## 1. Introduction

To continue the pilot land allocation in Vi ChRing Village, Hieu Commune, Kon Plong District, Kon Tum Province in June 2007, with the support of Project of Villager Support for Sustainable Forest Management in Central Highland by JOFCA/ JICA, the consultants including forestry lecturers in Faculty of Agriculture and Forestry, Central Highland University conducted training and planning for CFM and RFPD from 20 January 2008.

The CFMP of Vi ChRing Village is established for the duration of five years: 2008 – 2012.

Participatory approach has been used during the process; villagers also could access to the methods for natural resources inventory, monitoring, planning, measurement of trees by colored classes and use of stable forest model to compare and to be the basis for identification of wood supply capacity of forest plots. The process and planning methods for CFM and RFPD are presented in the following diagram: (Work schedule is presented in the annex)

In the planning process, in addition to the participation of villagers, there are supports from consultants (Dr. Prof. Associate Bao Huy, Dr. Vo Hung; Master: Cao Thi Ly Hoang Trong Khanh) and the participation of learners from CFM training from relevant agencies including Sub-

Department of Forest Protection (Sub-DFP), Division of Economics, District DONRE, extensionists, forest rangers and forest enterprises in Kon Plong District, Hieu Commune and members from Vi ChRing CFM Board. List of participants are attached in the Annex)

## 2. Conditions in Vi ChRing Village

Vi ChRing Village (also called Village no. 5) is in Hieu Commune, Kon Plong District, Kon Tum Province. The residential area is located at commune center. Hieu Commune is 28 km from Center of Kon Plong District to the South West and located along National Road No. 24 from Kon Tum to Quang Ngai Province. Hieu Commune has total area of 20,505ha.

There are 32 households in Vi ChRing Village, most of people are of M' Nam ethnic group (27 households) and there are 5 households of Kinh ethnic. The village has population of 125 people, out of which, there are 64 man and 61 women. Number of labors is 58 people.

Main cultivation is one crop paddy; paddy fields located along streams in forest and some people cultivate on former upland farms. The livelihood is difficult and people rely heavily on forest. The intellectual level is rather low.

Number of poor households account for 75% total households; most of non-poor households are of Kin ethnic. The number shows that the economic situations of the villagers are difficult. Most of poor households have small cultivation area. Therefore, land and forest allocation and CFM planning is the basis to attract poor households with small area to work in forestry and have income from forestry.

There are 20 households accessed to national power network, mainly used for domestic needs not for production.

The irrigation in the village is almost null, only few channels made by farmers.

Domestic water is insufficient for many households, villagers lack of domestic water in dry season.

## 3. Objectives of Five - Year Community Forest Management Plan

The CFMP of Vi ChRing Village is established with following objectives:

- Support the community to manage 808ha of natural forest in sustainable manner
- Contribute to stabilize forest, protect water resources for domestic use and production
- Provide stable forest products and gradually improve villagers' livelihood.

## 4. Community forest resources and supply capacity in five years

Division of forest plots, naming, status, management objective identification, area

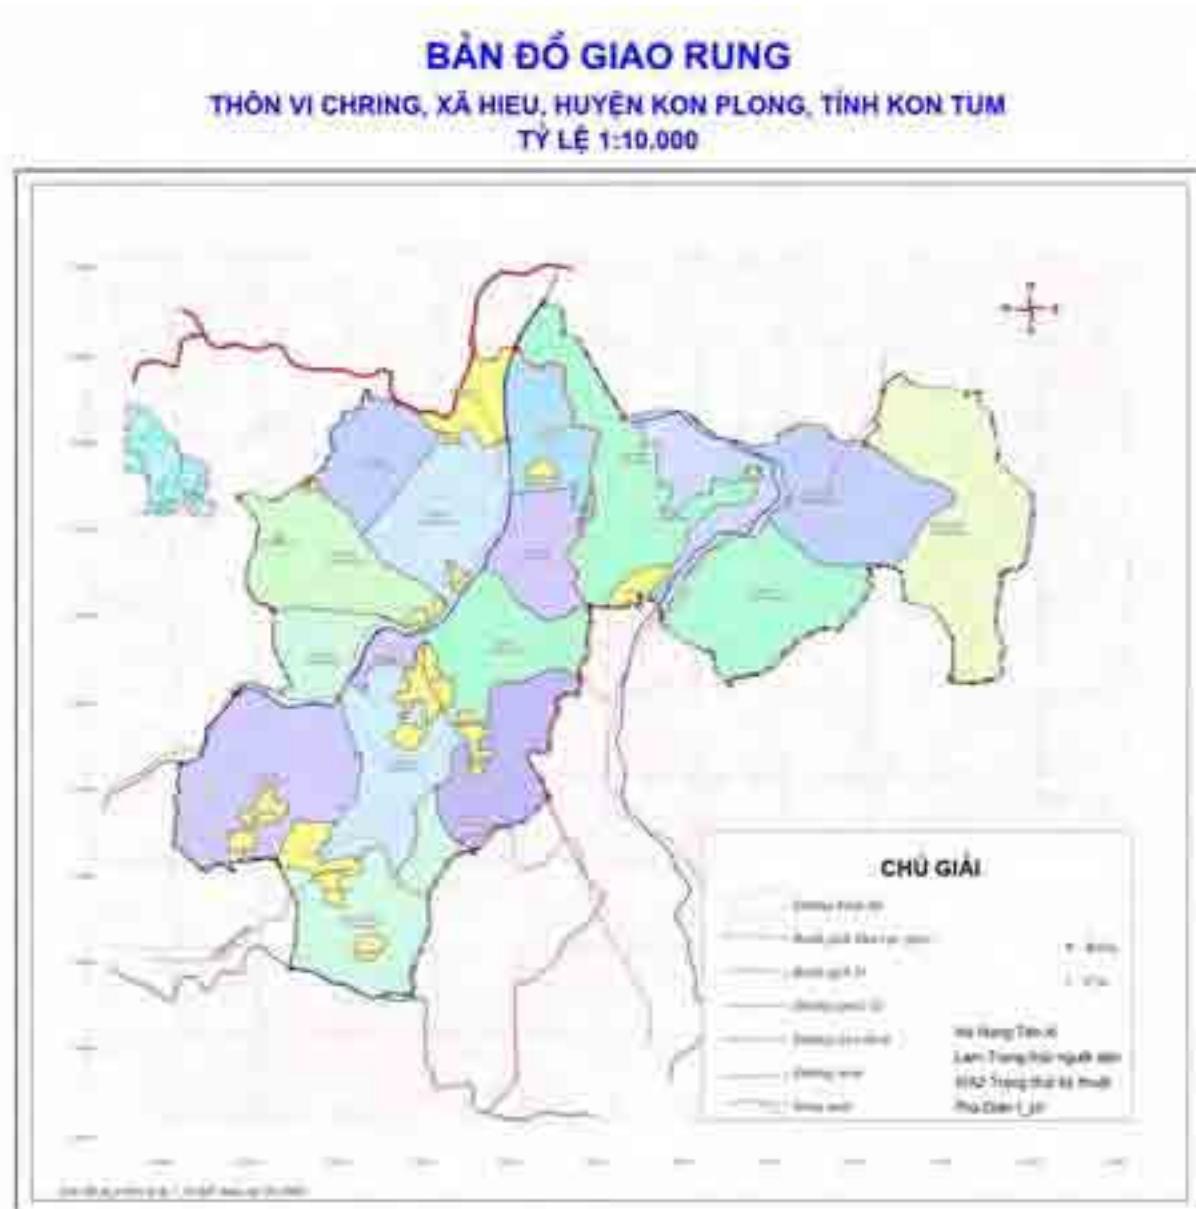

There are 17 forest plots in 4 compartments in Block 497 and 1 compartment in Block 498 allocated to the community; the plots have been mapped, named by location; objectives have been set, area has been measures and forest status has been identified. Total forest and forestry land of 17 plots is 808ha. These plots are in the production forest area.

First village meeting to inform about CFM

Description and analysis of forest plots

17 forest plots have been described out of which 14 plots have status of IIIA<sub>2</sub> (Lem), including: Dak Pac, Dak Nech, Dak Pui, Dak Doc, Dak Mua, Dak Roc A, Dak Roc B, Ha Nang, Ngoc Chim Moc, Dak Bo B, Dak Deang, Mang Rxo, Ngoc Tu Bra A, Ngoc Tu Bra B. 3 plots have status of IIIA<sub>1</sub> (Me) including: Dak Kiec Penh, Dak Dreng and Dak Bo A. Together with plot description, the identification, analysis on difficulties, opportunities and solutions have been conducted for each forest plot. The results are presented in annex.

Villagers participating in forest plot description and

## Assessment of wood supply from forest plots

Inventory of colored diameter classes has been conducted in all community forest plots. The colored diameter classes have been identified according to stable forest model as follows:

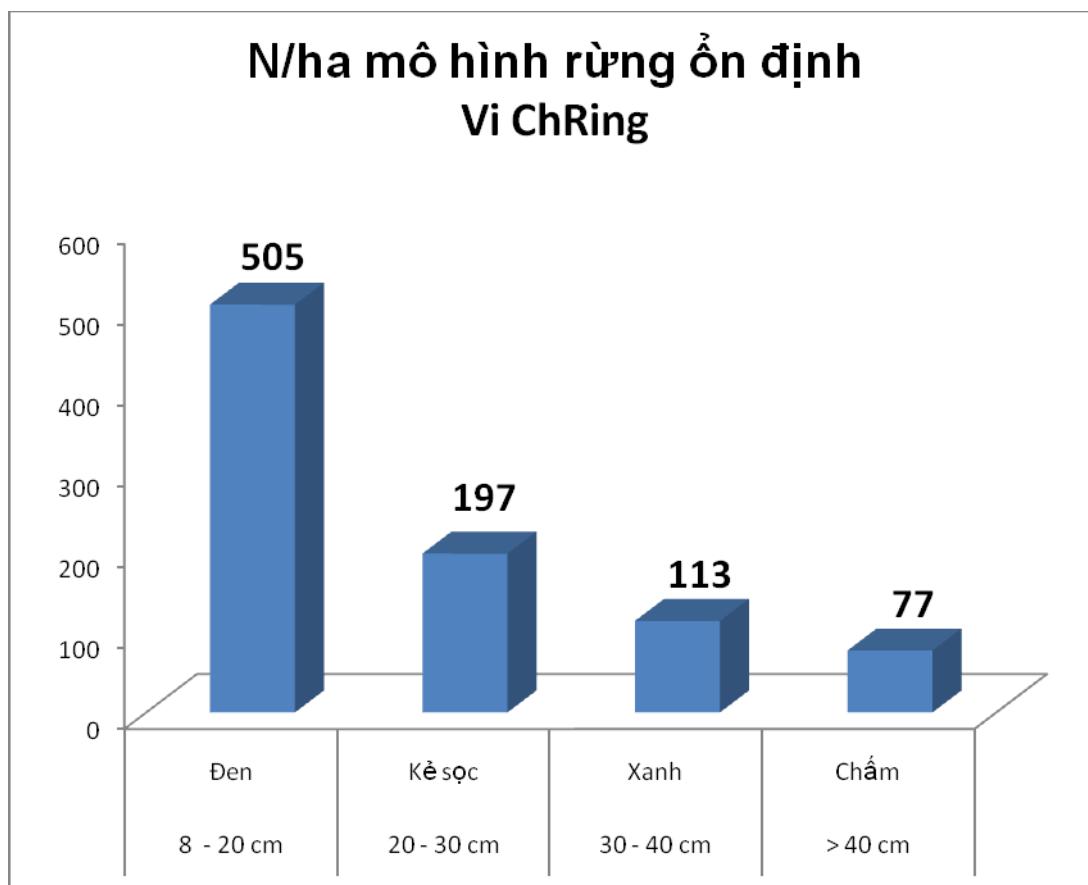

**Colored diameter classes**

<b>Black</b>	<b>Stripe</b>	<b>Green</b>	<b>dotted</b>
8 - 20cm	21 - 30cm	31 - 40cm	> 40cm

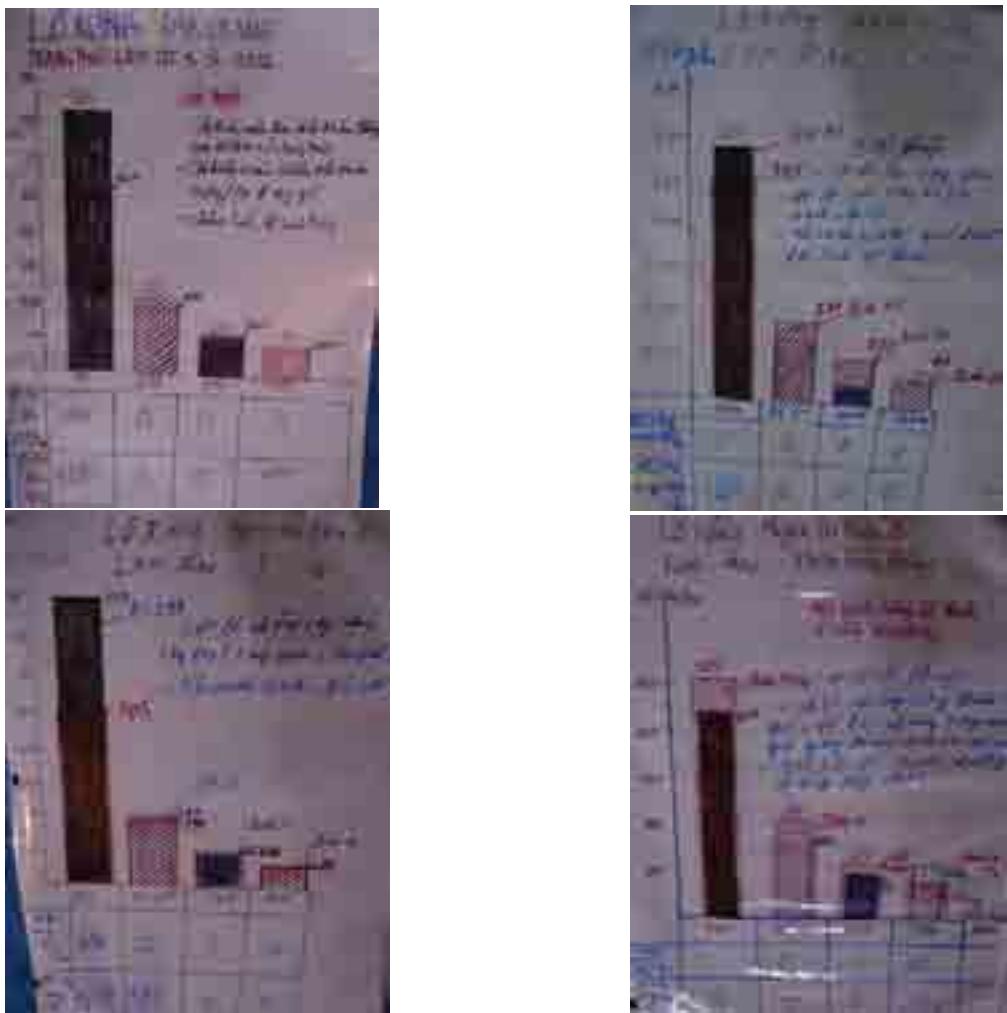

**Results of number of trees by colored diameter classes in 17 forest plots**

N o.	Plot name	Inve nror y plot s	Num ber of trees per ha	Number of trees by colored diameter classes per ha				Numbe r of trees in the plot	Number of trees by colored diameter classes per plot

Diagram of tree number per ha by colored diameter classes is compared with stable forest model to identify the supply capacity of those forest plots in five years.

*Diagram of tree number by colored diameter classes is compared with stable forest model to identify the wood supply capacity in five years*

On the basis of comparing colored diameter classes with stable forest model, the wood supply per ha and wood supply per plot can be identified; with technical advice and orientation, villagers discussed to find out some silviculture measures for managing each forest plot. The results are 10 forest plots can supply wood in the coming five years, 6 other forest plots do not have sufficient tree number compared to stable forest model; therefore, they need maintenance; one religious plot is not counted for wood supply.

#### **Number of trees can be used in forest plots in five years and measures proposed for each plot**

## 5. Timber needs of Vi ChRing Village in five years and supply - demand balancing

Farmers participated in need analysis of forest

Results of timber community timber need analysis reveals the needs for building houses, animal houses, rice store, furniture, box and fence.

Representative farmer group discussed with facilitator group and identified the needs of forest products for households in the village in five years as follows:

## Timber needs of Vi ChRing Village in five years 2008 – 2012

Products from wood	Colored diameter classes	Needs for individual product A	Needs for new house construction in the village per year B=A*households need new houses in a year	Maintenance of the village in a year C=(A/use duration)* Number of user households	Total timber needs of the village in a year D=B+C	Total timber needs of the village in five years E=D*5	Remarks
House construction	Stripe	2	8	6	14	70	4 new houses in a year There are 27 wooden houses in the village Maintenance time: 10 years
	Green	8	32	22	54	270	
	Dotted	8	32	22	54	270	
Cattle/buffalo stables	Black	20	140	129	269	1345	7 new stables in a year There are 27 houses having stables Maintenance time: 5 years
	Stripe	8	56	43	99	495	
Rice store	Stripe	3	12	16	28	140	4 new stores in a year There are 27 households having stores Maintenance time: 5 years
	Dotted	1	4	5	9	45	
Fence	Black	41 stems per household	82 stems	(41/2)x33 households = 677	82+ 677 =759	3795	2 households need new houses in a year All 33 households need fence Use duration: 2 years
Firewood (fresh trees)							Utilize barks, branches after harvest, old pillar, fence... for firewood - do not cut living trees.
Furniture	Table and chair	Dotted	1/3	(33/10)* 1/3 = 1	1	5	There are 33 households 1 set of table and chairs Use in 10 years

Products from wood		Colored diameter classes	Needs for individual product	Needs for new house construction in the village per year	Maintenance of the village in a year $C=(A/\text{use duration})^*$ Number of user households	Total timber needs of the village in a year $D=B+C$	Total timber needs of the village in five years $E=D*5$	Remarks
	Bed	Dotted	1/3		(66/15)* 1/3 = 2	2	10	There are 33 households 2 beds per household use in 15 years
	Cabinet	Dotted	1/3		(33/15)* 1/3 = 1	1	5	There are 33 households 1 cabinet per household Use in 15 years
Box		Dotted	1	2		2	10	
<b>Total</b>								

Remarks:

- Wood for house construction: *Juniperus*, *Zyzygium grandis*, *Castanopsis*
- Furniture: *Juniperus*, *Prunus arborea*
- Box: *Zyzygium grandis*
- Fence: low value species with black diameter - each household needs 2 small poles, 3 big poles/1m - 1 black tree can be made into 12 pole; number of black trees per household is 41.
- Yearly maintenance for each households requires half of fencing poles

Timber needs for each household:

House structure	Volume	Colored diameter classes		
		Dotted	Stripe	Green
Main pole 4m	8	1		
Subordinate pole: 3m	8	1/3		
Tie-beam	8	2/3		
Vertical beam 8m	12	1/2		
4.5m cross bar	8	1/2		
Ridge holder	1		2	
Poles under floor and wall 2.5	90	1		
Floor board and wall	90 + 130			8
Rafter 2.5m	45	1		

Colored diameter classes			
Roof rafter and bar	60 rafters + 120 bars	1	
Reserve		2	
<b>Total number of trees</b>		<b>8</b>	<b>2</b>
			<b>8</b>

From the result of comparing colored diameter of 16 forest plot with stable forest, number of trees with timber provision volume of 10 forest plots in five years have been identified including: Dak Pac, Dac Doc, Dak Mua, Dac Roc A, Dak Roc B, Ngoc Chim Moc, Dak Bo A, Dak Deang, Ngoc Tu Bra A, Ngoc Tu Bra B; and based on timber needs analysis, the supply - demand balance has been prepared.

### Balancing of timber supply - demand of Vi ChRing Village in five years: 2008 - 2012

Forest plots	Number of trees by colored diameter classes			
	Black	Stripe	Green	Dotted
Dak Pac				380
Dak Doc				128
Dak Mua				510
Dak Roc A	1325			1060
Dak Roc B				405
Ngoc Chim Moc				550
Dak Bo A				300
Dak Deang	4200			294
Ngoc Tu Bra A	750	580		
Ngoc Tu Bra B				1320
<b>Total tree supply by diameter of 10 forest plots in five years</b>	<b>6275</b>	<b>580</b>	<b>0</b>	<b>4947</b>
<b>Timber (tree) needs of the village in five years</b>	<b>5140</b>	<b>705</b>	<b>270</b>	<b>345</b>
<b>Supply - demand balancing</b>	<b>1135 redundant</b>	<b>125 insufficient</b>	<b>270 insufficient</b>	<b>4602 redundant</b>
<b>Forest harvest plan for use in five years</b>	<b>5140</b>	<b>580</b>	<b>0</b>	<b>345 + 43 (for insufficiency of stripe trees) +135 (for insufficiency of green trees) = 523</b>
<b>Commercial timber harvest plan in five years</b>	<b>0</b>	<b>0</b>	<b>0</b>	<b>4424</b>
<b>Total harvested trees in five years</b>	<b>5140</b>	<b>580</b>	<b>0</b>	<b>4947</b>

Supply - demand balance results show that trees in green diameter is not sufficient in all plots; 3 classes of black, stripe and dotted allow harvesting when compared to stable forest model; especially all plot are redundant of dotted diameter trees; that means forest here are mature. Therefore, timber supply capacity of 10 plots for household needs and commerce is sufficient for coming five years. However, the community needs to change to use the dotted trees to replace stripe and green because the two classes are insufficient. Harvest for commerce should take all the dotted trees after meeting demand of the community to avoid over maturity of tree and facilitate growth of regenerated trees.

## **6. 5 year Community Forest Management Plan in Vi ChRing Village 2008 - 2012**

Results of five year CFMP were established based on previous discussion results including:

Management objectives of forest plot which include difficulties, opportunities/advantages, and specific measures for each plot.

- Chart to compare colored diameter trees in forest plot compared with stable forest model to identify the wood supply demand in coming five years and analyze measures for different plots.

- Results of needs analysis and supply - demand balance of forest products in five years.

Plan has been prepared by following measures:

- i) Forest protection
- ii) Forest enrichment and development of NTFPs
- iii) Forest utilization: Timber harvest

In the forest utilization plan, there are 10 forest plot will be selectively harvested in five years (2008 – 2012). Number of selectively cut trees by diameters is identified so as to ensure the uses of the community in five years (2008 - 2012), number of redundant trees harvestable can be sold to create income and add to community forest development fund and share among households.

The areas allocated to the community are production forest; however, some plots are watershed of big stream; therefore, in addition to the identification of harvestable trees, the checking of harvest intensity and canopy after harvest have been conducted. The results shows that forest plots with selective cutting intensity is less than 10% and after harvest canopy is more than 0.6 (60%); the number meets the selective cutting standards of intensity (5%), short rotation (5 years on average) and is suitable to the community management capacity, in addition, the harvest has low impact on forest. From the timber supply - demand balance, the wood supply is enough for furniture, the redundant number is for commercial purpose.

