant: | Signature of Applicant |
| 4. routes of approximate | Note: (1) The answer to question 5 must be supported by detailed maps Showing the areas involved. |
| Present type of Business (if any) Honore Temperature Sevential Sev | (2) "TIMBER RIGHT" includes a right to- (a) inspect, survey, enumerate, mark and map any area or trace (b) class and compared to the compared |
| Area(i) within which applicant wishes to carry out logging and acquire timber rights | (e) have access to and extract(whether without any agents, ser workmen animals, whether and machines, or all or any of timber or tree; (1) take any timber into possession or <u>ownershin</u> ; (2) for the purpose of any of the things specified in paragraph; (a) to (b), construct and maintain. |
| Names of persons and/or land owning groups with whom preliminary discussions. have been made reparting land ownership, tumber rights and development proposals | any works (including railwoss, transmoss, roads we silpways, harbours, port areas, where, jetties, by dams, pipelines, serodromes, yards and campoj; any vables, power supplies, lines or other means for distribution of power, cranses, weighbridges, saw by |
| | |
| | (h) for any of the purposes specified herein- |
| 7. Period for which Timber Rights sought Details of proposed operations a) Annual volume (cubic meters) of logs to be extracted | subject to the provision of the River Waters Act, to use water, and to quarry, extract, move and use any stone, earth or road-making or building material. |
| | 7 |
| | |
| | |

2-3. How we can use the SolGeo-FIMS for form1

Georeferencing becomes easy and fast and accurate with the same NGIC basemap

2022/9/6

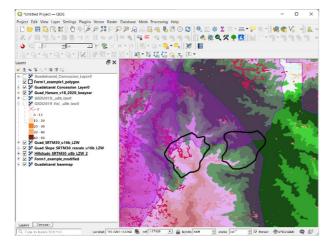

5

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

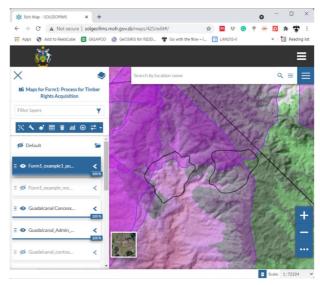

2. Timber rights acquisition

2-4. How we can use the SolGeo-FIMS form1

Easy to compare the previous concession (overlapping), forest condition, topography by SolGeo-FIMS or QGIS

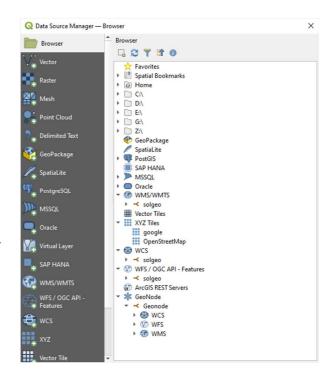

Detail analysis by QGIS

Sharing the application data

Type of connection by GIS software

- PostGIS
 - You can access the vector data as GIS data
- WMS: Web Mapping Services
 You can load the maps and layers on the server with the prefix color as an image.
- WFS: Web Feature Services
 You can load the vector layers on the server as GIS data
- WCS: Web Coverage Service
 You can load the raster layers on the server as GIS data
- Geonode to access WMS, WFC, WCS on Geonode