Village meeting to agree upon forest management plan

### Selective cutting indicators for forest plot

Plot	Area (ha)	M (m <sup>3</sup> /ha)	N cutting per ha	M cutting (m <sup>3</sup> /ha)	Canopy before harvest	Canopy after harvest	Cutting intensity (%)	Rotation (year)

Remarks:

- Selection of trees to cut: Mature dotted trees; black and stripe trees suitable to community use for furniture.

- First year: Hire enterprise to harvest, open roads and feeder roads; pay after selling harvested timber

- Following years: The village buys saws with money from sold timber, villagers will harvest

- Community forest management board monitor the harvest; coordinate with DPC and CPC to organize bidding

- Villagers clean forest with simple equipment, utilize branches for firewood.

## 7. Implementation arrangement

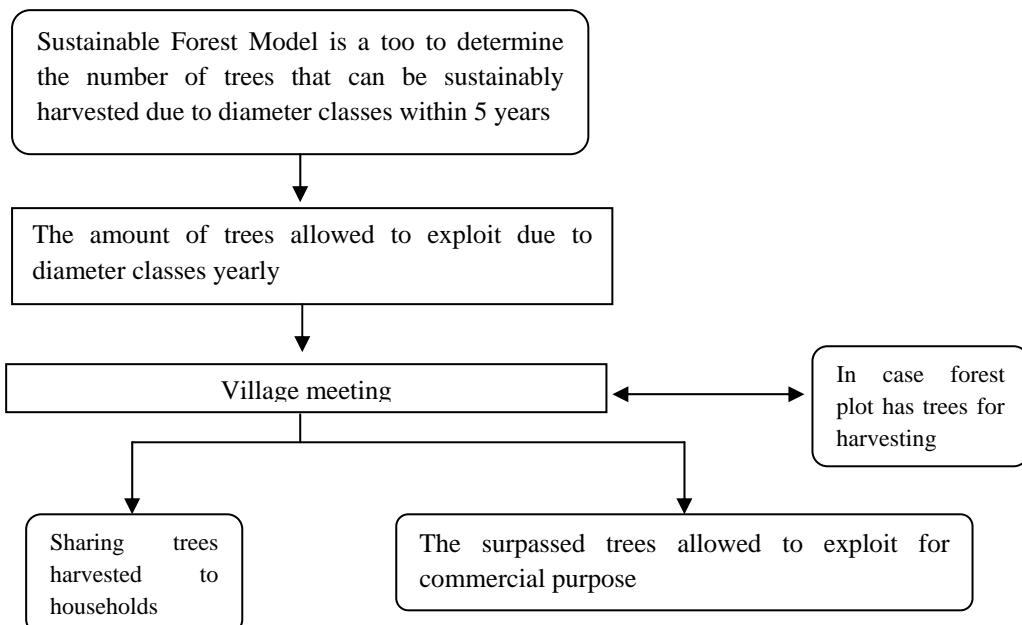

### i) Task allocation

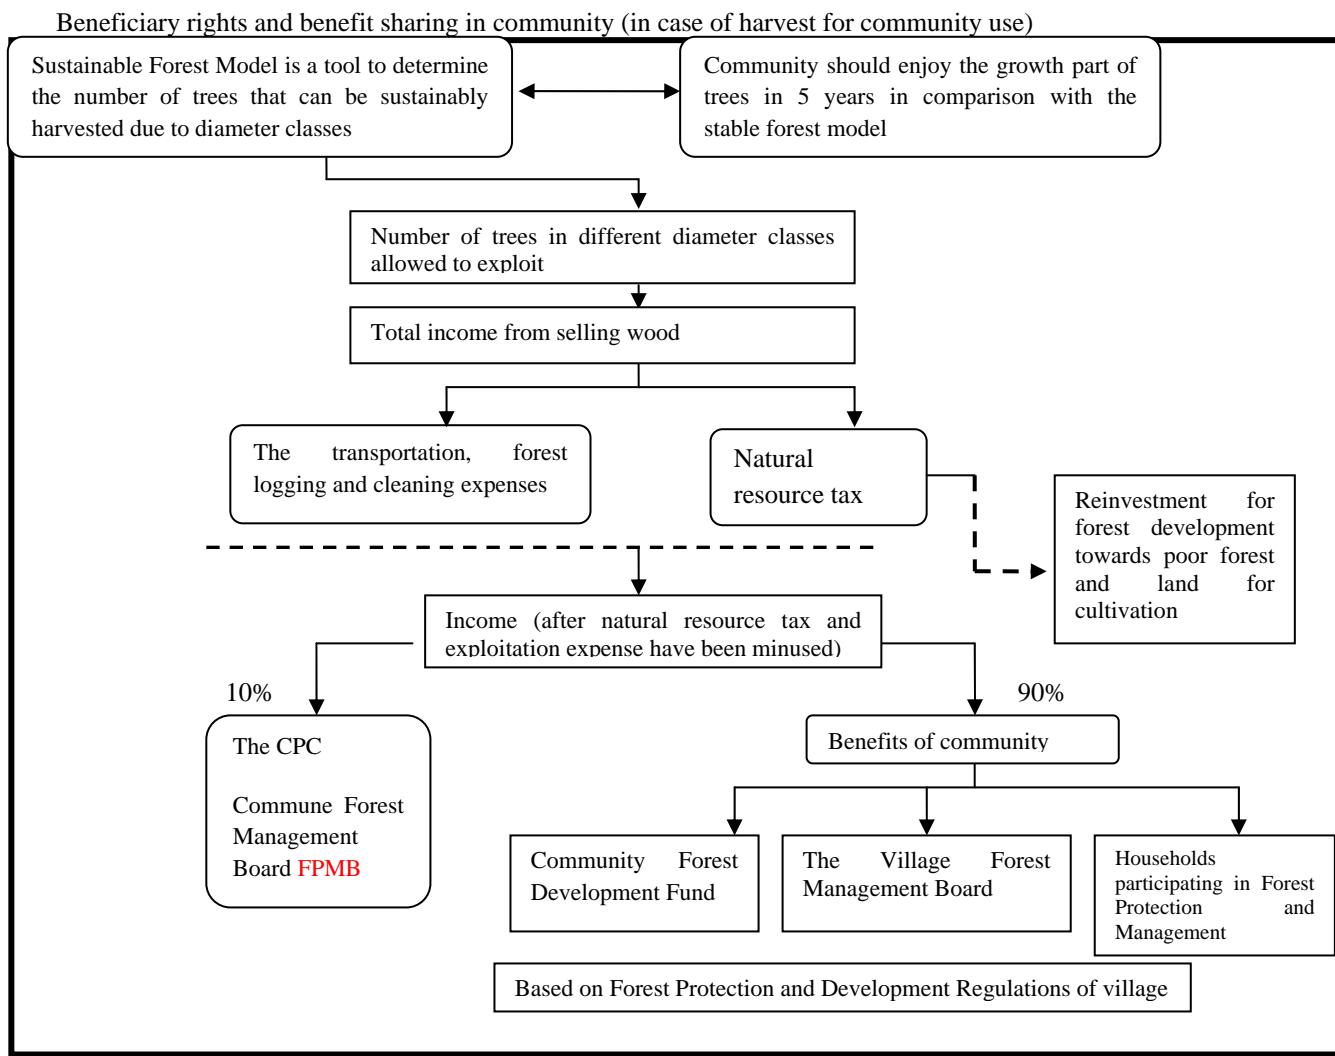

#### Assign tasks for implementing activities in forest management plan

Forest management activities	Responsibilities	
	Household	Community Forest Management Board
Forest protection	Participate to forest protection according to tasks assigned by forest protection group	Form 3 forest protection groups for forest plots Coordinate and record workdays
Forest development: Forest enrichment and plantation of non-timber forest products	Participate in task allocation	Allocate tasks for groups to conduct forest enrichment and plantation of non-timber forest products Coordinate and record workdays
Timber harvest	Mark trees, and clean forest	Organize harvest according to plans Supervise Organize timber bidding
Benefits share		Share harvested timber to households for use Supervise the benefit sharing after selling timber according to RFPD

### ii) Benefit and benefit sharing

- **With regards to timber for house construction and furniture:** Annually CFMB organizes village meeting to prepare plan and vote for households to construct houses in the year. For other domestic timber for kitchen, animal houses, furniture..., households are allowed harvesting in plots according to the plan.
- **With regards to non-timber forest products:** Households can use for their needs according to RFPD.
- **With regards to commercial timber:** Organize harvest and bidding. Pay natural resources tax according to current regulations. After excluding tax and other harvest contract cost, pay to CPC 10% for the operation of commune forestry board and support the community in forest management; 90% are community benefit and shared among households and pay to community forest development fund according to RFPD, in which 20% is kept in the fund as community income

**Beneficiary rights and benefit sharing in community (in case of harvest for commercial purpose)****iii) Management of community forest development fund**

Community forest development fund is from commercial harvest and NTFP harvest and sell or fine from violations.

The fund is managed by CFMB accountant and treasurer; the spending is according to RFPD; receipts and payment notes must be available and reported in quarterly village meeting.

## 8. Conclusions and recommendations

**i) Conclusions**

The 5 year forest management plan of Vi ChRing Village was prepared on the basis of assessing forest resources and community needs; the results show that community timber needs can be met; forest harvest for self use and commerce can ensure the suitable forest development; low harvest intensity and short rotation have low impact on forest.

With the support of local governments and functional agencies, in the community has sufficient capacity to protect and develop forest in the next five years.

**ii) Recommendations**

The following steps are necessary:

- Issue red book for forest and forest land for the community in Vi ChRing Village
- DPC approves RFPD and annual and five year CFMP and harvest plans
- CPC approves annual CFMPs
- Community implements the RFPD and CFMPs

## Annexes

### ANNEX 1: Schedule for CFM planning and RFPD establishment in Vi ChRing Village

#### Training objectives

At the end of the training courses, participants will have capacity of

- Support communities to establish five years forest management plans
- Facilitate communities to establish RFPD
- Guide the community to apply silviculture techniques in selective cutting

**Output s of the training:** Through the training and working with the community, some outputs will be produced and submitted for approval:

- i) Five year plan CFM
- ii) Community RFPD

**Participants:** All participants from the training of Land and Forest Allocation, maximum number is 20 people

**Time/venue:** 7 days: From 14 to 20 January 2008 at a hotel in KonPlong District and ViChRing Village, Hieu Commune. Morning: 8:00 – 11:30; Afternoon: 13:30 – 17:00.

#### Training schedule

Date/time		Methods	Location	Activity	Tools and Documents	Learners	Villager participants
1 14/1/08	Morning	Presentation	<b>Hotel/Kon Plong District</b>	Opening Process of Community Forest Management	Forest allocation documents Forest allocation map (2 copies) Training materials Stationery	Whole	No
	Afternoon	Presentation Individual exercise		Participatory forest inventory Identification of supply capacity of forest plots			
2 15/01	Morning	Group exercise	<b>At Vi ChRing Village</b>	Identify village needs of forest products Establish five year Community Forest Management Plan			
	Afternoon	Presentation		Establish Community RFPD Field plan			
3 16/01	Morning 8:30 – 11:00	Village meeting	<b>At the village</b>	Introduction to community forestry Prepare plan for working in the village Form work groups	Stationery Working schedule at the village List of core farmers	All learners	All households in the village
	Afternoon	Group work		Forest description Identify management objectives for forest plots, problems, issues and measures			
4 17/01	Morning	Group work	<b>At the village</b>	Data analysis on wood supply from forest plots	Data synthesis sheet Model of stable forest	4 groups	4 groups

Date/time		Methods	Location	Activity	Tools and Documents	Learners	Villager participants
	Afternoon	Group work	At the village	Assessment on forest product needs Balance of supply and demand	Table of supply - demand balancing Stationery Transparency paper Model of stable forest	4 groups	4 groups
5 18/01	Morning	Group work	At the village	Prepare 5 year CFM plan	Planning sample sheet Stationeries	4 groups	4 groups
	Afternoon	Group work	At the village	Objectives of establishment of RFPD, topics Establish RFPD by topics	Stationery Maps of forest plots	4 groups	4 groups
6 19/01	Morning	General working	At the village	Draft of the regulations	Stationery	Whole	12 representatives/village
	Afternoon	General working session at forest	At the village	Simple silviculture technical training in selective cutting	Stationery Measurement tape Colored diameter tapes Compass Poster on silviculture techniques GPS Tree marking sheet	Whole	12 representatives/village
7 20/01	Morning	Village meeting 8:30 11:00	At Vi ChRing Village	Agree upon the CFMP and RFPD	Draft Five year Community Forest Management Plan Draft RFPD is written on A0 paper	All learners	All households in the village

## ANNEX 2: List of participants to CFMP establishment in Vi ChRing Village

### List of participants to the training

No.	Full name	Local	Remarks
1	Ho Dac Huy	PMU of forestry projects in Kon Tum Province	Project staff
2	Nguyen Dang Trinh	Management division, Sub-Department of Forest Protection, Kon Tum Province	Forest rangers
3	Do Van Khanh	Division of Natural Resources and Environment in Kon Plong District:	Officer
4	Tran Van Thanh	Forestry, Agriculture and Industry Development Investment and Services Company in Kon Plong District	Technician
5	Nguyen Cong Tuong	Forest protection station in Kon Plong District	Forest rangers
6	Dang Tuan	Forest protection station in Kon Plong District	Forest rangers
7	Tran Van Nhu	Mang La Forest Enterprise, Kon Plong District	Vice Director cum JICA Project staff
8	Nguyen Ngoc Xuan	Kon Plong District Division of Economics	Technician
9	Ho Thi Thanh Nga	Hieu Commune extension worker	Technician
10	Dinh Xuan Do	Hieu Commune People's Committee	Chairman
11	Dinh Xuan Dam	Vi ChRing Village	Village Chief
12	Dinh Van Dich	Community Forest Management Board of Vi Chring Village:	Head
13	Dinh Xuan Hai	Community Forest Management Board of Vi Chring Village:	Vice head
14	Dinh Xuan Trai	Community Forest Management Board of Vi Chring Village:	Members
15	Y On	Community Forest Management Board of Vi Chring Village:	Members
16	Dr. Assoc. Prof. Bao Huy	Central Highland University	Consultant
17	MA. Cao Thi Ly	Central Highland University	Consultant
18	Dr. Vo Hung	Central Highland University	Consultant
19	Engineer Hoang Trong Khanh	Central Highland University	Consultant

	Mixed timber - bamboo forest	Bamboo: Thin Timber: Only has small trees of less than 15cm diameter	Bamboo: Medium Timber: has trees with diameter from 15cm to minimum harvestable diameter	Bamboo: thick Timber: has trees with diameter greater than minimum harvestable diameter
	Bamboo forest: - Diameter.	- Small Neohouzeana.	- Medium Neohouzeana.	- Big Neohouzeana
	Density	- Thin	- Medium	- Thick

Species	name of big timber species		Name of small timber species
	Red Juniperus (Long Ka Pong). Zyzygium (Long Ho reng), Schima superba (Long ta mot) Castanopsis (Long Ka sa) Dacrycarpus imbricatus (Long ha mia)		

Canopy	Thin	Thick	
		x	

Openings in forest	Not available	few	many
	x		

Slope degree	Is it easy to move in the plot		
	Easy (less slope)	normal (medium slope)	Difficult (high slope)
	x		

Forest products	Is it possible to harvest forest products in the plot in the next five years?		
	If harvestable, specify 3 main forest products that can be harvested.	yes x	no
	Timber: Red Juniperus, Dacrycarpus imbricatus, Zyzygium, Schima superba, Castanopsis Non-timber forest products palm leaf (for roofing material), leaf of Acanthopanax lasiogyne (for medicine), mushrooms and orchids.		

Forest fire risk	Has the plot been fired?			
	in the last five years	no, in the last 5 years	no, in the last 10 years	never x

Grazing	Situation of cattle grazing in the forest plots through signs like cattle dungs, footprints, or eaten grass...)			
	high level	medium level	low level x	No

**Table for Specifying forest plot management objectives**

Plot name/Plot No.	Dak Doc
Management objectives	Produce timber and non-timber forest products Leaf for roof, medicine materials, charcoal
Problems/difficulties	People from other village come to harvest timber for their house construction The trees are too big making it difficult for farmers in sawing Difficult to transport after logging. There are many mature trees, if no harvest, they will fall or have hollow
Advantages/opportunities	Close to National Road no. 24 Flat terrain, easy to harvest High commercial timber stock volume
Solutions	Establish forest protection groups for frequent patrol

	<p>The CPC is requested to inform neighbouring villages on the community forest boundary to avoid encroachment.</p> <p>- Use suitable diameter trees for house construction (green - dotted)</p> <p>- Harvest mature trees to sell and avoid waste in falling, hollow and create favourable conditions for regenerated trees.</p>

**Table for Specifying forest plot management objectives**

Plot name/Plot No.	Ngoc Tu Bra B
Management objectives	Provide timber and non-timber forest products
Problems/difficulties	- Far from the village, steep terrain, difficult to access - It is difficult to identify boundaries, can not use natural boundaries like: stream, river or feeder roads.... - No feeder roads to the plot - Not many people know the plot location
Advantages/opportunities	- There are many big timber trees; the forest is little impacted - Easy in management and protection
Solutions	- Protect and manage as RFPD for harvest of commercial timber - Make landmarks to mark plot boundaries and location CPC informs to other villages to avoid impact and encroachment to the community forest resources.

Annex.....	15

## 1. Introduction

On the basis of five year CFMP (2008 - 2012) of Vi ChRing Village, the year 2008 plan has been established.

The participatory planning process including 19 participants out of which 12 are from related agencies in district like economics divisions, district DONRE, FEs, in provincial level like DARD, DONRE, Sub-DOF, FPMB; 7 members are commune staff, CFMB and villagers from Vi ChRing, with the support and monitoring of Assistant to Chief Representative of JICA Vietnam Office and CTA of JICA Project and coordinator from FSIV. The discussion is assisted and facilitated with consultant team from Central Highland University including: Dr. Prof. Associate Bao Huy, Dr. Vo Hung, M.A. Cao Thi Ly, Enginer Pham Doan Phu Quoc. (Refer to list of participants).

## 2. Objectives of CFM Plan 2008

Vi ChRing Village 2008 CFMP has been established with following objectives:

- Implement and complete gradually the established five year plan to contribute to stabilize forest, protect water resources for living and production and create income from CFM for Vi ChRing villagers.
- Detailed planning for activities needs implementing in 2008 as basis for effective implementation.

## 3. Vi ChRing Village 2008 CFMP

2008 CFMP was established based on five year plan including activities in 3 solution groups: Forest protection, enrichment planting and development of NTFP and forest use. There are 4 main activities discussed for establishing 2008 plan, including:

- Forest protection
- Forest development:
  - o Additional planting with 2 local species of Hong tung and Melia Aderazach
  - o Plant bamboo along stream
- Forest utilization: Selective cutting with small intensity, short rotation to meet Vi ChRing community needs in 2008, and the surplus is sold to make Forest Development Fund for Vi ChRing Community and income for member households participating in CFM.

### 3.1. Forest Development Plan

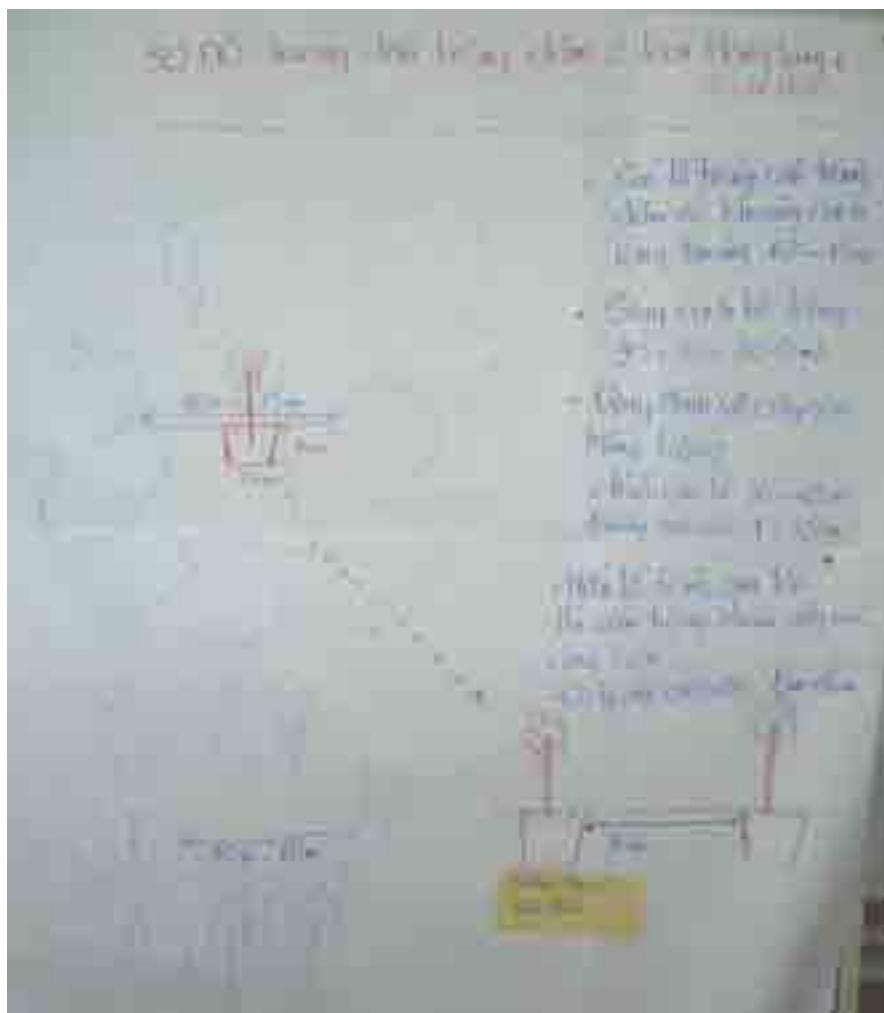

No.	Activity	Time(Solar Calendar month)	Location	Area/quantity	Needs (material, advice, budget, labor...)	Responsibility
1	Construct of forest protection schemes: + Map of community forest: <i>Conjugated iron, iron pole (1.5m x 2.0m)</i> + RFPD board constructed with cement and written with paint (2.5m x 3.5m)	May 2008	T-Junction for inter-village road and national road no. 24	1 map 1 RFPD	VND 6,000,000 VND 10,000,000	JICA Project finances and hires people for construction CFMB monitors
2	Mica RFPD board, decal letter (1.2m x 2.4m)	May 2008	Put at communal house	1 board	VND 1,000,000	
3	Hand-out RFPD: printed on A4 plastic coated hard cover for households: (33 copies x VND 15,000/copy)	April 2008	Deliver to households	33 copies	VND 500,000	
4	Colour printed and plastic coated map on A0 paper	April 2008	Deliver to 3 forest protection groups	3 maps	VND 1,000,000	
5	Deliver to 3 forest protection groups.	April 2008	Vi ChRing Village	3 forest protection groups		CDMB 32 households in the village
6	Inform about forest area allocated to Vi ChRing Village	Frequently by information media	To all villages in the commune			Hieu CPC

### 3.2. Forest development plan:

#### i) Additional planting with 2 local species of Hong tung and Melia Aderazach

No.	Activity	Time	Location	Area/quantity	Needs (material, seeds, breeds, advice, budget, labor...)	Responsibility
1	Organize whole village meeting and divide forest plantation groups	6/ 2008	Vi ChRing Village	32 households divided into 2 groups - each has 16 households		Village Chief & CDMB
2	Survey locations with seedlings of Hong tung and Melia Aderazach	7/2008	Ngoc Chim Moc Plot & Dak Pui Plot	55 ha 43 ha	2 workdays/household 2 workdays/household	16 households in group 1 16 households in group 2
3	Survey and identify opening for plantation and digging holes	7/2008	Dak Dreng Dak Nech	31 ha 31 ha	5 - 7 workdays/household 5 - 7 workdays/household	Group 1 Group 2
4	Carry seedlings	8/2008	At 2 plots Ngoc Chim Moc and Dak Rui where seedlings are available	1,600 seedlings of 2 species/ 2 plots 50 seedlings/household		All 32 households arrange time to participate
5	Plant seedlings to the hole	8/2008	At openings in 2 plots of Dak Dreng and Dak Nech	800 seedlings/ Dak Dreng plot- 50 seedlings/household 800 seedlings/ Dak Nech plot- 50 seedlings/household		Group 1 Group 2
6	Tending, protection and monitoring	Frequently and periodically from planting time	At planted area	All 17 CFM plots Pay attention to new plantation areas		All community participate Forest protection groups are assigned

**Map for additional planting of Hong tung and Melia Aderazach in openings of young and poor forest**

**ii) Plant bamboo along stream**

No.	Activity	Time(Solar Calendar month)	Location	Area/quantity	Needs (material, seeds, breeds, advice, budget)	Responsibility
1	Assign location for planting to households	May 2008	At 3 forest plots: Dak Kiec Penh, Dak Dreng, Dak Nech	810 seedlings  Assigned to responsible households: 30 seedlings/household	Seedlings:: provided by JICA Project in 2008 = VND 12,150,000	CFMB and all village households
2	Hole digging	From 1st - 15th of June 2008				Each household plants themselves and conduct
3	Stir soil and prevent water log in the hole	16 – 30/6/2008				

4	Bamboo planting	July 2008				tending in identified locations
5	Tending and protection	August - December 2008				

**Map for bamboo planting along streams****Important technical notice for bamboo planting activity:**

*Bamboo has wide ecological area; however, shoot bamboo fit elevation between 500m and 600m; therefore, it is necessary to survey suitable bamboo species in high area like Vi ChRing with elevation of 1,200m and cold climate in winter. If so, bamboo has higher survival rate. In Addition, bamboo is*

*light demanding species, therefore, it is important to have plan for vegetation clearing, and not plant under forest canopy by stream banks.*

**Bamboo species fit Vi ChRing conditions is: *Phyllostachys pubescens*. Refer to Guidelines for *Phyllostachys pubescens* attached to this plan to prepare seedlings and guide to community.**

### 3.3. Forest utilization plan in 2008

No.	Activity	Time	Location	Area/quantity	Needs (material, seeds, breeds, advice, budget)	Responsibility
1	Silviculture technical training in selective cutting	10 – 15/4/2008	Vi ChRing Village	15 - 17 households 6 - 7 technicians	Consultants from Central Highland University  Rulers, paint, stationeries...	District working group CDMB. JICA Project supports
2	Mark trees by paint (only mark colored diameter class: dotted)  Take note the number of marked trees by diameter classes	1 – 10/5/2008	Ngoc Tu Bra B Plot  Go for tree marking and stay in forest	1,320 dotted trees	All participants joined  Assign tasks for households  Paint, 30m tape, canvas...	District working group (Forest Protection Station has core role). CDMB.  JICA Project supported allowances for technicians and materials
3	Timber harvest permit	20 – 30/5/2008	Kon Plong District			Hieu Commune Forestry Board Kon Plong DPC (advised by Forest Protection Station).
4	Cut dotted trees and clean forest  Cut stripe and black trees when the community needs.	June 2008	Ngoc Tu Bra B Plot  Ngoc Tu Bra A & Dak Deang	1,320 dotted trees  116 stripe trees 1,028 black trees	Machine saws (3 saws)  .	JICA Project supported machine saws. Mang La Forest Enterprise gave technical support CDMB assigned tasks Households worked
5	Timber trailing (bring timber to log field)	15/6 – 31/7/2008			Contract with Kon Plong Company	CDMB assigned persons to

No.	Activity	Time	Location	Area/quantity	Needs (material, seeds, breeds, advice, budget)	Responsibility
						monitor
6	Mark trees prepare timber profile	15/8/2008	Log field			Forest Protection Station, Kon Plong District CDMB
7	Timber bidding Broadcast information on mass media	September 2008	Hieu CPC			Hieu CPC CDMB Economic Division of Kon Plong District
8	Benefit sharing among the community as RFPD	October 2008	Vi ChRing Village			CDMB

Timber harvest plan in 2008 of Vi ChRing Village was based on five year CFMP (2008 - 2012), in which timber harvest has two objectives: i) community use; ii) the surplus is sold to create income for community, raise fund for Forest Development Fund and pay natural resources tax and pay to CPC for forest management.

#### Number of harvested trees for use and trade in forest plots in 2008

Diameter classes (cm)	Colored diameter classes	Total harvestable trees	Forest plot	Area (ha)	Number of trees for community use	Number of commercial trees
8 - 20	Black	1028	Ngoc Tu Bra A Dak Deang	58	500	0
20 - 30	Stripe	116	Ngoc Tu Bra A	58	116	0
30 - 40	Green	0			0	0
> 40	Dotted	1320	Ngoc Tu Bra B	88	105	1215
<b>Total</b>		<b>2,464</b>			<b>1,249</b>	<b>1,215</b>

In addition to identifying number of trees on stable forest model basis, relevant technical indicators of forest harvest are checked like: Forest standard for harvest like stock volume, harvest diameter class; selective cutting indicators like intensity, canopy, timber harvest rotation.

Checking results of Ngoc Tu Bra B Plot, 88 ha is included for big timber harvest in 2008 show that, the plot is qualified for harvest and harvest principles in CFM are ensured including small intensity, short rotation, harvest with low impact:

- The forest is medium stocking or above, the stock volume is high (above 400m<sup>3</sup>/ha); and there are many mature trees. Ensure standards for timber harvest forest.
- Number of harvested trees is small (15 trees/ha), intensity by stock volume is 8% with rotation of 5 years. Compliance to regulations on community forest harvest with intensity less than 10% with 5-year rotation

The standards for timber harvest forest and indicators by stock volume is *compliance to requirements in Official Document No. 2324/BNN-LN by MARD dated 21st August 2007 on guidelines of technical indicators and procedures for community forest harvest.*

### **Indicators for selective cutting of the forest plots in 2008**

Plot	Area (ha)	M (m3/ha)	N cutting/ha	M cutting (m3/ha)	Canopy before harvest	Canopy after harvest	Cut Intensity by stock volume (%)	Rotation (year)
Ngoc Tu Bra B	88	436	15	36	0.80	0.77	8.4	5

### **4. Forecast on economic efficiency and benefit sharing from commercial timber in 2008**

Economic efficiency from commercial timber harvest in 2008 is calculated at lowest level like low price, highest cost (as contingencies for difficulties in harvest site and transport) Results are shown in following table

#### **Forecast on economic efficiency of commercial timber harvest in 2008, Vi ChRing Village**

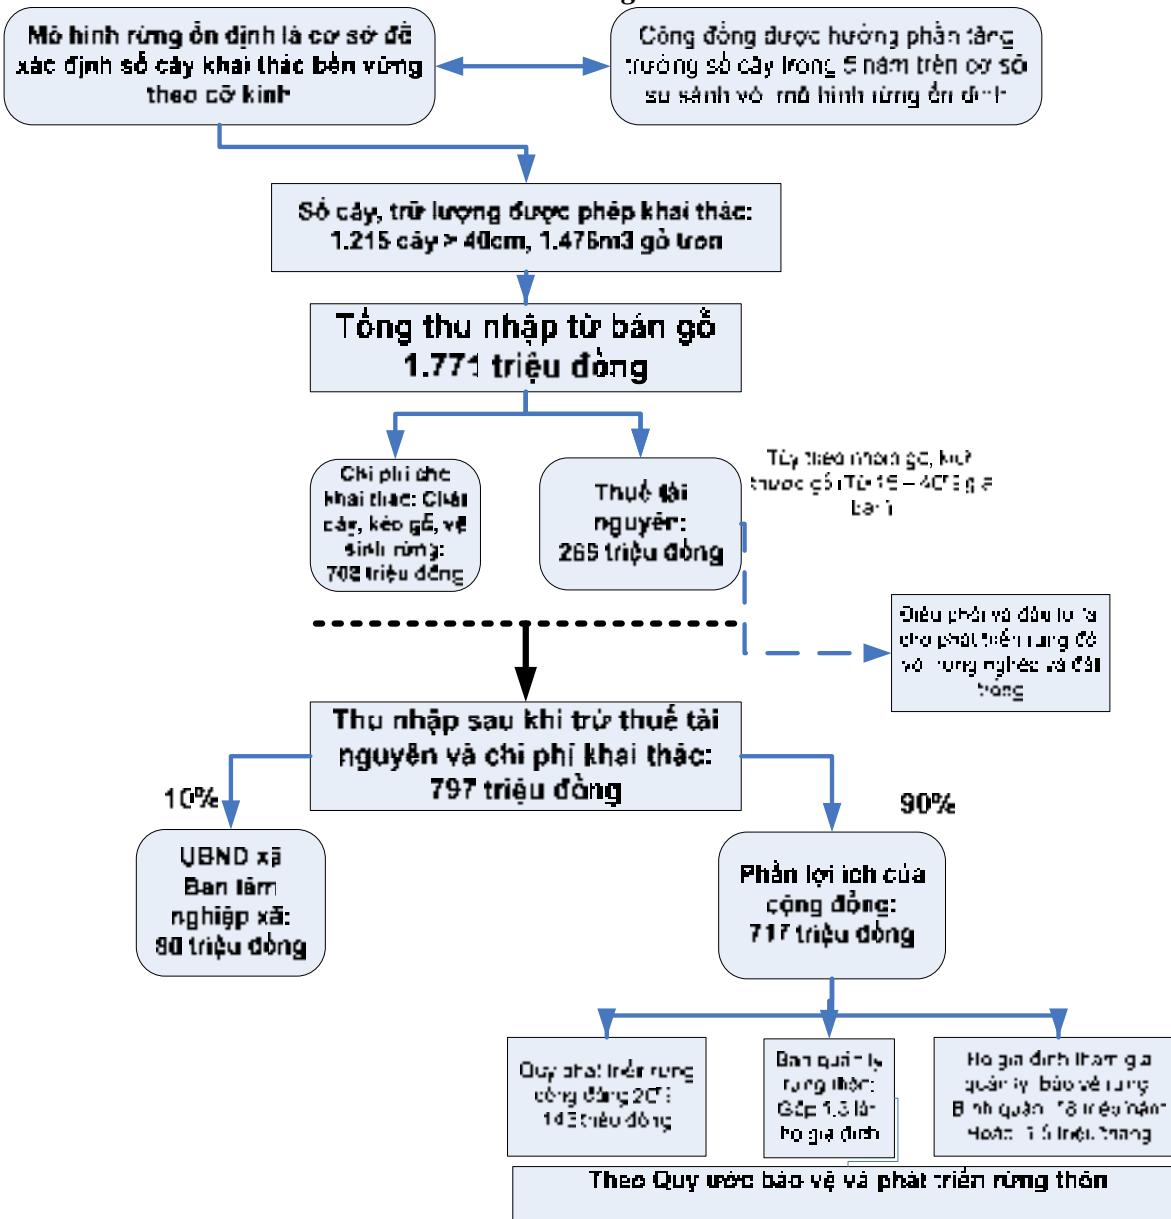

Diameter classes (cm)	Color diameter classes	Total harvestable trees	Number of trees for community use	Number of commercial trees	Commercial round log (m3)	Unit price (million VND/m3)	Total income (million VND)	Cost for logging and trailing (million VND)	Profit (million VND)
8 - 20	Black	1028	1028	0	0				
20 - 30	Stripe	116	116	0	0				
30 - 40	Green	0	0	0	0				
> 40	Dotted	1320	105	1215	1,476	1.2	1,771	708	1,063
<b>Total</b>		<b>2,464</b>	<b>1,249</b>	<b>1,215</b>	<b>1,476</b>	<b>1.2</b>	<b>1,771</b>	<b>708</b>	<b>1,063</b>

Calculated results show that:

- Total income from commercial timber: VND 1,771 million
- Fee and tax cost:
  - o Total cost for harvest (logging, cleaning and trailing): VND 708 million
  - o Natural resources tax (25% on average): VND 266 million
- After tax income and cost: VND 797 million, benefits are shared as follows:
  - o Pay to Hieu CPC VND 80 million
  - o Benefit for Vi ChRing Village: VND 717 divided as specified in RFPD:
    - Community Forest Development Fund 20%: VND 143 million
    - Average household income: VND 18 million/year or VND 1.5 million/month;  
in which members of CFMB received 1.3 times as normal household.

## Diagram for benefit sharing in commercial timber harvest in 2008, ViChRing

Village

## Conclusion and recommendations

### i) Conclusions

CFMP 2008 of Vi ChRing Village is described with 4 major activities. The plan was discussed in details with balance on community labor, time, budget, capacity... to ensure the feasibility.

If the plan is implemented in 2008, it will contribute to the first step of implementing 5 year CFMP; this is total new implementation for the locality and helps initiate the CFM process.

The implementation of CFMP 2008 will create income as well as mobilize resources from the community to forest development course; in addition, CFM capacity will be gradually improved with the support of relevant stakeholders.

### ii) Recommendations

To implement CFM approach and CFMP 2008 of Vi ChRing Village, government agencies and JICA project need to work on following issues:

- Kon Plong DPC grants land and forest use certificate for Vi ChRing Village community.
- Hieu Commune People's Council agrees and Kon Plong DPC approves Regulations on forest protection and development and five year CFMP of Vi ChRing Village.
- CPC approves CFMP 2008
- District People Committee approves and grants timber harvest permit for 2008 to Vi ChRing Village.
- Departments and sectors support, facilitate the community to implement RFPD and CFMP 2008 of Vi ChRing Village.
- JICA Project supports training, necessary materials and equipment to implement CFM activities in 2008 in Vi ChRing Village.

# REGULATIONS ON COMMUNITY FOREST PROTECTION AND DEVELOPMENT

## Vi ChRing Village

January 2008

HIEU COMMUNE  
PEOPLE'S COMMITTEE  
Vi Chring Village

SOCIALIST REPUBLIC OF VIETNAM  
Independence – Freedom - Happiness

## REGULATIONS ON COMMUNITY FOREST PROTECTION AND DEVELOPMENT Vi ChRing Village

### I. Works to be done:

- The community must protect the watershed forest of streams of Dak Mua, Dak Nech, Dak Ram, Dak So,...
- Members of the community and households must participate in forest enrichment, NTFP development according to annual plans.
- Members of the community and households must participate in forest protection groups according to the appointment of Community Forest Management Board.
- Timber harvest must follow the approved annual plans: by forest plots, number of logged trees, diameter class allowed for harvest.
- Timber harvest includes: tree selection, logging, forest cleaning after harvest, trailing... all works must be done properly according to silviculture techniques.
- In case a household urgently needs small timber for use: Back trees (diameter of 8-20cm), stripe trees (diameter of 20-30cm), the household must report to get the approval and guideline from Community Forest Management Board (CFMB).
- Free grazing is not allowed; grazing must be taken care of; animal must be kept in stables at night.

### II. Works can be done:

- Community members are allowed harvest and use of NTFPs like bamboo, bee honey, bamboo, forest vegetable, medicinal plants, leaf for roofing material...
- Community members are allowed harvest NTFPs to sell including: Smilax leaf, bee honey, forest vegetable... to improve household income.
- Households can cultivate on their former upland farms.
- Community members and households can harvest timber for household use according to annual approved plan.
- Community can harvest commercial timber by annual approved plan.
- Destructive animal can be caught including: rat, sparrow, bamboo rat.

### III. Works encouraged to do:

- Community members learn how to harvest, use, develop and management forest.
- Increase intensive farming in paddy field, upland farms and home garden.
- It is advisable to plant perennial trees with annual crops on upland farms.
- Plant high productivity grass to develop animal husbandry.
- Conduct traditional bee keeping by boring trees in the forest for bees to build their hives.
- Plant shoot bamboo by the streams to get more income and contribute to maintain water resources in the upstream.

- Use available tools and equipment to harvest and transport logs: Log with hand saw and axe; transport with buffalo and cattle.
- Utilize branches and barks of logged trees for firewood, animal houses, fence...
- Use smoke to get bee honey; do not use fire to burn bees.
- When harvesting NTFPs, some NTFPs should be remained for long term use and development.
- Cattle and buffalos are grazed in Dak Kiec Penh Plot and around household field.

#### **IV. Works can't be done:**

- Community members and households are not allowed harvesting commercial timber without approval. The harvest must be organized for all community.
- Community members are not allowed harvesting NTFPs with large scale for sales. The harvest must be organized for all community.
- Forest cutting for upland farming is not allowed.
- Hunting of wildlife is not allowed.
- It is not allowed to cut big timber trees by streams.
- Use of explosive, electricity to catch fish, frog... in streams is not allowed.

#### **V. Benefit and rights of the village and villagers:**

##### **1. Benefit and rights of the village and villagers:**

- Access to land and forest use rights (red book)
- Benefited on allocated forest and land area.
- Technically supported in forest protection and development.
- Entitled to integrate rural development program to develop community forest.
- Access to compensation of labor and investment if the government conducts land acquisition for other public purposes.

##### **2. Benefit and rights of villagers:**

- Access to participation and decision of CFMP and RFPD
- Be equal in benefit sharing from community forest.
- Benefited from timber and NTFPs from CFMP and RFPD.
- Can use forest and forest land for livelihood improvement

#### **VI. Benefit sharing in community and forest development fund management:**

##### **1. Benefit sharing from household use wood:**

- Hold village meeting to vote for households to construct new house annually.
- Each household is allowed to cut 10 dotted trees (diameter > 40cm), 2 stripe trees (diameter: 30 - 40cm)
- Households want to build animal houses, store, fence or furniture must take trees in the right plot in the annual plan and get agreement from CFM Board.

##### **2. Benefit sharing from commercial timber**

- CFM Board organizes harvest and selling of commercial timber by annual plan and shares benefit within the community as follows:
  - + Pay natural resources tax according to government regulations.
  - + Pay the labor of logging and transport.
- The remaining is shared as follows:
  - + 10% is paid to CPC for the operation of commune forestry board.
  - + 90% is community benefit and shared as follows:
    - 20% is allocated in village development fund.

The remaining is shared equally in 3 parts as follows: 1 part is divided for all households according to number of people in the households; 2 remaining parts are shared between households and community members by labor contribution, the members of CFM Board are benefited 1.3 times compared to normal household labor.

### **3. Management of community forest development fund**

- The objectives of the fund are to pay for forest protection, development and common community benefit.
- Community forest development fund is managed by CFM Board.
- CFM Board assigns one person to be accountant and one to be cashier.
- Payment and receipt must have bill and signatures of 3 person: Head of Community Forest Management Board, accountant and cashier. If head of CFM Board is not present, the Vice Head can sign instead.
- CFM Board expenditure is decided by its head, and reported at village meeting.
- The expense amounted to VND 500,000 must be discussed and agreed by the community; pay note must be prepared.
- Annually, CFM Board must report in village meeting about the use and management of the fund.
- In case the fund management is not proper, the wrong payment amount must be repaid by the wrong doers and those persons are not allowed to continue the job.

## **VII. Responsibilities and authorities of CFM Board and community members:**

### **1. Responsibilities and authorities of CFM Board:**

- Establish, monitor and implement CFMP and RFPD.  
Establish and allocate tasks for community forest protection groups.
- Record work days for community members, households participating in forest protection and development activities. Work days for following activities will be recorded:
  - + With regards to households: Patrol to protect forest, plant trees, plant NTFPs, harvest, clean forest, participate in village meeting related to forest management and protection.
  - + With regard to Community Forest Management Board: Labor work is similar to households. In addition, work days will be recorded for meeting of CFM Board, preparation of report and solving related issues.
- Organize rewards and compensation.
- On behalf of the community to solve related issues to forest management and protection.
- Archive records and quarterly report to PPC on the management of community forest.

### **2. Responsibilities and rights of community households and members:**

- Equal in participating to community forest management activities.
- Establish and implement CFMP and RFPD;
- Monitor, prevent and report in time to CFM Board the violations to community forest.
- Protect wildlife
- Participate in forest fire extinguishment when mobilized by CFM Board and CPC.
- Monitor activities of CFM Board.

## **VIII. Rewards and compensation:**

### **1. Rewards:**

- The detector of violation (logging, harvest of NTFPs, hunting of wildlife) will be rewarded by half of word day number of the violators, if violators are people inside the village.
- The detector of violation (logging, harvest of NTFPs, hunting of wildlife) will be rewarded by 1/4 sales of sold products, if violators are outsiders. In case releasing living wildlife to the forest, the work days will be paid as above case.
- In case of preventing the violation and report to CFM Board will be paid with 4 work days per case.
- Person detecting violation many times will be listed for the CPC or DPC to reward.

## **2. Compensation:**

- In case, villagers log timber without plan, all timber, logging tool and equipment will be seized; if cut green trees with diameter of 30 - 40 cm, three work days will be excluded, if cut dotted trees with diameter of above 40cm, four work days will be excluded.
- If villagers hunt wildlife, the wildlife and tools will be seized then sold to pay the CFM fund and 3 work days will be excluded; if wildlife are alive, they will be released to forest.
- If villagers harvest to sell NTFPs with large quantity, products will be seized and paid to the CFM Fund, exclude 4 work days, if the products are already sold, 4 work days will be excluded, and work days equivalent to product sales will be excluded.
- If outsiders cut timber and hunt wildlife in the community forest, products and tools will be seized and reported to CPC; amount got from product selling will be paid to CFM Fund; if wildlife are still alive, they will be released to the forest.
- If outsiders harvest NTFPs in community forest, products and tools will be seized then sold to pay to the fund.
- If one person lets cattle and buffalos to destroy crops of other households, he/she must compensate with an amount equivalent to the loss and area damaged.
- If a person catches fish with explosive, poisons and electricity, his/her tools will be seized and 3 work days will be excluded. If outsiders violated, they will be transferred to CPC for penalty.

## **IX. Procedures for rewards and compensation**

### **1. Procedures of rewards**

- Hold village meeting to vote for person to be rewarded in forest protection and development. The reward level will be decided by the community and paid from village fund.
- Rewards to detection the violation require:
  - + Minutes of RFPD violation, minutes of compensation.
  - + Minutes of seized product sales and voucher for receipt.
  - + Confirmation of reward level.
  - + In case of selling products and reward with cash, pay note must be prepared.
- Annually, CFM Board must report in the village meeting on rewards in forest protection and development.

### **2. Compensation procedures**

Steps for compensating:

- Prepare Minutes of RFPD violation and minutes of compensation.
- Write confirmation to exclude the work days of violators,

- In case, the products are sold, CFM Board must organize the selling and pay the fund; voucher of receipt must be prepared.
- Annually, CFM Board must report in the village meeting on compensation in forest protection and development.