2022/9/6

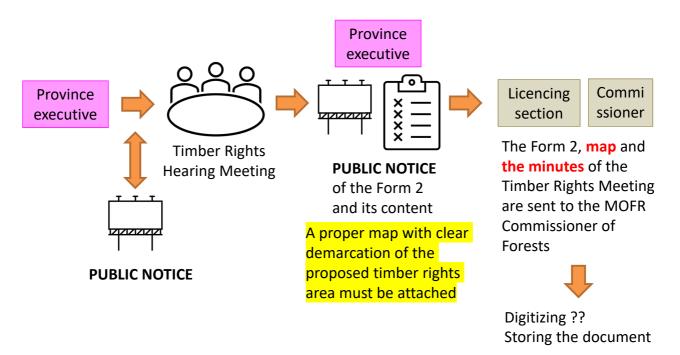

7

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

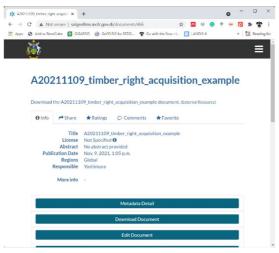

2. Timber rights acquisition

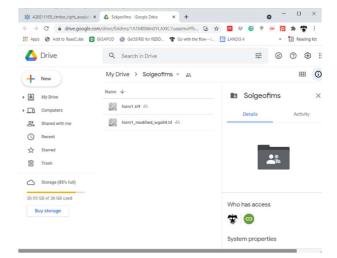

2-5. Form 2 Timber Rights Hearing Meeting

2-6. Document management: Form1, Form2 etc. with SolGeo-FIMS

You can store the related document linking to maps.
 For example, you can use cloud storage with SolGeo-FIMS

Document on SolGeo-FIMS

Example to use google drive

2022/9/6

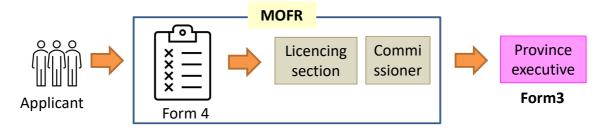

9

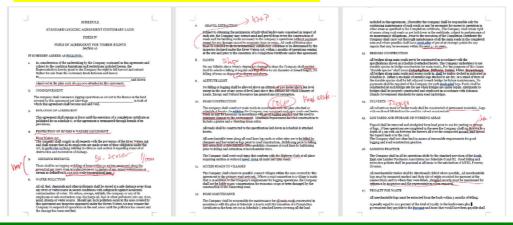

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

2. Timber rights acquisition

2-7. Form4 Form of agreement for timber rights workflow

Lists a set of social and environmental criteria

2-8. Form4 Form of agreement for timber rights

PROTECTION OF RIVERS & WATERS CATCHMENT

No felling of trees within 50 meters measured along the ground of any main river or water course or 25 meters of any minor watercourse or stream as defined on a 1:50,000 scale topographical map

SLOPES

On any hillside above 20 degree in slope the Company shall restrict itself to selective felling of regular size logs above 60 cm diameter at breast height. No felling of trees on slopes of 30 degree and above

PRESERVATION OF VILLAGE SAFETY & ENVIRONMENT

No felling, logging or other operations shall take place closer than 100 meters from the edge of any village area with the exception of construction of road access. No road shall be constructed to pass closer than 30 meters from the edge of the carriageway to any existing dwelling house. Should the terrain make it essential to pas closer than 30 meters

- PRESERVATION OF TAMBU PLACES
- ALTITUDE RESTRICTION

It shall be a condition of the License that no felling or logging shall take place above 400 meters except on any plateaus or level land for which specific prior approval has been granted in writing by the Commissioner of Forests after his consultation with the landowners.

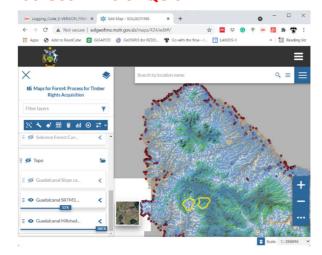

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

2. Timber rights acquisition

2-9. How we can use the SolGeo-FIMS form4

Maybe. It should be done before.

Easy to compare with environmental data watercourse, topography etc. And previous concession (overlapping), forest condition, settlement by SolGeo-FIMS or QGIS