The contents of RFPD have been agreed on 20 January 2008.

**Signed by household heads**

1. Household head:

*Vi ChRing Village, 20 January 2008*

On behalf of the community

2. Household head:

**Secretary**

**Village Chief**

3. Household head:

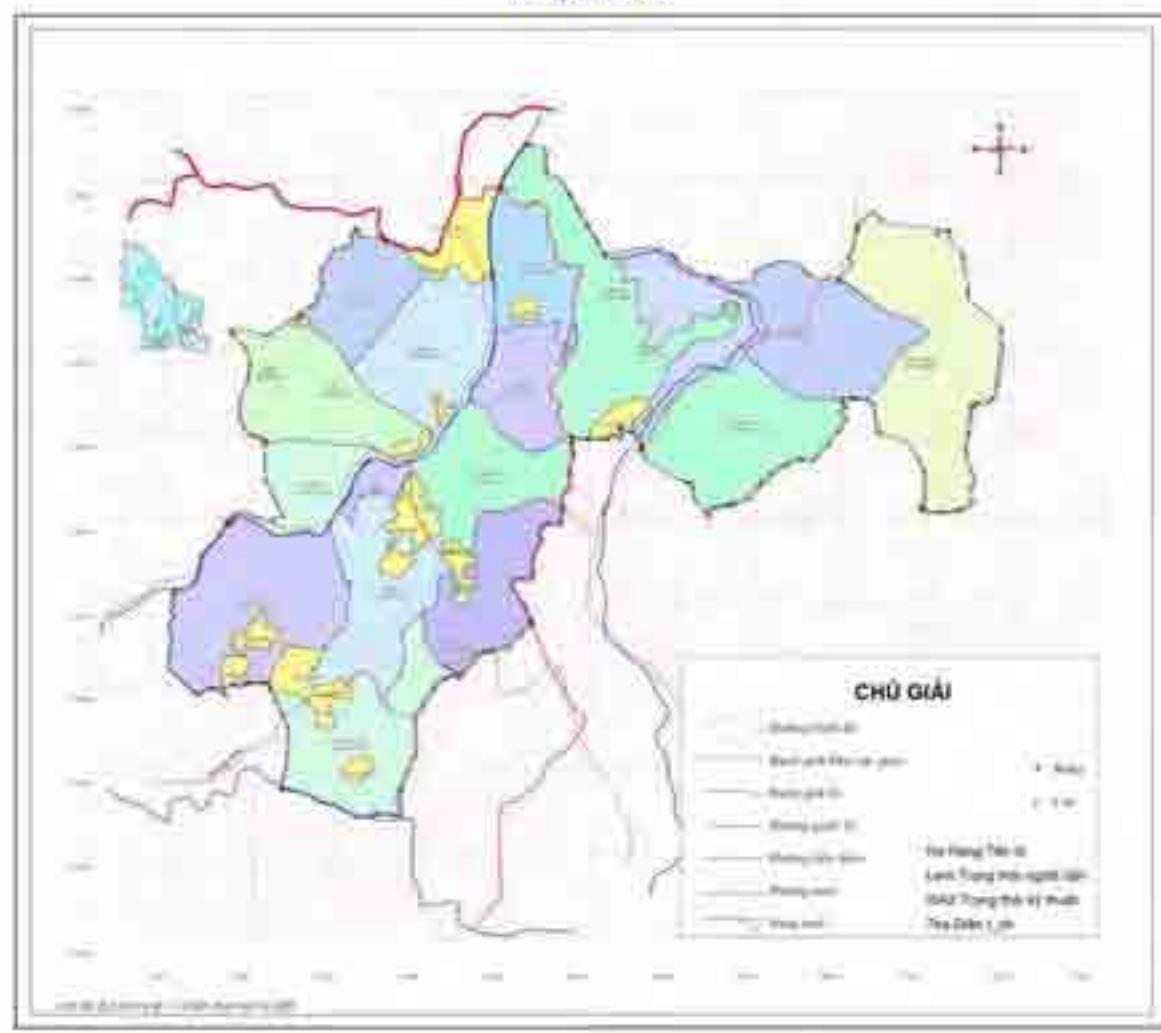

(Signature and fullname) (Signature and fullname)

**Ho Thi Thanh Nga**

**Dinh Xuan Dam**

Below is the detail results produced from group discussions during the participatory evaluation exercises. Numbers in the parenthesis indicate the number in each group. The scores are the sum of seeds put by each of the participants individually - from 1 (lowest) to 4 (highest).

### 1. Cattle

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi (6)	Can sell with higher price than before	20	Lack of vet medicine	22	Have new skills	20
	Decreased diseases	18	Not know how to treat diseases	18	Know how to make compost	18
	Have good manure for crops/trees	18	Lack of feed during dry season	16	Know how to sell higher prices	17
	Have hybrid bull	11				
Poe (11)	Decreased death of cattle/buffaloes	42	Lack of land for grazing	40	How to make suitable stables (ex. cover to keep inside warm)	44
	Have compost for use in paddy	42	Lack of cement to make stable floor	37	How to treat some general diseases such as scabby	39
	Planted grass for animal food source	41	Rainy and cold weather	36	How to care baby cattle/buffaloes	39
	Able to find day of delivery	39	Lack of fodder grass seeds	33	How to find pregnancy	29
Hieu (11)	Have technical training	40	Rainy and cold weather	38	Learn how to plant fodder grasses	39
	Have animals	40	Lack of bulls	36	How to find diseases	38
	Have material for stable	34			How to cage animals	37
	Have fodder seeds	26			How to care animals	31
Ngoc Tem (5)	Have income by selling animals	20	Lack of ropes to keep animals	20	How to make stables	20
	Have grass for animal foods.	16	Lack of hybrid grass seeds	18	How to herd animals	20
	Make compost	15	Foot-and-mouth diseases	16	How to prevent diseases	19
	Have used animals to plow	5				
Dak Pne (6)	Have manure/compost	24	Lack of vet medicine	24	How to care animals	22
	Have materials for stable	23	Lack of grass during dry season	19	How to process and preserve animal food	21
	Have income by selling animals	20			How to make stables	21
	Have animals (breed)	18			How to select good breed	18
	Have plow/traction	17			How to share benefit with community	18
	Have access to training	14				

## 2. Pig

Village	Benefit		Challenge		Lessons Learnt		
	Indicator (score)		Indicator (score)		Indicator (score)		
Dak Koi (5)	Have skills to raise new kind of pigs	12	Lack of vegetable and water during dry season	20	How to share benefit with community (animal bank system)	19	
	Have income source for household	11	Lack of vet medicines	18	How to treat newborn pigs (cut teeth/navel and castrate).	17	
	Able to utilize manure for trees/crops around houses.	10	Lack of labor to collect firewood to cook bran for pigs.	17	How to feed mother pig (snails, crab, fish) to prevent paralysis after delivery	13	
						How to use manure for trees/crops.	
Poe (11)	Use manure to make compost	36	Lack of cement/roof to make stable	44	How to make stables	34	
	Keep stables clean and neat	33	Lack of animal foods	44	Crossbreeding skills	33	
	Have income	28	Easily have disease	24	How to use manure for crops/trees	33	
	Prevent diseases.	28	Cold weather	22	How to find some general diseases	27	
			Lack of sow for breeding	22			
Hieu (11)	Have technical training	40	Rainy and cold weather	38	Learn how to plant fodder grasses	39	
	Have animals	40			How to find diseases	38	
	Have material for stable	34			How to cage animals	37	
	Have fodder seeds	26			How to care animals	31	
Ngoc Tem (6)	Know how to raise animal inside stable	22	Lack of water (to keep stable clean)	31	How to make stables	28	
	Have sows for breeding	19	Diseases	23	How to prevent scabies	24	
	Know care and hygiene	16	Lack of hybrid sow	21	How to crossbreed pigs	24	
	Able to make compost	15			How to raise F1 pigs	24	
	Have income by selling pigs	12			How to cage pigs in stable	22	
Dak Pne (7)	Have income by selling pigs	28	Lack of feed during dry season	27	How to use new knowledge to have better results	26	
	Use manure for trees/crops	25	Lack of labor to process foods for pigs	21	Needs to plant and preserve feeds for pigs (maize/cassava)	26	
	Make it easier to care pigs	23	Lack of water	18	How to share benefit with community (animal bank system)	20	
	Less diseases due to hygiene			Difficult to reserve maize/cassava (animal foods)	14		
			Lack of vegetable (animal foods)	8			

## 3. Fish

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi (6)	Have new skills of fish raising	24	Diseases	24	Make fish feeds not stick to pond hedge (use frame)	24
	Have income source for household	22	Lack of water during dry season	22	How to sell fish at better prices	19
	Share fingerings within the village	11			How to strengthen pond hedge before rainy season	16
Poe (11)	Have income for by selling fish	44	Rain damage pond hedge - fish flow away	39	How to dig pond	44
	Have fish for crossbreeding	42	Lack of water during dry season	37	How to clean pond water	42
	Improve daily meal for family	40	Diseases	27	how to care fish	40
	Share fingerings in/out of village	16			How to frame fish feeds	39
Hieu (9)	Improve livelihoods	28	Not able to find disease	28	Feed (2 times per day)	28
	Have technical training	28	Lack of initial foods	28	Use manure to feed fish	26
	Have fingerings	24	Lack of marketing skill	22	How to clean pond water	20
	Have material to make ponds	24	Slow growth in cold season	20	How to dig pond	17
	Have Income	13				
Ngoc Tem (9)	Have pond with sufficient water	35	lack of fingering	20	How to use manure for fish feed	35
	Have income for household by selling fish	34	Fish flow away due to pond hedge damaged	13	How to make pond	33
	Have fingerings	33			How to frame fish feeds to prevent feeds flowing away	33
	Easier to raise fish	28			How to make gutter for in-out of water	32
Dak Pne (7)	Have income for household by selling fish	24	Lack of water during dry season	25	How to make fish pond	28
	Know how to clean pond water	22	Lack of fingering	22	How to care and feed (use frame)	25
	Improve daily meal for family	21	Lack of feeds during dry season	20	Share benefit with community	24
	Know how to care fish	16				

## 4. Duck, Goats and Rabbits

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi (duck, goats, rabbit) (5)	Have skills to care and make stables	18	Low education level of villagers (difficult to understand new knowledge)	16	How to raise and prevent/cure some general diseases.	18
	Have fodder grass seeds for animal feeds	15	Diseases	12	How to make stable	16
	Use manure to fertilize crops/trees	14	Lack of labor to herd animals	10	How to feed duck (snails, fish)	15
	Reduced diseases	14	Lack of feeds during dry season.	10	How to plant grass for feeds	13
	Increase income	12				
Poe (duck) (11)	Improve daily meals of family (duck egg)	12				
	Have ducks	40	Cold weather	38	How to care duck	38
	Have eggs to sell or eat	34	Many death of duck	35	How to make cages to raise ducks	35
Hieu (duck) (9)	have made cages	33	Diseases	31	How to keep duck warm by cover cages	31
	Have technical training	29	Lack of initial foods	26	Caring skills	26
	Income	23	Damage by crow	25	How to prevent diseases	23
Ngoc Tem (duck) (12)	Improve daily meal	21	Rainy and cold weather	24	How to make cage	22
	Easier to raise duck	63	Diseases	75	How to make cage	64
	Have income	55	Difficulty in caring baby ducks	58	How to care duck	56
	Duck not damage crops	54			How to select eggs to be hatched	50
Ngoc Tem (goats) (4)	Duck grow fast	50				
	Improved meals of family					
	Use natural grasses	12	Foot-and-mouth diseases	11	How to crossbreed.	12
	Goats breed provided	12	Not enough herding	10	How to raise goats in cages	12
	Learnt how to care goats	9	Damage crops	10	How to care goats	12
Dak Pne (6) (duck, goats, rabbits)	Learnt how to make stable and prevent diseases	9				
	Had better delivery outcomes	8				
	Have animals provided	24	Some species not suitable for local conditions	22	How to make stable	23
	Have received technical training	23	Diseases	21	How to cure diseases with local medicine	22
	Have grass seeds provided	20	Not enough ability to care	18	How to feed rabbits	19

## 5. SLA

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi (6)	Received new seedling/seeds		Difficult to plant new species		How to plant new species	
	Have impact to preserve soil.		Lack of family labor		How to find contour lines	
	Have income					
Poe (5)	Better soils helps growth of cassava		Insects damage Teflosia seeds		How to make contour lines by A-frame	
	Increase family income		Damage by free grazing animals		How to plant Teflosia	
	Got seeds/seedling for next crop		Cold weather			
Hieu (9)	Have technical training	28	Not able to sell produces	26	How to use compost	26
	Income	26	Animals damage	25	How to care trees	24
	Received seedling	22	Cold climate	22	Place trees on contour lines	21
	Improve daily meal	18	Not able to follow training	21	How to design SLA	18
Dak Pne (6)	Easy to plant	24	Lack of seeds/seedling/material	24	How to prevent soil erosion	24
	Able to use land longer	24	Long hot and dry season	16	How to increase land fertility	19
	Harvest faster	23	Lack of family labor	13	How to share experience with community	12
	Able to sell at higher prices	23			How to use trees/crop for expansion	12
	Easier to sell	22			How to use Teflosia for better soil	12

## 6. Fruits trees

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi	Able to use manure spoiled on sloping land		Lack of chemical to protect plant		How to make holes for different kinds of trees	
	Received seedling		Not able to identify diseases of trees		How to fertilize trees with use of manure	
	Acquire planting skills		Lack of water during dry season		How to prune branches	
Poe (11)	Received seedlings		Lack of seedling		How to make holes to plant	
	Had income by selling fruits		Lack of skills to fertilize		How to plant fruits	
			Easily get diseases		How to take care of seedling	
					How to select good seedling	
					How to select kinds of trees suitable for climate	
Dak Pne (5)	Obtained skills of planting	15	Lack of chemical to protect plant	20	How to make holes for different kinds of trees	19
	Able to use manure spoiled on sloping land	13	Lack of water during dry season	18	How to fertilize trees with use of manure	15
	Received seedling	13	Lack of seedling	18	How to make fence around trees	12
			Damage by animals	10		

## 7. Tree planting

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi	Have income		Trees die due to lack of water in dry season		How to make seedling nursery	
	Able to use trees for fence and firewood				Planting skill on sloping land	
	Received seeds to make seedling					
Poe (3)	Not yet		Trees die		How to fertilize with manure	
					How to make holes to plant	
					How to plant trees	
Hieu (11)	Have technical training	40	Insect damage roots	40	Planting skills	39
	Have seedling	39	Disease	40	How to find diseases	38
	Improve daily meal	30	Cold climate	32	How to cut branch	30
	Income	27	Leaf drop	28		
Ngoc Tem (8)	Have income	21	Plant at inappropriate timing	21	How to fertilize trees with use of manure	23
	Prevent soil erosion	21	Lack of seedling/water	16	How to plant trees	21
	Received seedling	20				
	Can fertilize trees by using manures	19				
Dak Pne (7)	Increase income	28	Insect damage	22	How to make seedling nursery	28
	Easily planted	25	Lack of fertilizer	21	How to plant	25
	Easy to care	19	Long hot season	21	How to dig holes for fertilizing	20
			Low survival of tree	15		

Note: Poe and Hieu (bamboo), Ngoc Tem (Beetle nuts, acacia and bamboo), Dak Koi and Dak Pne (Boi Loi))

## 8. Vegetables

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Dak Koi (5)	Have vegetable at daily meals		Lack of water during dry season		How to use of manure for vegetable	
			Fence made by weak material -easily damaged by animals		Planting skills of some new vegetable species	
					How to care and harvest vegetable	
Poe (6)	Improve daily meals of family		Damage by insects		How to prepare land (beds)	
	Increase income		Damage by chickens		How to plant vegetable	
	Received seeds		Cold weather		How to care vegetable	
Hieu (9)	Have technical training	29	Lack of watering tools	29	Planting skills	28
	Improve daily meal	23	rainy and cold climate	26	How to use compost	28
	Income	18	Far from water source	23	How to care vegetable	23
Dak Pne (8)	Improve daily meals of family	31	Lack of water during dry season	29	How to share experience with community	30
	Received seeds	27	Lack of seeds	29	How to prepare land	30
	Received training	22	Lack of chemicals for plant protection	28	How to care and harvest vegetable	25
	Increase income	20			How to prevent insect by local knowledge	23
Ngoc Tem (8)	Improve daily meal	46	Lack of water	41	How to fence gardens	38
	Increase income	41	Diseases of plants	41	How to plant vegetable	37
	Received seeds	38	Lack of fertilizers	36	How to use of manure for vegetable	36
	Gained planting and caring skills	35	Lack of seeds	35	How to care vegetable	35

## 9. Compost

Village	Benefit		Challenge		Lessons Learnt	
	Indicator (score)		Indicator (score)		Indicator (score)	
Poe (20)	Use compost resulted in better rice yield		Lack of sheets		How to make compost	
	Environment get cleaner		Lack of lime			
	Better tree growth by fertilizing with compost					
	Reduced diseases/insects					
Dak Pne (6)	Better tree growth by applying compost	24	lack of cement to make stable	22	How to make compost	24
	Use compost resulted in better rice yield	24	lack of skills of fertilization	8	How to utilize manure	23
	Environment get cleaner	22	Lack of lime	8	How to fertilize crop/trees	22
	Reduced weeds	22

## Appendix 11 Draft Plan of Livelihood Improvement for 10 Other Villages

### PoE Commune

#### Village 1 (Total 64 households)

#### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Kon K Tau/start activity	Participant
Fish rearing	- No fishpond - No assistance from ADB project yet		- Water is too cold for fish	- Searching cold-resistance fish species	A Ngao	After Tet.	A Minh, A Dat, A Ria, A Khong, A Xoi, A Soi, A That, A Ren, A Dai, A Nghiem, A Ngao, A Do, A Vang, A Pham, A Tron
Duck rearing	- some HH own duck rearing	- Having experience of duck rearing	- Lack of knowledge on how to feed ducks	- Using remaining foodstuff for pigs for ducks			
Pig rearing	- 64 HH own local pigs - 32 HH has sties for pigs - No training provided by ADB project yet	- Foodstuff is available (corn, cassava, broken rice, etc.)	- There is no stable with concrete floor - There is no hybrid pigs (local species only)		A Ngao	After Tet	A Dut - A Trieu
Cattle/buffalo rearing, compost making	- 12 HH own cattle (on their own) - There are stables for all cattle (some individual, some collective) - 3 stables built by ADB project (3HH per 1 stable) - Training on cattle rearing was provided twice - 38 HH own buffaloes	- Grass available year-round - Epidemic is not often happening	- No knowledge on how to make compost - There is no stable - Grazing of cattle and buffalo causes damage to the field - Cattle and buffalo die of too cold temperature	- Learning from Mr. A Ram (Kon KTau) - Making stables by themselves using local materials	A Ngao	After Tet	A Ngao want to make compost and he will learn from A Ram (Kon KTau village)
Paddy rice	- No training provided by ADB project yet - More than 10km	- Seeds are subsidized by the government - Training provided by the	- No knowledge on how to apply compost - No knowledge on how to	- Learning technique from Mr. A Ram	A Ngao	After Tet	*A Ngao is liaison leader - Bi-weekly

	between houses and the paddy fields - 1 harvesting per year	government	- No knowledge on how to weed and stir mud for rice - Weather is unsuitable for 2 <sup>nd</sup> crop (too cold) - Paddy fields are too far from home (1 day walking)	train buffalo plowing (Kon K Tau village)	meeting
Other crops	- Villagers are only interested in vegetable garden		- Lack of seeds - Lack of technique - Temperature is too cold in many months of a year	- Villagers can afford buying seeds in town - CF Than of Dak Pne can assist on technique	A Thai, A Dut, A Ngao, A Dat.
Fruit tree planting	- Orange				
Agroforestry	- No slope land agroforestry practiced				
Tree and other planting	- Boiloi, Acacia, Rattan, Bamboo planted - Acacia, Rattan, Bamboo seedlings provided by ADB project - No training provided by ADB project				

**Plan of Establishment of the Liaison persons**

1. Members	Name	Activity in charge of:
	A Ngao	Leader (temporally in charge of all activities)
		Other members to be assigned by A Ngao
2. Meeting	(1) Frequency (2) Venue	Bi-weekly Community House
	(3) Topic to discuss	Scheduling of visit to the model village, report of visiting to the model village
3. Activities	(1) Coordination of technical transfer/exchange with the model village (2) (3) (4)	(1) Coordination of technical transfer/exchange with the model village (2) (3) (4)

## Village 2 (Total 72 Households)

### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Turobang/start activity	Participant
Fish & Duck rearing	- No HH has a fishpond	- Villagers have been trained on fish rearing - Land for fishpond is available - Some HH have already had experience on fish rearing	- Still lack of experience on fish rearing - No money for buying fingerlings	Visiting the model village to learn more about the activities	A Ro	After Tet (February), A Ro will visit Kon K Rau village to know more about the activities	Y Ngai, A Len, Y Tai, Y Toi, Y Mon, Y Tun, A Ron, A Ro, A Doong, Y Noi, Y Thao, A Duci, Y Nhaoo, A Duc, Y Thoan, A Tan, Y Tan, A The, Y Din, Y Than, Y Rua, Y Honh, Y Trem, Y Don, A Nai, Y Trut, Y Trai, Y K Re, Y Dung, A Tinh, Y Hai, A Thap, Y Thanh, Y Rong, Y Noi, Y Thao, A Duc, Y Hao, A De, A Ron
Duck	- some HH own ducks; purchased by themselves - No assistance from ADB project yet - Keeping ducks under the houses	- Foodstuff for duck is available - Baby ducks can be provided by villagers	- There is no duck pen - Still lack of experience on duck rearing				?
Pig rearing	- All HH own pigs (local); purchased by themselves - About 80 % of HH own stables - Grazing and sty keeping combined - No HH assisted by ADB project	- Foodstuff is available - 80% of HH already have pig-sties - Land is available for planting fodder	- Still let pig go freely - Unable to deal with pig diseases	- Learning experience from Kon Ktau village		After Tet (February)	
Cattle/buffalo	- Almost all HH own	- There are stable obtained	- Buffalo go freely	- Villagers want	A Ro		No villagers

rearing	<ul style="list-style-type: none"> <li>- buffaloes; purchased by themselves</li> <li>- No cattle</li> <li>- About 10 stables (collective)</li> <li>- Mostly grazing</li> <li>- no HH makes compost</li> </ul>	<ul style="list-style-type: none"> <li>- Enough dung can be collected for making compost</li> </ul>	<ul style="list-style-type: none"> <li>- Die in cold season</li> <li>- Diarrhea in March, April</li> <li>- Lack of grass in dry season</li> </ul>	<ul style="list-style-type: none"> <li>- damaging cultivation work</li> </ul>	<ul style="list-style-type: none"> <li>- to see what has been done by Project before considering about practicing</li> </ul>	can consider practicing the activity before seeing Kon K Tau village.

Fish rearing	<ul style="list-style-type: none"> <li>- 2 HHs own a fishpond; started less than 2 years ago.</li> <li>- Fish raisers received very small amount of fingerlings from their relatives in Quangai.</li> <li>- Tilapia, carp, grasscarrap are raised.</li> <li>- Tilapia has reproduced fingerlings where as grasscarrap does not grow well or reproduce.</li> <li>- Villagers are interested in construction of the fence along the fishpond.</li> <li>- Villagers have knowledge about using dung as food for fish but do not want to apply it.</li> </ul>	<ul style="list-style-type: none"> <li>- Land for fish pond available</li> <li>- Workforce available</li> <li>- Foodstuff available (dung, cassava leaves)</li> <li>- Water available</li> <li>- Suitable climate</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of tech (not know how to treat with water)</li> <li>- No fingerlings</li> </ul> <p>Next Thursday meet with A Doa in vil 7</p>	<ul style="list-style-type: none"> <li>- Learn experience from village 7</li> <li>- Get fingerlings from village 7</li> </ul>

## Plan of Establishment of the Liaison persons

1. Members	Name	Activity in charge of:
Dinh xuan Bien	Pig rearing	
A Ha	Cattle rearing	
A Ti	Goat rearing	
A Huong	Fish rearing	
A Do	Duck rearing	
2. Meeting	(1) Frequency	Meet with Mr. Dung ( CF ) on June 26 <sup>th</sup> ,2008 at Nuoc Not village
	(2) Venue	House of Head of vil 2
	(3) Topic to discuss	
3. Activities	(1) How to prevent pig from epidemic	
	(2) How to construct pig-sty/cattle-stable in a proper way	
	(3) Dig fish pond	
	(4) How to obtain hybrid cattle	
	(5) Visiting Nuoc Not Village to buy ducks	
	(6) Suggesting CPC to organize training courses on rearing Pig and cattle	
	(7)	

- Most of the HHs practice vegetable garden
- In the vegetable garden, the villagers grow: long bean; gourd; bitter-gourd; pumpkin, etc.
- Crops are for self-consumption only; there is no buyer around.
- Grapes and mangos are planted; seeds were bought in a town.
- Acacia has been planted and growing well; each HH received 100 seedlings from CPC.

## Village 5 (Total # HH: 69)

Fish rearing	<ul style="list-style-type: none"> <li>- 5-7 HHs own a fishpond.</li> <li>- The villagers made the fishpond by themselves.</li> <li>- Fingerlings were purchased in Quangai.</li> <li>- The villagers rear “rophi/Tilapia” which is small; they want to rear larger fish like grass carp.</li> </ul>	<ul style="list-style-type: none"> <li>- Foodstuff available:           <ul style="list-style-type: none"> <li>- vegetables, corn, broken rice</li> <li>- Land for fish pond available</li> </ul> </li> </ul>	<ul style="list-style-type: none"> <li>- No money to buy fingerlings</li> <li>- No tech. on how to rear fish</li> <li>- Epidemic</li> </ul>	<ul style="list-style-type: none"> <li>- Money contributed from some people</li> <li>- Borrow from relatives/support from Gov</li> <li>- Learn experience from others</li> </ul>	<ul style="list-style-type: none"> <li>- Next Thursday go to Vil 7 to meet A Que</li> </ul>	<ul style="list-style-type: none"> <li>- A Sut, A Senh, Y Minh, Y Tu, Y Ba, A Suong, A Thiet, Y Be, Y Tieu, A Roi, A Nua</li> </ul>

Tree planting	- Land available for Acacia, fruit trees - Work force available	- No Acacia seedlings/seeds - Not know how to make nursery - Not know how to treat with seeds	- Contacting with Nuoc Not for Acacia seedlings - Buy Acacia seedlings where available - Contacting with relatives/other projects in commune for Acacia seedlings	13/6/2008	A Cau, A Que, A Tre, A Dieu
Fruit tree planting	- There is no fruit tree in the village. -	- Land available - Work force available	- No seedlings/seeds - Not know how to make nursery - Not know how to treat with seeds - No money for Fruit trees seedlings	13/6/2008	A Cau, A Que, A Tre, A Dieu
Bamboo planting	- The villagers used to plant bamboo with assistance from the outside but all seedlings died.	- Land available - Work force available	- No seedlings/seeds - Not know how to make nursery - Not know how to treat with seeds - No money for Fruit trees seedlings	13/6/2008	A Cau, A Que, A Tre, A Dieu

### Plan of Establishment of the Liaison persons

1. Members			Activity in charge of:
A Ron	Name	Pig rearing	
A Hung		Cattle rearing	
A Roi		Goat rearing	
A Thiet		Rabbit, duck, fish rearing	
A Dieu		Tree, fruit tree, bamboo planting	
2. Meeting	(1) Frequency	Meet with Mr. Dung (CF) on June 16 <sup>th</sup> , 2008 at Nuoc Not village	
	(2) Venue	Rong House of Village 5	
	(3) Topic to discuss		
3. Activities	(1) How to prevent pig from epidemic		
	(2) How villagers can get hybrid cattle		
	(3) How to buy Goat from Village 7		
	(4) Experience and technique on planting fruit trees and bamboo		
	(5) How to buy fingerlings in Village 7		
	(6) How to dig fish pond		
	(7) How to treat water in the fish pond		

## Draft Plan of Livelihood Improvement for Other Villages for Dak Pne Commune

### Village 2

#### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Kon K Tau/start activity	Participant
Fish rearing	<ul style="list-style-type: none"> <li>- 2 HH have a fishpond; 1 HH has a fishpond with fish (tilapia) and experience of fish rearing; purchased fingerlings from the Kin people living in the village</li> <li>- No assistance from ADB project yet</li> </ul>	<ul style="list-style-type: none"> <li>- Land for making fishpond is available</li> <li>- There is sufficient water sources</li> <li>- Fishponds are close to the houses</li> </ul>	<ul style="list-style-type: none"> <li>- Some fishponds become lack of water from January to May</li> <li>- No money to buy fingerlings</li> </ul>	<ul style="list-style-type: none"> <li>- Learning experience from Kontuc village</li> <li>- Taking advantage of ADB project</li> </ul>	Ha Dong	Dec 11 <sup>th</sup> , 2007	A Hanh, A Hyau, Ha Dong, A Tien, Y Thai, A Mai, A Don, A Ldui, A Choh (9 persons)
Pig rearing	<ul style="list-style-type: none"> <li>- 1 HH owns a pig; purchased by himself</li> <li>- 1 sty for the pig</li> <li>- No technical assistance by ADB project</li> </ul>	<ul style="list-style-type: none"> <li>- Work force is available</li> <li>- Foodstuff is available</li> <li>- Land for fodder planting is available</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of rearing technique</li> <li>- Lack of initial money for stable construction</li> <li>- Lack of initial money to buy a pig</li> </ul>	<ul style="list-style-type: none"> <li>- Requesting assistance from Mrs. Y Brai of Kontuc village</li> <li>- Constructing sites by using local materials</li> <li>- Forming a group to raise fund to buy a pig</li> </ul>	A Bo	Around Dec 19 <sup>th</sup> , 2007	A Bron, A La, A Bo, Y Nhai *These participants are organized into an animal rotation group.
Cattle rearing	<ul style="list-style-type: none"> <li>- About 10 HH own cattle; purchased by themselves</li> <li>- 9 stables for cattle (all individual)</li> <li>- No assistance by ADB project yet</li> </ul>	<ul style="list-style-type: none"> <li>- Workforce is available</li> <li>- Climatic condition is suitable</li> <li>- Villagers have rearing technique</li> <li>- 50% of cattle is already vaccinated</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of initial money to construct stable, buy cattle, lime, bull, elephant grass, etc.</li> <li>- Lack of knowledge on how to treat cattle diseases</li> </ul>	<ul style="list-style-type: none"> <li>- Taking advantage of ADB project</li> </ul>	?	To be confirmed	A Hao, A Dunn, A Xin, Y Pec, A Phe, A Si, A Ka, A khui, A Tor, A Poi, Y Net, A Dut, A Luong, A Quang, A Chet, A Phyanh, A

Goat	- 6 goats provided by ADB project; 4 died eating plastic bags and 2 (female) survive - 5 HH form an interest group to share goats	- Water is abundant - Foodstuff is available - Workforce is available	- Lack of initial money for stable construction - No money to buy goat	A Hao	To be confirmed
Duck rearing	- some HH own duck	- Water is abundant - Foodstuff is available - Workforce is available	- No experience of rearing duck	Contacting Y Brai (Kontuc village) to buy ducks for cheaper price - Requesting assistance from Y Brai and A Bao (Kontuc village)	To be confirmed
Paddy rice	- Harvesting twice per year - Training (growing and compost making/ theory only) provided by ADB project - 5 min. to 1 hour between houses and the paddy fields - variety of seeds provided by the government	- Paddy field is available - Harvesting twice per year	- Lack of rice seeds - Lack of water for 2 <sup>nd</sup> crops - Lack of farming tools - Lack of pesticide - Paddy field is far from home for some HH	Discussing with ADB project for solution	To be confirmed
Other crops	- Slope land agroforestry practiced (with training)	- Land is available - Work force available	- Lack of initial money to buy seeds/seedlings	A Ngat, A Hanh	To be confirmed
				A Ngat, Y Poch, Y Len, A	

	provided by ADB project) - 2 homegarden - Hybrid corn for selling - 2 HH assisted by ADB project for avocado and grapefruit - 4 HH practice (slope land) agroforestry with boiloai, pineapple, beans	- Dung is available for making compost	- Lack of planting and tending technique	vegetable garden from CF Tuan of Konduc Village	Hanh *ADB Project already supports on SLA

### Plan of livestock rotation system

1. Types of livestock	(1) pigs	(2) ducks	(3) fish	(4) Others (specify)
2. Participants	A Bo			
	A Bron			
	A La			
	Y Nhai			
3. Responsibility of participants	(1) Construction of a sty for the pig (technical support from the model village) (2) Feeding and caring of the pig (3) (4) (5)			
4. System	(1) One piglet will be purchased from Turobang village (2) The mother pig will be shifted to a next raiser after each farrow (3) All piglets will be kept by the raiser (4) (5)			
5. How to breed	(1) To be consulted by the pig raisers of Turobang village (2) (3)			
6. How to settle the case of animals being killed	(1) Case in which the animals are killed by epidemic, accident or any causes which cannot be attributed to the raiser To be decided among the participants (2) Case in which the animals are killed due to negligence of the raiser To be decided among the participants			

### Plan of Establishment of the Liaison persons

1. Members			Activity in charge of:
A Bo	Name	Pig rearing, Leader	
A Hao		Goat, Duck, Rabbit rearing	
Ha Dong		Fish rearing	
A Ngat		Vegetable garden, SLA, Fruit tree planting, Tree planting	
A Hanh		Vegetable garden, SLA, Fruit tree planting, Tree planting	
2. Meeting	(1) Frequency	Monthly	
	(2) Venue	Community House	
	(3) Topic to discuss	Scheduling of visit to the model village, report of visiting to the model village	
3. Activities	(1) Coordination of technical transfer/exchange with the model village		
	(2)		
	(3)		
	(4)		

### Village 3 (Total 35 Households)

#### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Turobang/start activity	Participant
Fish & Duck rearing	- 2 HH have fishponds - 1 HH assisted by ADB project (fishpond making and rearing) - tilapia for self-consumption	- Land for fish pond is available - There is sufficient water sources	- Lack of technique on making fishpond and rearing fish	- Learning experience from Kontuc villagers - Taking advantage of ADB project	A Doi, A Bin	To be confirmed (after Tet holiday)	A Doi, A Bin
Pig rearing	- 10 HH own pigs; purchased by themselves - 4 HH have stables grazing and sty keeping combined - No HH assisted by ADB project	- Work force is available - Foodstuff is available - Land for fodder planting is available - Land for stable is available	- Lack of rearing technique - Lack of initial money for stable construction - Lack of initial money to buy a pig	- Requesting assistance from Y Brai of Kontuc village - using local materials for stable construction - Taking advantage of ADB project	Y Mili	To be confirmed (after Tet holiday)	Uoc, Mili, Y Phuong, Y Dop, A Dem, A Ho *Uoc, Y Mili and Y phuong want to buy piglets from Kontuc vil.
Duck, rabbit, goat	- 7 HH have goats; purchased by themselves - 4 HH have ducks - No assistance from ADB project yet	- Water is abundant - Foodstuff is available - Workforce is available - Land for making stables is available	- Lack of initial money for stable construction (for Goat) - No money to buy goat - No experience on rearing duck, goat, rabbit	- Using local materials for stable construction - Contacting Y Brai (Kontuc village) for buying ducks for soft price - Requesting assistance from Y Brai and A Bao of Kontuc village	Y Mili	To be confirmed (after Tet holiday)	Y Xit, Y Treng, Y Voi, Y Huyet, Y Dui, Y Tot, Y Et, Y Khoc, Y Mili, A Bin
Cattle/buffalo	- 28 HH own cattle; 5	- Workforce is available	- Lack of knowledge on	- Contacting Y	Y Mili	15 <sup>th</sup> , Dec	A Khip, A

rearing and compost making	<p>HH assisted by ADB project</p> <ul style="list-style-type: none"> <li>- 2 HH own stables (individual)</li> <li>- Mostly grazing</li> <li>- no HH makes compost</li> <li>- cattle grazing causes damage to corn and rice</li> <li>- cattle browsing in the forest dies of choking with lope</li> <li>- rice straw/silage (?)</li> </ul>	<p>- Local materials for stable construction are available</p>	<p>how to treat cattle diseases</p> <ul style="list-style-type: none"> <li>- Lack of knowledge and technique on how to make compost and silage</li> <li>- Lack of grass in December</li> </ul>	Brai of Kontuc village	Dieng, A Bin, A Hric, Y Mili, Y Phuong
Paddy rice	<p>- harvesting twice per year</p> <ul style="list-style-type: none"> <li>- distance between houses and the field: 2 - 3 min. to 2 km</li> <li>- hybrid rice subsidized for poor HH</li> <li>- local rice seeds provided for not-so-poor HH</li> <li>- technical assistance (training) done for 5 HH</li> </ul>				A Dep, A Mon, Y Mili, Y Va, Y Dem
Other crops	<ul style="list-style-type: none"> <li>- annual yield not known</li> <li>- ADB plans assistance but not implemented yet</li> </ul>	<ul style="list-style-type: none"> <li>- Workforce is available</li> <li>- Land is available</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of initial money for buying seeds/seedlings</li> <li>- Lack of technique on planting</li> <li>- Lack of knowledge on how to use pesticide</li> </ul>	<p>A Bok</p> <p>Dec 10<sup>th</sup> or 12<sup>th</sup>, 2007</p>	Tuan of Kon Tuc Village for assistance
Fruit trees	<ul style="list-style-type: none"> <li>- Grapefruit</li> <li>- Custard apple</li> <li>- Avocado</li> <li>- Jack fruit (wild)</li> <li>- Mango (wild)</li> </ul>				
Agroforestry	<ul style="list-style-type: none"> <li>- Annual yield not known</li> <li>- Self consumption only</li> <li>- Technical assistance of ADB project for 30 HH</li> </ul>				
Tree planting	<ul style="list-style-type: none"> <li>- Technical training for 30 HH planed by ADB project</li> <li>- Providing training for 5 HH so far</li> <li>- Boiloi planting</li> </ul>				

	- There is a plan for training

	(3)	
	(4)	

## Draft Plan of Livelihood Improvement for Other Villages for Dak Koi Commune

### Village 6

#### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Turobang village/start activity	Participant
Fish rearing	<ul style="list-style-type: none"> <li>- 1 HH has a fishpond (without any assistance from the outside)</li> <li>- Used to practice fish rearing for self-consumption only</li> <li>- All fish stolen and no fish in the pond now</li> </ul>	<ul style="list-style-type: none"> <li>- Villagers willing to help each other</li> <li>- Fish rearing used to be practiced</li> <li>- Climate is suitable</li> <li>- Foodstuff (cassava, pumpkin leaves, etc.) available</li> <li>- There is land available for making fishponds</li> <li>- Water source is secured</li> <li>- Workforce is available</li> <li>- Soft soil; easy for digging fish ponds</li> </ul>	<ul style="list-style-type: none"> <li>- No money to buy fingerlings</li> <li>- Difficult to dig fishponds in some places</li> </ul>	Learning experience from A Binh (Turobang village)	A Noa	To be confirmed after the rice harvest season	Noan, Dien, Co, Noa, De, Hon, Ve, Hoan (8 persons)
Pig rearing	<ul style="list-style-type: none"> <li>- 1 HH has a pig</li> <li>- 1 pig sty</li> </ul>	Foodstuff for pig available (broken rice, cassava, sweet potatoes, etc.)		<ul style="list-style-type: none"> <li>- Lack of experience</li> <li>- Lack of knowledge on new technique</li> </ul>	Y Ve	To be confirmed after the rice harvest season	Y Ve, Y Sang, Y Hien (3 persons); want to apply a rotation system for pig rearing
Cattle rearing	<ul style="list-style-type: none"> <li>- Nearly all HH have cattle (avg. two cows owned per HH)</li> <li>- Seven cattle provided by ADB project</li> <li>- 8 stables (all individual)</li> <li>- Mainly grazing (no experience of feeding cattle with rice straw)</li> </ul>	<ul style="list-style-type: none"> <li>- Cattle is good income source</li> <li>- Collecting dung is easy (for making compost)</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of grass in February and March</li> <li>- Foot &amp; mouth disease</li> <li>- Lack of knowledge on new technique</li> <li>- No cattle stable</li> </ul>	<ul style="list-style-type: none"> <li>- Using rice straw as foodstuff</li> <li>- Learning experience from A Duong and A Thanh (Turobang village) and</li> </ul>	A Chinh and A Thoa	To be confirmed after the rice harvest season	Y Hien, Y Kha, A Moi, Y ka, Y Dich, Y Mien, Y Ro, Y Ninh, Ha Van Thoa (9 persons)

			Dak Koi CPC
Duck rearing	<ul style="list-style-type: none"> <li>- No duck</li> <li>- Foodstuff is available</li> </ul>	<ul style="list-style-type: none"> <li>- All ducks died of epidemic</li> <li>- Duck laid small amount of eggs</li> </ul>	To be confirmed after the rice harvest season
Paddy rice	<ul style="list-style-type: none"> <li>- Harvesting twice per year</li> <li>- Two month lacking rice</li> <li>- 15 min. to more than one hour walk to the paddy fields from the houses</li> <li>- Training provided by ADB project</li> </ul>	<ul style="list-style-type: none"> <li>- Workforce is available</li> <li>- Climate is suitable</li> <li>- Source of increasing income</li> <li>- Villagers willing to help each other</li> </ul>	<ul style="list-style-type: none"> <li>- No money to buy hybrid rice seeds, fertilizer, insecticide, etc.</li> <li>- Bad road condition to the paddy field</li> <li>- Some villagers have small area of the paddy field</li> </ul>
Other crops	<ul style="list-style-type: none"> <li>- Hybrid cassava for selling</li> <li>- Local cassava for self-consumption</li> <li>- Hybrid corn for selling local corn for self-consumption</li> <li>- No assistance from ADB project</li> </ul>	<ul style="list-style-type: none"> <li>- Workforce available</li> <li>- Easy to plant</li> <li>- Fruit trees can be planted around the land as fence</li> <li>- Source of increasing income</li> <li>- Villagers willing to help each other</li> </ul>	<ul style="list-style-type: none"> <li>- No money to buy fertilizer, insecticide, etc.</li> <li>- Bad road condition to the cultivating land</li> <li>- Some villagers have small area of the cultivating land</li> </ul>
Fruit tree planting	<ul style="list-style-type: none"> <li>- Orange, lime, mango, etc.</li> <li>- Villagers want to plant Jack-fruit</li> <li>- Assistance from the government</li> </ul>	<ul style="list-style-type: none"> <li>- Fruit trees can be planted around the land as fence</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of planting and tending technique</li> </ul>
Tree planting	<ul style="list-style-type: none"> <li>- Boilo</li> <li>- Seedlings collected from the forest</li> </ul>		

### Activity Implementation Plan:

PURPOSE	ACTIVITIES	TARGET	NECESSARY INPUT	IMPLEMENT ACTION SCHEDULE	PARTICIPANT
			INTERNAL		
Harvesting fish for	Fish rearing				Noan, Dien, Co,

self-consumption	- Fishpond making	Participating HH completes fishpond making by xx, 2008	- Land to make fishponds - Labor force - Dung - Communist grass - Equipment for digging	- Technical assistance from the model village - Lime	After the rice harvesting finishes, 2007	Noa, De, Hon, Ve, Hoan
	- Fish rearing	Participating HH harvests xx kg of fish	- cassava leave - rice wine residue - dung	- Fingerlings from the model village - Technical assistance from the model village	xx, 2008	
Making compost for increasing yield of rice	Compost making	Participating HH increases yield of rice by xx %	- Dung - Communist grass	- Lime - Technical assistance from the model village	After learning how to make compost from Turobang village	Y Phien, Y Ly, Y Sen, Y Hoang, Y Trong, Y Xe, Y Nieng, Y Peng, Y Bai, Y Dich, Y Tinh, Y Phem

### Plan of livestock rotation system

1. Types of livestock	(1) pigs	(2) ducks	(3) fish	(4) Others (specify)	
2. Participants	Y Ve				
	Y Sang				
	Y Hien				
3. Responsibility of participants	(1) Construction of a sty for the pig (technical support from the model village) (2) Feeding and caring of the pig				
	(3)				
	(4)				
	(5)				
4. System	(1) One piglet will be purchased from Turobang village (2) The mother pig will be shifted to a next raiser after each farrow (3) All piglets will be kept by the raiser				
	(4)				
	(5)				
5. How to breed	(1) To be consulted by the pig raisers of Turobang village (2)				

	(3)
6. How to settle the case of animals being killed	(1) Case in which the animals are killed by epidemic, accident or any causes which cannot be attributed to the raiser To be decided among the participants
	(2) Case in which the animals are killed due to negligence of the raiser To be decided among the participants