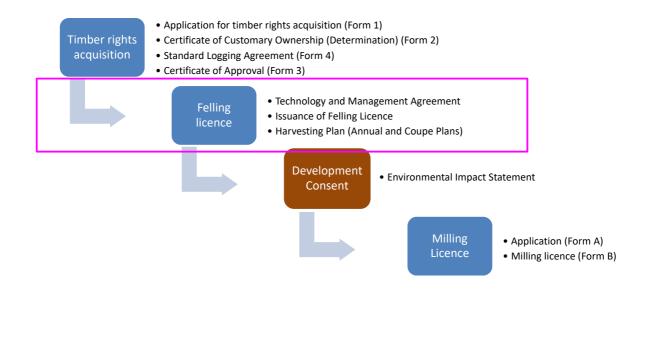

Search by location runne

| Apps | One And to Resource | Graph O |

Settlement etc

Slope, stream line

3. Licensing Process for Logging Activities at Large and Small Scale

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

IICA

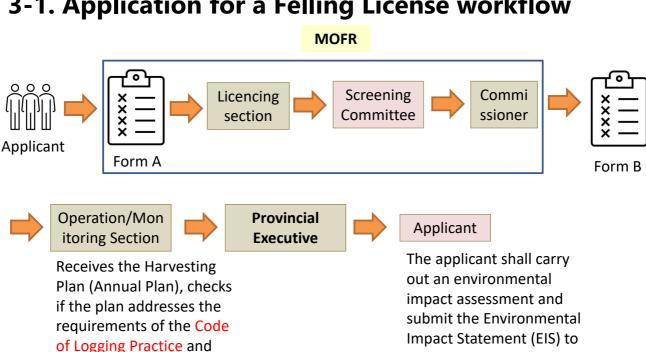

the MECDM.

3. Felling Licenses

approves the plan.

3-1. Application for a Felling License workflow

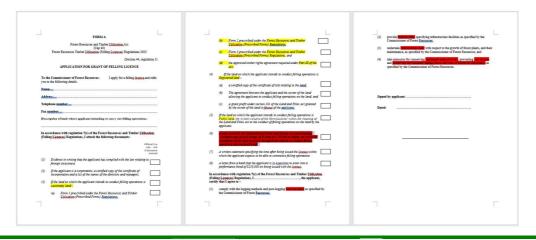

Ministry of Forestry & Research

3. Felling Licenses

3-2. Application for a Felling License

- A map issued by the Department of Lands and Survey, or a good quality Certified copy of such a map, of a scale of 1:50,000 or larger, on which the boundaries of the land on which the applicant intends to conduct felling operations are marked in red
- Landuse plan, logging plan, reforestation plans
- measures for conserving catchment areas of rivers, preventing soil erosion and preserving environment, tambu places and sites of historical importance

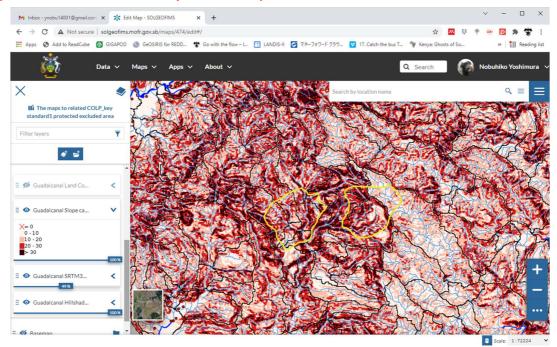

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

3. Felling Licenses

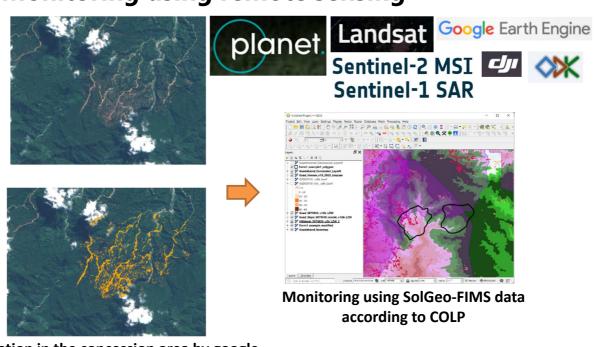

3-3. How we can use the SolGeo-FIMS

Support to check the COLP key standard1 protected excluded area

3. Felling Licenses

3-4. Monitoring using remote sensing

Classification in the concession area by google earth engine (NDVI classification or change)

2022/9/6 Similary of Perestry & Research 17

The workflow training: How to use the map data on SolGeo-FIMS for the concession workflow