## Village 7 (Total # HH: 38 (7A); 12 (7B – No participant))

### Technical Transfer/Exchange Plan

Activity	Basic Information	Advantages	Disadvantages	Measures to cope with the disadvantages	Contacting person	Expected time to contact Turobang village/start activity	Participant
Fish rearing	<ul style="list-style-type: none"> <li>- 1 HH has a fishpond; built by himself</li> <li>- No assistance from ADB project</li> </ul>	<ul style="list-style-type: none"> <li>- Land for making fish pond is available</li> <li>- Foodstuff is available</li> <li>- Workforce is available</li> <li>- Fish can improve daily diet</li> </ul>	<ul style="list-style-type: none"> <li>- There is no fingerlings</li> </ul>	<ul style="list-style-type: none"> <li>- Purchasing fingerlings for soft price from A Binh (Turobang village)</li> <li>- Contacting A Binh for more knowledge on fish rearing</li> </ul>	A Mui, Y Huong	To be confirmed after the rice harvesting season	A Ni, A Phuong, A Mui, A Bre, Y Huong, Y Ngroc, Y Nhua, Y Hao, Y Klang, A Reo (10 persons)
Duck rearing	<ul style="list-style-type: none"> <li>- Duck used be raised; purchased by themselves</li> <li>- Epidemic killed all</li> <li>- No pen</li> <li>- Villagers want to purchase</li> </ul>	<ul style="list-style-type: none"> <li>- Foodstuff is available</li> <li>- Workforce is available</li> </ul>	<ul style="list-style-type: none"> <li>- There is no duck</li> <li>- Lack of knowledge on how to treat diseases</li> </ul>	<ul style="list-style-type: none"> <li>- Purchasing duck from NT Loan (Turobang village)</li> <li>- Contacting NT Loan for more knowledge on duck rearing</li> </ul>	Y Ve	To be confirmed after the rice harvest season	Y La, Y Hon, Y Roan, Y Tuy, Y Mon, Y Ve, Y Bien (& more persons)
Pig rearing	<ul style="list-style-type: none"> <li>- No HH has pigs</li> <li>- 4 sties (previously used)</li> <li>- Regulation: raisers of pigs, ducks, etc. have to keep the livestock in the stable</li> </ul>	<ul style="list-style-type: none"> <li>- Foodstuff is available</li> <li>- Pig-sty is available</li> <li>- Suitable climate</li> </ul>	<ul style="list-style-type: none"> <li>- There is time available for taking care of pigs</li> <li>- Villagers have experience on traditional pig rearing</li> </ul>	<ul style="list-style-type: none"> <li>- Lack of knowledge on how to treat diseases</li> <li>- Have no idea about buying &amp; selling prices</li> <li>- Lack of water to clean pig-sty</li> <li>- pigs are too expensive to buy</li> </ul>	<ul style="list-style-type: none"> <li>- Contacting Animal health staff (CF Tram )</li> <li>- Find out information on pig price (CF Tram)</li> <li>- Contacting Y Huong (Turobang village) for more</li> </ul>		

			information			
Cattle rearing	<ul style="list-style-type: none"> <li>- About 30 HH have cattle in the Village 7A (each HH has 2 to 3 cattle)</li> <li>- Most HH purchased cattle by themselves</li> <li>- 2 HH were provided with Cattle by ADB project</li> <li>- 2 stables</li> <li>- Cattle are let the field graze and kept in one place during the night</li> <li>- 11 HH grow elephant grass</li> <li>- Some HH make silage</li> <li>- No HH makes compost</li> <li>- There are 6 buffaloes (3 HH)</li> </ul>	<ul style="list-style-type: none"> <li>- It is easy to collect dung to make compost</li> <li>- Source of income generation</li> <li>- Making compost</li> </ul>	<ul style="list-style-type: none"> <li>- Grass is not available from March to May</li> <li>- Lack of knowledge on how to treat diseases</li> <li>- No cattle stable</li> </ul>	<ul style="list-style-type: none"> <li>- Making silo</li> <li>- Collecting rice straws as foodstuff</li> <li>- Contacting Animal health staff of CPC</li> <li>- Learning from A Duong (Turobang village)</li> </ul>	To be confirmed after the rice harvest season	A Bri, A Blen, A May, A Tham, A He, Y Rac, A Nong, Y Phan, A Re, A Ha, Y Ve, A Keng, A Bro (13 persons)
Paddy rice	<ul style="list-style-type: none"> <li>- harvesting twice per year</li> <li>- rice is available year-round</li> <li>- 5 to 10 minutes between the houses and the paddy fields</li> <li>- ADB project provided training</li> </ul>	<ul style="list-style-type: none"> <li>- Rice is sufficient all year-round</li> </ul>	<ul style="list-style-type: none"> <li>- Hybrid rice seeds are not enough</li> <li>- Lack of water for 4 months</li> <li>- Lack of knowledge on how to apply fertilizers</li> <li>- Lack of knowledge on how to use compost</li> <li>- Lack of knowledge on how to transplant seedlings of different rice varieties</li> </ul>	<ul style="list-style-type: none"> <li>- Requesting government (CPC) for support</li> <li>- Knowledge will be informed (Hien will contact Mr. Luc)</li> <li>- CF Tram will inform the date to introduce tech. on compost</li> </ul>	To be confirmed after the rice harvesting season	Bak, Bria (b), A Blit, Y Hon, Y Ting (5 persons)
Other crops	<ul style="list-style-type: none"> <li>- Hybrid corn used to be grown for selling; not now since price was going down</li> </ul>					
Fruit tree planting	<ul style="list-style-type: none"> <li>- Willing to plant fruit trees for consumption and selling</li> </ul>					
Tree planting	<ul style="list-style-type: none"> <li>- Boilo by support of the government in 1998</li> <li>- seedlings are collected</li> </ul>					

	from the forests	
	- no fruit tree planting	

### Activity Implementation Plan:

PURPOSE	ACTIVITIES	TARGET	NECESSARY INPUT		IMPLEMENT ACTION SCHEDULE	PARTICIPANT
			INTERNAL	EXTERNAL		
Harvesting fish for self-consumption	Fish rearing - Fishpond making	Participating HH completes fishpond making by xx, 2008	- Land to make fishponds - Labor force - Dung - Communist grass - Equipment for digging	- Technical assistance from the model village - Lime	After the rice harvesting finishes, 2007	A Ni, A Phuong, A Mui, ABre, Y Huong, Y Huong, Y Ngroc, Y Nhua, Y hao, Y Klang, A Reo
	- Fish rearing	Participating HH harvests xx kg of fish	- cassava leave - rice wine residue - dung	- Fingerlings from the model village - Technical assistance from the model village	xx, 2008	
Making compost for increasing yield of rice	Compost making	Participating HH increases yield of rice by xx %	- Dung - Communist grass	- Lime - Technical assistance from the model village	After learning how to make compost from Turobang village	A Bria, A Blien, A May, A Tham, A He, Y Rac, A Nong, Y Phan, A Re, A Ha, Y Ve, A Keng, A Bro

## Annual Plan of Operation (APO) for the year from April 2008 to September 2008

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
0.3 Manage JCC meeting.	0.3.1 Prepare the JCC meeting (arrangement of venue, participants invitation, making and distributing resume, etc.).	Plan							Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Kato and Ms. Takinaga, Mr. Thien			
	0.3.2 Hold the JCC meeting.	Progress							Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Kato Mr. Thien (DoF, MARD)			airfare, travel allowances of the participants
0.4 Operate PR activities	0.4.1 Collect information to appear in the homepage.	Plan							Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Kato Mr. Thien (DoF, MARD)			
	0.4.2 Renew the homepage.	renewed homepage	Plan						Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Chiba and Ms. Takinaga, local staff of the Project Team			
1.1 Implement technical training on agriculture, forestry, animal husbandry, and agroforestry.	1.1.1 Prepare detailed schedule of the each field training based on the LIP.	Plan							Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Phi the 5 CFs, Japanese short term experts, local staff of the Project Team			
	1.1.2 Prepare the implementation of the field training plan (selection of lecturer, request to lecturer to prepare textbook, lecture place, invitation of the participants, etc.).	Progress							Pl.: DL.: CL.: VL.: Pro: Or:	Mr. Phi the 5 CFs, Japanese short term experts, local staff of the Project Team			
1.1.3 Implement the field training according to the detailed plan.	Plan								Pl.: DL.: CL.: VL.: Pro: Or:	Ms. Phi Villagers concerned to the training contents, some CPC staff, etc.	Cars, Stationary, PC, Projector, white boards, etc.		Lecturer's cost, Traveling allowance cost
	Progress												

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/ equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
1.2 Observe other villages located in the Central Highland.	1.2.1 Prepare the implementation of the study tours (decision of the place for the visits, schedule and contents of the visit, decision and invitation of participants, arrangement of transportation etc.)	Plan							PL: DL: CL: VL: Pro: Ot:	Japanese short term experts, local staff of the Project Team			
	1.2.2 Implement the study tours based on the plan.	Plan							PL: DL: CL: VL: Pro: Mr. Kato Or:	the 5 CFs, Japanese short term experts, local staff of the Project Team	Province staff, DPC staff, CPC staff, Villagers	Bus, Cars, stationary	Traveling allowance cost
1.3 Establish model agroforests as successful model.	1.3.1 Make the monthly plan of SFP in each model village.	Plan							PL: DL: CL: VL: VDB members Pro: Mr. Watanabe Or:	Ms. Phi	the 5 CFs, villagers who participate in each activity of the LIP	Car, Stationary, PC, Projector, white boards, etc.	
	1.3.2 Procure the materials for the implementation of the SFP in each model village based on the procurement plan.	Plan							PL: DL: CL: VL: Pro: Mr. Ban Or:	VDB members	the 5 CFs, Japanese short term experts, local staff of the Project Team	Stationary, PC, Projector, white boards, etc.	
1.3.3 Implement the SFP in each model village.	Plan								PL: DL: CL: VL: Pro: Mr. Ban Or:	Mr. Ban	the 5 CFs, Japanese short term experts, local staff of the Project Team	Pick-up car and truck for transportation of the materials	Ceiling of budget in this Japanese fiscal year is 60,120,000 VND for all villages
	Progress								PL: DL: CL: VL: Pro: Mr. Ban Or:	Mr. Ban	the 5 CFs, Japanese short term experts, local staff of the Project Team	Pick-up car and truck for transportation of the materials	Ceiling of budget in this Japanese fiscal year is 60,120,000 VND for all villages
1.3.4 Implement the participatory monitoring in each model village (including monthly workshop in each model village based on the monitoring and supervising method).	Plan								PL: DL: CL: VL: Pro: Mr. Kato Or:	Ms. Phi	the 5 CFs, Japanese short term experts, local staff of the Project Team	Car, Stationary, PC, Projector, white boards, etc.	
	Progress								PL: DL: CL: VL: Pro: Mr. Kato Or:	VDB members	the 5 CFs, Japanese short term experts, local staff of the Project Team	Stationary, PC, Projector, white boards, etc.	
1.3.5 Hold quarterly meeting based on the monitoring and supervising method.	Plan								PL: DL: CL: VL: Pro: Mr. Kato Or:	Ms. Phi	the 5 CFs, Japanese short term experts, local staff of the Project Team	Car, Stationary, PC, Projector, white boards, etc.	Traveling allowance cost
	Progress								PL: DL: CL: VL: Pro: Mr. Kato Or:				

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/ equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
1.4 Monitor and evaluate the knowledge and technical skills of villagers.	1.4.1 Implement the monitoring on knowledge and technical skill in each model village.	Plan							Pl: DL: CL: VL: Pro: Or:	The 5 CFs, Japanese short term experts, local staff of the Project Team			
	2.1 Conduct training on project planning, monitoring and evaluation.	Progress							Pl: DL: CL: VL: Pro: Or:	Mr. Kato			
	2.1.1 Implement the OJT in the monthly day-to-day operation of LIP activities for capacity building of mainly the CFs	Plan							Pl: DL: CL: VL: Pro: Or:	FPMB, Japanese short term experts, local staff of the Project Team			
	2.1.2 Implement the workshops for preparation of LIP in other villages and prepare the draft LIP based on the results of the workshops to enable the CFs to have skill on the preparation of the LIP plan through the participatory workshop.	Plan							Pl: DL: CL: VL: Pro: Or:	Ms. Phi	FPMB, Japanese short term experts, Local staff of DPC staff, FPMB	The 5 CFs, villagers in other villages, CPC and white boards, etc.	Stationary, PC, Projector, white boards, etc.
	2.1.3 Implement the training on marketing for the CFs	Plan							Pl: DL: CL: VL: Pro: Or:	Mr. Chiba			
		Progress							Pl: DL: CL: VL: Pro: Or:	Mr. Ban			
	2.2 Conduct training to improve facilitation capacity	Plan							Pl: DL: CL: VL: Pro: Or:				
	2.3 Have government staff participate in technical training conducted for villagers.	Progress							Pl: DL: CL: VL: Pro: Or:				
	2.3.1 Inform the parties concerned of the schedule of the technical training to be conducted for the villagers.	Plan							Pl: DL: CL: VL: Pro: Or:				
	2.3.2 Prepare the invitation for government staff who is expected to participate in the training.	Plan							Pl: DL: CL: VL: Pro: Or:	Mr. Kato	The 5 CFs, Japanese short term experts, Local staff of the Project Team	The 5 CFs, Japanese short term experts, Local staff of the Project Team	
		Progress											

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/ equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
2.4 Monitor and evaluate the degree of capacity improvement.	2.4.1 Carry out the monitoring. & evaluation	Plan							Pl.: DL: CL: VL: Pro: Mr. Kato Or:	Japanese short term experts, Local staff of the Project Team			
	Progress								Pl.: DL: CL: VL: Pro: Mr. Kato Or:				
3.2 Conduct training for villagers on methods for marketing agriculture, forestry, and livestock products.	3.2.1 Prepare the training plan on the marketing methods through the discussion with persons concerned.	Plan							Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:	Mr. Ban, Local staff of the Project Team, The 5 CFs			
	Progress								Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:				
3.3 Monitor and evaluate the degree of capacity improvement (on the marketing) of villagers.	3.3.1 Carry out the monitoring.& evaluation	Plan	■						Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:	Mr. Ban, Local staff of the Project Team, The 5 CFs			
	Progress		■						Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:				
3.3.2 Analyze the results of the monitoring.& evaluation	Plan		■						Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:	Mr. Ban, Local staff of the Project Team, The 5 CFs			
	Progress		■						Pl.: Ms. Phi DL: CL: VL: Pro: Mr. Ban Or:				

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
4.2 Carry out training for villagers and government staffs on community forest management	4.2.1 Hold a meeting to discuss training on community forest management with the personnel concerned.	Plan 							Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	FPMB, Provincial Japanese short term experts, Local staff of the Project Team	FPMB, Provincial Japanese short term experts, Local staff concerned to the CFM activity, Japanese short term experts		
	4.2.2 Prepare the implementation of the training on community forest management (selection of lecturer, request to lecturer to prepare textbook, arrangement of lecture place, invitation of the participants, etc.).	Progress  							Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	FPMB, Japanese short term experts, Local staff of the Project Team	FPMB, Japanese short term experts, Local staff of the Project Team		
	4.2.3 Conduct training on implementation of community forest management activity (OIT for silviculture techniques).	Documents for commercial logging plan 2008, Technical guideline on silviculture in the natural forest, Training report	Plan 						Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	FPMB, CFs, Provincial level staff, District/Commune level staff, enterprises, etc.	Residents of Vi Ching Village, Provincial PC, Projector, white boards, etc.	Cars, Stationary, PC, Projector, white boards, etc.	Lecturer's cost, Traveling allowance cost
	4.2.4 Prepare the implementation of the extension seminar (selection of lecturer, request to lecturer to prepare textbook, arrangement of lecture place, invitation of the participants, etc.).	Progress  	Plan 						Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	FPMB, Japanese short term experts, Local staff of the Project Team	Residents of Vi Ching Village, Provincial PC, Projector, white boards, etc.	Cars, Stationary, PC, Projector, white boards, etc.	Lecturer's cost, Traveling allowance cost
	4.2.5 Conduct the extension seminar on community forest management.	Progress  	Plan 						Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	FPMB, CFs, Provincial level staff, District/Commune level staff, enterprises, etc.	Residents of Vi Ching Village, Provincial PC, Projector, white boards, etc.	Cars, Stationary, PC, Projector, white boards, etc.	Lecturer's cost, Traveling allowance cost
4.3 Monitor and evaluate the results of training	4.3.1 Carry out the monitoring & evaluation	Plan 							Pl: Ms. Phi DL: CL: VL: Pro: Mr. Kato Or:	Japanese short term experts, Local staff of the Project Team	Japanese short term experts, Local staff of the Project Team		
	Progress  												

Activities	Detailed Activities	Target (Expected Output)	Year 2008						Person in charge	management personnel	Participants	Materials/ equipment	Input budget
			Apr	May	Jun	Jul	Aug	Sep					
5.1 Hold technical seminars targeting residents of other villages in Kon Plong and Kon Ray districts, Kon Tum Province	5.1.1 Prepare the implementation of the technical seminar (selection of presenters, contents of presentations, preparation of handouts, arrangement of the venue, invitation to the participants, etc.).	Plan							Pl: Ms. Phi Dl: CL: Vl: Pro: Mr. Chiba Ot:	FPMB, Japanese short term experts, Local staff of the Project Team			
	5.1.2 Hold the technical seminar for the residents of the other villages within Kon Plong and Kon Ray districts.	Plan	■■■						Pl: Ms. Phi Dl: CL: Vl: Pro: Mr. Chiba Ot:	VDB members, Residents of the other villages of the Project Team, The CFs			Traveling allowance cost

11. Compost making	2 Households		
12. Home garden	14 Household	Village 2, 3, 5, 6, 8	13 households

**Impact of the project activities: how much the activities are extended to other villages as well as within the model village**

**As of end of July 2008**

<b>Dak Pne</b>				
Activity	Number of villagers who have imitated the activity within the model village	Name of the other villages that have imitated the activity from the model village	Number of villagers who have imitated the activity in each of the other villages	Remarks
Fish rearing	Total 7 villagers A Léch, A Xu, A Roh, A Diên, A Nghịệp, A Cúp, A Phiên			A Xu, A Roh and A Diên cooperate together to dig fish pond and to improve their daily meals (A Léch has his own fish pond). The participants who take part in fish raising activity of project gave them advises on how to raise fish but they still failed because this activity is totally new to them. A Nghịệp, A Cúp and A Phiên dug the pond and bought materials by themselves to disinfect the pond, they were given baby fish from Mr. A Onh and Mr. A Xanh.
Pig rearing	Total 8 villagers A Báo, A Xanh, A Kôih, A Dieo, Y Khóa, A Byáo, A Hyáo, A Quǎng			They imitated the participants taking part in pig raising activity of project to make pigsties for raising pigs (So far, they have just applied free-range raising in yards in cropping time). They have been supported with techniques on how to raise pigs but pig raising hasn't brought high effectiveness because they lack foodstuff for pigs. they were seeing the results of raising pig in sty, they were consulted and can buy F1 pig with soft price.
Home Garden	Total 10 villagers Dinh Đèo, A leo, A Rík, A Hyáo, Y Chem, Y Him, A Júp, A Xu, A Nha, A Ngô			So far, they have planted local vegetables and based on their own experience. Therefore, productivity is low. They now want to learn experience from households taking part in project's activity to gain better result in vegetable planting and to have vegetables in their daily meals. They have been supported with experience from those who take part in project's activity. However, result brought to them isn't very high
Boi Loi planting	Total 16 villagers A Blöi, A Khun, A Nhà, A Kha, A Hái			They are waiting for result
Compost making	Total 2 villagers A Nhà, A Hyáo			They make the stable by themselves and they collect dung to make compost.

**Impact of the project activities: how much the activities are extended to other villages as well as within the model village**

**DAK KOI**      **As of end of July 2008**

Activity	Number of villagers who have imitated the activity within the model village	Name of the other villages that have imitated the activity from the model village	Number of villagers who have imitated the activity in each of the other villages	Remarks
Fish raising	Total 10 villagers 1. A Rüi 2. A Lua 3. A Bruòng 4. A Ngheo 5. Y Huong 6. A Pea 7. A Vùng 8. A Thagh 9. Nguyen Thi Van 10. A Ro	Village No. 8 Village No. 9	8	They imitate to improve their daily life, the project model villagers instructed how to raise and share baby fish to them. This activity is brandy new, they don't have any experience, they do with the number of labor force and financial they have. Mrs Nguyễn Thị Vân and Mr. A Thành raise fish not only for eating but also for commercial purpose. Each of them invested around 2,500,000 to 3,000,000 VND to hire excavator for digging the pond, each pond's size is 300 - 500m <sup>2</sup> . they will buy baby fish by themselves. Later, they will find the market in district town for their products. These imitators do not have experience so they have the instructions from CF and the former raisers.
Pig rearing	Total 8 villagers 1. A Sam 2. A Bình 3. A Hoan 4. A Rô 5. A Dương 6. A Du 7. A Reo 8. A Bâng	Village No.2, Village No.4, Village No.7 Village No.9	5	They imitate they way of keeping pig in stable. They said that keeping pig in stable make the living environment cleaner and the home garden protected. They imitate and do by their own. This activity is new, so they face some difficulties in feeding, some of them study from model-villagers on how to feed Mr. Dương constructed his sty following the style of the project models, he studied experience from project participants.
Vegetable home garden	Total 7 villagers 1. A Ui 2. A Vùng No information of other villagers' name			They imitate to have green vegetable for daily meal. Model-villagers and CF support them with tech. some of them have experience so that they work well. They buy the seed by themselves and studied experience from other project participants.

## Questionnaire for checking possibility of continuation of activities.

Bản câu hỏi kiểm tra khả năng tiếp tục các hoạt động

Kon K Tau Village, Poe Commune

What do you expect how many households participating in the activity at the present will continue the activity after end of the project?

Theo bạn thì khoảng bao nhiêu hộ đang tham gia các hoạt động của dự án hiện tại sẽ tiếp tục các hoạt động này sau khi dự án

A: all or most of HHs will continue the activity A: Tất cả hoặc hầu hết hộ gia đình sẽ tiếp tục thực hiện các hoạt động

B: Many of HHs will continue the activity B: Nhiều hộ gia đình sẽ tiếp tục thực hiện các hoạt động

C: About half of HHs will continue the activity C: Khoảng một nửa số hộ gia đình sẽ tiếp tục thực hiện các hoạt động

D: A Few HHs will continue the activity D: Một vài hộ gia đình sẽ tiếp tục thực hiện các hoạt động

E: None of HHs will continue the activity E: Không có hộ nào tiếp tục thực hiện các hoạt động của dự án

**Pig raising** Nuôi heo

Female	Heo nái	A	B	C	D	E	Current number of participants	
				X			Số người tham gia hiện tại	1

In case that you marked C, D or E, what are main reasons why you think such households will withdraw from the activity?

Trong trường hợp bạn đánh C,D hoặc E, thì lý do chính gì làm bạn nghĩ những hộ đó sẽ rút khỏi các hoạt động?

Not enough foodstuff

Không đủ thức ăn cho heo

What are conditions for the households, who may withdraw, to continue the activity?

Điều kiện gì cho những hộ, có thể rút lui, có thể tiếp tục các hoạt động?

Ask PPHs to save a portion of cassava for wine-producing as foodstuff for pig. Also ask them to plant more cassava

Đề nghị dân bớt một phần khoai mì làm rượu để cho heo và trồng thêm khoai lang

Male pig	Heo đực	A	B	C	D	E	Current number of participants	
		X					Số người tham gia hiện tại	1

The reasons

Lý do

The condition

Điều kiện

Plant more foodstuff like: sweet potatoes, corn, cassava

Trồng thêm thức ăn cho heo : rau lang, mì, bắp

F1 Pig	Heo F1	A	B	C	D	E	Current number of participants

## Questionnaire for checking possibility of extension of activities.

Bản câu hỏi kiểm tra khả năng mở rộng các hoạt động.

Kon K Tau Village, Poe Commune

Do you think that the activity has been or will be extended to other villagers inside or outside model village?

Theo bạn thì các hoạt động nêu ra dưới đây đã được nhân rộng hoặc sẽ được nhân rộng đến các hộ khác trong hoặc ngoài thôn mô hình ở cấp độ nào?

A: the activity can be extended without any supports from VDB or CPC

A: Hoạt động có thể được nhân rộng mà không cần sự hỗ trợ từ VDB hoặc UBND xã

B: the activity can be extended with some supports from VDB or CPC

B: Hoạt động có thể được nhân rộng với một ít sự hỗ trợ từ VDB hoặc UBND xã

C: the activity cannot be extended with some supports from VDB or CPC

C: Hoạt động không thể nhân rộng ngay cả có sự hỗ trợ từ VDB hoặc UBND xã

**Pig raising      Nuôi heo**

<b>Female</b>	<b>Heo nái</b>	A      B      C	Current number of participants Số người tham gia hiện tại	1
		<input checked="" type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>		

Why did you select the mark? Lý do nào làm bạn đánh dấu chọn ở trên?

Why Vil. can get pig and construct the stable by themselves using local materials.

Tại sao Hoạt động nuôi heo nái người dân có thể tự làm chuồng bằng những vật liệu địa phương, giống heo thì các hộ có thể tự nhân rộng.

<b>Male pig</b>	<b>Heo đực</b>	A      B      C	Current number of participants Số người tham gia hiện tại	1
		<input type="checkbox"/> <input type="checkbox"/> X <input type="checkbox"/>		

Why It's difficult for Vil. to rear male pig because they do not have enough nutritious foodstuff needed.

Tại sao Hoạt động nuôi heo đực đối với người dân là rất khó vì người dân không có khả năng cung cấp thức ăn và chất bổ dưỡng cần thiết cho heo.

<b>F1 Pig</b>	<b>Heo F1</b>	A      B      C	Current number of participants Số người tham gia hiện tại	6
		<input type="checkbox"/> <input checked="" type="checkbox"/> X <input type="checkbox"/>		

Why Vil. do not have money to buy foodstuff for pig, therefore rearing pig become difficult

Tại sao Hiện nay thức ăn dành cho heo người dân không có khả năng tự mua chính vì vậy mà việc nuôi heo gấp rất nhiều khó khăn

**Cattle raising      Nuôi bò**

<b>Cattle</b>	A      B      C	Current number of participants Số người tham gia hiện tại	3
	<input type="checkbox"/> <input checked="" type="checkbox"/> X <input type="checkbox"/>		

Why Difficult for cattle to enjoy healthy life in cold weather. Need tech. support from the Gov.

Tại sao Bò khó phát triển trong điều kiện khí hậu lạnh. Cần hỗ trợ kỹ thuật từ Nhà Nước

<b>Buffalo</b>	<b>Nuôi Trâu</b>	A      B      C	Current number of participants Số người tham gia hiện tại	4
		<input checked="" type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>		

Why Buffalo can adapt itself to cold weather. Grass available

Tại sao Trâu thích hợp với khí hậu lạnh. Có nhiều.

<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C	Current number of participants Số người tham gia hiện tại	11
		<input checked="" type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>		

Why PPHs can share experience and give/sell fingerlings to others

Tại sao Các hộ đang tham gia có thể chia sẻ cá và kinh nghiệm cho các hộ khác

Duck	<b>Ngan</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 17
Why Tại sao	PPHs already obtain duck rearing experience and baby ducks. They can sell/give baby ducks to others vil.		
	Người dân đã có kinh nghiệm chăn nuôi, chăm sóc vịt hiện nay một số hộ đã có vịt con và các hộ tham gia dự án có thể cho hoặc bán vịt con cho các hộ xung quanh hoặc các thôn khác .		
Making compost	<b>Ủ phân</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 28
Why Tại sao	Vil. can use local materials to make compost. PPHs also willing to share experience to others		
	Người dân có thể sử dụng những vật liệu địa phương để ủ phân, các hộ tham gia dự án có thể chia sẻ kinh nghiệm cho các hộ xung quanh và các thôn khác.		
SLA	<b>Đất dốc</b>	A      B      C <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 5
Why Tại sao	Planting tech. will be transferred to others by PPHs, the Gov. support with seeds/seedlings		
	Dân hướng dẫn kỹ thuật cho nhau, nhà nước giúp giống		
Home Garden	<b>V. Rau</b>	A      B      C <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 16
Why Tại sao	Planting tech. will be transferred to others by PPHs, the Gov, support with seeds/seedlings		
	Dân hướng dẫn kỹ thuật cho nhau, nhà nước giúp giống		
Fruit tree	<b>CAQ</b>	A      B      C <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 21
Why Tại sao	Planting tech. will be transferred to others by PPHs, the Gov, support with seeds/seedlings		
	Dân hướng dẫn kỹ thuật cho nhau, nhà nước giúp giống		
Bamboo	<b>Tre</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại _____ 6
Why Tại sao	Planting tech. and seedlings can be shared easily		

## Questionnaire for checking possibility of continuation of activities.

Bản câu hỏi kiểm tra khả năng tiếp tục các hoạt động

Vichiring Village, Hieu Commune

What do you expect how many households participating in the activity at the present will continue the activity after end of the project?

Theo bạn thì khoảng bao nhiêu hộ đang tham gia các hoạt động của dự án hiện tại sẽ tiếp tục các hoạt động này sau khi dự án kết thúc?

- A: all or most of HHs will continue the activity    A: Tất cả hoặc hầu hết hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 B: Many of HHs will continue the activity    B: Nhiều hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 C: About half of HHs will continue the activity    C: Khoảng một nửa số hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 D: A Few HHs will continue the activity    D: Một vài hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 E: None of HHs will continue the activity    E: Không có hộ nào tiếp tục thực hiện các hoạt động của dự án

**Pig raising      Nuôi heo****Female      Heo nái**

	A	B	C	D	E	Current number of participants	
	X					Số người tham gia hiện tại	2

In case that you marked C, D or E, what are main reasons why you think such households will withdraw from the activity?

Trong trường hợp bạn đánh C,D hoặc E, thì lý do chính gì làm bạn nghĩ những hộ đó sẽ rút khỏi các hoạt động?

What are conditions for the households, who may withdraw, to continue the activity?

Điều kiện gì cho những hộ có thể rút lui tiếp tục tham gia các hoạt động?

Commit to implement properly regulations on animal bank system

Cam kết thực hiện quy định ngân hàng vật nuôi

**Male pig****Heo đực**

	A	B	C	D	E	Current number of participants	
	X					Số người tham gia hiện tại	1

The reasons

Improve the quality of the pig in the village, increase income

Lý do

Cải tạo đàn heo trong thôn, tăng thu nhập

The condition

Any one receive profit from the boar has to obey the regulation of the animal bank

Điều kiện

Người dân hưởng lợi từ heo đực phải tuân theo quy định ngân hàng vật nuôi

**F1 Pig****Heo F1**

	A	B	C	D	E	Current number of participants	
	X					Số người tham gia hiện tại	1

The reasons

Improve the quality of the pig in the village, increase income

Lý do

Cải tạo đàn heo trong thôn, tăng thu nhập

The condition

Any one receive profit for the pig has to obey the regulation of the animal bank

Điều kiện

Người dân hưởng lợi từ heo phái phải tuân theo quy định ngân hàng vật nuôi

**Cattle raising      Nuôi bò****Cattle****bò**

	A	B	C	D	E	Current number of participants	
	X					Số người tham gia hiện tại	1

The reasons

The PPhs directly get income

Lý do

Hộ tham gia được hưởng lợi trực tiếp

The condition

Commit to implement properly regulations on animal bank system

Điều kiện

Cam kết thực hiện quy định ngân hàng vật nuôi

	<b>Chỉ h祐 trợ chuồng</b>	A	B	C	D	E	Current number of participants
<b>Stable only</b>		X					Số người tham gia hiện tại _____ 1
The reasons Lý do							
The condition Điều kiện	Support from community and government is needed (iron sheet and cement for repaire) Có sự hỗ trợ từ cộng đồng, nhà nước( tấm lợp và xi măng để sửa chữa)						
<b>Buffalo</b>	<b>Nuôi Trâu</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 6
The reasons Lý do	Buffalo used for ploughing, get dung Có trâu để cày ruộng,có phân						
The condition Điều kiện	Commit to implement properly regulations on animal bank system Thực hiện tốt quy định ngân hàng vật nuôi						
<b>Fish raising</b>	<b>Nuôi cá</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 15
The reasons Lý do							
The condition Điều kiện	Share experience and support fingerlings among PPHs. Chia sẻ kinh nghiệm, hỗ trợ con giống giữa người dân.						
<b>Duck</b>	<b>Ngan</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 8
The reasons Lý do							
The condition Điều kiện	Commit to implement properly regulations on animal bank system Thực hiện tốt quy định ngân hàng vật nuôi						
<b>Making compost</b>	<b>Ủ phân</b>	A	B	C	D	E	Current number of participants
			X				Số người tham gia hiện tại _____ 12
The reasons Lý do	Environment is cleaner. Trees give higher yield Sạch môi trường. Năng suất cây trồng tăng lên						
The condition Điều kiện	Should be included in local economic development plan Gắn với phát triển kinh tế ở địa phương						
<b>SLA</b>	<b>Đất dốc</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 1
The reasons Lý do	Bringing profit to PPHs and this is an example for other to learn Lợi ích cho gia đình và để bà con học tập						
The condition Điều kiện	Follow the local economic development orientation. Theo định hướng phát triển kinh tế của địa phương						
<b>Home Garden</b>	<b>V. Rau</b>	A	B	C	D	E	Current number of participants
			X				Số người tham gia hiện tại _____ 16
The reasons Lý do							
The condition Điều kiện	old stable foundation might be used as a fertile area for veg. garden Nền chuồng trâu bò cũ có thể sử dụng để làm vườn rau						

<b>Fruit tree</b>	<b>CAQ</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 10
The reasons Lý do	Suitable with weather, increase income Phù hợp với khí hậu, tăng thu nhập						
The condition Điều kiện	With support and remind from VDB Sự giúp đỡ, nhắc nhở từ VDB						
<b>Bamboo</b>	<b>Tre</b>	A	B	C	D	E	Current number of participants
		X					Số người tham gia hiện tại _____ 2
The reasons Lý do	Bamboo sprout is a kind of food Lá măng làm thức ăn						
The condition Điều kiện	With monitor from villagers and VDB Có sự theo dõi từ người dân và VDB						

## Questionnaire for checking possibility of extension of activities.

Bản câu hỏi kiểm tra khả năng mở rộng các hoạt động.

Vichiring Village, Hieu Commune

Do you think that the activity has been or will be extended to other villagers inside or outside model village?

Theo bạn thì các hoạt động nêu ra dưới đây đã được nhân rộng hoặc sẽ được nhân rộng đến các hộ khác trong hoặc ngoài thôn mô hình ở cấp độ nào?

A: the activity can be extended without any supports from VDB or CPC

A: Hoạt động có thể được nhân rộng mà không cần sự hỗ trợ từ VDB hoặc UBND xã

B: the activity can be extended with some supports from VDB or CPC

B: Hoạt động có thể được nhân rộng với một ít sự hỗ trợ từ VDB hoặc UBND xã

C: the activity cannot be extended with some supports from VDB or CPC

C: Hoạt động không thể nhân rộng ngay cả có sự hỗ trợ từ VDB hoặc UBND xã

**Pig raising** Nuôi heo**Female** Heo nái

A      B      C

X		
---	--	--

Current number of participants

Số người tham gia hiện tại

2

Why did you select the mark? Lý do nào làm bạn đánh dấu chọn ở trên?

All food stuff and work force can be exploited. Create more income.

Tận dụng nguồn thức ăn, sức lao động, tăng thu nhập.

**Male pig**

Heo đực

A      B      C

	X	
--	---	--

Current number of participants

Số người tham gia hiện tại

1

Why

Tại sao

Vil. want to improve/change the quality of the herd but they cannot afford a boar. Need support from Dist.

Dân muốn cải tạo đàn heo của địa phương nhưng không có khả năng mua heo đực giống. Cần hỗ trợ từ huyện

**Cattle raising** Nuôi bò**Cattle**

bò

A      B      C

X		
---	--	--

Current number of participants

Số người tham gia hiện tại

1

Why

Tại sao

Commit to implement properly regulations on animal bank system

Cam kết thực hiện tốt ngân hàng vật nuôi

**Stable only**

Chỉ hỗ trợ chuồng

A      B      C

	X	
--	---	--

Current number of participants

Số người tham gia hiện tại

1

Why

Tại sao

Government support with iron sheets and cement

Nhà nước hỗ trợ tôn và xi măng

**Buffalo**

Nuôi Trâu

A      B      C

X		
---	--	--

Current number of participants

Số người tham gia hiện tại

6

Why

Tại sao

Commit to implement properly regulations on animal bank system

Cam kết thực hiện tốt quy định ngân hàng vật nuôi

**Fish raising**

Nuôi cá

A      B      C

X		
---	--	--

Current number of participants

Số người tham gia hiện tại

15

Why

Tại sao

Dig fishponds by themselves and share fingerlings

Tự đào ao và chia sẻ nguồn cá giống

**Duck**

Ngan

A      B      C

X		
---	--	--

Current number of participants

Số người tham gia hiện tại

8

Why

Tại sao

Share experience and baby ducks among villagers.

Chia sẻ kinh nghiệm và con giống săn có của cộng đồng

<b>Making compost</b>	<b>Ủ phân</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 12
Why	Should be included in local economic development plan		
Tại sao	Gắn với các kế hoạch phát triển kinh tế của địa phương		
<b>SLA</b>	<b>Đất đőc</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 1
Why	Follow the local economic development orientation.		
Tại sao	Theo định hướng phát triển kinh tế của địa phương		
<b>Home Garden</b>	<b>V. Rau</b>	A      B      C	Current number of participants
		<input checked="" type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại _____ 16
Why	old stable foundation might be used as a fertile area for veg. garden		
Tại sao	Nền chuồng trâu bò cũ có thể sử dụng để làm vườn rau		
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C	Current number of participants

Why	Seedlings and techniques from people's committee		
Tại sao	Cây giống và kỹ thuật từ UBND		
<b>Bamboo</b>	<b>Tre</b>	A      B      C	Current number of participants
		<input type="checkbox"/> <input type="checkbox"/> X	Số người tham gia hiện tại _____ 2
Why	In need of having consultant from scientists about characteristic of different bamboo species		
Tại sao	Có sự tham gia của các nhà khoa học cây trồng về đặc tính sinh học của các loài tre và điều kiện đất đai		

## Questionnaire for checking possibility of continuation of activities.

Bản câu hỏi kiểm tra khả năng tiếp tục các hoạt động

Nuoc Not Village, Ngoc Tem Commune

What do you expect how many households participating in the activity at the present will continue the activity after end of the project?

Theo bạn thì khoảng bao nhiêu hộ đang tham gia các hoạt động của dự án hiện tại sẽ tiếp tục các hoạt động này sau khi dự án kết thúc?

- A: all or most of HHs will continue the activity    A: Tất cả hoặc hầu hết hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 B: Many of HHs will continue the activity    B: Nhiều hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 C: About half of HHs will continue the activity    C: Khoảng một nửa số hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 D: A Few HHs will continue the activity    D: Một vài hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 E: None of HHs will continue the activity    E: Không có hộ nào tiếp tục thực hiện các hoạt động của dự án

**Pig raising    Nuôi heo**

**Female    Heo nái**      A    B    C    D    E    Current number of participants

	X			
--	---	--	--	--

Số người tham gia hiện tại

7

In case that you marked C, D or E, what are main reasons why you think such households will withdraw from the activity?

Trong trường hợp bạn đánh C,D hoặc E, thì lý do chính gì làm bạn nghĩ những hộ đó sẽ rút khỏi các hoạt động?

What are conditions for the households, who may withdraw, to continue the activity?

Điều kiện gì cho những hộ, có thể rút lui, có thể tiếp tục các hoạt động?

More sweet potatoes/cassava/corn should be planted. Land for those kinds of foodstuff available.

Trồng thêm nhiều loại thức ăn (mì bắp, rau lang..). Đất có đất

**Male pig    Heo đực**      A    B    C    D    E    Current number of participants

X				
---	--	--	--	--

Số người tham gia hiện tại

1

The reasons  
Lý do

The condition  
Điều kiện

Increase payment to Male rearer after mating. Make public that hybrid piglet grow faster than the local one.

Tăng thêm tiền cho mỗi lần phối giống. Nói cho dân biết heo lai con F1 lớn nhanh hơn heo địa phương.

**F1 Pig    Heo F1**      A    B    C    D    E    Current number of participants

	X			
--	---	--	--	--

Số người tham gia hiện tại

6

The reasons  
Lý do

The condition  
Điều kiện

Make public that F1 grow faster, more income. Plant more cassava, corn, sweetpotatoes.

Nói cho hộ tham gia biết heo F1 lớn nhanh, bán được nhiều tiền. Trồng thêm mì, bắp, rau lang

**Cattle raising    Nuôi bò**

**Cattle    bò**      A    B    C    D    E    Current number of participants

	X			
--	---	--	--	--

Số người tham gia hiện tại

3

The reasons  
Lý do

The condition  
Điều kiện

Make public that Hybrid cattle grow faster. More income

Nói cho các hộ tham gia biết Bò lai nuôi nhanh lớn, bán được nhiều tiền.

<b>Goat raising</b>	<b>Nuôi dê</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	4
The reasons Lý do				
The condition Điều kiện	Make public that Goat easy to rear, grass available, goat meat nutritious. Market available. Nói cho các hộ tham gia biết lợi ích của việc nuôi Dê: dễ nuôi, có săn cỏ, dễ bán, thịt dê bổ			
<b>Rabbit raising</b>	<b>Nuôi Thỏ</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	5
The reasons Lý do				
The condition Điều kiện	Guiding PPhs on treatment of diseases, preventing from dying young hướng dẫn dân cách trị bệnh, phòng chống chết non			
<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	28
The reasons Lý do				
The condition Điều kiện	Reserve foodstuff, consolidate fish-pond bank Dự trữ thực phẩm, gia cố bờ ao			
<b>Duck</b>	<b>Ngan</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	42
The reasons Lý do	Many baby ducks died . PPHs lost patience Vịt con chết nhiều. Họ nuôi nản lòng.			
The condition Điều kiện	Make better pen. Need to know how to prevent duck from dying young Làm chuồng trại tốt hơn. Làm thế nào để phòng chống chết non			
<b>Making compost</b>	<b>Ủ phân</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	9
The reasons Lý do	Land is so fertile. No need compost Hiện giờ đất tốt không cần phân.			
The condition Điều kiện	Explain to HHs that in future land will get poorer. Compost should be reserved from now. Giảng cho Hộ tham gia biết vài năm nữa đất sẽ xấu. Cần dự trữ phân từ bây giờ			
<b>SLA</b>	<b>Đất đúc</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	2
The reasons Lý do	Not fully trust in the model (planting along contour line)/ benefit come out from Teprosia Chưa thật sự tin tưởng vào lợi ích của việc trồng cây theo đường đồng mức, lợi ích của Cốt khí			
The condition Điều kiện	Explain to HHs how water erode surface soil. Organize study tour. Giảng cho Hộ biết nước xói mòn đất như thế nào. Tổ chức tham quan.			
<b>Home Garden</b>	<b>V. Rau</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	16
The reasons Lý do	Lack of seeds/seedlings Thiếu giống, thiếu thuốc trừ sâu			
The condition Điều kiện	saving money after selling veg. The money saved can be used for pesticide, seeds/seedlings để dành tiền sau mỗi lần bán rau để mua giống và thuốc			

<b>Acacia</b>	<b>T.Keo</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	45
The reasons Lý do				
The condition Điều kiện	Explain to vil. that they can get profit from selling Acacia. Also Acacia can help reduce erosion, increase canopy.			
	Giải thích cho dân về lợi ích, bán có tiền. Ngoài ra trồng Keo còn có tác dụng chống xói mòn, tăng độ che phủ.			
<b>Betel nut</b>	<b>Tcau</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	42
The reasons Lý do	Beetle nut died, damaged by cattle			
	Cau chết vì bò trâu phá, hộ nản lòng			
The condition Điều kiện	The village should have regulations on cattle rearing. Cattle are not permitted to travel freely			
	Thôn cần có quy định về việc chăn thả			
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	14
The reasons Lý do				
The condition Điều kiện	Need clearly explain why seedlings die and how to prevent from that. Also let the vil. know fruit tree is nutritious			
	Cần giải thích rõ tại sao cây chết và biện pháp phòng ngừa. Đồng thời cho dân biết trái cây là nguồn dinh dưỡng tốt			
<b>Bamboo</b>	<b>Tre</b>	A      B      C      D      E	Current number of participants	
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	9
The reasons Lý do	Many seedlings died. PPHs lost patience			
	Tre chết nhiều Hộ nản lòng.			
The condition Điều kiện	PPHs really in need to know why bamboo seedlings died and how to prevent from dying			
	Hộ tham gia phải biết lý do tại sao chết và cách phòng ngừa			

## Questionnaire for checking possibility of extension of activities.

Bản câu hỏi kiểm tra khả năng mở rộng các hoạt động.

Nuoc Not Village, Ngoc Tem Commune

Do you think that the activity has been or will be extended to other villagers inside or outside model village?

Theo bạn thì các hoạt động nêu ra dưới đây đã được nhân rộng hoặc sẽ được nhân rộng đến các hộ khác trong hoặc ngoài thôn mô hình ở cấp độ nào?

A: the activity can be extended without any supports from VDB or CPC

A: Hoạt động có thể được nhân rộng mà không cần sự hỗ trợ từ VDB hoặc UBND xã

B: the activity can be extended with some supports from VDB or CPC

B: Hoạt động có thể được nhân rộng với một ít sự hỗ trợ từ VDB hoặc UBND xã

C: the activity cannot be extended with some supports from VDB or CPC

C: Hoạt động không thể nhân rộng ngay cả có sự hỗ trợ từ VDB hoặc UBND xã

**Pig raising      Nuôi heo**

<b>Female</b>	<b>Heo nái</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 7

Why did you select the mark? Lý do nào làm bạn đánh dấu chọn ở trên?

Need dissemination from CPC at monthly meeting. Other HHs need to see the model.

Cần UBND dân xã cần tuyên truyền trong các cuộc họp hàng tháng. Các hộ ở thôn khác cần xem mô hình

<b>Male pig</b>	<b>Heo đực</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 1

Why      Male pig available. Mating can be done easily

Tại sao      Heo tự phối. Có đực

<b>F1 Pig</b>	<b>Heo F1</b>	A      B      C	Current number of participants
		<input type="checkbox"/> <input type="checkbox"/> X	Số người tham gia hiện tại _____ 6

Why      Many piglets may die. Lack of foodstuff. Vill. may lose patience

Tại sao      Nhiều heo con sẽ chết. Không đủ thức ăn. Dân nản lòng.

**Cattle raising      Nuôi bò**

<b>Cattle</b>	<b>bò</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 3

Why      Easy to rear. Foodstuff available. Get plenty of money when cattle sold

Tại sao      Dễ nuôi. Có sẵn thức ăn. Bán được nhiều tiền.

<b>Goat raising</b>	<b>Nuôi dê</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 4

Why      Foodstuff available. Get plenty of money when goat sold

Tại sao      Dễ nuôi. Có sẵn thức ăn. Bán được nhiều tiền.

<b>Rabbit raising</b>	<b>Nuôi Thỏ</b>	A      B      C	Current number of participants
		<input type="checkbox"/> <input type="checkbox"/> X	Số người tham gia hiện tại _____ 5

Why      Difficult to rear. Many died of unknown causes. Lost patience.