4. Question and discussion

Auditing

 $Auditing \ Proforma \ for \ inspection \ of \ harvesting \ operations$

| Monitoring Proforma for in | nspection of har | resting operat | lions | | |
|--|----------------------|----------------|---------|---------|----------------|
| Component of Operation Assessed | Marks for compliance | Check 1 | Check 2 | Check 3 | Total score |
| Log pond – Check one | | | | | |
| Has a 50m buffer to the ocean (strip of vegetation) | 2 | | | | |
| Is adequately drained | 2 | | | | |
| Oil or other waste products are being safely disposed of | 2 | | | | |
| Sub-total | | | | | |
| Roading - Check two lengths of 100m | | | | i i | |
| Located as shown on the coupe plan | 2 | | | | |
| Clearing is 40m or less | 2 | | | | |
| Drainage is acceptable (Table drains, turn outs, cross fall, culverts) | 2 | | | | |
| Road clearing edge is located more than 40m from any buffer | 2 | | | | |
| Sub-total | | | 1 | | |

| Component of Operation Assessed | Marks for compliance | Check 1 | Check 2 | Check 3 | Total score |
|--|-------------------------|---------|-------------------------|---------|----------------|
| Buffers - Check two | | | | | |
| Marked in the field as shown on the coupe plan | 2 | | | | |
| Correct buffer width | 2 | | | | |
| No unauthorised entry to the buffer (ic. trees fallen into buffer/frees fallen in buffer/machine entry) | 2 | | | | |
| Sub-total | | | | | |
| Watercourse crossings – Check one | | | | | |
| Located as shown on the coupe plan | 2 | | | | |
| Appropriate type of crossing for the situation ie. culvert, ford or bridge | 2 | | | | |
| Drainage around the watercourse crossing does not run into the watercourse | 2 | | | | |
| Machines have not operated in the watercourse during construction | 2 | | | | |
| There has been no unnecessary cutting of trees in and around the watercourse crossing. | 2 | | | | |
| Sub-total | | | | | |
| Landings - Check two | | | | | |
| Located as per coupe harvest plan | 2 | | | | |
| At least 40m from the edge of any buffer | 2 | | | | |
| Is well drained with no skid tracks running downhill onto the landing | 2 | | | | |
| la less than 1,600 square meters | 2 | | | | |
| Sub-total | | | | | |
| Skid track - Check three lengths of 189m | | | | | |
| Major skid track located as per the harvesting plan | 2 | | 1 | | |
| Blade not used if skid track less than 12 degrees. If more than 12 degrees then damage minimised. | 2 | | | | |
| Track no wider than 5.5 meters at any point | 2 | | | | |
| No damage to any buffer zone | 2 | | | | |
| Sub-total | | | | | |
| Falling and wastage - Check 4 stumps and give full marks for every stump that meets the standard | | | | | |
| Trees have been fallen using directional falling principles io. scarf, back cut. | 1 | | | | |
| The choice of felling direction was suitable | 1 | | | | |
| Stumps are as low as possible | 1 | | | | |
| The point of cross cutting is correct and has not left a merchantable amount of timber behind | 1 | | | | |
| Sub-total | | | | | |
| | | | ACHIEVED SIBLE 100 P | | |

Auditing Workflow

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Auditing Field Visit

1. Before going into the field

use the coup plan to randomly select one log pond, three lengths of rad, two buffers, one watercourse crossing, three lengths of skid track, two landings and a location that will have fallen trees to inspect.

2. Visit each of these locations with a company and landowner representative and assess against the criteria on the auditing proforma.

For example on the log pond, check that oil and other wastes arc being properly disposed of. Explain the company and landowner representatives the process being undertaken and the results so as to educate them in application of the Code.

Auditing Checklist

- 3. If the company is meeting with the standard described award full points for that check
- 4. If the company does not meet the standard described award 0 points.
- 5. Complete all the required checks and total the score for each section and overall.

See CoLP checklist.

6. With the company representative analyse where the problems where, section by section and determine how they can improve.

The Project on Capacity Development for Sustainable Forest Resource Management in Solomon Islands (SFRMP)

Auditing Report and Follow-up Action

7. Report to the relevant supervisors and staff on the staff on the score and discuss it.

For MOFR this will be Honiara headquarters. For the company this will be on-site staff and company management and for the landowners this will be other member of the community.

8. For MOFR Officers if a serious breach is identified, then follow up action is required in writing through headquarters.

9. The Commissioner of Forests will from time to time set a minimums mark that must be achieved for each inspection. If this mark is not achieved then follow up action must also be taken. Penalty actions are described elsewhere.