Tại sao      Khó nuôi. Chết nhiều. Không biết tại sao chết. Nản lòng.

<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/>	Số người tham gia hiện tại _____ 28

Why      Water available. Easy to rear. Immediate profit.

Tại sao      Có nguồn nước. Dễ nuôi. Lợi ích trước mắt.

<b>Duck</b>	<b>Ngan</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tạ      42
Why	Foodstuff abundant. Easy to rear.		
Tại sao	Thức ăn phong phú. Dễ nuôi.		
<b>Making compost</b>	<b>Ủ phân</b>	A      B      C <input type="checkbox"/> <input type="checkbox"/> X	Current number of participants Số người tham gia hiện tạ      9
Why	Vil. not used to using compost. Land is fertile, no need compost		
Tại sao	Dân không quen dùng phân ủ. Đất tốt. Không cần phân		
<b>SLA</b>	<b>Đất dốc</b>	A      B      C <input type="checkbox"/> <input type="checkbox"/> X	Current number of participants Số người tham gia hiện tạ      2
Why	Land is fertile, no need to follow SLA model		
Tại sao	đất tốt, không cần làm theo mô hình SLA		
<b>Home Garden</b>	<b>V. Rau</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tạ      32
Why	easy to do, get income soon		
Tại sao	Dễ làm, sớm có thu nhập		
<b>Acacia</b>	<b>T.Keo</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tạ      45
Why	Villager know how to germinate acacia		
Tại sao	Người dân đã biết ươm keo		
<b>Betel nut</b>	<b>Tcau</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tạ      42
Why	Local knowledge is used to germinate beetle nut		
Tại sao	Người dân tự ươm theo cách bản địa		
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tạ      14
Why	Villagers do like fruit trees		
Tại sao	Rất thích trồng		
<b>Bamboo</b>	<b>Tre</b>	A      B      C <input type="checkbox"/> <input type="checkbox"/> X	Current number of participants Số người tham gia hiện tạ      9
Why	Vill. do not like planting bamboo because bamboo difficult to survive		
Tại sao	Không thích trồng, khó sống.		

## Questionnaire for checking possibility of continuation of activities.

Bản câu hỏi kiểm tra khả năng tiếp tục các hoạt động

Kon Tuc Village, Dak Pne Commune

What do you expect how many households participating in the activity at the present will continue the activity after end of the project?

Theo bạn thì khoảng bao nhiêu hộ đang tham gia các hoạt động của dự án hiện tại sẽ tiếp tục các hoạt động này sau khi dự án kết thúc?

A: all or most of HHs will continue the activity A: Tất cả hoặc hầu hết hộ gia đình sẽ tiếp tục thực hiện các hoạt động

B: Many of HHs will continue the activity B: Nhiều hộ gia đình sẽ tiếp tục thực hiện các hoạt động

C: About half of HHs will continue the activity C: Khoảng một nửa số hộ gia đình sẽ tiếp tục thực hiện các hoạt động

D: A Few HHs will continue the activity D: Một vài hộ gia đình sẽ tiếp tục thực hiện các hoạt động

E: None of HHs will continue the activity E: Không có hộ nào tiếp tục thực hiện các hoạt động của dự án

**Pig raising Nuôi heo****Female Heo nái**

A	B	C	D	E	Current number of participants
---	---	---	---	---	--------------------------------

	X				Số người tham gia hiện tại
--	---	--	--	--	----------------------------

5

In case that you marked C, D or E, what are main reasons why you think such households will withdraw from the activity?

Trong trường hợp bạn đánh C,D hoặc E, thì lý do chính gì làm bạn nghĩ những hộ đó sẽ rút khỏi các hoạt động?

---

What are conditions for the households, who may withdraw, to continue the activity?

Điều kiện gì cho những hộ, có thể rút lui, có thể tiếp tục các hoạt động?

Workforce is needed

---

Cần có thêm lao động

---

**Male pig****Heo đực**

A	B	C	D	E	Current number of participants
---	---	---	---	---	--------------------------------

X					Số người tham gia hiện tại
---	--	--	--	--	----------------------------

1

The reasons Lý do 3 more households want to keep F1 boar because many sow-pig will be available in the village

---

The condition

Foodstuff should be available.

Điều kiện

Các hộ này phải có đủ thức ăn cho heo.

**F1 Pig****Heo F1**

A	B	C	D	E	Current number of participants
---	---	---	---	---	--------------------------------

X					Số người tham gia hiện tại
---	--	--	--	--	----------------------------

1

The reasons Lý do

The condition

Plant more cassava/corn or save those kinds of foodstuff. Land available

Điều kiện

Phải để dành/ trồng thêm thức ăn cho heo (mì, bắp...). Có đất

**Cattle raising Nuôi bò****Cattle****bò**

A	B	C	D	E	Current number of participants
---	---	---	---	---	--------------------------------

X					Số người tham gia hiện tại
---	--	--	--	--	----------------------------

3

The reasons Lý do

The condition

More grass should be planted. Workforce also needed

Điều kiện

Cần trồng thêm cỏ. Cần lao động

<b>Stable only</b>	<b>Chỉ hổ trọ chuồng</b>	A    B    C    D    E	Current number of participants	
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	15
The reasons Lý do				
The condition Điều kiện	Explain to vil. that Compost is important for farming, therefore cattle-stable should be used for dung collection			
	Giải thích cho dân biết Phân ủ cần thiết cho nông nghiệp do đó cần sử dụng chuồng để có thể thu gom phân			
<b>Goat raising</b>	<b>Nuôi dê</b>	A    B    C    D    E	Current number of participants	
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	2
The reasons Lý do	Goat died, villagers said that goat death is an ill omen to them			
	Dê chết, người dân cho việc dê chết là không tốt đối với họ			
The condition Điều kiện	Training is needed. Goat need properly taking care. More workforce and more grass needed			
	Cần tập huấn để thay đổi nhận thức, cần chăm sóc dê tốt hơn, cần lao động, cần thêm cỏ			
<b>Rabbit raising</b>	<b>Nuôi Thỏ</b>	A    B    C    D    E	Current number of participants	
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	1
The reasons Lý do	Many rabbits died, rabbits are infertile			
	Thỏ chết nhiều, thỏ không đẻ			
The condition Điều kiện	Change rabbit species, continue to train to increase acknowledge on raising rabbit			
	Thay đổi thỏ giống, tiếp tục tập huấn để nâng cao kiến thức chăn nuôi			
<b>Fish raising</b>	<b>Nuôi cá</b>	A    B    C    D    E	Current number of participants	
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	6
The reasons Lý do				
The condition Điều kiện	Fish-pond bank need to consolidate. More food stuff to be reserved			
	Cần gia cố bờ ao, dự trữ thực ăn			
<b>Duck</b>	<b>Ngan</b>	A    B    C    D    E	Current number of participants	
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	18
The reasons Lý do				
The condition Điều kiện	More foodstuff to be reserved, especially in dry season			
	Cần dự trữ thực phẩm nhất là vào mùa khô			
<b>Making compost</b>	<b>Ủ phân</b>	A    B    C    D    E	Current number of participants	
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	15
The reasons Lý do				
The condition Điều kiện	cattle should be kept in the best conditions preventing from young death. Dung should be collected			
	Phải chăm sóc bò thật tốt để khỏi chết sớm, gom phân			
<b>SLA</b>	<b>Đất đroc</b>	A    B    C    D    E	Current number of participants	
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	3
The reasons Lý do				
The condition Điều kiện	Workforce, fertilizer/compost and farming tools are needed			
	Cần có lao động, phân bón và dụng cụ lao động			

<b>Home Garden V. Rau</b>	A      B      C      D      E	Current number of participants	
	<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại	10
The reasons Lý do	Vegetables for daily consumption/for selling available Có rau ăn, có hộ làm rau bán		
The condition Điều kiện	Workforce, fertilizer/compost and farming tools are needed Cần có lao động, phân bón và dụng cụ lao động		
<b>Boi Loi</b>	<b>Bòi lòi</b>	A      B      C      D      E	Current number of participants
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại 34
The reasons Lý do	Many villagers in the village gain more income from Boi Loi Trong thôn có nhiều hộ có thu nhập từ bòi lòi		
The condition Điều kiện	Buyer should be available. Reasonable price Cần có người mua, giá hợp lý		
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C      D      E	Current number of participants
		<input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại 18
The reasons Lý do	Mango give fruit, orange is blooming Xoài đã có quả, cam có hoa		
The condition Điều kiện	Pesticide is needed Có thuốc trừ sâu đục thân.		

## Questionnaire for checking possibility of extension of activities.

Bản câu hỏi kiểm tra khả năng mở rộng các hoạt động.

Kon Tuc Village, Dak Pne Commune

Do you think that the activity has been or will be extended to other villagers inside or outside model village?

Theo bạn thì các hoạt động nêu ra dưới đây đã được nhân rộng hoặc sẽ được nhân rộng đến các hộ khác trong hoặc ngoài thôn mô hình ở cấp độ nào?

A: the activity can be extended without any supports from VDB or CPC

A: Hoạt động có thể được nhân rộng mà không cần sự hỗ trợ từ VDB hoặc UBND xã

B: the activity can be extended with some supports from VDB or CPC

B: Hoạt động có thể được nhân rộng với một ít sự hỗ trợ từ VDB hoặc UBND xã

C: the activity cannot be extended with some supports from VDB or CPC

C: Hoạt động không thể nhân rộng ngay cả có sự hỗ trợ từ VDB hoặc UBND xã

**Pig raising Nuôi heo****Female Heo nái**

A	B	C
<input type="checkbox"/>	X	<input type="checkbox"/>

Current number of participants

Số người tham gia hiện tại

5

Why did you select the mark? Lý do nào làm bạn đánh dấu chọn ở trên?

Villagers unable to get information on the price. Piglet are sold at cheaper price than expected

Dân không biết giá bán. Bị tư thương mua giá rẻ so với mong đợi

**Male pig Heo đực**

A	B	C
<input type="checkbox"/>	X	<input type="checkbox"/>

Current number of participants

Số người tham gia hiện tại

1

Why Not many Hhs rear sow pig. No income from mating

Tại sao Chưa có nhiều Hộ nuôi heo nái. Không kiếm được tiền từ phôi giống.

**F1 Pig Heo F1**

A	B	C
<input type="checkbox"/>	X	<input type="checkbox"/>

Current number of participants

Số người tham gia hiện tại

1

Why Vil. have not realized the profit of rearing pig in pig-sty

Tại sao Hộ nuôi chưa thấy được thu nhập từ việc nuôi heo thịt nhốt chuồng

**Cattle raising Nuôi bò****Cattle bò**

A	B	C
<input type="checkbox"/>	X	<input type="checkbox"/>

Current number of participants

Số người tham gia hiện tại

3

Why cattle should be kept from dying young. VDB should remind PPhs to implement regulation stipulated

Tại sao Bò phải được chăm sóc tốt, không để chết non. VDB cần nhắc nhở việc thực thi quy định.

**Chỉ h祐 trợ****Stable only chuồng**

A	B	C
X	<input type="checkbox"/>	<input type="checkbox"/>

Current number of participants

Số người tham gia hiện tại

15

Why Vil. can use local materials for stable construction

Tại sao Bà con có thể dùng vật liệu địa phương để làm chuồng

**Goat raising Nuôi dê**

A	B	C
<input type="checkbox"/>	<input type="checkbox"/>	X

Current number of participants

Số người tham gia hiện tại

2

Why Vil. do not follow instruction on rearing. Goat die is an ill omen to vil.

Tại sao Hộ tham gia không tuân thủ đúng những hướng dẫn về chăn nuôi. Dê chết là điềm không tốt đối với dân

**Rabbit raising Nuôi Thỏ**

A	B	C
<input type="checkbox"/>	<input type="checkbox"/>	X

Current number of participants

Số người tham gia hiện tại

1

Why Big portion of rabbit died make other HHs afraid of rearing rabbit

Tại sao Thỏ của những hộ trong thôn chết nhiều nên họ không muốn nuôi

<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Vil. obtain fish rearing tech. fingerling can be given by PPHs			6
Tại sao	Họ đã biết cách nuôi cá, có cá con để hỗ trợ cho các ao khác			
<b>Duck</b>	<b>Ngan</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Foodstuff available. Income visible (1 HH got 96,000 VND from selling duck)			18
Tại sao	Có thực phẩm, có thêm thu nhập (có hộ đã bán được 960.000 đ)			
<b>Making compost</b>	<b>Ủ phân</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Dung is available. Compost already been used effectively			15
Tại sao	Có gia súc. Các hộ đã dùng phân bón cho cây trồng			
<b>SLA</b>	<b>Đất dốc</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	SLA already given fruit. Vil. know how to use A frame			3
Tại sao	Đã có thu hoạch và sẽ có giống, họ biết dùng thước chữ A			
<b>Home Garden</b>	<b>V. Rau</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Vil. can make home garden by themselves. Also vil. seen the production of home garden			10
Tại sao	Bà con hộ đã tự làm vườn, trồng và đã có thu hoạch			
<b>Boi Loi</b>	<b>Bời lòi</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Vil. can make Nursery by themselves			34
Tại sao	Bà con đã biết ươm cây			
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C <input type="checkbox"/> <input checked="" type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	Vil. need to know where they could find out seedling-seller			18
Tại sao	Cần biết nơi mua giống cây			

## Questionnaire for checking possibility of continuation of activities.

Bản câu hỏi kiểm tra khả năng tiếp tục các hoạt động

Tu Ro Bang Village, Dak Koi Commune

What do you expect how many households participating in the activity at the present will continue the activity after end of the project?

Theo bạn thì khoảng bao nhiêu hộ đang tham gia các hoạt động của dự án hiện tại sẽ tiếp tục các hoạt động này sau khi dự án kết thúc?

- A: all or most of HHs will continue the activity    A: Tất cả hoặc hầu hết hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 B: Many of HHs will continue the activity    B: Nhiều hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 C: About half of HHs will continue the activity    C: Khoảng một nửa số hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 D: A Few HHs will continue the activity    D: Một vài hộ gia đình sẽ tiếp tục thực hiện các hoạt động  
 E: None of HHs will continue the activity    E: Không có hộ nào tiếp tục thực hiện các hoạt động của dự án

**Pig raising    Nuôi heo**

**Female    Heo nái**      A    B    C    D    E    Current number of participants

		X		
--	--	---	--	--

Số người tham gia hiện tại

7

In case that you marked C, D or E, what are main reasons why you think such households will withdraw from the activity?

Trong trường hợp bạn đánh C,D hoặc E, thì lý do chính gì làm bạn nghĩ những hộ đó sẽ rút khỏi các hoạt động?

lack of food for pig, lack of piglet (to start rearing). Need husking machine

Thiếu thức ăn cho heo, không có con giống, công cụ chế biến

What are conditions for the households, who may withdraw, to continue the activity?

Điều kiện gì cho những hộ, có thể rút lui, có thể tiếp tục các hoạt động?

Increase area of corn, sweet potatoes....provide vil. with rice husking machine

Mở rộng diện tích trồng trọt, bắp, rau lang...cho ho máy xay xác...

**Male pig    Heo đực**      A    B    C    D    E    Current number of participants

X				
---	--	--	--	--

Số người tham gia hiện tại

1

The reasons

Lý do

The condition    Plant more corn, sweet potatoes. Boar rearer should get more profit

Điều kiện    Trồng thêm bắp, rau lang. Chia lợi nhuận cao hơn khi nuôi heo đực

**F1 Pig    Heo F1**      A    B    C    D    E    Current number of participants

			X	
--	--	--	---	--

Số người tham gia hiện tại

3

The reasons

Lý do

lack of food for pig

Thiếu thức ăn cho heo

The condition    Enlarge the planting area, buy food processing tools (grinder,...)

Điều kiện    Mở rộng diện tích trồng trọt, công cụ chế biến thức ăn (máy xay xác,...)

**Cattle raising    Nuôi bò**

**Cattle    bò**      A    B    C    D    E    Current number of participants

X				
---	--	--	--	--

Số người tham gia hiện tại

4

The reasons

Lý do

The condition    PPhs need to be supported with ox (hybrid) for mating.

Điều kiện    Người dân cần được hỗ trợ bò giống (lai)

<b>Stable only</b>	<b>Chỉ hỗ trợ chuồng</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do			
The condition Điều kiện	PPhs to be provided / afford cattle as a requirement for using stable in case that cattle die. hỗ trợ giống hoặc có tiền mua giống để chuồng được sử dụng		
<b>Goat raising</b>	<b>Nuôi dê</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do			
The condition Điều kiện	Workforce needed Cần lao động		
<b>Rabbit raising</b>	<b>Nuôi Thỏ</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do			
The condition Điều kiện	Workforce needed Cần lao động		
<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do			
The condition Điều kiện	Need good road and Buyer Cần đường giao thông thuận lợi và có đầu ra		
<b>Duck</b>	<b>Ngan</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do	The number of ducks is not many so villagers do not care much on tending. The free raising method is applied, ducks are not well tended, not many baby duck deliver per farrow, less income from duck Số lượng vịt ít nên người dân không quan tâm chăm sóc. Phương pháp nuôi thả rông nên vịt sinh sản kém dẫn đến không đem lại thu nhập		
The condition Điều kiện	Duck should be kept in bigger scale which attract more care from vil. Nên nuôi quy mô hơn để người dân tập trung chăm sóc		
<b>Making compost</b>	<b>Ủ phân</b>	A      B      C      D      E	Current number of participants
		<input type="checkbox"/> X <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Số người tham gia hiện tại
The reasons Lý do			
The condition Điều kiện	This activity should become one of their habit, so Vil will take part in this activity voluntarily. Khi ủ và sử dụng phân thành thói quen, người dân sẽ tự tham gia		

<b>SLA</b>	<b>Đất dốc</b>	A      B      C      D      E	Current number of participants	
		<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	1
The reasons Lý do				
The condition Điều kiện				
<b>Home Garden V. Rau</b>	A      B      C      D      E	Current number of participants		
	<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	11	
The reasons Lý do				
The condition Điều kiện	Workforce needed. PPhs have to arrange time for the work ( most of the time work in field) Cần có lao động và Hộ tham gia phải biết sắp xếp lịch công việc			
<b>Boi Loi</b>	<b>Bòi lòi</b>	A      B      C      D      E	Current number of participants	
	<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	18	
The reasons Lý do				
The condition Điều kiện	In case Boi Loi die of some reasons, support on seedlings/fertilizer from the Gov. is needed. Trong trường hợp bòi lòi chết và hộ tham gia muốn tiếp tục trồng thì phải có sự hỗ trợ về giống/phân bón			
<b>Fruit tree</b>	<b>CAQ</b>	A      B      C      D      E	Current number of participants	
	<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	18	
The reasons Lý do				
The condition Điều kiện	In case seedlings die of some reasons, support on seedlings/fertilizer from the Gov. is needed. Trong trường hợp cây ăn quả chết và hộ tham gia muốn tiếp tục trồng thì phải có sự hỗ trợ về giống/phân bón từ nhà nước			
<b>Bamboo</b>	<b>Tre</b>	A      B      C      D      E	Current number of participants	
	<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	5	
The reasons Lý do				
The condition Điều kiện	After 5 more years, the surviving bamboo will give more seedlings for expansion Sau 5 năm nữa số tre còn lại sẽ phát triển, dân tự nhân rộng			
<b>Cinnamon</b>	<b>Quế</b>	A      B      C      D      E	Current number of participants	
	<input checked="" type="checkbox"/> X	Số người tham gia hiện tại	1	
The reasons Lý do				
The condition Điều kiện	This act. can be continued if PPhs found out that the weather is suitable/ provided with seedlings Nếu khí hậu thuận lợi và có nguồn giống			

## Questionnaire for checking possibility of extension of activities.

Bản câu hỏi kiểm tra khả năng mở rộng các hoạt động.

Tu Ro Bang Village, Dak Koi Commune

Do you think that the activity has been or will be extended to other villagers inside or outside model village?

Theo bạn thì các hoạt động nêu ra dưới đây đã được nhân rộng hoặc sẽ được nhân rộng đến các hộ khác trong hoặc ngoài thôn mô hình ở cấp độ nào?

A: the activity can be extended without any supports from VDB or CPC

A: Hoạt động có thể được nhân rộng mà không cần sự hỗ trợ từ VDB hoặc UBND xã

B: the activity can be extended with some supports from VDB or CPC

B: Hoạt động có thể được nhân rộng với một ít sự hỗ trợ từ VDB hoặc UBND xã

C: the activity cannot be extended with some supports from VDB or CPC

C: Hoạt động không thể nhân rộng ngay cả có sự hỗ trợ từ VDB hoặc UBND xã

**Pig raising      Nuôi heo**

<b>Female</b>	<b>Heo nái</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	4

Why did you select the mark? Lý do nào làm bạn đánh dấu chọn ở trên?

Villagers like raising sow-pig, but they need support with piglet and foodstuff.

Người dân rất thích nuôi heo nái nhưng họ cần sự hỗ trợ về giống, thức ăn.

<b>Male pig</b>	<b>Heo đực</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	1

Why  
Tại sao Boar is expensive. One HH cannot afford it. If several Hhs together keep the boar, VDB should be asked to guide the HHs on obligation and rights.

Heo đực giống mắc tiền, một hộ không mua được. Nhiều hộ góp lại thì cần có VDB để giải quyết những vấn đề về quyền và nghĩa vụ liên quan

<b>F1 Pig</b>	<b>Heo F1</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	3

Why  
Tại sao Need technical assistance  
Cần được sự hỗ trợ về kỹ thuật

<b>Cattle raising</b>	<b>Nuôi bò</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	4

Why  
Tại sao Because PPhs have to implement rotation fund and disseminate infor. to other villagers  
Vì phải thực hiện quỹ quay vòng và quảng bá mô hình cho những thôn khác

<b>Stable only</b>	<b>Chỉ hỗ trợ chuồng</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	11

Why  
Tại sao Local material is available.  
Vật liệu làm chuồng có sẵn tại địa phương

<b>Goat raising</b>	<b>Nuôi dê</b>	A      B      C	Current number of participants Số người tham gia hiện tại
		<input type="checkbox"/> X <input type="checkbox"/>	2

Why  
Tại sao VDB has to manage rotation fund and disseminate infor. to other villagers  
VDB phải quản lý quỹ quay vòng và quảng bá mô hình cho những thôn khác

<b>Rabbit raising</b>	<b>Nuôi Thỏ</b>	A      B      C <input type="checkbox"/> X <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	
Why	VDB has to manage rotation fund and disseminate info. to other villagers			1
Tại sao	VDB phải quản lý quỹ quay vòng và quảng bá mô hình cho những thôn khác			
<b>Fish raising</b>	<b>Nuôi cá</b>	A      B      C <input checked="" type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Current number of participants Số người tham gia hiện tại	11
Why	this models expanded automatically			
Tại sao	Vì mô hình này đã tự nhân rộng			
<b>Duck</b>	<b>Ngan</b>	A      B      C <input type="checkbox"/> <input type="checkbox"/> X	Current number of participants Số người tham gia hiện tại	18
Why	Duck need bigger area and money for foodstuff if they are kept in big population			
Tại sao	Vì nuôi vịt phải có diện tích chăn thả nếu muốn chăn nuôi nhiều và cần vốn để đầu tư thức ăn
